DINERO VENTURES ENTERS INTO PROPERTY PURCHASE AND ASSIGNMENT AGREEMENTS FOR MINERAL CLAIMS

STEWART, BC, February 2, 2026 – **Dinero Ventures Ltd.** (TSXV: DNO) (the “**Company**”) announces that it has entered into a property purchase agreement dated February 2, 2026 (the “**Purchase Agreement**”) with Red Eye Resources Ltd. (“**Red Eye**”) pursuant to which the Company will acquire a 100% interest in certain mineral claims known as the Mount Bisson property located in British Columbia, Canada (the “**Property**”). As consideration for the Property, the Company will issue 1,953,641 common shares in the capital of the Company (the “**Common Shares**”) to Red Eye at a deemed price of \$0.12 per Common Share (the “**Consideration Shares**”). In connection with the Purchase Agreement, the Company will assume Red Eye’s obligation to pay a 1% net smelter return royalty (the “**Royalty**”, and collectively with the Consideration Shares, the “**Property Purchase**”).

The Company also announces that it has entered into an assignment and assumption agreement dated February 2, 2026 (the “**Assignment Agreement**”) with Red Eye and Glen Prior (the “**Optionor**”). On September 1, 2023, Red Eye and the Optionor entered into an option agreement (the “**Option Agreement**”), pursuant to which the Optionor granted to Red Eye the option to acquire a 100% interest in certain mineral claims as described in the Option Agreement (the “**Option**”). Pursuant to the Assignment Agreement, Red Eye will assign the Option to the Company and the Company will assume all rights and obligations of Red Eye under the Option Agreement (the “**Assignment**”, and collectively with the Property Purchase, the “**Transactions**”). As consideration for the Option, the Company will issue 250,000 Common Shares to Red Eye at a deemed price of \$0.12 per Common Share.

The Transactions are subject to customary closing conditions, including acceptance by the TSX Venture Exchange (the “**TSXV**”). No finders' fees will be paid in connection with the Transactions.

The property has REE mineralization associated with a NW trending magnetic high within the claim boundaries. A historic airborne geophysical (magnetic and radiometric) survey over the claims identified a 1-2 km wide north- northwest trending magnetic high that is within the property boundaries. Red Eye has confirmed the magnetic anomaly as well collected silt samples during the same program which show an overall high concentration of REEs, suggesting widespread REE- bearing zones throughout the property. The Company has a drill permit allowing diamond drilling to evaluate zones of parallel REE bearing zones.
