

Gold Production for YE 2025 of ~6.6koz¹ above the mid-point of the annual 6-7koz guidance range

And

Award of Impact Benefit Agreement (“IBA”)

TORONTO, ONTARIO – 8 January 2026 – Amaroq Ltd. (AIM, TSX-V, NASDAQ Iceland: AMRQ, OTCQX: AMRQF), an independent mine development corporation focused on unlocking Greenland’s mineral potential, is pleased to announce year end gold production from its flagship Nalunaq gold mine amounted to ~6.6koz¹, above the mid-point of the annual 6-7koz production range and pre-final refinery assessment.

Highlights

- Year end production of ~6.6koz¹, above the mid point of the 6-7koz guidance range
- Mining and processing rates expected to continue to be consistent into the new year
- Final IBA awarded for the Nalunaq gold mine
- Production guidance and budget for 2026 will be announced in late February 2026

Eldur Olafsson, CEO of Amaroq, commented:

“In what has been a commissioning year for our Nalunaq mine in Southern Greenland, I am very pleased to announce gold production came above the mid point of the guidance range. Since completion of the shutdown in Q4 2025 and restart of operations, the processing unit and mining operations have performed well, in line with our expectations for Phase 1 and with a target to increase the recovery factor up to ~90%, once Phase 2 is complete, in Q2 2026.”

“We are very proud to have had the final impact benefit agreement for our Nalunaq mine approved; it is significant milestone, not only for Amaroq but also demonstrates how a successful mining industry in Greenland is being developed. I would just like to take the opportunity to thank all of our team on the ground, as well as our sub contractors who have worked tirelessly in the construction and commissioning at Nalunaq. I very much look forward to bringing the market more news, as we progress into the new year and phase 2 commissioning.”

About Amaroq

Amaroq's principal business objective is the identification, acquisition, exploration and development of gold and strategic metal assets in Greenland. The Company's flagship asset is the 100%-owned Nalunaq Gold Mine, currently in production and ramp up, and supported by a growing pipeline of high-grade satellite gold targets across South and West Greenland.

Amaroq also acquired a 100% interest in the Black Angel zinc-lead-silver project in West Greenland, historically one of Greenland's highest-grade base metal operations, where the Company is advancing studies to evaluate the potential for future redevelopment as part of its emerging West Greenland Hub strategy.

Beyond gold and base metals, Amaroq controls a broad portfolio of strategic metal licences across South Greenland, including advanced exploration projects at Stendalen (copper-nickel sulphides) and within the Sava Belt, where the Company is exploring for copper, nickel, rare earth elements and other critical minerals.

Amaroq is continued under the Business Corporations Act (Ontario) and wholly owns Nalunaq A/S, incorporated under the Greenland Companies Act
