(1) As disclosed in Note 2 to the consolidated financial statements, in 2017 the Company identified an immaterial non-cash re-classification error with respect to a component of its deferred income tax expense associated with accounting for the deferred tax on its net investment in foreign operations related to an inter-company financing. The reclassification is between the deferred tax provision in the statement of operations and foreign currency translation reserve in equity. This adjustment has been corrected on a retrospective basis with all prior period comparative figures being restated.

(2) Non-IFRS financial measures are defined in the Management's Discussion and Analysis section.

Q3 2018 vs Q3 2017

The Company generated consolidated revenue of \$82.3 million in the third quarter of 2018, an increase of 28% from the same period in 2017. In the US operations, industry activity increased by 12% while market share increased to 61% from 59%. In Canada, industry activity was comparable while market share decreased to 85% from 88%. The International business unit saw increases in activity in each of the Company's major markets. In the Argentinian business unit, the increase in activity was partially offset by the weakness in the Argentinian peso.

Consolidated adjusted EBITDA increased to \$42.5 million in the third quarter, an increase of 62% from the same period in 2017. For the nine-month period, consolidated adjusted EBITDA was \$106.7 million, an increase of 51% over the 2017 comparative period. Increases in revenue in all operating segments, combined with significant operating leverage, led to the improvement in this key measure.

The Company recorded net income of \$24.4 million (\$0.28 per share) in the third quarter of 2018, compared to net income of \$7.4 million (\$0.08 per share) recorded in the same period in 2017. Net income was positively impacted from the increased level of activity, increased market share in the US operations, and reduction in depreciation expense.

President's Message

Pason achieved strong results in the third quarter of 2018 and our teams continue to perform very well in all geographies. We generated revenue of \$82.3 million in the period, an increase of 28% compared to the same quarter last year. The main drivers of revenue growth were increased drilling activity and market share gains in the United States, and higher activity levels in all of Pason's international markets.

Adjusted EBITDA was \$42.5 million for the quarter, an increase of 62%. Adjusted EBITDA as a percentage of revenue was 52% compared to 41% one year ago. The drivers of this improvement were the significant increase in revenue with high incremental margins. Pason recorded net income for the quarter of \$24.4 million (\$0.28 per share) compared to \$7.4 million (\$0.08 per share) in the prior year quarter.

Capital expenditures for the quarter were \$4.9 million and free cash flow was \$26.9 million. At September 30, 2018, our working capital position stood at \$235 million, including cash and short-term investments of \$184 million. There is no debt on our balance sheet. We are maintaining our quarterly dividend at \$0.18 share.

At the beginning of this year, we began reporting our revenue along five product categories to better reflect the changing nature of Pason's business as follows:

- **Drilling Data** contains all products and services associated with acquiring, displaying, storing, and delivering drilling data. Revenue in this segment increased 32% in the third quarter compared to the prior year period and accounted for 51% of our total revenue. The increase was driven by a 12% increase in total US land drilling activity and US market share gains from 59% to 61%. Drilling industry days and segment revenue in Canada were flat. Internationally, drilling activity increased in all major markets.
- **Mud Management & Safety** includes products such as the Pit Volume Totalizer (PVT), Gas Analyzer, Hazardous Gas Alarm, and the Electronic Choke Actuator. In the third quarter, Mud Management & Safety generated 27% of total revenue.
- **Communications** includes satellite and terrestrial Internet bandwidth, Wireless Rigsite, VoIP and Intercom services and accounted for 9% of total revenue. Revenue in this segment is showing lower growth because of the transition from satellite to terrestrial bandwidth with lower pricing and better user experience for customers.
- **Drilling Intelligence** bundles Pason's product offerings targeted at enabling our customers' drilling optimization and automation efforts. It contains products such as autodrillers, abbl Directional Advisor®, the ExxonMobil Drilling Advisory System® and Pivot, a pipe oscillation system for improving slide drilling. Drilling Intelligence is our highest growth segment as revenue increased 73% in the third quarter compared to the prior year and accounted for 9% of our total revenue. Our level of confidence in the successful commercialization of new drilling intelligence products continues to grow. There currently are over 150 drilling rig installations of new Drilling Intelligence software in North America.
- **Analytics & Other** includes our Verdazo Discovery Analytics product suite, various reports, and other revenue streams. This segment is not as directly correlated to drilling activity and accounted for 4% of revenue.

We have increased our investment in R&D and IT in the first nine months of 2018 compared to the previous year period with a focus on machine learning algorithms, particularly in Drilling Intelligence and Mud

Management & Safety. Our capital expenditures will be relatively modest going forward with a larger portion of development efforts focused on software and analytics. We intend to spend up to \$25 million in capital expenditures in 2018 and up to \$30 million in 2019. Our highly capable and flexible IT and communications platform can host additional new Pason and third-party software at the rigsite and in the Cloud.

From a macro perspective, the oil market continued to tighten in the third quarter. Despite continued strong production from the US and increasing output from OPEC countries, we had seen a further draw in global inventories and an increase in oil prices. The tightening supply and demand balance was driven by accelerating decline rates in the international production base and by the reduction in exports from Venezuela and Iran.

In the United States there are concerns for industry activity in the coming few quarters given take-away constraints across several basins, especially in the Permian in Texas and New Mexico. However, we have not yet seen any signs of a slowdown and we expect activity levels to plateau, rather than decline significantly. It is expected that the Permian takeaway constraints will be addressed in the next 12-18 months.

