INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Lithium Ion Energy Limited

Opinion

We have audited the consolidated financial statements of Lithium Ion Energy Limited and its subsidiaries (the Company), which comprise the consolidated balance sheets as at December 31, 2024 and 2023, and the consolidated statements of loss and comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the company as at December 31, 2024 and 2023, and the consolidated financial performance and consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the company in accordance with ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter - Material Uncertainty Relating to Going Concern

We draw your attention to Note 1 in the consolidated financial statements, which indicates that the Company has incurred ongoing losses during the year ended December 31, 2024 and had a cumulative deficit as at December 31, 2024. As stated in Note 1, these events or conditions, along with other matters as set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2023. These matters were addressed in the context of the audit of the consolidated financial statements as a whole, and in forming the auditor's opinion thereon, and we do not provide a separate opinion on these matters. For the matter below, our description of how our audit addressed the matter is provided in that context.

In addition to the matter described in the *Emphasis of Matter - Material Uncertainty Related to Going Concern* section, we have determined that matters described below to be key audit matters to be communicated in our auditor's report.

(continues)

Independent Auditor's Report to the Shareholders of Lithium Ion Energy Limited
(continued)

Existence and Recoverability of Exploration and Evaluation Assets

We refer to financial statement summary of material accounting policy information on exploration and evaluation assets and related disclosure in Note 4.

At December 31, 2024, the combined value of exploration and evaluation and related assets amounted to \$1,267,166.

At each reporting period end, management applies judgment in assessing whether there are any indicators of impairment relating to mining claims and deferred exploration costs. If there are indicators of impairment, the recoverable amount of the related asset is estimated in order to determine the extent of any impairment. Exploration and evaluation assets are assessed for impairment if sufficient evidence exists to determine technical feasibility and commercial viability, and facts and circumstances suggest the carrying amount exceeds the recoverable amount. Once technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to the area of interest are first tested for impairment and then reclassified to mining property development assets within property and equipment.

Recoverability of the carrying amount of any exploration and evaluation assets is dependable on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

We considered this a key audit matter due to the significance of the deferred exploration and evaluation assets balance and the judgments made by management in its assessment of indicators of impairment related to mining claims and deferred exploration costs, which have resulted in a high degree of subjectivity in performing audit procedures related to these judgments applied by management.

To address the risk for material misstatement on exploration and evaluation and related assets, our audit procedures included, amongst other procedures:

- Assessing the compliance of Company's accounting policies over exploration and evaluation assets with applicable accounting standards in IFRS 6.
- Obtaining, for all mining claims, by reference to government registries, evidence to support the right to explore the area and claim expiration dates through examination of applicable licenses.
- Assessing the exploration and evaluation asset valuation processes and practices.
- Enquiring with management and reviewing budgets and other documentation as evidence that further exploration and evaluation activities in the area of interest will be continued in the future.
- Assessing whether any data exists to suggest that the carrying value of the exploration and evaluation assets is unlikely to be recovered through development or sale.

We assessed the adequacy of the Company's disclosures related to exploration and evaluation assets.

Other Information

Management is responsible for the other information. The other information comprises the information, other than the consolidated financial statements and our auditor's report thereon, which includes Management's Discussion and Analysis.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

(continues)

Independent Auditor's Report to the Shareholders of Lithium Ion Energy Limited
(continued)

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.

(continues)

Independent Auditor's Report to the Shareholders of Lithium Ion Energy Limited
(continued)

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Justin Rousseau.

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

1. NATURE AND CONTINUANCE OF OPERATIONS

Lithium Ion Energy Ltd. (Formerly Ion Energy Ltd.) was incorporated under the Business Corporation Act (Alberta) on June 5, 2017. On September 1, 2023, the Company changes its name from Ion Energy Ltd. to Lithium Ion Energy Ltd. The head office of the Company is located at Suite 400, 90 Adelaide Street West, Toronto, Ontario M5H 4A6. The registered office of the Company is located 1250 – 639 5th Avenue S.W. Calgary Alberta T2P 0M9. The Company trades on the TSX Venture Exchange under the trading symbol "ION", on the OTC under the symbol "IONGF", and on the Frankfurt Stock Exchange under the symbol "ZA4".

The Company is engaged in the business of the acquisition and exploration of mineral properties with a focus on advancing projects containing lithium mineralization. The Company is actively advancing its mineral project located in western Mongolia.

These consolidated financial statements are prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. As at December 31, 2024, the Company has a deficit of \$15,213,006 (December 31, 2023 - \$13,013,158). The Company is in the process of exploring and developing its mineral properties and has not yet determined whether those properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to fund property commitments and to complete the exploration and development of the properties and upon achieving future profitable production or proceeds from the disposition thereof.

