ADAMERA MINERALS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the Nine months ended September 30, 2025

(Unaudited; Expressed in Canadian Dollars)

1. Nature and Continuance of Operations and Going Concern

Adamera Minerals Corp. (“Adamera” or “the Company”) was incorporated in February 2013 pursuant to an amalgamation under the Business Corporation Act (British Columbia). The Company’s common shares are listed for trading on the TSX Venture Exchange (“Exchange”) under the symbol “ADZ”. The Company also trades on the OTC Marketplace in the United States under the symbol “DDNFF”. The Company is in the process of exploring its mineral properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. The Company is considered to be in the exploration stage and does not have operating cash flows.

The Company’s head office, principal address and registered and records office is 1100, 1111 Melville Street, Vancouver, British Columbia, Canada, V6E 3V6.

These condensed consolidated interim financial statements of the Company have been prepared in accordance with International Accounting Standards (“IFRS”) on a going concern basis, which contemplates that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, these condensed consolidated interim financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern and such adjustments could be material.

The Company’s continuing operations as intended are dependent upon the extent to which it can successfully develop its mineral properties and whether those assets contain ore reserves that are economically recoverable, and on its ability to raise additional funds by way of equity financings to meet the Company’s liabilities and commitments as they come due. To date the Company has not generated revenue and incurred a loss for the nine months ended September 30, 2025 of \$409,158. Although the Company has been successful at raising funds in the past through the issuance of share capital, it is uncertain whether it will be able to continue this financing in the future. These material uncertainties may cast significant doubt on the Company’s ability to continue as a going concern.

2. Statement of Compliance and Basis of Preparation

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with IFRS as issued by the International Accounting Standards Board (“IASB”) and interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”).

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for financial instruments that have been measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The preparation of these condensed consolidated interim financial statements in conformity with IASB requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements.

These condensed consolidated interim financial statements, including comparatives, have been prepared on the basis of IFRIC Accounting Standards that are published at the time of preparation.

ADAMERA MINERALS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the Nine months ended September 30, 2025

(Unaudited; Expressed in Canadian Dollars)

3. Material Accounting Policy Information

These condensed consolidated interim financial statements have been prepared in accordance with IFRS as issued by the IASB on a basis consistent with those followed in the Company's most recent annual financial statements for the year ended December 31, 2024.

These condensed consolidated interim financial statements do not include all note disclosures required by IFRS for annual financial statements, and therefore should be read in conjunction with the annual financial statements for the year ended December 31, 2024. In the opinion of management, all adjustments considered necessary for fair presentation of the Company's financial position, results of operations, and cash flows have been included. Operating results for the nine-month period ended September 30, 2025 are not necessarily indicative of the results that may be expected for the current fiscal year ending December 31, 2025.

4. Financial and Capital Risk Management

The Company classifies its financial instruments into categories as follows: cash and receivables as financial assets at amortized cost; accounts payable and due to/from related parties as other financial liabilities at amortized cost. The fair value of these financial instruments approximates their carrying value due to their short-term nature.

Fair Value

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – unadjusted quoted prices in active markets for identical assets and liabilities;
- Level 2 – inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – inputs that are not based on observable market data.

Credit Risk

Credit risk is the risk of a financial loss to the Company if counterparty to a financial instrument fails to meet its contractual obligations.

The Company's cash is primarily held in major Canadian financial institutions, consequently the credit risk on cash is assessed as low. The Company's receivables consist of cost recoveries and reimbursements. Management believes that the credit risk concentration with respect to financial instruments included in receivables is minimal.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet the financial obligations as they fall due. The Company ensures that there is sufficient capital in order to meet annual business requirements, after taking into account administrative, property holding and exploration budgets. As the Company does not have operating cash flow, the Company has relied primarily on equity financings to meet its capital requirements. The Company assessed liquidity risk as high.

Interest Rate Risk

Interest rate risk is the risk of change in the borrowing rates of the Company. The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

ADAMERA MINERALS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the Nine months ended September 30, 2025

(Unaudited; Expressed in Canadian Dollars)

4. Financial and Capital Risk Management (continued)

Foreign Exchange Risk

Foreign exchange risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company has operations in the USA and Canada; however, its net monetary position in US dollars is minimal and therefore is not exposed to significant foreign exchange risk.

Commodity Risk

Commodity risk is the risk on financial performance due to fluctuations in the prices of commodities. The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market price of commodities for which it is exploring. The Company closely monitors commodity prices to determine the appropriate course of action to be taken.

Capital Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company defines its capital as cash and shareholder's equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares periodic expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash treasury on demand deposit in an interest bearing Canadian chartered bank account. The Company is not subject to any externally imposed restrictions on its capital. There have been no changes to the Company's management of capital during the nine months ended September 30, 2025.

5. Marketable Securities

On June 15, 2021, the Company received 1,000,000 shares of Churchill Resources Inc. pursuant to an agreement entered into in 2014 for the sale of the data of Amaruk Diamond property (Note 10(e)(iv)). The shares are measured and presented at fair value using the observable market share price as at the date of the statements of financial position. The gain or loss as a result of the re-measurement is recorded through profit and loss ("FVTPL").

	\$ 146,312	\$ 202,184

Exploration deposits consist of bonds posted for the exploration properties which are held until reclamation is completed at the site.

8. Right-of-Use Assets and Lease Liabilities

The Company leased an office space under a non-cancellable operating lease for a period of five years expiring on August 31, 2025. On the commencement date, the Company recognized \$70,774 of right-of-use assets ("ROU") and \$1,257,367 of lease liabilities. The ROU asset of \$70,774 represents the portion of office space used by the Company and the residual \$1,186,593 represents the portion of office space used by sublessees.

The Company is liable for the liability under the head lease with the landlord. Sublessees have signed agreements for some of the offices within the area under the head lease, and the Company is responsible for the collection of any rental amounts from them.

The right-of-use assets and lease liabilities in relation to the extended lease are as follows:

17. Subsequent Event

On October 9, 2025, the Company announced a non-brokered private placement financing to raise gross proceeds of up to \$724,000 through the issuance of both share units and flow-through share units. The financing will finance near-term exploration drilling on the Company's Flag Hill South property. In addition, it will finance continuing systematic exploration on its South Hedley project.

The financing will consist of two components:

1. Up to 5.6 million units will be issued at a price of \$0.09 per unit for gross proceeds of \$504,000. Each unit will consist of one common share and one common share purchase warrant. Each warrant will be exercisable at a price of \$0.15 for a period of two years from the date of issuance. Planned use of proceeds from the unit financing includes working capital and exploration drilling on the Company's gold projects in Washington State, United States. If the closing market price of the Company's common shares on the Exchange is \$0.20 or more over a period of 10 consecutive trading days at any time after the date that is four months and one day after the respective closing, the warrants will expire on the 30th day after the 10 consecutive trading days at or above \$0.20 unless exercised by the holder on or before the accelerated expiry date.
2. Up to 2 million flow-through units will be issued at a price of \$0.11 per unit for gross proceeds of \$220,000. Each FT unit will consist of one common share and one-half common share purchase warrant. Each full warrant will be exercisable at a price of \$0.15 for a period of two years from the date of issuance to purchase a non-flow-through share. The warrants associated with the FT units will have the same accelerated provision as the unit financing. Flow-through funds will be used for qualifying Canadian exploration expenditures on the Company's newly identified gold, copper and zinc prospects on the South Hedley project in Southern British Columbia and may be eligible for the 30% critical mineral exploration tax credit.
