Management Discussion & Analysis

For the nine months ended August 31, 2023**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

This MD&A includes certain forward-looking statements or information. All statements other than statements of historical fact included in this MD&A including statements relating to the potential mineralization or geological merits of the Company's mineral properties and the future plans, objectives or expectations of the Company are forward-looking statements that involve various risks and uncertainties. Such forward-looking statements include among other things, statements regarding future commodity pricing, estimation of mineral reserves and resources, timing and amounts of estimated exploration expenditures and capital expenditures, costs and timing of the exploration and development of new deposits, success of exploration activities, permitting time lines, future currency exchange rates, requirements for additional capital, government regulation of mining operations, environmental risks, anticipated reclamation expenses, timing and possible outcome of pending litigation, timing and expected completion of property acquisitions or dispositions, and title disputes. They may also include statements with respect to the Company's mineral discoveries, plans, out-look and business strategy.

Forward-looking statements are predictions based upon current expectations and involve known and unknown risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements.

Important factors that could cause actual results to differ materially from the Company's plans or expectations include risks relating to the actual results of exploration programs, fluctuating commodity prices, the possibility of equipment breakdowns and delays, the availability of necessary exploration equipment including drill rigs, exploration cost overruns, general economic or business conditions, regulatory changes, and the timeliness of government or regulatory approvals to conduct planned exploration work. Additional factors that could cause actual results to differ materially from the Company's plans or expectations include political events, fluctuations in mineralization grade, geological, technical, mining or processing problems, future profitability on production, the ability to raise sufficient capital to fund exploration or production, litigation, legislative, environmental and other judicial, regulatory, political and competitive developments, inability to obtain permits, general volatility in the equity and debt markets, accidents and labor disputes and the availability of qualified personnel.

Although the Company has attempted to identify all the factors that may affect our forward-looking statements or information, this list of the factors is not exhaustive. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statements were made, and readers are advised to consider such forward-looking statements in light of the risks and uncertainties detailed throughout this MD&A. The Company disclaims any intention or obligation to update or revise forward-looking information, whether as a result of new information, future events or otherwise, except where required by applicable securities laws.

THE RAVEN PROPERTY

On November 30, 2021, the Company entered into a property purchase and sale agreement with a company with directors in common with the Company to purchase a 100% interest in the Raven Property located in the Lillooet Mining Division of British Columbia, Canada. In consideration, the Company issued the vendor 7,000,000 common shares with a fair value of \$350,000. The Raven Property comprised one mineral claim covering 492.28 hectares. The Raven Property is subject to a 1.5% net smelter returns royalty to a third party. The Company has the right, at any time prior to commercial production, to purchase one-half of 1% of the 1.5% net smelter returns royalty for \$1,500,000.

The Raven Property exhibits similar lithologies, alteration and mineralization to the historical Bralorne-Pioneer mining complex located 45 kms to its northwest and which is reported to have produced in excess of 12.6 million tonnes grading 9.3 grams per tonne gold (British Columbia Minfile).

The Company has a five-year exploration permit on the Raven Property which has approximately four years remaining. The Company has posted a reclamation bond of \$13,000 with the Minister of Finance.

On October 25, 2022, the Company entered into an agreement to purchase a 100% interest in the Raven Surround Claims which surround the Raven Property on all sides for \$100,000. The Raven Surround Claims are comprised of 14 mineral claims covering 1,209.99 hectares. The Raven Surround Claims are subject to a 2% net smelter returns royalty. The Company has the right, at any time prior to commercial production, to purchase 62.5% of the 2% net smelter returns royalty (1.25%) for \$2,000,000.

During the nine months ended August 31, 2023, the Company staked additional claims for \$2,369. The claims covered an access road to the Raven Property.

CRITICAL ACCOUNTING ESTIMATES

Preparation of the Company's financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities as at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Significant accounting judgments

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the Company's financial statements are discussed below:

- The recoverability of the carrying value of exploration and evaluation assets.

The application of the Company's accounting policy for exploration and evaluation expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company. If, after exploration and evaluation expenditures are capitalized, information becomes available suggesting that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount the Company carries out an impairment test at the cash-generating unit ("CGU"), or group of CGUs, level in the year the new information becomes available. If indicators of impairment exist, the recoverable amount of the asset is estimated in order to determine the extent of the impairment.

- The going concern assumption.

The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay for its ongoing operating expenditures, meet its liabilities for the ensuing year, and to fund planned and contractual exploration programs, involves significant judgment based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances.

Estimates and assumptions

The key estimates applied in the preparation of the Company's financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

- Amount of mining exploration tax credit receivable.

Dinero Ventures Ltd.

Management Discussion & Analysis

For the nine months ended August 31, 2023

The Company is entitled to refundable tax credits on qualified resource expenditures incurred in British Columbia. Management's judgment and estimates are applied in determining whether the resource expenditures are eligible for claiming such credits.

CRITICAL ACCOUNTING ESTIMATES – (cont'd)

Estimates and assumptions – (cont'd)

- Assumptions used in the calculation of the fair value assigned to share-based payments.

The Company uses the Black-Scholes option pricing model for valuation of share-based payments. Option pricing models require the input of subjective assumptions, including expected price volatility, interest rate and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's equity reserves.

