

Ceylon Graphite Announces Best Ever Assay Results

September 12, 2018, Vancouver – Ceylon Graphite Corp. (“Ceylon Graphite”) (TSX-V: CYL) (OTC: CYLYF) (FSE: CCY) is pleased to announce the assay test results of samples from the large untapped natural graphite vein discovered in late August 2018 at its K1 site in the Karasnagala area in Sri Lanka.

Coordinates of the drill location are E-133102, N-211423. The sample was tested at the laboratory of the Sri Lanka Government’s Geological Survey and Mines Bureau.

RESULTS OF CHEMICAL ANALYSIS

Constituents determined	Contents %
Carbon	97.61
Silica as SiO₂	1.83
Iron as Fe₂O₃	0.28

Note: The analysis was performed on a powdered sample dried at 105 C

“These outstanding test results at 97.61% pure carbon further confirm that our K1 site has virtually the purest naturally occurring graphite on the planet.” said Bharat Parashar, Chief Executive Officer. “In finding such commercially viable, high-quality natural graphite we are now shifting time and resources to preparations for commercial production.”

Ceylon Graphite has six large sized high-quality veins at its K1 site, test results from each showing Carbon content of over 90%.

The Company anticipates there is even more substantial high-quality graphite at lower depths at this site and continues to actively pursue its aggressive exploration of the site as it positions itself for production.

The Company expects to receive its mining license for K1 shortly.

Qualified Person

Robert Marvin, P. Geo (ONT) is a Qualified Person under National Instrument 43-101 and has reviewed and approved the geological information provided in this news release.

About Ceylon Graphite Corp.

Ceylon Graphite Corp is a public company listed on the TSX Venture Exchange (CYL:TSX-V), that is in the business of exploration and development of graphite mines in Sri Lanka. The Government of Sri Lanka has granted the company exploration rights in a land package of over 120km². These exploration grids (each one square kilometer in area) cover areas of historic graphite production from the early twentieth century and represent a majority of the known graphite occurrences in Sri Lanka. Graphite mined in Sri Lanka is known to be some of the purest in the world, and currently accounts for less than 1% of the world graphite production.

FORWARD LOOKING STATEMENTS: *This news release contains forward-looking information as such term is defined in applicable securities laws, which relate to future events or future performance and reflect management's current expectations and assumptions. The forward-looking information includes statements about Ceylon Graphite's grids, Ceylon Graphite's plans to undertake additional drilling and to develop a mine plan, Ceylon Graphite's Mining License application and to commence establishing mining operations. Such forward-looking statements reflect management's current beliefs and are based on assumptions made by and information currently available to Ceylon Graphite, including the assumption that, the drilling exercises will confirm the presence of high quality graphite, sufficient financial resources will be available, the records from the drilling exercises prove to be accurate, there will be no unanticipated delays or costs materially affecting Ceylon Graphite's exploration, development and production, there will be no material adverse change in metal prices, all necessary consents, licenses, permits and approvals will be obtained, including various Local Government Licenses and the market. Investors are cautioned that these forward-looking statements are neither promises nor guarantees and are subject to risks and uncertainties that may cause future results to differ materially from those expected. Risk factors that could cause actual results to differ materially from the results expressed or implied by the forward-looking information include, among other things, an inability to reach a final acquisition agreement, inaccurate results from the drilling exercises, a failure to obtain or delays in obtaining the required regulatory licenses, permits, approvals and consents, an inability to access financing as needed, a general economic downturn, a volatile stock price, labour strikes, political unrest, changes in the mining regulatory regime governing Ceylon Graphite, a failure to comply with environmental regulations and a weakening of market and industry reliance on high quality graphite. Ceylon Graphite cautions the reader that the above list of risk factors is not exhaustive.*

These forward-looking statements are made as of the date hereof and, except as required under applicable securities legislation, Ceylon Graphite does not assume any obligation to update or revise them to reflect new events or circumstances. All of the forward-looking statements made in this press release are qualified by these cautionary statements and by those made in our filings with SEDAR in Canada (available at www.sedar.com)