In Canada, we expect activity in the upcoming winter drilling season to be somewhat lower than last year. We continue to be concerned about the medium-term outlook for Canadian oil and gas as the ongoing crude oil and natural gas takeaway capacity issues, and price differentials, continue to create an environment of extreme caution for Canadian E&P companies.

In aggregate, we expect drilling activity in Pason's core markets to be largely flat in 2019 compared to 2018. Our market positions remain strong, and we expect to be able to deliver growth through higher product adoption going forward. We are the service provider of choice for many leading operators and drilling contractors with Pason equipment installed on over 65% of all active land drilling rigs in the Western Hemisphere. We continue to be very well-positioned to participate in the industry's recovery and growth.

Marcel Kessler
President and Chief Executive Officer
November 7, 2018

Management's Discussion and Analysis

The following discussion and analysis has been prepared by management as of November 7, 2018, and is a review of the financial condition and results of operations of Pason Systems Inc. (Pason or the Company) based on International Financial Reporting Standards (IFRS) and should be read in conjunction with the consolidated financial statements and accompanying notes.

Certain information regarding the Company contained herein may constitute forward-looking statements under applicable securities laws. Such statements are subject to known or unknown risks and uncertainties that may cause actual results to differ materially from those anticipated or implied in the forward-looking statements.

All financial measures presented in this report are expressed in Canadian dollars unless otherwise indicated.

Additional IFRS Measures

In its interim condensed consolidated financial statements, the Company uses certain additional IFRS measures. Management believes these measures provide useful supplemental information to readers.

Funds flow from operations

Management believes that funds flow from operations, as reported in the Consolidated Statements of Cash Flows, is a useful additional measure as it represents the cash generated during the period, regardless of the timing of collection of receivables and payment of payables. Funds flow from operations represents the cash flow from continuing operations, excluding non-cash items. Funds flow from operations is defined as net income adjusted for depreciation and amortization expense, non-cash, stock-based compensation expense, deferred taxes, and other non-cash items impacting operations.

Cash from operating activities

Cash from operating activities is defined as funds flow from operations adjusted for changes in working capital items.

Non-IFRS Financial Measures

These definitions are not recognized measures under IFRS, and accordingly, may not be comparable to measures used by other companies. These Non-IFRS measures provide readers with additional information regarding the Company's ability to generate funds to finance its operations, fund its research and development and capital expenditure program, and pay dividends.

Revenue per EDR day

Revenue per EDR day is defined as the daily revenue generated from all products that the Company has on rent on a drilling rig that has the Company's base EDR installed. This metric provides a key measure on the Company's ability to increase production adoption and evaluate product pricing.

EBITDA

EBITDA is defined as net income before interest expense, income taxes, stock-based compensation expense, depreciation and amortization expense, and gains on disposal of investments.

Adjusted EBITDA

Adjusted EBITDA is defined as EBITDA, adjusted for foreign exchange, impairment of property, plant, and equipment, restructuring costs, and other items which the Company does not consider to be in the normal course of continuing operations.

Management believes that EBITDA and Adjusted EBITDA are useful supplemental measures as they provide an indication of the results generated by the Company's principal business activities prior to the consideration of how these results are taxed in multiple jurisdictions, how the results are impacted by foreign exchange or how the results are impacted by the Company's accounting policies for equity-based compensation plans.

Free cash flow

Free cash flow is defined as cash from operating activities plus proceeds on disposal of property, plant, and equipment, less capital expenditures (including changes to non-cash working capital associated with capital expenditures), and deferred development costs. This metric provides a key measure on the Company's ability to generate cash from its principal business activities after funding the capital expenditure program, and provides an indication of the amount of cash available to finance, among other items, the Company's dividend and other investment opportunities.

Overall Performance

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2018	2017	Change	2018	2017	Change
(000s)	(\$)	(\$)	(%)	(\$)	(\$)	(%)
Revenue						
Drilling Data	42,090	31,889	32	114,805	88,974	29
Mud Management and Safety	22,299	19,288	16	62,863	53,225	18
Communications	7,504	6,567	14	21,413	18,440	16
Drilling Intelligence	7,111	4,099	73	16,066	11,313	42
Analytics and Other	3,340	2,733	22	9,281	7,465	24
Total revenue	82,344	64,576	28	224,428	179,417	25

The Pason Electronic Drilling Recorder (EDR) remains the Company's primary product. The EDR provides a complete system of drilling data acquisition, data networking, and drilling management tools and reports at both the wellsite and at customer offices. The EDR is the base product from which all other wellsite instrumentation products are linked. By linking these products, a number of otherwise redundant elements such as data processing, display, storage, and networking are eliminated. This ensures greater reliability and a more robust system of instrumentation for the customer.

EDR rental day performance for Canada and the United States is reported below:

	Pason Electronic Drilling Recorder (EDR) Rental Days					
	Three Months Ended September 30,			Nine Months Ended September 30,		
	2018	2017	Change	2018	2017	Change
	#	#	(%)	#	#	(%)
Canada	16,100	16,900	(5)	45,500	49,900	(9)
United States	57,500	49,500	16	164,700	128,500	28

Total revenue increased 28% and 25% for the three and nine months ending September 2018, over the same period in 2017. This increase is attributable to an increase in revenue per EDR day in all three operating segments combined with an increase in the activity in the US operating segment.

Industry activity in the US market increased 12% in the third quarter of 2018 compared to the corresponding period in 2017, while third quarter Canadian industry activity was consistent in the third quarter of 2018 compared to the corresponding period in 2017. US EDR days increased by 16% in the third quarter of 2018 compared to the corresponding period in 2017, while third quarter Canadian EDR days, which includes non-oil and gas-related activity, decreased 5% from 2017 levels.