TRANSACTIONS BETWEEN RELATED PARTIES

At October 27, 2023, the Company's Board of Directors consists of Edward Kruchkowski, Randolph Kasum, Corey Kruchkowski, Bailey Kasum, Brian Morrison and Brent Petterson. The officers of the Company are Edward Kruchkowski, Chief Executive Officer and Randy Kasum, Chief Financial Officer.

Key management personnel consist of the directors of the Company. During the nine months ended August 31, 2023 and 2022, the Company incurred the following key management compensation charges:

	2023	2022
Accounting	\$ 9,000	\$ 8,950
Exploration and evaluation assets - geological	5,500	-
Management fees	36,000	12,000
Share issue costs	-	2,800
Stock-based compensation	-	225,500
	<u>\$ 50,500</u>	<u>\$ 249,250</u>

At August 31, 2023, exploration advances include \$40,000 (November 30, 2022: \$40,000) paid to a company with directors in common with the Company for a drill program at the Raven Property.

At August 31, 2023, due to related parties includes \$8,000 (November 30, 2022: \$Nil) due to companies with directors in common with the Company for management fees. Amounts due to related parties are unsecured, non-interest bearing and have no specific terms of repayment.

CHANGES IN ACCOUNTING POLICIES INCLUDING INITIAL ADOPTION

There were no changes in the Company's significant accounting policies during the nine months ended August 31, 2023 that had a material effect on its condensed interim financial statements.

Dinero Ventures Ltd.

Management Discussion & Analysis

For the nine months ended August 31, 2023

The Company's significant accounting policies are disclosed in Note 3 to its condensed interim financial statements for the nine months ended August 31, 2023.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

The fair values of the Company's accounts payable and accrued liabilities approximate their carrying values due to the short-term nature of these instruments. The Company's cash is classified at Level 1 of the fair value hierarchy. The Company has no financial instruments at Levels 2 or 3.

The Company has exposure to the following risks from its use of financial instruments:

(a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company's cash is held in a Canadian financial institution. The Company has minimal credit risk.

(b) Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquid funds to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The contractual financial liabilities of the Company as of August 31, 2023 are \$23,286 (November 30, 2022: \$37,107). All the liabilities presented as accounts payable and accrued liabilities are due within 90 days. Management will be required to raise funds to meet its financial obligations.

(c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, commodity price risk and interest rates, will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on capital.

At August 31, 2023 and November 30, 2022, the Company is not exposed to any significant market risk.

Dinero Ventures Ltd.

Management Discussion & Analysis

For the nine months ended August 31, 2023**RISKS AND UNCERTAINTIES**

In addition to the risks and uncertainties outlined earlier in this management discussion, the Company is also subject to other risks and uncertainties including the following:

General Risk Associated with the Mining Industry

The business of mineral deposit exploration and extraction involves a high degree of risk. Few properties that are explored ultimately become producing mines. At present, none of the Company's properties has a known commercial ore deposit. The main operating risks include: securing adequate funding to maintain and advance exploration properties; ensuring ownership of and access to mineral properties by confirmation that claims and leases are in good standing and obtaining permits for drilling and other exploration activities. The market prices for gold and other metals can be volatile and there is no assurance that a profitable market will exist for a production decision to be made or for the ultimate sale of the metals even if commercial quantities of precious and other metals are discovered.

Exploration and development activities involve risks which careful evaluation and experience may not, in some cases eliminate. The commercial viability of a mineral deposit depends on many factors not all of which are within the control of management. Some of the factors that affect the financial viability of a given mineral deposit include its size, grade and proximity to infrastructure, government regulation, taxes, royalties, land tenure, land use, environmental protection and reclamation and closure obligations. Management may attempt to mitigate its exploration risk by employing a strategy of joint ventures with other companies which balances risk while at the same time allows properties to be advanced.

Dependence on Key Personnel

Loss of certain members of the executive team or key operational leaders of the company could have a disruptive effect on the implementation of the Company's business strategy and the efficient running of day-to-day operations until their replacement is found. Recruiting personnel is time consuming and expensive and competition for professionals is intense. The Company may be unable to retain its key employees or attract, assimilate or train other necessary qualified employees, which may restrict its growth potential.

Permits and Licences

The operations of the Company will require licences and permits from various governmental authorities, which have been applied for and/or will be applied for at the proper time. There can, however, be no assurance that the Company will be able to obtain all necessary licences and permits required to carry out exploration, development and mining operations of its properties.

Dinero Ventures Ltd.

Management Discussion & Analysis

For the nine months ended August 31, 2023

RISKS AND UNCERTAINTIES – (cont'd)*Environmental Regulation*

The operations of the Company are subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation provides for restrictions and prohibitions on spills, releases or emissions or various substances produced in association with certain mining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. A breach of such legislation may result in the imposition of fines and penalties. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a manner which means stricter standards, and enforcement, fines and penalties for non-compliance are becoming more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and their directors/officers and employees. The cost of compliance with changes in governmental regulations has the potential to reduce the profitability of future operations. The Company may become subject to liability for pollutions or hazards against which it cannot insure or again which it may elect not to insure where premium costs are disproportionate to the Company's perception of the relevant risks. The payment of such insurance premiums and of such liabilities would reduce the funds available for exploration and production activities.
