NEWS RELEASE TSX-V: QNC

Quantum Numbers Corp. announces it has been granted a notice of allowance from United States Patent and Trademark Office for his second patent.

Montreal, Canada. August 29, 2018 - Quantum Numbers Corp. (the "Corporation" or "QNC") (TSX VENTURE:QNC) is pleased to announce it has recently received a notice of allowance from the United States Patent and Trademark Office ("USPTO") concerning the patent application entitled "Method and System for Generating a Random Bit Sample" ("the new patent") filed earlier this year. As announced at the beginning of the year, this new patent coupled with QNC's quantum random number generator ("QRNG") will monitor numbers generated to ensure that only random numbers are selected from our QRNG.

This notice of allowance covers the dynamic calibration aspects of that patent pending which had initially been presented. Expedite prosecution has been possible thanks to prioritized examination under USPTO's Track One program.

Mr. Phaneuf CEO said "We are really satisfied with the scope of this notice of allowance covers the dynamic calibration aspects which is a large spectrum of the mobile applications we targeted. This second patent, is another important milestone for us, our future clients and partners. We have applied for a continuation application in which we pursue the claims of all the other aspect of the patent pending with an aim to maximize our intellectual property assets in the United States."

About Quantum Numbers Corp.

QNC is an innovative developer of cryptographic solutions based on Quantum Random Number Generator. The Corporation's mission is to address the growing demand for affordable hardware security for connected devices. Visit our website at www.quantumnumberscorp.com.