In the third quarter of 2018, the Pason EDR was installed on 61% of the land rigs in the US market compared to 59% during the same time period of 2017.

In the third quarter of 2018, the Pason EDR was installed on 85% of the land rigs in the Canadian market compared to 88% during the same period of 2017. For the purposes of market share, the Company uses the number of EDR days billed and oil and gas drilling days as reported by accepted industry sources.

Revenue generated from the Company's other wellsite instrumentation products was largely driven by the increase in drilling activity in the US market combined with increases in the adoption of certain EDR peripherals, most notably the alarms and sensors, and an increase in revenue from the Company's drilling intelligence products.

For the third quarter of 2018, the Company saw an increase in activity in all major regions of the International operating segment with the largest increases in Australia and Argentina.

Discussion of Operations

United States Operations

	Three Months Ended September 30,			Nine Months Ended September 30,

Depreciation and amortization	4,200	4,151	1	12,128	13,322	(9)
Segment gross profit	31,652	19,397	63	83,770	48,875	71

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	\$	\$	\$	\$
Revenue per EDR day - USD	716	647	694	648
Revenue per EDR day - CAD	936	809	893	847

Revenue from the US operations increased by 33% in the third quarter of 2018 over the 2017 comparable period (28% when measured in USD). For the first nine months of 2018, revenue increased 35% compared to the prior period (37% when measured in USD).

Industry activity in the US market increased by 12% in the third quarter of 2018 over the 2017 comparable period. For the first nine months of 2018, industry activity increased by 19% compared to the prior period. US market share was 61% for the third quarter of 2018 compared to 59% during the same period of 2017. For the first nine months of 2018, US market share was 61% compared to 57% during the same period of 2017. The increase in market share is driven by market share growth in key US regions combined with changes in the mix of active customers.

EDR rental days increased by 16% in the third quarter of 2018 over the 2017 comparable period. Revenue per EDR day increased to US\$716 in the third quarter of 2018, an increase of US\$69 over the same period in 2017. The increase in revenue per EDR day was driven by higher adoption of certain peripheral products and selective price increases on certain products.

Revenue per EDR day for the first nine months of 2018 was US\$694, an increase of US\$46 from the same period of 2017.

Rental services and local administration increased by 7% in the third quarter of 2018 over the 2017 comparative period (6% when measured in USD). For the first nine months of 2018, rental services and local administration increased 11% over the 2017 comparative period (15% when measured in USD). The increase in operating costs is attributable higher field staff levels and higher direct costs to support additional activity.

Depreciation expense increased by 1% in the third quarter of 2018 over the 2017 comparative period. For the first nine months of 2018, depreciation expense decreased 9% over the 2017 comparative period.

Segment gross profit increased by \$12.3 million or 63% in the third quarter of 2018 over the 2017 comparative period. For the first nine months of 2018, segment gross profit was \$83.8 million. This represents an increase of 71% over the 2017 comparative period.

	2018	2017	2018	2017
	\$	\$	\$	\$
Revenue per EDR day - CAD	1,191	1,041	1,133	1,010

Canadian drilling activity in the third quarter of 2018 was flat relative to the same period in 2017. The level of activity during the quarter was affected by weather-related issues during September. For the first nine months of 2018, drilling activity decreased by 6% compared to the same period in 2017. Rig activity reflected the challenging industry outlook and takeaway capacity issues in the WCSB.

Canadian segment revenue increased by 9% in the third quarter of 2018 over the 2017 comparative period. For the first nine months of 2018, revenue increased by 2% compared to the prior period.

Canadian market share was 85% for the third quarter of 2018 compared to 88% during the same period of 2017. For the first nine months of 2018, Canadian market share was 86% compared to 89% during the same period of 2017.

EDR rental days decreased 5% in the third quarter of 2018 compared to 2017. On a year-to-date basis EDR rental days decreased 9% over 2017 levels. Revenue per EDR day increased by \$150 to \$1,191 during the third quarter of 2018 compared to 2017. For the first nine months of 2018, revenue per EDR day increased by \$123 to \$1,133. The increase is driven by higher adoption of certain EDR peripherals and the successful introduction of drilling intelligence products.

Rental services and local administration decreased by 7% in the third quarter of 2018 relative to the same period in 2017. For the first nine months of 2018, rental services and local administration increased 9%

compared to the same period in 2017. The increase is due to repair costs and other direct field costs incurred primarily in the first two quarters of 2018.

Depreciation and amortization expense decreased by 36% in the third quarter of 2018 over the 2017 comparative period. The decrease is a result of lower capital programs since 2014 and a drop in amortization expense of previously deferred research and development costs as fewer project costs are being capitalized for accounting purposes.

Segment gross profit for the third quarter of 2018 increased 74% to \$10.1 million in the third quarter of 2018 compared to \$5.8 million in segment gross profit in the 2017 comparative period.

International Operations

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2018	2017	Change	2018	2017	Change
(000s)	(\$)	(\$)	(%)	(\$)	(\$)	(%)
Revenue						
Drilling Data	4,646	3,238	43	12,590	9,979	26
Mud Management and Safety	1,692	1,159	46	4,754	3,398	40
Communications	377	240	57	1,113	775	44

Analytics and Other	977	522	87	2,177	1,242	75
Total revenue	8,160	5,578	46	21,769	16,792	30
Rental services and local administration	4,434	4,317	3	13,882	13,282	5
Depreciation and amortization	804	980	(18)	2,663	3,026	(12)
Segment gross profit	2,922	281	940	5,224	484	979

Drilling activity increased in the Company's major international markets, although the majority of the absolute gains were seen in Australia, Argentina, and the Andean region. The increase in activity in Argentina was offset by a weaker Argentinian peso compared to the prior year.

