5. DERIVATIVE ROYALTY ASSET

In October 2020, the Company closed an agreement to acquire an existing 27.5% price participation royalty (“PPR”) interest on the operating Higginsville Gold Operations (“Higginsville”) owned by Karora Resources Inc.. Higginsville is a low-cost open pit gold operation in Higginsville, Western Australia. The royalty is a 27.5% PPR royalty on the difference between the average London PM fix gold price for the quarter and A\$1,340/oz on the first 2,500 ounces per quarter for a cumulative total of 34,000 ounces of gold.

As the amount received by the Company will vary depending on changes in the London PM fix gold price and the changes in the exchange rate between the A\$ and the US\$, the Company has recognized the Higginsville PPR as a derivative asset carried at fair value through profit and loss. As per IFRS 9, the Higginsville PPR was recognized as a derivative asset upon inception at \$7.2 million, any cash received from the Higginsville PPR will be used to reduce the derivative asset, and at each period-end the Company will estimate the fair value of the Higginsville PPR using a valuation model with any changes between the estimated fair value and the carrying value flowing through profit or loss in the period.

At June 30, 2023, the key inputs used in the Company’s valuation model for the Higginsville PPR derivative asset were:

- 4,918 ounces of gold remaining to be delivered (December 31, 2022 – 9,918);
- Gold price estimate of \$1,912/oz (December 31, 2022 - \$1,748/oz); and
- U.S. dollar to Australian dollar exchange rate of A\$1.50 per \$1.00 (December 31, 2022 – A\$1.49 per \$1.00).

Based on the valuation model the Company estimated the fair value at June 30, 2023, was \$1.3 million (December 31, 2022 - \$2.2 million). The Company recorded mark-to-market gains on the Higginsville derivative asset of less than \$0.1 million and \$0.5 million for the three and six months ended June 30, 2023, respectively (June 30, 2022 - \$0.2 million gain and \$0.4 million gain).

The Company, through its wholly-owned subsidiary, holds a 15% interest in Silverback Ltd. Distributions to the shareholders are completed on a monthly basis. Prior to April 2021, distributions to shareholders were completed on an annual basis at minimum. Amended Loan Facility

In March 2019, the Company entered into a convertible loan facility (the “**Loan Facility**”) of C\$12.0 million with Beedie to fund acquisitions of new royalties and streams. The Loan Facility consisted of an initial advance of C\$7.0 million (the “**First Drawdown**”) with a conversion price of C\$5.56 per share, with the remaining C\$5.0 million available for subsequent advances, and carried an interest rate of 8.0% on drawn amounts and a standby fee on all undrawn funds of 2.5%. The Loan Facility is secured by certain assets of the Company and can be repaid with no penalty at any time after the 12-month anniversary of each advance.

In August 2020, the Company completed an amendment (the “**First Amendment**”) under which the Company drew down the remaining undrawn C\$5.0 million (the “**Second Drawdown**”) with a conversion price of C\$9.90 per share, and the Loan Facility was increased by an additional C\$20.0 million. As part of the First Amendment, all future advances will have a minimum amount of C\$2.5 million and each advance will have its own conversion price based on a 20% premium to the 30-day Volume Weighted Average Price (“**VWAP**”) of the Company’s shares on the date of such advance. The standby fee on all undrawn funds was also amended to bear an interest rate of 1.5%.

In August and October 2020, Beedie converted the First Drawdown at a conversion price of C\$5.56 per share for a total of 1,258,992 Common Shares. In March 2021, Beedie converted the Second Drawdown at a conversion price of C\$9.90 per share for a total of 505,050 Common Shares.

In March 2021, the Company drew down C\$5.0 million (the “**Third Drawdown**”), at a conversion price of C\$14.30 per share, from the Loan Facility. In October 2021, the Company drew down C\$3.0 million (the “**Fourth Drawdown**”), at a conversion price of C\$11.16 per share, from the Loan Facility.

8. LOANS PAYABLE (cont'd...)

In August 2022, the Company and Beedie closed a first supplemental loan agreement to extend the maturity date of the Amended Loan Facility from April 22, 2023, to January 22, 2024 (the "**Second Amendment**"). In consideration for the Second Amendment the Company incurred a fee of C\$0.2 million (the "**Loan Extension Fee**"), which is deemed included in the principal amount outstanding under the Loan Facility and bears interest at a rate of 8% per annum. The Loan Extension Fee is due on the earlier of January 22, 2024, and the acceleration of the principal amount of the Loan Facility. The Loan Extension Fee will be convertible into Common Shares at a conversion price of C\$7.34 per share, calculated based on a 20% premium to the 30-day VWAP of the Common Shares on the close of trading on the trading day immediately prior to the effective date of the Second Amendment. Upon closing of the Second Amendment, the Company recognized a gain of \$0.3 million to reflect the change required in the amortized cost of the liability using the effective interest method over a longer period of time.

On May 19, 2023, the Company closed a second supplemental loan agreement (the "**Third Amendment**") with Beedie, to amend the Loan Facility by:

- i. extending the maturity date to May 9, 2027;
- ii. increasing the loan facility by C\$5.0 million from C\$20.0 million to C\$25.0 million, of which C\$21.0 million will be undrawn after giving effect to the C\$4.0 million conversion described below;
- iii. increasing the interest rate from 8.0% to 10.0% per annum;
- iv. amending the conversion price of the Fourth Drawdown from C\$11.16 per share to C\$8.67 per share, being a 30% premium to the 30-day VWAP of the Company shares measured at market close on the day prior to announcement of the Third Amendment;
- v. amending the conversion price of C\$4.0 million of the Third Drawdown from C\$14.30 per share to C\$7.33 per share, being the 5-day VWAP of the Company shares measured at market close on the day prior to announcement of the amendment, and converting the C\$4.0 million into shares at the new conversion price. Upon closing the Company issued Beedie 545,702 Common Shares for the conversion of the C\$4.0 million;
- vi. amending the conversion price of the remaining C\$1.0 million of the Third Drawdown from C\$14.30 per share to C\$8.67 per share, being to the 30-day VWAP of the Company shares measured at market close on the day prior to announcement of the Third Amendment; and
- vii. all other terms of the loan facility remain unchanged.

