

Quantum Numbers Corp. Announces Change of Name at the Annual General Meeting of Shareholders to Be Held on May 27th, 2021

Montreal, Quebec--(Newsfile Corp. - May 19, 2021) - Quantum Numbers Corp. (TSXV: QNC) (OTC Pink: QNCCF) (FSE: 34Q) ("QNC" or the "Corporation") announces that the Company will adopt a new name at the next AGM to be held on May 27th, 2021 at 10 a.m.

The Company has chosen the name "Quantum e⁻Motion" to replace Quantum Numbers Corp.

Francis Bellido, CEO, commented: "This rebranding strategy reflects both the evolution of the Company as well as its vision for the future. The new name Quantum e⁻Motion is not only evocative and catchy, but it also relates to the Company's core technology and its uniqueness. The generation of pure quantum random signals based on the motion of electrons (e⁻) tunneling through a junction is a distinct feature that set our technology apart from the competition."

Along with this change, a newly redesigned company logo will be revealed, and a new website is planned to be launched the same day. The Company will also announce its move to a new headquarters located at the Technoparc Montreal, one of Canada's most cutting-edge scientific park (2300 Boulevard Alfred Nobel, Saint-Laurent, QC H4S 2A4).

The AGM will be host in a virtual-only format in response to the ongoing global COVID-19 pandemic.

About QNC

The Corporation's mission is to address the growing demand for affordable hardware security for connected devices. The patented solution for a Quantum Random Number Generator exploits the built-in unpredictability of quantum mechanics and promises to provide enhanced security for protecting high value assets and critical systems.

The Corporation intends to target the highly valued Healthcare Services industry while ensuring its technology is also relevant and applicable to others, such as Financial Services, Cloud-Based IT Security Infrastructure, Classified Government Networks and Communication Systems, Secure Device Keying (IOT, Automotive, Consumer Electronics) and Quantum Cryptography.