Revenue in the International segment increased by 46% in the third quarter of 2018 compared to the same period in 2017. For the first nine months of 2018, revenue increased by 30% compared to the prior period.

Rental services and local administration expenses increased by 3% in the third quarter of 2018 compared to the same period in 2017. For the first nine months of 2018, rental services and local administration expense increased by 5% compared to the prior period.

Depreciation expense decreased by 18% in the third quarter of 2018 compared to the same period in 2017.

Segment gross profit was \$2.9 million for the third quarter of 2018, an improvement from the \$0.3 million profit recorded in the corresponding period in 2017. For the first nine months of 2018, segment gross profit was \$5.2 million compared to \$0.5 million in 2017.

Corporate Expenses

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2018	2017	Change	2018	2017	Change
(000s)	(\$)	(\$)	(%)	(\$)	(\$)	(%)
Other expenses						
Research and development	6,711	6,945	(3)	19,687	19,083	3
Corporate services	4,363	3,553	23	12,008	11,157	8
Stock-based compensation	2,589	3,145	(18)	8,978	8,869	1
Other						
Foreign exchange (gain) loss	(1,516)	113	—	6,675	(353)	—
Other	(644)	552	—	(458)	768	—
Total corporate expenses	11,503	14,308	(20)	46,890	39,524	19

Corporate service expenses increased in the third quarter of 2018 over the 2017 comparative period due to one time costs combined with certain expenses being recognized in different periods in 2018 as compared to 2017.

Q3 2018 vs Q2 2018

Consolidated revenue was \$82.3 million in the third quarter of 2018 compared to \$68.3 million in the second quarter of 2018, an increase of \$14.0 million or 21%. The second quarter of the year is typically the weakest for the Company due to the seasonality of Canadian drilling activity. US and international activity levels continued to increase and this partially offset the anticipated drop in Canadian activity.

Revenue in the US segment was \$54.2 million in the third quarter of 2018 compared to \$50.3 million in the second quarter of 2018, an increase of \$3.9 million or 8% as industry activity, market share and revenue per EDR day all increased. The Canadian segment earned revenue of \$20.0 million in the third quarter of 2018 compared to \$10.7 million in the second quarter of 2018, an increase of \$9.4 million or 88%. The International segment earned revenue of \$8.2 million in the third quarter of 2018 compared to \$7.3 million in the second quarter of 2018, an increase of \$0.8 million or 11%.

Adjusted EBITDA, which adjusts EBITDA for foreign exchange and certain non-recurring charges, was \$42.5 million in the third quarter of 2018 compared to \$29.5 million in the second quarter of 2018. Funds flow from operations was \$36.0 million in the third quarter of 2018 compared to \$27.8 million in the second quarter of 2018.

The Company recorded net income in the third quarter of 2018 of \$24.4 million (\$0.28 per share) compared to a profit of \$5.5 million (\$0.06 per share) in the second quarter of 2018. The Company recorded an unrealized foreign exchange gain in the third quarter of 2018 compared to a significant unrealized foreign exchange loss in the second quarter of 2018.

Summary of Quarterly Results

(1) As disclosed in Note 2 to the consolidated financial statements, in 2017 the Company identified an immaterial non-cash re-classification error with respect to a component of its deferred income tax expense associated with accounting for the deferred tax on its net investment in foreign operations related to an inter-company financing. The reclassification is between the deferred tax provision in the statement of operations and foreign currency translation reserve in equity. This adjustment has been corrected on a retrospective basis with all prior period comparative figures being restated. Refer to table below on the impact of the restatement on prior period figures.

(2) Non-IFRS financial measures are defined in the Management's Discussion and Analysis section.

Restatement of Prior Period Error (refer to Note 2 to the consolidated financial statements)

Pason's quarterly financial results vary quarter to quarter due in part to the seasonality of the oil and gas service industry in Canada, which is somewhat offset by the less seasonal nature of US and International operations. The first quarter is generally the strongest quarter for the Company due to strong activity in Canada, where location access is best during the winter. The second quarter is typically the slowest due to spring break-up in Canada, when many areas are not accessible due to ground conditions, and, therefore, do not permit the movement of heavy equipment. Activity generally increases in the third quarter, depending on the year, as ground conditions have often improved and location access becomes available; however, a rainy summer can have a significant adverse effect on drilling activity. By the fourth quarter, often the Company's second strongest quarter, access to most areas in Canada becomes available when the ground freezes. Consequently, the performance of the Company may not be comparable quarter to consecutive quarter, but should be considered on the basis of results for the whole year, or by comparing results in a quarter with results in the same quarter for the previous year.

Liquidity and Capital Resources

As at September 30,	2018	2017	Change
(000s)	(\$)	(\$)	(%)
Cash and cash equivalents	119,762	159,437	(25)
Short-term investments	64,725	—	—
Working capital	234,771	190,518	23
Funds flow from operations ⁽¹⁾	97,833	59,766	64
Capital expenditures ⁽¹⁾	15,426	11,604	33
As a % of funds flow ⁽¹⁾⁽²⁾	15.8%	19.4%	(365) bps

(1) Figures are for the Nine months ended September 30.

