

M1 Site “New” Vein one of the largest in Sri Lanka

June 3rd , 2019, Vancouver – Ceylon Graphite Corp. (“Ceylon Graphite”) (TSX-V: CYL) (OTC: CYLYF) (FSE: CCY) today announced that further to its report on the 14th of May 2019, the needle type crystalline graphite vein it discovered 10 feet downhole at its M1 site in the Malsiripura area in Sri Lanka has increased 2x in size with depth (shown below at 20/25ft). The discovery of the widest graphite vein found to date was made in the course of driving a new ventilation shaft at the M1 site and has continued to grow in width as the digging progresses deeper into the rock.

Such a discovery clearly shows the robust exploration potential of the M1 site. No such modern exploration has occurred in one of the worlds best crystalline graphite jurisdictions. The pictures above show the size of the vein. This vein is in the southern section of the GRID.

“The size of this vein is larger than anything we have seen below the surface – it is “Epic” by any standards. We are delighted at the continued growth in the size of the vein.” said Bharat Parashar, Chief Executive Officer. “The M1 site continues to provide fantastic results and will likely be one of the largest graphite finds in Sri Lanka. Ceylon Graphite is looking good to soon start commercial graphite production.’

Qualified Person

About Ceylon Graphite Corp.

Ceylon Graphite Corp, is a public company listed on the TSX Venture Exchange (CYL:TSX-V), that is in the business of exploration and development of graphite mines in Sri Lanka. The Government of Sri Lanka has granted the company exploration rights in a land package of over 120km². These exploration grids (each one square kilometer in area) cover areas of historic graphite production from the early twentieth century and represent a majority of the known graphite occurrences in Sri Lanka. Graphite mined in Sri Lanka is known to be some of the purest in the world, and currently accounts for less than 1% of the world graphite production.

FORWARD LOOKING STATEMENTS: *This news release contains forward-looking information as such term is defined in applicable securities laws, which relate to future events or future performance and reflect management's current expectations and assumptions. The forward-looking information includes statements about Ceylon Graphite's grids, Ceylon Graphite's plans to undertake additional drilling and to develop a mine plan, Ceylon Graphite's Mining License application and to commence establishing mining operations. Such forward-looking statements reflect management's current beliefs and are based on assumptions made by and information currently available to Ceylon Graphite, including the assumption that, the drilling exercises will confirm the presence of high quality graphite, sufficient financial resources will be available, the records from the drilling exercises prove to be accurate, there will be no unanticipated delays or costs materially affecting Ceylon Graphite's exploration, development and production, there will be no material adverse change in metal prices, all necessary consents, licenses, permits and approvals will be obtained, including various Local Government Licenses and the market. Investors are cautioned that these forward-looking statements are neither promises nor guarantees and are subject to risks and uncertainties that may cause future results to differ materially from those expected. Risk factors that could cause actual results to differ materially from the results expressed or implied by the forward-looking information include, among other things, an inability to reach a final acquisition agreement, inaccurate results from the drilling exercises, a failure to obtain or*

delays in obtaining the required regulatory licenses, permits, approvals and consents, an inability to access financing as needed, a general economic downturn, a volatile stock price, labour strikes, political unrest, changes in the mining regulatory regime governing Ceylon Graphite, a failure to comply with environmental regulations and a weakening of market and industry reliance on high quality graphite. Ceylon Graphite cautions the reader that the above list of risk factors is not exhaustive.

These forward-looking statements are made as of the date hereof and, except as required under applicable securities legislation, Ceylon Graphite does not assume any obligation to update or revise them to reflect new events or circumstances. All of the forward-looking statements made in this press release are qualified by these cautionary statements and by those made in our filings with SEDAR in Canada (available at www.sedar.com)