There is a material uncertainty related to these conditions that may cast significant doubt regarding the Company's ability to continue as a going concern.

The Company has financed its operations primarily through the issuance of common shares since inception. The Company continues to seek capital through various means including the issuance of equity and/or debt. While the Company has been successful in securing financing in the past, there is no assurance that it will be able to do so in the future or on terms that are favorable to the Company. Accordingly, these consolidated financial statements do not give effect to adjustments, if any, that would be necessary should the Company be unable to continue as a going concern. If the going concern assumption was not used, then the adjustments required to report the Company's assets and liabilities on a liquidation basis could be material to these consolidated financial statements. The Company plans to obtain loans of \$100,000 to satisfy short-term liquidity requirements.

2. MATERIAL ACCOUNTING POLICY INFORMATION

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the IFRS Interpretations Committee ("IFRIC").

(b) Basis of presentation

These consolidated financial statements have been prepared on a historical cost basis, with the exception of financial instruments classified at fair value through profit or loss ("FVTPL"). In addition, these consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

In the preparation of these consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amount of expenses during the period. Actual results could differ from these estimates.

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

2. MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

(c) Basis of measurement

The consolidated financial statements are presented in Canadian dollars, which is the Company's functional and presentation currency. The functional currency of Ion Energy Holdings Inc. and 1402166 B.C. Ltd. is also the Canadian dollar. The functional currency of Ion Energy LLC is the Mongolian tugrik.

(d) Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and its wholly owned subsidiaries, Ion Energy Holdings Inc. ("Holdings Inc.") a company incorporated in Canada on November 1, 2019 and Ion Energy LLC ("Ion Mongolia") a company incorporated in Mongolia on October 4, 2017. Ion Energy Holdings Inc. is a wholly owned subsidiary of Ion Energy Ltd. Ion Energy LLC is a wholly owned subsidiary of Ion Energy Holdings Inc. On August 10, 2023, the Company acquired 100% of 1402166 B.C. Ltd. The Company has consolidated the assets, liabilities and expenses of its subsidiaries after the elimination of inter-company transactions and balances. The subsidiary's principal business is the acquisition and development of mineral properties.

(e) Financial instruments

Below is a summary showing the classification and measurement bases of the Company's financial instruments.

Classification	IFRS 9
Cash and cash equivalents	FVTPL
Accounts payable and accrued liabilities	Amortized cost
Loans payable	Amortized cost
License purchase payable	Amortized cost

Financial assets

Financial assets are classified as either financial assets at FVTPL, amortized cost, or fair value through other comprehensive income. The Company determines the classification of its financial assets at initial recognition.

i. Financial assets recorded at FVTPL

Financial assets are classified as FVTPL if they do not meet the criteria of amortized cost or fair value through other comprehensive income. Gains or losses on these items are recognized in profit or loss.

ii. Investments recorded at fair value through other comprehensive income ("FVOCI")

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to measure the investment at FVOCI whereby changes in the investment's fair value (realized and unrealized) will be recognized permanently in OCI with no reclassification to profit or loss. The election is made on an investment-by-investment basis.

iii. Amortized cost

Financial assets are classified as measured at amortized cost if both of the following criteria are met and the financial assets are not designated as at fair value through profit and loss: 1) the objective of the Company's business model for these financial assets is to collect their contractual cash flows; and 2) the asset's contractual cash flows represent "solely payments of principal and interest".

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(e) Financial instruments (Continued)

Financial liabilities

Financial liabilities are classified as either financial liabilities at fair value through profit or loss or at amortized cost. The Company determines the classification of its financial liabilities at initial recognition.

i. Amortized cost

Financial liabilities are classified as measured at amortized cost unless they fall into one of the following categories: financial liabilities at FVTPL, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition, financial guarantee contracts, commitments to provide a loan at a below-market interest rate, or contingent consideration recognized by an acquirer in a business combination.

ii. Financial liabilities recorded fair value through profit or loss ("FVTPL")

Financial liabilities are classified as FVTPL if they fall into one of the five exemptions detailed above.

Fair Value Hierarchy

IFRS establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described as follows:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 – Valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors which can be substantially observed or corroborated in the marketplace.

Level 3 – Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

Cash, accounts payable and accrued liabilities, loans payable, and license purchase payable are level 1 financial instrument measured at fair value on the consolidated balance sheets.

Transaction costs

Transaction costs associated with financial instruments, carried at FVTPL, are expensed as incurred, while transaction costs associated with all other financial instruments are included in the initial carrying amount of the asset or the liability.

Subsequent measurement

Instruments classified as FVTPL are measured at fair value with unrealized gains or losses recognized in profit or loss. Instruments classified as amortized cost are measured at amortized cost using the effective interest rate method. Instruments classified as FVOCI are measured at fair value with unrealized gains or losses recognized in other comprehensive income.