(2) Calculated by dividing capital expenditures by funds flow from operations.

During the second quarter of 2018, the Company invested in a USD \$50.0 million term deposit bearing an interest rate of 2.30% maturing in November 2018.

Contractual Obligations

	Less than 1 year	1–3 years	Thereafter	Total
(000s)	(\$)	(\$)	(\$)	(\$)
Operating leases and other contracts	6,874	10,371	4,836	22,081

Contractual obligations relate primarily to minimum future lease payments required primarily for telecommunication charges and operating leases for certain facilities and vehicles.

At September 30, 2018, the Company had no capital lease obligations, and other than the operating leases detailed above, and the onerous lease obligation recorded, has no off-balance sheet arrangements.

The Company has available a \$5.0 million demand revolving credit facility. At September 30, 2018, no amount had been drawn on the facility.

Disclosure of Outstanding Share and Options Data

As at September 30, 2018, there were 85.4 million common shares and 5.1 million options issued and outstanding.

SEDAR

Additional information relating to the Company can be accessed on the Company's website at www.pason.com and on the Canadian Securities Administrators' System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com.

Critical Accounting Estimates

The preparation of the consolidated financial statements requires that certain estimates and judgments be made with respect to the reported amounts of revenue and expenses and the carrying value of assets and liabilities. These estimates are based on historical experience and management's judgments, and as a result, the estimates used by management involve uncertainty and may change as additional experience is acquired.

Depreciation and Amortization

The accounting estimate that has the greatest impact on the Company's financial statements is depreciation and amortization. Depreciation of the Company's capital assets includes estimates of useful lives. These estimates may change with experience over time so that actual results could differ significantly from these estimates.

Carrying Value of Assets

The carrying amounts of the Company's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. Judgments and assessments are made to determine whether an event has occurred that indicates a possible impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year.

Stock-Based Payments

The fair value of stock-based payments is calculated using a Black-Scholes option pricing model. There are a number of estimates used in the calculation, such as the future forfeiture rate, expected option life, and the future price volatility of the underlying security, which can vary from actual future events. The factors applied in the calculation are management's best estimates based on historical information and future forecasts.

Income Taxes

The calculation of deferred income taxes is based on a number of assumptions, including estimating the future periods in which temporary differences, tax losses, and other tax credits will reverse. Tax interpretations, regulations, and legislation in the various jurisdictions in which the Company and its subsidiaries operate are subject to change.

The estimation of deferred tax assets and liabilities includes uncertainty with respect to the reversal of temporary differences.

Deferred tax assets are recognized for the carry-forward of unused tax losses and unused tax credits when it is probable that taxable income will be available to utilize unused tax losses and unused tax credits. This requires estimation of future taxable income and usage of tax loss carry-forwards for a considerable period into the future. Income tax expense in future periods may be affected to the extent actual taxable income is not sufficient or available to use the temporary differences giving rise to the deferred tax asset.

Risk and Uncertainties

Pason has implemented a risk management framework that helps the Company manage the reality that future events, decisions, or actions may cause undesirable effects. The framework takes a value-based approach to identifying, prioritizing, communicating, mitigating, and monitoring risks, and aligns this with the organization's appetite for risk considering our culture, strategy, and objectives.

Although a framework can help the Company to manage its risks, the Company's performance is subject to a variety of risks and uncertainties. Although the risks described below are the risks that we believe are material, there may also be risks of which we are currently unaware, or that we currently regard as immaterial based upon the information available to us. Interested parties should be aware that the occurrence of the events described in these risk factors could have a material adverse effect on our business, operating results, and financial condition.

Operating Risks

Pason derives the majority of its revenue from the rental of instrumentation and data services to oil and gas companies and drilling contractors in Canada, the US, Australia, and Latin America. The demand for our products is directly related to land-based or offshore drilling activity funded by energy companies' capital expenditure programs. A substantial or extended decline in energy prices or diversion of funds to large capital programs could adversely affect capital available for drilling activities, directly impacting Pason's revenue.

Commodity Prices

Prices for crude oil and natural gas fluctuate in response to a number of factors beyond Pason's control. The factors that affect prices include, but are not limited to, the following: the actions of the Organization of Petroleum Exporting Countries, world economic conditions, government regulation, political stability in the Middle East and elsewhere, the foreign supply of crude oil, the price of foreign imports, the availability of alternate fuel sources, and weather conditions. Any of these can reduce the amount of drilling activity.

Seasonality

Drilling activity in Canada is seasonal due to weather that limits access to leases in the spring and summer, making the first and last quarters of each year the peak level of demand for Pason's services due to the higher level of drilling activity. The length of the drilling season can be shortened due to warmer winter weather or rainy seasons. Pason can offset some of this risk, although not eliminate it, through continued growth in the US and internationally, where activity is less seasonal.

Proprietary Rights

Pason relies on innovative technologies and products to protect its competitive position in the market. To protect Pason's intellectual property, the Company employs trademarks, patents, employment agreements, and other measures to protect trade secrets and confidentiality of information. Pason also believes that due to the rapid pace of technological change in the industry, technical expertise, knowledge, and innovative skill, combined with an ability to rapidly develop, produce, enhance, and market products, also provides protection in maintaining a competitive position.

Litigation

The Company is involved in various claims and litigation arising in the normal course of business. While the outcome of these matters is uncertain and there can be no assurance that such matters will be resolved in Pason's favour, the Company does not currently believe that the outcome of any pending or threatened proceedings related to these or other matters, or the amounts which the Company may be required to pay by reason thereof, would individually or in the aggregate have a material adverse impact on its day-to-day business operations.