As required by IFRS 9, the Third Amendment was considered a substantial modification of the Loan Facility, and for accounting purposes as per IFRS 9, the existing debt instruments were extinguished, and the new debt instruments were recognized at fair value on the amendment date. The difference in value between the amount that was retired for the old debt instrument and the amount recorded for the new debt instrument, taking into account the modification in conversion price to induce conversion of part of the old debt instrument, was recorded as a loss on extinguishment of loan payable of \$1.4 million. Transaction costs of \$0.1 million incurred on the Third Amendment were included in the loss on extinguishment of loan payable.

The amount the Company has to repay under the Loan Facility, the First Amendment, the Second Amendment, and the Third Amendment (together the "**Amended Loan Facility**"), will vary depending on the changes in the exchange rate between the C\$ and the US\$, therefore the conversion feature portion of the Amended Loan Facility has been accounted for as a non-cash derivative loan liability and will be accounted at fair value through profit and loss. Upon initial recognition, on May 19, 2023, the derivative loan liability was assigned a fair value of \$0.4 million using a Black-Scholes option pricing model. Upon initial recognition the debt portion of the Amended Loan Facility was valued at \$2.7 million, which is the difference between the face value of the debt of \$3.1 million (C\$4.2 million) and the value of the derivative loan liability of \$0.4 million. The debt portion of the Amended Loan Facility has been accounted for at amortized cost using the implied effective interest rate of 14.6%.

On March 30, 2023, the Company signed an amendment to extend the maturity date of the Castle Mountain Loan from June 1, 2023, to April 1, 2024. As part of the amendment, on March 31, 2023, the Company paid the \$0.3 million accrued interest on the loan, effective April 1, 2023, the interest rate increased to 12.0% per annum, and the principal and accrued interest will be repaid no later than April 1, 2024. Fair value

Financial instruments recorded at fair value on the consolidated statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- a) Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- b) Level 2 - Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- c) Level 3 - Inputs for assets and liabilities that are not based on observable market data.

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

Cash, accounts receivables (royalty, derivative royalty, and stream receivables, and other receivables), and accounts payable (trade and other payables), are carried at amortized cost. Their carrying value approximated their fair value because of the short-term nature of these instruments or because they reflect amounts that are receivable to the Company without further adjustments. Marketable securities are carried at fair value and are classified within Level 1 of the fair value hierarchy. The derivative royalty asset is carried at fair value, and was valued using inputs that are not observable, including a gold forward price curve, US\$/A\$ foreign exchange rates based on forward curves, and an estimated discount rate (Note 5). Therefore, the derivative royalty asset is classified within Level 3 of the fair value hierarchy.

Loans payable and acquisition payables are carried at amortized cost. The fair values of the Company's loans payable are approximated by their carrying values as the interest rates are comparable to market interest rates. The derivative loan liability is carried at fair value, and was valued using a Black-Scholes option pricing model with inputs that are not observable (Note 8). Therefore, the derivative loan liability is classified within Level 3 of the fair value hierarchy.

15. FINANCIAL INSTRUMENTS (cont'd...)

Capital risk management

The Company's objectives when managing capital are to provide shareholder returns through maximization of the profitable growth of the business and to maintain a degree of financial flexibility relevant to the underlying operating and metal price risks while safeguarding the Company's ability to continue as a going concern. The capital of the Company consists of share capital. The Board of Directors does not establish a quantitative return on capital criteria for management. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. The Company may issue new shares in order to meet its financial obligations. The management of the Company believes that the capital resources of the Company as at June 30, 2023, are sufficient for its present needs for at least the next twelve months. The Company is not subject to externally imposed capital requirements.

Credit risk

Credit risk arises from cash deposits, as well as credit exposures to counterparties of outstanding receivables and committed transactions. There is no significant concentration of credit risk other than cash deposits. The Company's cash deposits are primarily held with a Canadian chartered bank. Receivables include value added tax due from the Canadian government. The carrying amount of financial assets recorded in the financial statements represents the Company's maximum exposure to credit risk. The Company believes it is not exposed to significant credit risk and overall, the Company's credit risk has not declined from the prior year.

Liquidity risk

The Company strives to maintain sufficient liquidity to meet its short-term business requirements, taking into account its anticipated cash flows from royalty interests, its holdings of cash, and its committed liabilities. The maturities of the Company's non-current liabilities are disclosed in Note 4 and Note 8. All current liabilities are settled within one year.

Currency risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company primarily operates in Canada, Australia, Argentina, Mexico, and the United States and incurs expenditures in currencies other than United States dollars. Thereby, the Company is exposed to foreign exchange risk arising from currency exposure. The Company has not hedged its exposure to currency fluctuations. Based on the above net exposure, as at June 30, 2023, and assuming that all other variables remain constant, a 1% depreciation or appreciation of the United States dollar against the Canadian dollar, Australian dollar, Argentinian peso, and Mexican peso would result in an increase/decrease in the Company's pre-tax income or loss of approximately less than \$0.1 million.
