

Spectra Products Inc. Announces Signing CarGenerator Distribution Agreement

For Immediate Release – November 25, 2025

Toronto, Ontario – Spectra Products Inc. (**SSA: TSXV**) (the “**Company**”) announces that it has signed a non-exclusive distribution agreement with CarGenerator Inc. for its new product. The product, CarGenerator, is the world’s lightest portable generator at 11 lbs. and is sleek and maintenance-free.

CarGenerator, is a compact, weatherproof system manufactured in Canada that safely turns almost any car or SUV into a quiet reliable back-up power source for the home or camping trip. CarGenerator is a safe and user-friendly product granting virtually anyone the freedom to access power from their vehicle. It produces 1000W of pure sine-wave household electricity when you connect it to your car as the vehicle idles. It is a cleaner, lighter and space-saving alternative to a traditional noisy gas generator.

Power outages are increasing, becoming more frequent and longer-lasting, driven by factors like extreme weather, rising electricity demand, and aging infrastructure. Both Canada and the United States are experiencing this trend, with some regions and vulnerable populations being disproportionately affected such as rural areas.

Andrew Malion, President of Spectra Products Inc., commented, “CarGenerator will provide power using your gas, diesel, hybrid, or pure electric vehicle. This revolutionary product transforms your car or truck into a backup electric generator that can provide emergency power for your home furnace in winter, your fridges in the summer, plus computers, internet routers, and a few lights. Make sure your family and your home is protected from any extended power outages.”

About the Company

Spectra Products Inc. is the Toronto-based North American designer, manufacturer and distributor of wheel end safety products to the transportation industry. These products include Brake Safe®, Zafety Lug Lock®, Hub Alert as well as the Termin-8R® line of anti-corrosion and extreme pressure lubricants including protecting EV equipment.