Credit Risk

Pason is exposed to credit risk to the extent that its customers, operating primarily in the oil and natural gas industry, may experience financial difficulty and be unable to meet their obligations. However, Pason has a large number of customers on both the Operator and Contractor side, which minimizes exposure to any single customer.

Availability of Qualified Personnel

Due to the specialized and technical nature of Pason's business, Pason is highly dependent on attracting and retaining qualified or key personnel. There is competition for qualified personnel in the areas where Pason operates, and there can be no assurance that qualified personnel can be attracted or retained to meet the growth needs of the business. To mitigate this risk, Pason has a Human Resources department within each significant business unit to support that function.

Alternative Energies

There continues to be extensive discussion at all levels of government worldwide and by the public concerning the burning of fossil fuels and the impact this may have on the global environment. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability, which could lead to potentially increased capital expenditures and operating costs. Implementation of strategies for reducing greenhouse gases could have a material impact on the nature of operations of the Company. Given the evolving nature of the debate related to climate change and the control of greenhouse gases and the possible resulting requirements, it is not possible to predict either the nature of those requirements or the impact on the Company.

International Operations

Assets outside of Canada and the US may be adversely affected by changes in governmental policy, social instability, or other political or economic developments beyond the Company's control, including expropriation of property, exchange rate fluctuations, and restrictions on repatriation of cash. The Company has mitigated these risks where practical and considered warranted. Approximately 90% of the Company's revenues are generated in Canada and the US, which limits exposure to risks and uncertainties in foreign countries. The Company's Argentinian subsidiary is operating in a highly inflationary economy and its operating results are being impacted by a weakening Argentina peso relative to the Canadian dollar.

Foreign Exchange Exposure

The Company operates internationally and is primarily exposed to exchange risk relative to the US dollar. The Canadian operations are exposed to currency risk on US denominated financial assets and liabilities with fluctuations in the rate recognized as foreign exchange gains or losses in the Consolidated Statements of Operations. The Company's self-sustaining foreign subsidiaries expose the Company to exchange rate risk on the translation of their financial assets and liabilities to Canadian dollars for consolidation purposes.

Adjustments arising when translating the foreign subsidiaries into Canadian dollars are reflected in the Consolidated Statements of Operations and Other Comprehensive Income as unrealized foreign currency translation adjustments. The Company has not hedged either one of these risks.

The Company does not employ any financial instruments to manage risk or hedge its activities. The vast majority of the Company's activities are conducted in Canada and the US, where local revenue is earned against local expenses and the Company is therefore naturally hedged.

Major Customers

Pason has a large customer base, consisting of both Operators and Contractors, and does not rely on any single customer for a significant portion of its revenue. No single customer accounted for more than 10% of the consolidated revenues of the Company. The loss of one or more customers, or a reduction in the amount of business Pason does with any of its customers, if not offset by obtaining new customers or increasing the amount of business it does with existing customers, could have a detrimental impact on Pason's revenue.

Key Personnel

Pason's success depends to a significant extent on the contributions of a number of its officers and key employees. The Company does not carry "key person" insurance on any of its key employees. As such, the loss of services of one or more of these key employees could have a material adverse effect on Pason's business, operating results, or financial condition.

Dividends

The decision to pay dividends and the amount paid is at the discretion of Pason's board of directors, which regularly reviews the Company's financial position, operating results, and industry outlook. Pason's ability to pay dividends is dependent on the Company's ability to generate cash flow in excess of its operating and investment needs and the Company's financial position.

Taxation

Pason and its subsidiaries are subject to income and other forms of taxation in the various jurisdictions in which they operate. Pason attempts to structure its operations in a tax efficient manner in light of prevailing tax regimes. Any adverse change to existing taxation measures, policies or regulations, or the introduction of new taxation measures, policies or regulations in any of the jurisdictions in which Pason operates could have a negative impact on Pason's business, operating results, or financial condition.

The management of Pason believes that the provision for income taxes is adequate and in accordance with both generally accepted accounting principles and appropriate regulations. However, the tax filing positions of the Company are subject to review and audit by tax authorities who may challenge and succeed in management's interpretation of the applicable tax legislation.

Information Security

Pason's business operations use an extensive network of communications and computer hardware and software systems. In addition, Pason's equipment captures, transmits, and stores significant quantities of drilling data on behalf of its customers. The Company takes measures to protect the security and integrity of its information systems and data, however, there is a risk that these measures may not fully protect against a potential security breach, which could have a negative impact on the Company's ability to operate or its reputation with existing and potential customers.

Notes to Condensed Consolidated Interim Financial Statements

(\$CDN 000s, except per share data) (unaudited)

1. Description of Business

Pason Systems Inc. (the "Company") is a leading global provider of instrumentation and data management systems for drilling rigs.

The Company headquarters are located at 6130 Third Street SE, Calgary, Alberta, Canada. The Company is a publicly traded company listed on the Toronto Stock Exchange under the symbol PSI. The condensed consolidated interim financial statements of the Company are comprised of the Company and its subsidiaries (together referred to as the "Group" and individually as "Group entities"). The accompanying consolidated financial statements include the accounts of Pason Systems Inc. and its wholly owned subsidiaries.

2. Basis of Preparation

These unaudited condensed consolidated interim financial statements have been prepared in accordance with the requirements of International Accounting Standard ("IAS") 34, Interim Financial Reporting and include the accounts of Pason and its wholly owned subsidiaries. All significant inter-company balances and transactions including revenue and expenses have been eliminated. These unaudited condensed consolidated interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements of the Company as at and for the year ended December 31, 2017 and first quarter 2018 financial statements.

