

WesCan Energy Corp.
STATEMENT OF RESERVES DATA
AND OTHER OIL AND GAS INFORMATION
(Form 51-101F1)

Part 1 – Date of Statement

This statement of reserves data and other oil and gas information is dated July 18, 2019

The effective date is March 31, 2019

The preparation date is July 18, 2019

Part 2 – Disclosure of Reserves Data

The following is a summary of the oil and natural gas reserves and the value of future net revenue of WesCan Energy Corp. (the "Company") as evaluated by McDaniel & Associates Consultants Ltd. (McDaniels) as at March 31, 2019, and dated July 18, 2019 (the "McDaniel Report"). McDaniels is an independent qualified reserves evaluator and auditor.

All evaluations of future revenue are after the deduction of future income tax expenses, unless otherwise noted in the tables, royalties, development costs, production costs and well abandonment costs but before consideration of indirect costs such as administrative, overhead and other miscellaneous expenses. The estimated future net revenue contained in the following tables does not necessarily represent the fair market value of the Company's reserves. There is no assurance that the forecast price and cost assumptions contained in the McDaniel Report will be attained and variances could be material. Other assumptions and qualifications relating to costs and other matters are included in the McDaniel Report. The recovery and reserves estimates on the Company's properties described herein are estimates only. The actual reserves on the Company's properties may be greater or less than those calculated.

SUMMARY OF OIL AND GAS RESERVES BASED ON FORECAST PRICES AND COSTS AS AT MARCH 31, 2019

Reserves Category	Company Reserves ⁽¹⁾

Notes:

- "Gross Reserves" are the Company's working interest (operating or non-operating) share before deducting of royalties and without including any royalty interests of the Company. "Net Reserves" are the Company's working interest (operating or non-operating) share after deduction of royalty obligations, plus the Company's royalty interests in reserves.
- "Proved" reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.
- "Probable" reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.
- "Possible" reserves are those additional reserves that are less certain to be recovered than probable reserves. It is unlikely that the actual remaining quantities recovered will exceed the sum of the estimated proved plus probable plus possible reserves.
- "Developed" reserves are those reserves that are expected to be recovered from existing wells and installed facilities or, if facilities have not been installed, that would involve a low expenditure (e.g. when compared to the cost of drilling a well) to put the reserves on production.
- "Developed Producing" reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut-in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.
- "Developed Non-Producing" reserves are those reserves that either have not been on production, or have previously been on production, but are shut in, and the date of resumption of production is unknown.
- "Undeveloped" reserves are those reserves expected to be recovered from known accumulations where a significant expenditure (for example, when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned.
- Includes associated, non-associated and solution gas where applicable.

Part 3 – Pricing Assumptions

The following tables detail the benchmark reference prices for the regions in which the Company operated, as at March 31, 2019 reflected in the reserves data disclosed above under "Part 2 – Disclosure of Reserves Data". The forecast price assumptions assume the continuance of current laws and regulations and take into account inflation with respect to future operating and capital costs. There will be adjustments to field prices from the benchmarks below.

Part 4 – Reconciliation of Changes in Reserves

The following table sets forth a reconciliation of the changes in the Company's gross reserves as at March 31, 2019 against such reserves as at March 31, 2019 based on the forecast price and cost assumptions.

RECONCILIATION OF COMPANY GROSS RESERVES BY PRINCIPAL PRODUCT TYPE BASED ON FORECAST PRICES AND COSTS AS AT MARCH 31, 2019

	PDP	PNP	PUD	TP	PPDP	PPNP	PPUD	TPP

Part 5 – Additional Information Relating to Reserves Data

Undeveloped Reserves

Reserves classified as undeveloped are those that are expected to be recovered from known accumulations where a significant expenditure (eg. The cost of drilling and completing a well) is required to render them capable of production. These accumulations are known due to production data and other information learned by exploration in the area where the property is located. Probable undeveloped reserves are characterized by a lower certainty of recovery than proven undeveloped reserves.

The following table sets forth the net proved and probable undeveloped reserves, each by product type, attributed to our assets for the years ended March 31, 2019, 2018, 2017, and, in the aggregate, before that time based on forecast prices and costs.