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(e) Financial instruments (Continued)

Derecognition

The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled, or expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

Expected Credit Loss Impairment Model

IFRS 9 introduced a single expected credit loss impairment model, which is based on changes in credit quality since initial application.

The carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

(f) Cash and cash equivalents

Cash and cash equivalents are comprised of cash on hand, guaranteed investment certificates (GICs) and deposits held in trust and with banks that are readily convertible into known amounts of cash with original maturity of three months or less.

(g) Property and equipment

Property and equipment include furniture at the Company's head office and equipment of the Baavhai-Uul Project. Property and equipment are recorded at cost less accumulated depreciation and accumulated impairment losses. The carrying amounts of property and equipment are depreciated using the straight-line method over the estimated useful life of the asset which is 10 years. Management reviews the estimated useful lives, residual values and depreciation and depletion methods of the Company's property and equipment at the end of each financial year, and when events and circumstances indicate that such a review should be made. Changes to estimated useful lives, residual values or depreciation methods resulting from such review are accounted for prospectively.

Impairment

The carrying values of property and equipment are reviewed for impairment at each balance date, with recoverable amount being estimated when events or changes in circumstances indicate that the carrying value may be impaired. The recoverable amount of property and equipment is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For an asset that does not generate largely independent cash inflows, a recoverable amount is determined for the cash-generating unit to which the asset belongs, unless the asset's value in use can be estimated to approximate fair value. An impairment exists when the carrying value of an asset or cash-generating unit exceeds its estimated recoverable amount. The asset or cash generating unit is then written down to its recoverable amount.

Derecognition

Upon disposal or abandonment, the carrying amounts of property and equipment are derecognized and any associated gains or losses are recognized in profit or loss. The cost and accumulated depreciation and impairment of fully depleted mineral properties and fully depreciated equipment are derecognized.

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(h) Exploration and evaluation and pre-development expenditure

Exploration and evaluation expenditures include the costs of acquiring licenses, exploration and evaluation activity, and the fair value, at the date of acquisition, of exploration and evaluation assets acquired in a business combination. Exploration and evaluation expenditures are capitalized.

Costs incurred before the Company has obtained legal rights to explore an area are recognized as exploration and evaluation expense in the consolidated statement of loss and comprehensive loss. Acquisition costs, including general and administration costs, are only capitalized to the extent that these costs can be related directly to operational activities in the relevant area of interest where it is considered likely to be recoverable by future exploration or sale or where the activities have not reached a stage which permits a reasonable assessment of the existence of reserves.

Exploration and evaluation assets are assessed for impairment if sufficient evidence exists to determine technical feasibility and commercial viability, and facts and circumstances suggest the carrying amount exceeds the recoverable amount. Once technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to the area of interest are first tested for impairment and then reclassified to mining property development assets within property and equipment.

Recoverability of the carrying amount of any exploration and evaluation assets is dependable on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

Actual costs incurred upon settlement of the decommissioning liability are charged against the provision to the extent the provision was established.

(i) Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax, risk-free rate that reflects current market assessments of the time value of money and the risks specific to the liability. Provisions are not recognized for future operating losses.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognizes any impairment loss on associated assets.

(j) Restoration, rehabilitation and environmental obligations

A legal or constructive obligation to incur restoration, rehabilitation and environmental costs may arise when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset as soon as the obligation to incur such costs arises. Discount rates using a pretax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either a unit of production or the straight-line method as appropriate. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount or timing of the underlying cash flows needed to settle the obligation. Costs for restoration of subsequent site damage that is created on an ongoing basis during production are provided for at their net present values and charged against profit or loss as extraction progresses. The Company has no material restoration, rehabilitation or environmental costs as the disturbance to date is minimal and the Company is in the early stages of exploration of its properties.

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(k) Share capital

Proceeds from the issuance of common shares are classified as equity on the consolidated statement of financial position. Incremental costs directly attributable to the issuance of shares are recognized as a deduction, net of any tax effects.

(l) Share-based payment transactions

The Company has a stock option plan, refer to note 7. Employees (including officers), directors and consultants of the Company receive remuneration in the form of stock options granted under the plan for rendering services to the Company. Stock options granted during the period are accounted for in accordance with the fair value method of accounting for stock-based compensation. The fair value for these options is estimated at the date of grant using the Black-Scholes option pricing model.

The Company is also required to estimate the expected future forfeiture rate of options in its calculation of share-based compensation expense. The cost of options is recognized, together with a corresponding increase in share-based payment reserve, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant options become fully entitled to the award (the "vesting date"). The cumulative expense recognized for option grants at each reporting date until the vesting date reflects the portion of the vesting period that passed and is the Company's best estimate of the number of options that will ultimately vest on the vesting date. The Company records share-based compensation expense and credits contributed surplus for all stock options granted which represents the movement in cumulative expense recognized as at the beginning and end of that period. Any consideration received on the exercise of stock options is credited to share capital.

