### **Description of Business**

The Company was incorporated in British Columbia under the Company Act of British Columbia on October 2, 1984 as Consolidated Goldwin Ventures Inc. and effectively on April 30, 2012 changed its name to WestKam Gold Corp. The Company's strategy is to identify, acquire, explore and develop precious and base metal deposits amenable to low production costs and high operating margins, focusing on properties with low initial entry costs.

### **Overall Performance and Outlook**

The Company is currently focusing its exploration efforts on the Bonaparte property located in British Columbia, Canada. During the fiscal year ended October 31, 2014, the Company completed the acquisition of its 100% interest in the Bonaparte claims and during the fiscal year ended October 31, 2015, the Company completed a 7-hole drill program to evaluate continuity on the "Discovery Zone. Highlights from the 2015 drill program include the discovery of a new vein, 450 metres east of the Crow/Grey Jay/Owl veins of the Discovery Zone (DZ). This new vein discovery from DDH-15-05 assayed 7.88 g/t Gold, (0.253 oz/t Gold), 38.4 g/t Silver, 0.33% Copper and 28.6 g/t Tellurium over 1.0 meters. The Company also identified a large new target area on the Company's Bonaparte Property some 200 metres from the eastern edge of the original Discovery Zone where they encountered veins in granodiorite with the same type of mineralization as the Discovery Zone. The Company will continue to evaluate similar opportunities for base and precious metals projects located in Canada.

During the fiscal years ended October 31, 2016 and 2017, the Company's exploration campaigns focused on advancing the decline towards the Grey Jay/Crow vein systems in anticipation of proceeding with a planned 10,000-tonne bulk sample program on the Discovery Zone. A proposed 12-hole, 2,440m drill program is planned to further evaluate the Crow vein structure prior to recommencing work on the decline in 2018.

During fall 2018, the Company completed a 591m, eight-hole drill program to further evaluate mineralization along the Crow-Grey Jay-Owl vein structure. Results from this exploration program were evaluated and incorporated into plans for future exploration drilling in fiscal 2020.

The Company will continue to advance its Bonaparte property and to evaluate similar opportunities for base and precious metals projects located in Canada.

### **Company Activity**

#### **IFRS 16, Leases:**

IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation, and disclosure of leases including guidance for both parties to contract, the lessee and the lessor. The new standard eliminates the classification of leases as either operating or finance leases as is required by IAS 17 and instead introduces a single lessee accounting model.

## **Financial Instruments and Risk Management**

### **Fair values**

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values. The Company classifies the fair value of the financial instruments according to the following hierarchy based on the amount of observable inputs used to value the instrument:

- Level 1 - inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets;
- Level 2 - inputs to the valuation methodology included quoted prices for identical assets or liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace; and,
- Level 3 - inputs to the valuation methodology are not based on observable market data.

The fair value of cash is measured at Level 1 of the fair value hierarchy. The carrying value of receivables, reclamation bonds, accounts payable and accrued liabilities and notes payable are measured at amortized cost using effective interest rate.

### **Financial instrument risk exposure and risk management**

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company considers the fluctuations of financial markets and seeks to minimize potential adverse effects on financial performance.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management process.

### **Credit risk**

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash and receivables. The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company's receivables consist primarily of grants due from federal government agencies. The maximum exposure to credit risk is equal to the fair value or carrying value of the financial assets.

### **Liquidity risk**

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. The Company considers its current liabilities to be aged as follows:

As at October 31, 2019

	Total	Up to 3 months	3 – 12 months
Accounts payable and accrued liabilities	\$ 1,252,168	\$ 62,635	\$ 1,189,533
	<u>\$ 1,252,168</u>	<u>\$ 62,635</u>	<u>\$ 1,189,533</u>

As at October 31, 2018

	Total	Up to 3 months	3 – 12 months
Accounts payable and accrued liabilities and notes payable	\$ 953,336	\$ 77,220	\$ 876,116
	<u>\$ 953,336</u>	<u>\$ 77,220</u>	<u>\$ 876,116</u>

### **Interest rate risk**

The Company has cash balances. The Company's current policy is to invest excess cash in investment grade short-term demand deposit certificates issued by its banking institutions. The company periodically monitors the investments it makes and is satisfied with the credit rating of its banks. The Company is marginally exposed to interest rate risk. The Company's bank account earns interest income at variable rates and its notes payable carry fixed interest rates. The fair value of its portfolio is relatively unaffected by changes in short-term interest rates.

**Foreign currency risk**

The Company has limited exposure to foreign currency risk on currency fluctuations related to monetary items with a settlement currency other than Canadian dollars.

**Commodity price risk**

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold and other precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.