Factors	L & M Oil (Mbbbl)		Natural Gas (MMcf)		Oil Equivalent (Mboe)	
	1st Attributed	Cumulative at Year End	1st Attributed	Cumulative at Year End	1st Attributed	Cumulative at Year End
Proved Undeveloped Reserves						
Priorthereto	-	-	-	-	-	-
March 31, 2017	101.8	101.8	67.4	67.4	113.1	113.1
March 31, 2018	99.8	99.8	67.4	67.4	111.0	111.0
March 31, 2019	99.8	99.8	67.4	67.4	113.1	113.1
Proved & Probable Undeveloped Reserves						
Priorthereto	-	-	-	-	-	-
March 31, 2017	229.2	229.2	143.4	143.4	253.1	253.1
March 31, 2018	224.9	224.9	143.4	143.4	248.8	248.8
March 31, 2019	225.0	225.0	143.4	143.4	253.2	253.2

Significant Factors or Uncertainties

The estimation of reserves requires significant judgment and decisions based on available geological, geophysical, engineering and economic data. These estimates can change substantially as additional information from ongoing development activities and production performance becomes available and as economic and political conditions impact oil and gas prices and costs change. The Company's estimates are based on current production forecast, prices and economic conditions. All of the Company's reserves were evaluated by McDaniel, an independent engineering firm.

As circumstances change and additional data becomes available, reserve estimates also change. Based on new information, reserves estimates are reviewed and revised, either upward or downward, as warranted. Although every reasonable effort has been made by the Company to ensure that reserves estimate are accurate, revisions may arise as new information becomes available. As new geological, production and economic data is incorporated into the process of estimating reserves the accuracy of the reserve estimate improves.

Certain information regarding the Company set forth in this report, including management's assessment of the Company's future plans and operations contain forward-looking statements that involve substantial known and unknown risks and uncertainties. These risks include, but are not limited to: the risks associated with the oil and gas industry, commodity prices and exchange rates; industry related risks could include, but are not limited to, operational risks in exploration, development and production, delays or changes in plans, risks associated with the uncertainty of reserve estimates, health and safety risks and the uncertainty of estimates and projections of production, costs and expenses. Competition from other producers, the lack of available qualified personnel or management, stock market volatility and ability to access sufficient capital from internal and external sources are additional risks the Company faces in this market. The Company's actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward looking statements and accordingly, no assurance can be given that any events anticipated by the forward looking statements will transpire or occur, if any of them do, what benefits the Company can derive from. The reader is cautioned not to place undue reliance on this forward looking information.

Future Development Costs

The following table shows the development costs anticipated in the next five years, which have been deducted in the estimation of the future net revenues of the proved and probable reserves.

	Total Proved Estimated Using Forecast Prices and Costs (Undiscounted) (\$M)	Total Proved Plus Probable Estimated Using Forecast Prices and Costs (Undiscounted) (\$M)
2018	1,340	1,965
2019	1,264	1,879
2020	-	-
2021	-	-
2022	-	-
Total for five years	2,604	3,844
Remainder	-	-
Total for all years	2,604	3,844

The Company has been successful in raising its required capital through equity financings and plans to continue to do so for the development costs specified above. The effect of the costs of the expected funding would have no impact on the revenues or reserves currently being reported.

Part 6 – Other Oil and Gas Information

Oil and Gas Properties and Wells

Major property

WesCan's 16 operated batteries well sites are located in the Provost area of east-central Alberta. The company owns and operated a 100% working interest in these assets which are productive from multiple zones in the Mannville.

The following table sets forth the number of wells in which the Company held a working interest as at March 31, 2019.

	Oil		Natural Gas	
	Gross	Net	Gross	Net
Producing	17.0	16.4	0	0
Non-producing	6.0	6.0	0	0
Total	23.0	22.4	0	0

The Company has a working interest position in the following acreage:

	<u>Gross (acres)</u>	<u>Net (acres)</u>
Developed	1,719	1,618
Undeveloped	751	751

Forward Contracts

As of March 31, 2019 the Company had no forward contracts.