Correction of Error

During the fourth quarter of 2017, the Company adjusted for an immaterial non-cash error in the recognition of a component of its deferred income tax expense. The error was a result of the Company recognizing in the statement of operations the deferred income tax effect of the future taxable foreign exchange gain adjustment associated with its net investment in foreign operations related to an inter-company financing, when the amount should have been adjusted through the foreign currency translation reserve within equity.

Accordingly, this adjustment has been corrected on a retrospective basis with all prior period comparative figures being restated. The cumulative impact of this error as of January 1, 2017 was to increase retained earnings and reduce Foreign Currency Translation Reserve by \$9,871.

3. Significant Accounting Policies

There have been no significant accounting policy changes other than as discussed below; refer to the audited annual consolidated financial statements as at and for the year ended December 31, 2017 and first quarter 2018 financial statements.

Adoption of new and amended standards

IFRS 9, Financial Instruments and IFRS 15, Revenue from Contracts with Customers

The Company adopted IFRS 9, Financial Instruments and IFRS 15, Revenue from Contracts with Customers, on January 1, 2018. There was no impact to the Company's financial position, results of operations, or cash flows as a result of the adoption of either standard. Refer to the Company's 2018 first quarter financial statements for further details.

Future Accounting Policy Changes

In January 2016 the International Accounting Standards Board released IFRS 16, Leases, which is required to be applied for years beginning on or after January 1, 2019, and which supersedes IAS 17, Leases; earlier application is allowed, but not before the application of IFRS 15, Revenue from Contracts with Customers.

This new pronouncement introduces a single lessee accounting model by eliminating a lessees' classification of leases as either operating leases or finance leases.

The most significant change will be the lessee's recognition of the initial present value of unavoidable future lease payments as a leased asset and liability on the Consolidated Balance Sheets. Leases with durations of twelve months or less and leases for low-value assets are both exempted.

The measurement of the total lease expense over the term of a lease will be unaffected by the new standard. The presentation on the Consolidated Statement of Operations will result in most lease expenses being presented as amortization of leased assets and financing costs arising from lease liabilities rather than as being a part of either local administration expense or corporate service expenses.

The lessee's actual cash flows will be unaffected, however relative to the current standard, the lessee's statement of cash flows will reflect increased operating activity cash flows offset by a corresponding decrease in financing activity cash flows due to the payment of the "principal" component of leases.

Management is currently accumulating the leases and developing the framework to capture the impacts of the new standard and does not expect the Company's Consolidated Balance Sheets will be materially affected. At this time it is not possible to make reasonable estimates of the effects of the new standard.

Foreign Currency

Argentina has continued to experience multiple quarters of increasing rates of inflation and a devaluation of the Argentinian peso relative to the Canadian dollar. In the second quarter of 2018, management concluded that its Argentinian subsidiary is operating in a hyperinflationary economy. Management has concluded that applying the standards under IAS 29, Financial Reporting in Hyperinflationary Economies would not have a material impact on the financial results.

4. Seasonality

Pason's quarterly financial results vary quarter to quarter due in part to the seasonality of the oil and gas service industry in Canada, which is somewhat offset by the less seasonal nature of US and International operations. The first quarter is generally the strongest quarter for the Company due to strong activity in Canada, where location access is best during the winter. The second quarter is typically the slowest due to spring break-up in Canada, when many areas are not accessible due to ground conditions, and, therefore, do not permit the movement of heavy equipment. Activity generally increases in the third quarter, depending on the year, as ground conditions often improve and location access becomes available; however, a rainy summer can have a significant adverse effect on drilling activity. By the fourth quarter, often the Company's second strongest quarter, access to most areas in Canada becomes available when the ground freezes. Consequently, the performance of the Company may not be comparable quarter to consecutive quarter, but should be considered on the basis of results for the whole year, or by comparing results in a quarter with results in the same quarter for the previous year.

5. Operating Segments

The Group has three reportable segments, as described below, which are the Group's strategic business units. The strategic business units offer the same services, but are managed separately. For each of the strategic business units, the Group's senior management reviews internal management reports on a monthly basis.

Information regarding the results of each reportable segment is included below. Performance is measured based on gross profit as included in the internal management reports. Segment gross profit is used to measure performance, as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries. Inter-segment pricing is determined on an arm's length basis. Intra-group balances and transactions are eliminated.

The Group operates in three geographic segments: Canada, the United States, and International (Latin America, Offshore, the Eastern Hemisphere, and the Middle East). The following table represents a disaggregation of revenue from contracts with customers along with the reportable segment for each category:

6. Share Capital

Common Shares				
	Nine Months Ended September 30, 2018		Year Ended December 31, 2017	
	(\$)	(#)	(\$)	(#)
Balance, beginning of period	150,887	85,158	139,730	84,628
Exercise of stock options:	5,553	273	9,407	431
Verdazo Acquisition	—	—	1,750	99
Balance, end of period	156,440	85,431	150,887	85,158

Common shares

At September 30, 2018, the Company was authorized to issue an unlimited number of common shares and an unlimited number of preferred shares, issuable in series.

The holders of common shares are entitled to receive dividends, as declared, and are entitled to one vote per share at meetings of the Company. All shares rank equally with regard to the Company's residual assets.

Stock option plan

The Group has a stock option plan that entitles qualified employees to purchase shares in the Company. Options, which are issued at market price, vest over three years and expire after five years.