Where the terms of a stock option award are modified, the minimum expense recognized in compensation expense is the expense as if the terms had not been modified. An additional expense is recognized for any modification that increases the total fair value of the option or is otherwise beneficial to the options as measured at the date of modification.

(m) Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision makers – being the Board of Directors. For management purposes, the Company is organized into one main operating segment, which involves exploration for lithium. All of the Company's activities are interrelated, and discrete financial information is reported to the Board as a single segment. Accordingly, all significant operating decisions are based upon analysis of the Company as one segment. The financial results from this segment are equivalent to the financial statements of the Company as a whole.

(n) Foreign operations

For entity whose functional currency is the Canadian dollar, transactions in currencies other than the Company's functional currency are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are translated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated. Exchange differences on monetary items are recognized in the year in which they arise.

The financial results of foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency. Income and expenditures of foreign operations are translated at the average rate of the exchange for the year. All assets and liabilities are translated at the rate of exchange ruling at the reporting date. Differences arising on translation are recognized as other comprehensive income ("OCI").

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(o) Taxes

Taxes are comprised of current and deferred taxes. Tax expense is recognized in the profit or loss except to the extent that it relates to items recognized directly in other comprehensive income (loss) or elsewhere in shareholders' equity, in which case the related tax expense or recovery is also recognized directly in other comprehensive income (loss) or elsewhere in shareholders' equity.

Current tax expense is the expected cash tax payable on the taxable income for the year, using tax rates enacted, or substantively enacted, at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax expense and related liability are recognized with respect to temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the reporting date and are expected to continue to apply when the deferred tax asset or liability is settled. Deferred tax assets are recognized to the extent that it is probable that the assets can be recovered.

(p) Loss per share

Loss per share is computed by dividing the loss for the period by the weighted average number of common shares outstanding during the period. Basic and diluted loss per share for each year presented are the same due to the potential issuances of shares under warrant or share option agreements being, in total, anti-dilutive.

(q) Related party transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

(r) Leases

All leases are accounted for by recognizing a right-of-use asset and a lease liability except for leases of low value assets and leases with a duration of twelve months or less. Lease liabilities are measured at the present value of the contractual payments due to the lessor over the lease term, with the discount rate determined by the incremental borrowing rate on commencement of the lease is used. Right-of-use assets are amortized on a straight-line basis over the remaining term of the lease or over the remaining economic life of the asset if this is judged to be shorter than the lease term. During the year ended December 31, 2024, amounts totaling \$36,000 (December 31, 2021 - \$36,500) were included in the consolidated statements of loss and comprehensive loss related to leases of a short-term nature.

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

(s) Use of judgments and estimates

Management is required to make estimates, judgments and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. Management reviews these judgments, estimates and assumptions on an ongoing basis, including those related to fair values of financial instruments, recoverability of assets and income taxes. Actual results may differ from these estimates.

Significant estimates include the following:

Valuation of share-based compensation

The Company uses the Black-Scholes Option Pricing Model for valuation of share-based compensation. Option pricing models require the input of subjective assumptions including expected price volatility, interest rate, and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and equity reserves.

Significant judgements include the following:

Functional currency

The functional currency for each of the Company's subsidiaries is the currency of the primary economic environment in which the entity operates. Determination of functional currency may involve certain judgments to determine the primary economic environment and the Company reconsiders the functional currency of its entities if there is a change in events and conditions which determined the primary economic environment.

Going Concern

The Company must assess its ability to continue as a going concern. Factors that affect this determination include current cash and investments, budgeted expenditures for future periods and the conditions of the market for exploration companies.

(t) New accounting policies and amendments

The amendments to IAS 1 specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

In addition, an entity is required to disclose when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months. The amendments have not had an impact on the classification of the Company's liabilities

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Amendments not yet adopted:

IAS 1 – amendments: Classification of liabilities as current or non-current

IFRS 18: Presentation and Disclosure in Financial Statements

IFRS 18 will apply for reporting periods beginning on or after January 1, 2027, and also applies to comparative information. IFRS 18 will replace IAS 1; many of the other existing principles in IAS 1 are retained, with limited changes. IFRS 18 will not impact the recognition or measurement of items in the financial statements, but it may change what an entity reports as its 'operating profit or loss'. Key new concepts introduced in IFRS 18 relate to: (i) the structure of the statement of profit or loss; (ii) required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures); and (iii) enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general. The Company is currently assessing the effects of IFRS 18 on the financial statements.