Additional Information Concerning Abandonment and Reclamation Costs

McDaniel has included abandonment costs in the Undiscounted Total Proved \$2,041M and \$2,249M Undiscounted for Total Proved & Probable and going forward will be to only apply abandonment and reclamation costs to undeveloped locations.

Tax Horizon

The Company is expected to become taxable in 2019 under the proved plus probable cash flows forecast in this report.

Costs Incurred

The following table summarizes the capital expenditures made by the Company on oil and natural gas properties for the year ended March 31, 2019.

Property Acquisition Costs (\$M)		Exploration Costs (\$M)	Development Costs (\$M)
Proved Properties	Unproved Properties		
0	0	0	0

Exploration and Development Activities

The Company did not participate in drilling any exploration or development wells during its 2019 financial year:

	Exploratory Wells		Development Wells	
	Gross	Net	Gross	Net
Oil Wells	-	-	-	-
Gas Wells	-	-	-	-
Service Wells	-	-	-	-
Dry Holes	-	-	-	-
Total Completed Wells	0	0	0	0

Production Estimates

The following table sets forth the volume of production estimated by McDaniel's for 2019.

AREA	TOTAL PROVED RESERVES			
	Light and Medium Oil (Mbbbl)	Heavy Oil (Mbbbl)	Natural Gas (MMscf)	Natural Gas Liquids (Mbbbl)
Provost, Alberta	234.8	70.5	365.5	11.0
Total for all areas	234.8	70.5	365.5	11.0

TOTAL PROVED PLUS PROBABLE RESERVES

AREA	Light and Medium Oil (Mbbbl)	Heavy Oil (Mbbbl)	Natural Gas (MMscf)	Natural Gas Liquids (Mbbbl)
Provost, Alberta	394.5	87.0	521.4	15.6
Total for all areas	394.5	87.0	521.4	15.6

These values are gross to Company's working interest before the deduction of royalties payable to others.

Production History

The following table sets forth certain information in respect of production, product prices received, royalties, production costs and netbacks received by the Company for each quarter of its most recently completed financial year:

	Three Months Ended June 30, 2018	Three Months Ended September 30, 2018	Three Months Ended December 31, 2018	Three Months Ended March 31, 2019
Avg. Daily Production				
Light and Medium Oil (bbl/d)	94.0	103.0	92.0	90.0
Natural Gas (Mscf/d)	184	206	240	92
Avg. Net Prices Received (\$/boe)	49.68	65.18	23.30	47.39
Royalties (\$/boe)	5.49	4.86	3.10	5.29
Production Costs(\$/boe)	27.39	27.57	29.42	34.33
Netback Received (\$/boe)	16.80	32.75	-9.22	7.77

ABBREVIATIONS AND CONVERSION

In this document, the abbreviations set forth below have the following meanings:

Oil and Natural Gas Liquids

bbl	barrel
bbls	barrels
Mbbls	thousand barrels
MMbbls	million barrels
Mstb	1,000 stock tank barrels
bbls/d	barrels per day
NGLs	natural gas liquids stock
stb	tank barrels of oil
stb/d	stock tank barrels of oil per day

Natural Gas

Mscf	thousand standard cubic feet
MMscf	million standard cubic feet
Mscf/d	thousand standard cubic feet per day
MMscf/d	million standard cubic feet per day
MMBTU	million British Thermal Units
Bscf	billion standard cubic feet
GJ	gigajoule

Other

AECO	Nisku Gas Storage's natural gas storage facility located at Suffield, Alberta.
BIT	Before Income Tax
AIT	After Income Tax
boe	barrel of oil equivalent on the basis of 1 boe to 6 Mscf of natural gas. Boe's may be misleading, particularly if used in isolation. A boe conversion ratio of 1 boe for 6 Mscf is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.
boe/d	barrel of oil equivalent per day
m ³	cubic metres
\$M	thousands of dollars
WTI	West Texas Intermediate, the reference price paid in U.S. dollars at Cushing, Oklahoma for crude oil of standard grade