At September 30, 2018, 5,141 (2017: 4,243) stock options were outstanding for common shares at exercise prices ranging from \$15.94 to \$27.96 per share, expiring between 2018 and 2022 as follows:

	Nine Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
	Share Options	Weighted Average Exercise Price	Share Options	Weighted Average Exercise Price
	(#)	(\$)	(#)	(\$)
Outstanding, beginning of period	5,514	20.06	5,075	20.53
Granted	—	—	89	19.32
Equity settled	(273)	17.12	(288)	16.57
Expired or forfeited	(100)	19.43	(633)	22.51
Outstanding, end of period	5,141	20.22	4,243	22.46
Exercisable, end of period	2,411	22.89	1,775	22.95
Available for grant, end of period	839		1,702	

Stock-based compensation expense and liability

The stock option, restricted share unit (RSU), deferred share unit (DSU), and performance share unit (PSU) plans expense are summarized as follows:

Expense

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(\$)	(\$)	(\$)	(\$)
Stock options	1,244	979	3,534	2,617
RSUs	369	524	1,972	1,718
DSUs	(122)	33	463	208
PSUs	828	902	2,199	2,204
Deferred compensation expense	270	707	810	2,122
Stock-based compensation	2,589	3,145	8,978	8,869

On December 31, 2016, the Company purchased all of the existing and outstanding shares of Verdazo Analytics, Inc. (Verdazo). In accordance with IFRS, a portion of the deferred compensation payable was not considered part of the purchase price but is accounted for as future stock-based compensation expense over the vesting period. This amount, which is being accrued over the three year period ending December 31, 2019, totals \$4,201.

Liability

As at	September 30, 2018	December 31, 2017
	(\$)	(\$)
RSUs	2,102	935
PSUs	2,407	1,075
Deferred compensation expense	1,889	1,079
Current portion of stock-based compensation liability	6,398	3,089
RSUs	1,151	390
DSUs	2,414	1,951
PSUs	1,284	417
Non-current portion of stock-based compensation liability	4,849	2,758
Total stock-based compensation liability	11,247	5,847

Common share dividends

During the quarter ended September 30, 2018, the Company declared and paid dividends of \$15,378 (2017: \$14,425) or \$0.18 per common share (2017: \$0.17).

7. Income Per Share

Basic income per share

The calculation of basic income per share is based on the following weighted average number of common shares:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(#)	(#)	(#)	(#)
Issued common shares outstanding, beginning of period	85,378	84,814	85,158	84,628
Effect of exercised options	32	39	114	129
Weighted average number of common shares outstanding for the period	85,410	84,853	85,272	84,757

Diluted income per share

The calculation of diluted income per share is based on a weighted average number of common shares outstanding after adjustment for the effects of all potential dilutive common shares calculated as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(#)	(#)	(#)	(#)
Weighted average number of common shares (basic)	85,410	84,853	85,272	84,757
Effect of share options	607	117	309	197
Weighted average number of common shares (diluted)	86,017	84,970	85,581	84,954

Options totaling 2,406 are excluded from the above calculation as their effect would have been anti-dilutive. The average market value of the Company's shares for purposes of calculating the dilutive effect of share options was based on quoted market prices during the period.

8. Other (Income) Expenses

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
	(\$)	(\$)	(\$)	(\$)
Foreign exchange (gain) loss	(1,516)	113	6,675	(353)
Other	(644)	552	(458)	768
Other (income) expenses	(2,160)	665	6,217	415

In 2017, the Company's Argentina subsidiary initiated repayment of advances made to it by the Canadian operating company. As a result, any foreign exchange gains and losses from these advances are recorded in profit or loss for the period. Previously, these advances were considered to be part of the net investment and gains or losses arising from these advances were recorded in the Consolidated Statements of Other Comprehensive Income.

9. Cash and Cash Equivalents

As at	September 30, 2018	December 31, 2017
	(\$)	(\$)
Cash	50,439	74,902
Cash equivalents	69,323	79,227
Cash and cash equivalents	119,762	154,129

Cash equivalents are made up of cash invested in money market funds with interest rates up to 2.00%.

10. Short-term investments

As at	September 30, 2018	December 31, 2017
	(\$)	(\$)
Short-term investments	64,725	—

During the second quarter of 2018 the Company invested in a USD \$50,000 term deposit bearing an interest rate of 2.30% maturing in November, 2018.

11. Financial Instruments

The carrying values of financial assets and liabilities approximate their fair value due to the short-term nature of these items. Pason's financial instruments include cash and cash equivalents, short-term investments, trade and other receivables, trade payables and accruals, and stock-based compensation liability.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values.

The three levels of the fair value hierarchy are as follows:

- Level 1 - Quoted prices in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly.
- Level 3 - Inputs that are not based on observable market data.

	Financial Assets at Fair Value			September 30, 2018
	Level 1	Level 2	Level 3	
	(\$)	(\$)	(\$)	(\$)
Cash and cash equivalents	119,762	—	—	119,762
Short-term investments	—	64,725	—	64,725
Total financial assets at fair value	119,762	64,725	—	184,487

12. Approval of Interim Financial Statements

The condensed unaudited consolidated interim financial statements were approved by the Board of Directors on November 7, 2018.

13. Events After the Reporting Period

On November 7, 2018, the Company announced a quarterly dividend of \$0.18 per share on the Company's common shares. The dividend will be paid on December 31, 2018 to shareholders of record at the close of business on December 14, 2018.