Baavhai Uul Project – Exploration License

The Company is the owner of a mineral exploration license (the “License”) to explore an area approximately 63,000 hectares in size containing lithium brine targets (the “Baavhai Uul Project”). The Company acquired the License pursuant to a purchase agreement dated February 15, 2019, for total consideration of \$1,229,630.

Under the terms of an amending agreement dated August 15, 2019, the following milestone payments remain outstanding:

- (i) On completion of an initial exploration programme as recommended by a technical report prepared in accordance with National Instrument 43-101 prepared for the Baavhai Uul Project, US\$200,000 in cash. As of December 31, 2024 \$Nil (December 31, 2023 - \$264,520) has been accrued in relation to this payment as a non-current liability.
- (ii) On completion of a feasibility study as such term shall be defined in the Technical Report, US\$200,000 in cash. This milestone has not yet been accrued as the probability of the company completing this item is not yet determinable.
- (iii) On the issuance of a mining license for the Baavhai Uul project located in Sukhbaatar province, US\$100,000 in cash. This milestone has not yet been accrued as the probability of the company completing this item is not yet determinable.

Future production on the Baavhai Uul Project is subject to a 1.5% gross revenue royalty.

During the year ended December 31, 2024, the Company determined that it would not proceed with the Baavhai Uul project and recorded an impairment of \$1,602,473. Concurrently, the Company recorded a recovery of the license purchase payable of \$287,780.

Urgakh Naran Project – Exploration License

On February 10, 2021, the Company acquired the Urgakh Naran Lithium Brine Project (the “Urgakh Naran Project”) located in Mongolia’s Dornogovi Province. The name “Urgakh Naran” is Mongolian for “Rising Sun” and the Project covers an area of approximately over 29,770 hectares of prospective lithium terrain located 150km west northwest of the Company’s Baavhai Uul Lithium Brine Project. The Company acquired the Urgakh Naran Project as a result of a successful tender bid submitted to the Mineral Resource Authority of Mongolia. As at December 31, 2024, the Company conducted an impairment assessment of the Urgakh Naran Project and determined that no impairment was required.

(Expressed in Canadian Dollars, Unless Otherwise Stated)

4. EXPLORATION AND EVALUATION ASSETS (Continued)

Acquisition of 1402166 B.C. LTD. (Bliss Lake Mineral Claims)

In August 2023, the Company completed the acquisition of 100% of the issued and outstanding common shares of 1402166 B.C. LTD. a company holding the rights to mineral claims located in the Northwest Territories (“NWT”), Canada known collectively as the “Bliss Lake Claims”. Pursuant to an amending agreement dated June 20, 2023, which closed on August 11, 2023 (“Closing Date”) the Company issued 571,428 common shares with a fair value of \$131,428. The Company completed initial prospecting work on the property and spent a further \$19,048.

The Company was determined to be the acquirer in the transaction. The acquisition was determined to be an asset acquisition as 1402166 B.C did not meet the definition of business. The Company allocated the fair value of consideration paid to the value of the exploration and evaluation asset acquired.

The Company will issue up to 1,250,000 common shares (with a floor price per share of \$0.20) one year from Closing if an assay result of a sample from the Property during the 12 months after the Closing Date yields a grade of at least 0.5% Li₂O, and up to 1,250,000 common shares (with a floor price per share of \$0.20) two years from Closing if an assay result of a sample from the Property during the 24 months after the Closing Date yields a grade of at least 0.5% Li₂O. If the Company announces a mineral resource estimate of at least 5 million tonnes of measured, indicated and inferred resources containing Lithium Oxide (Li₂O) grading of at least 1.00% on the mining claims on the Property, the Company will pay an additional \$300,000 cash payment within five days of the announcement to certain vendors. One third of the share-based milestone payments and one half of the cash-based milestone payment (should the above conditions be met) are payable to the Company’s CFO, Robert Payment. Mr. Payment became an officer of the Company after the close of the acquisition of 1402166 B.C. Ltd. During the year ended December 31, 2024, the Company determined that no further work would be carried out on the property and recorded an impairment of \$150,476.

Little Nahanni Mineral Claims

The Company acquired the Little Nahanni Claims by staking during the year ended December 31, 2023, for a total cost of \$22,935. During the year ended December 31, 2024, the Company determined that no further work would be carried out on the property and recorded an impairment of \$22,935.

5. LOANS PAYABLE

	December 31, 2024	December 31, 2023
	\$	\$
Opening balance	25,000	-
Loans received	23,022	25,000
Finance fees	2,902	-
Closing balance	50,924	25,000

On June 15, 2023, the Company entered loan agreement for \$25,000 from Olympic Metals Inc, a company with common directors and officers. The loan does not bear interest and was repayable September 30, 2023. The loan agreement requires the Company pay an administrative fee of \$600. The loan passed the due date and remains unpaid and is due on demand.

