

# Quantum eMotion Appoints Cyber Security and Telecommunication Expert to The Board of Directors

Montreal, Quebec--(Newsfile Corp. - July 20, 2021) - Quantum eMotion Inc. (TSXV: QNC) (OTC Pink: QNCCF) (FSE: 34Q0) ("QeM" or the "Company") is pleased to announce the appointment of Wayne Teeple to its Board of Directors.

As the Company moves forward to finalize the development of its first product and prepares its commercial deployment, QeM continues to strengthen the composition of its Board of Directors.

Wayne Teeple brings relevant technical and business knowledge and a significant network, which he developed during his 30-year tenure in experience in the telecommunications, information technology/management (IT or IM) and information security systems. During his years in both the Canadian Military, as a Communications & Electronics Program/Project Management Officer, and in the Information Technology industry he has acquired experience in a wide variety of executive positions.

Wayne Teeple was the founder and CEO of Phirelight Security Solutions Inc. that was acquired in December 2018 by a large international company offering space and security engineering services and technologies. Wayne is currently one of their Cybersecurity Advisors. He holds a degree in computer sciences from University of Ottawa.

Francis Bellido, CEO, comments, "Wayne is a welcome addition to the QeM team. His expertise around IT Security & Cryptographic Technologies will be invaluable as we move forward with our first product deployment strategy."

Wayne Teeple comments, "QRNGs are a genuinely disruptive technology, bringing quantum-level security to markets at a low cost for the first time. It has the potential to become the first line of defense that safeguards the security and privacy of electronic communications and digital assets. I am very excited to join QeM as I believe its QNRG technology will become a game changer for the Cybersecurity Industry."

## About QeM

The Company's mission is to address the growing demand for affordable hardware security for connected devices. The patented solution for a Quantum Random Number Generator exploits the built-in unpredictability of quantum mechanics and promises to provide enhanced security for protecting high value assets and critical systems.

The Company intends to target the highly valued Healthcare Services industry while ensuring its technology is also relevant and applicable to others, such as Financial Services, Cloud-Based IT Security Infrastructure, Classified Government Networks and Communication Systems, Secure Device Keying (IOT, Automotive, Consumer Electronics) and Quantum Cryptography.
