14 Financial Instruments Fair Value and Risks

a) Fair Value

The carrying value of the Company's financial instruments consisting of cash and cash equivalents, loan and accounts receivable and accounts payable and accrued charges approximates their fair value due to their immediate or short-term maturity. Investments are measured at fair value using Level 1 and Level 3 inputs described above.

The Company does not measure any assets at level 3 of the fair value hierarchy.

SPECTRA PRODUCTS INC.
Notes to Unaudited Interim Condensed Financial Statements
September 30, 2024 and December 31, 2023

14 Financial Instruments Fair Value and Risks (cont'd)

b) Credit Risk

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist primarily of cash and cash equivalents, and accounts receivable.

Cash and cash equivalents are maintained at a major financial institution. Deposits and short-term investments held with a bank may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand and are maintained with a financial institution of reputable credit and therefore bear minimal credit risk.

Credit risk from accounts receivable encompasses the default risk of customers. Credit risk on accounts receivable is minimized as a result of the constant review and evaluation of customer account balances. The Company also maintains an allowance for doubtful accounts at an estimated amount (if needed), to provide sufficient protection against losses resulting from collecting less than full payments from its receivables.

As at September 30, 2024, two major customers accounted for 56% and 16% of accounts receivable (December 31, 2023 – three major customers accounted for 54% and 14%).

The Company's maximum credit exposure is represented by the carrying amount of accounts receivable.

c) Foreign Currency Risk

The Company is exposed to currency risk due to a certain portion of the Company's sales and purchases being in U.S. currency, resulting in U.S. dollar accounts receivable and U.S dollar cash balances. In addition, the company has US dollar denominated investments. These activities result in exposure to fluctuations in foreign currency rates between the U.S. and Canadian dollar. The Company's sensitivity to these foreign currency fluctuations is such that a 10% strengthening or weakening of the U.S. dollar would result in a corresponding \$23,461 increase or decrease to the Company's income before taxes and \$4,867 to other comprehensive income for the period ended September 30, 2024. At September 30, 2024, the Company had net assets denominated in U.S. currency of USD \$209,855 (December 31, 2023 – USD \$282,910) translated into Canadian dollars as shown below. The Company does not utilize any financial instruments or cash management policies to mitigate the risks arising from changes in foreign currency rates.

14 Financial Instruments Fair Value and Risks (cont'd)

d) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages liquidity risk through regular monitoring of cash requirements by preparing short-term cash flow forecasts. The financing requirements are addressed through a combination of credit facilities and private placements.

The following are the contractual maturities of the Company's financial liabilities as at September 30, 2024.

	Due within 1 year	1 and 2 years	Due between		Total
			2 and 3 years	3 and 4 years

Total	\$ 208,360	75,764	79,537	20,120	\$ 383,781

e) Market Risk

The Company is exposed to market risk through its financial instruments and especially to price risk from its investing activities. It is the risk that the fair value and future cash flows of its investments will fluctuate because of market factors. Management monitors its investments on a regular basis and uses the services of an investment adviser when needed. The Company's sensitivity to market risk is such that a 10% strengthening or weakening of its portfolio would result in a respective \$4,907 increase or decrease to the Company's other comprehensive income for the year ended September 30, 2024.