On October 14, 2024, the Company entered loan agreement for US\$16,000 from Olympic Metals Inc, a company with common directors and officers. The loan does not bear interest and is repayable on October 15, 2025. The loan agreement requires the Company pay an administrative fee of US\$1,600.

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

6. OTHER INTEREST – VICTORY NICKEL PROJECT

On January 25, 2022, the Company entered into a binding term sheet which set out the terms for an exploration joint venture with Aranjin Resources Ltd. ("Aranjin"). The joint venture allowed for both companies to grant one another reciprocal exploration rights to their respective exploration licenses within Mongolia. Under the terms of the agreement, Aranjin was granted a right to explore Ion's properties for base metals (including copper, lead, zinc, nickel, cobalt and associated metals) and to earn an 80% interest in and to all base metal projects discovered and/or defined on the Ion Properties subject to the existing royalties and subject to the completion by Aranjin of its work commitment of \$3.0 million over three years. Ion was granted a right to explore Aranjin's properties for lithium and an 80% interest in and to all lithium projects discovered and/or defined on the Aranjin licenses, subject to the existing royalties. Aranjin is considered to be a related party as two of the Company's directors also serve as directors of Aranjin.

During the year ended December 31, 2023, the Company entered an agreement with Aranjin whereby it agreed to formally separate a portion of the formerly held Baavhi Uul exploration license covering the area identified by Aranjin known as the "Victory Nickel Project" in exchange for a 20% free carried interest in the Victory Nickel Project.

The exchange of a portion of the Company's exploration license for the 20% carried interest represented a non-monetary transaction and was accounted for at fair value which was determined to be \$67,500.

7. SHARE CAPITAL

Authorized

Unlimited number of common voting shares.

Issued and Outstanding

As of December 31, 2024, there were 65,781,146 common shares outstanding.

Common shares issued during the year ended December 31, 2024, were as follows:

- (i) On June 28, 2024, the Company issued 393,675 common shares with a fair value of \$21,652 (\$0.055 per share) to settle debt. In relation to the debt settlement the company recognized a gain of \$76,767.

Common shares issued during the year ended December 31, 2023, were as follows:

- (i) On January 11, 2023, the Company issued a total of 82,500 shares in exchange of options exercised at a price of \$0.605 with the total proceeds of \$49,914. The value attributed to these options was \$16,262.
- (ii) On March 2, 2023, the Company issued 100,000 common shares in a non-brokered private placement at \$0.40 per share for aggregate gross proceeds of \$40,000.
- (iii) On July 20, 2023, the Company completed a non-brokered private placement of 4,000,000 units of the Company ("Units") at a price of \$0.25 per Unit, for aggregate gross proceeds of \$1,000,000 (the "Offering"). Each Unit consists of one common share of the Company (a "Share") and one common share purchase warrant (a "Warrant"). Each Warrant entitles the holder to acquire one Share for \$0.40 for a period of 12 months after the closing of the Offering (extended an additional 12 months effective May 7, 2024). In connection with the Offering, the Company recorded share issue costs of \$66,108 in relation to the private placement. The residual value of warrants issued in relation to the units have been valued at \$80,000 and have been allocated to contributed surplus.
- (iv) On August 11, 2023, the Company acquired the Bliss lake mineral claims which were held by 1402166 B.C. Ltd. by issuing 571,428 common shares with a fair value of \$131,428 (Note 4).

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

7. SHARE CAPITAL (Continued)

Stock Options

The Company has established a stock option plan (the "Plan") for its directors, officers and consultants under which the Company may grant options from time to time to acquire a maximum of 10% of the issued and outstanding common shares. The exercise price of each option granted under the plan shall be determined by the Board of Directors. Options may be exercised for a maximum term of ten years from the date of the grant. They are non-transferable and expire the greater of 90 days of termination of employment or holding office as director or officer of the Company and, in the case of death, expire one year thereafter. Unless otherwise stated, the options fully vest when granted.

Continuity of stock options:

	Number of		Weighted Average Exercise
	Options		Price
Balance at December 31, 2022	4,675,549	\$	0.35
Issued	2,072,000		0.300
Exercised	(82,500)		0.605
Expired	(1,593,049)		0.312
Balance at December 31, 2023	5,072,000	\$	0.31
Issued	1,250,000		0.09
Balance at December 31, 2024	6,322,000	\$	0.27

Stock options issued and outstanding as of December 31, 2024:

Expiry date	Number of Options	Number of Exercisable Options	Weighted Average Exercise Price	Weighted Average Remaining Years
October 21, 2025	3,000,000	3,000,000	\$0.32	0.81
March 2, 2025	2,072,000	2,072,000	\$0.30	0.17
March 13, 2026	1,250,000	1,250,000	\$0.09	1.20
	6,322,000	6,322,000	\$0.27	0.67

Share-based compensation expense of \$50,117 (December 31, 2023 - \$247,485) related to options granted and vested during the year. The Black-Scholes option pricing model used the following weighted average assumptions:

	December 31, 2024	December 31, 2023
Risk-free interest rate	4.14%	4.30%
Expected life of options	2 years	2 years
Annualized volatility	78.62%	93.00%
Dividend rate	0%	0%
Weighted average fair value per option	\$ 0.04	\$ 0.26

(Expressed in Canadian Dollars, Unless Otherwise Stated)

7. SHARE CAPITAL (Continued)

Warrants

The Company enters into agreements for various services for which all or partial consideration is comprised of warrants. As the fair value of the provision of services is difficult to measure, the Company measures the fair value of services received or to be received by reference to the fair value of warrants granted using the Black-Scholes Model.

Warrant activity is as follows:

	Number of Warrants	Weighted Average Exercise Price
Balance at December 31, 2022	12,190,000	\$ 0.69
Issued	4,000,000	0.40
Balance at December 31, 2023	16,190,000	\$ 0.62
Expired	(690,000)	0.50
Balance at December 31, 2024	15,500,000	\$ 0.62

Warrants outstanding as of December 31, 2024:

Expiry date	Number of Warrants	Weighted Average Exercise Price	Weighted Average
April 13, 2025*	11,500,000	\$0.70	0.28
July 19, 2025	4,000,000	\$0.40	0.55
	15,500,000	\$0.62	0.35

*Expired unexercised subsequent to December 31, 2024.

8. RELATED PARTY TRANSACTIONS

Key management personnel include those individuals having authority and responsibility for planning, directing, and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers and/or companies controlled by those individuals.

Transactions with key management:

	December 31, 2024	December 31, 2023
	\$	\$
Consulting fees	335,980	496,691
Share-based compensation	44,103	235,538
Total	380,083	732,229

The following balances with related parties are outstanding:

	December 31, 2024	December 31, 2023
Related party balances payable	\$	\$
Accounts payable	544,240	263,229
Loans payable - Olympic Metals Inc. (Note 5)	50,924	25,000
Rent - Steppe Gold Ltd.	54,240	44,070
Related party balances receivable		
Due from Aranjin Resources Ltd.	-	38,360

Other related party transactions include:

- The Company paid or accrued \$36,000 (December 31, 2023 - \$36,500) for office rent to Steppe Gold Ltd., whose Board includes one common director. Included in accounts payable and accrued liabilities is \$54,240 (December 31, 2023 - \$44,070) related to rent payable to Steppe Gold Ltd.
- On September 29, 2022, the Company agreed to loan \$100,000 to Aranjin Resources Ltd. ("Aranjin"). The loan is considered a related party transaction as there is a common director and a common officer of the respective companies. During the year ended December 31, 2023, the loan was repaid in full and the parties agreed that accrued interest of \$1,749 would be forgiven.
- One third of the share-based milestone payments and one half of the cash-based milestone payment in relation to the acquisition of 1402166 B.C Ltd. are payable to the Company's CFO, Robert Payment (Note 4). Mr. Payment became an officer of the Company after the close of the acquisition of 1402166 B.C. Ltd.
- During the year ended December 31, 2023, the Company entered an agreement with Aranjin whereby it agreed to formally separate a portion of Baavhi Uul exploration license covering the area identified by Aranjin known as the "Victory Nickel Project" in exchange for a 20% free carried interest in the Victory Nickel Project (Note 6). Aranjin is considered to be a related party as there is a common director and a common officer between the parties.

LITHIUM ION ENERGY LTD.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2024, and 2023

(Expressed in Canadian Dollars, Unless Otherwise Stated)

8. RELATED PARTY TRANSACTIONS (Continued)

- e) Expensed \$38,360 (December 31, 2023 - \$Nil) due from Aranjin as collection of the amount is uncertain and there is no contractual obligation between the parties. There is a common director and common officer between the respective entities.
- f) Obtained loans totalling \$23,022 (December 31, 2023 - \$25,000) (Note 5) from Olympic Metals Ltd. Company with common directors and officers.

9. CAPITAL RISK MANAGEMENT

The Company's capital currently consists of common shares. Its principal source of cash is from the issuance of common shares. The Company's capital management objectives are to safeguard its ability to continue as a going concern and to have sufficient capital to be able to acquire and conduct exploration and evaluation activities on mineral properties. The Company does not have any externally imposed capital requirements to which it is subject. The Company manages the capital structure and adjusts it in light of changes in economic conditions and the risk characteristics of the underlying assets. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern, such that it can provide returns for shareholders and benefits for other stakeholders.

10. FINANCIAL RISK MANAGEMENT

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate risk, foreign currency risk and price risk). All amortized cost financial instruments approximate their fair value due to the short term to maturity.

(i) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash and cash equivalents balance.

Cash and cash equivalents are held with a Canadian chartered bank and a financial institution in Mongolia, as well as in trust with a law firm with which the Company frequently does business. Sales tax and other receivables consist primarily of HST recoverable.

(ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure it will have sufficient liquidity to meet liabilities when due. To the extent the Company does not believe it has sufficient liquidity to meet its obligations, it will consider securing additional equity or debt funding. The Company's cash and cash equivalents are currently invested in business accounts with high-credit quality financial institutions and in trust and are available on demand by the Company. The Company's financial obligations consist of accounts payable and accrued liabilities.

Years ended		Less than one year	1-3 years	3-5 years	More than 5 years	Total
December 31, 2024	Accounts payable and accrued liabilities	1,179,154	-	-	-	1,179,154
December 31, 2023	Accounts payable and accrued liabilities	928,452	264,520	-	-	1,192,972

(Expressed in Canadian Dollars, Unless Otherwise Stated)

10. FINANCIAL RISK MANAGEMENT (continued)

(iii) Market risk

Market risk is the risk of loss that may arise from changes in market factors such interest rate, foreign exchange rates and commodity and equity prices.

(iv) Interest rate risk

The Company has cash and cash equivalents and no interest-bearing debt. The Company does not believe it is exposed to material interest rate risks.

(v) Foreign currency risk

The Company's functional and presentation currency is the Canadian dollar. The Company has cash balances in Mongolian tughrig and US dollars that are subject to foreign currency risk.

The Company is exposed to foreign currency risk on fluctuations related to cash, accounts payable and other liabilities, that are denominated in US dollars and Mongolian Tughrig. Sensitivity to a plus or minus 5% change in the foreign exchange rate of the US dollar compared to the Canadian dollar would affect net income by \$13,000 (December 31, 2023 - \$10,000) with all other variables held constant.

(vi) Commodity price risk

The Company is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, as they relate to lithium, and the stock market to determine the appropriate course of action to be taken by the Company.

Commodity price risk could adversely affect the Company. In particular, the Company's future profitability and viability of development depends upon the work market price of lithium. There is no assurance that, even if commercial quantities of lithium deposits are produced in the future, a profitable market will exist for them. As of December 31, 2024, the Company was not a lithium producer. Even so, commodity prices may affect the completion of future equity transactions such as equity offerings. This may also affect the Company's liquidity and its ability to meet its ongoing obligations.

14. RECLASSIFICATION OF COMPARATIVE INFORMATION

Certain items were reclassified on the Company's Consolidated Balance Sheet and Statement of Loss and Comprehensive loss for the year ended December 31, 2023, as follows:

Consolidated Balance sheet	Prior Disclosure December 31, 2023	Change	Revised December 31, 2023
	\$	\$	\$
Loans	-	25,000	25,000
License purchase payable	289,520	(25,000)	264,520
Total	289,520	-	289,520

Consolidated Statement of Loss and Comprehensive loss	Prior Disclosure December 31, 2023	Change	Revised December 31, 2023
	\$	\$	\$
Expenses:			
Write down of input tax credits	(110,893)	110,893	-
Other income	3,981	(3,981)	-
Interest income	2,080	(2,080)	-
Total expenses	2,394,461	(104,832)	2,289,629
Net loss before other items	-	(2,289,629)	(2,289,629)
Other items:			
Write down of input tax credits	-	(110,893)	(110,893)
Other income	-	3,981	3,981
Interest income	-	2,080	2,080

The Company disaggregated the loans payable from licence purchase payable to clarify disclosure.

Reclassifications of the above expense items to other items was undertaken to clarify disclosure of total expenses.

There was no impact to the Company's net comprehensive loss for the year ended December 31, 2023.

15. SUBSEQUENT EVENTS

Subsequent to December 31, 2024, the Company completed the following transaction:

- The Company entered into an LOI Agreement to progress a business combination with United Rare Earths Ltd. ("URE"), a US-based rare earths recycling and refining company. Concurrently the Company announced the intention to pursue a non-brokered private placement offering of convertible debentures ("Debentures") at a price of US\$1,000 per Debenture for aggregate gross proceeds of US\$ 2,000,000. The Debentures will mature 24 months from the date of issue (the "Maturity Date"), carry an interest rate of 8% per year and will be convertible to common shares at a conversion price of \$0.10 per share. In the event the 10-day volume weighted average price of the common shares of the Company exceeds \$0.15 or more on the Toronto Stock Exchange, the Company will have the right to accelerate the conversion of the shares. The LOI and debenture financing were cancelled effective March 27, 2025.
