

## NEWS RELEASE

### TRENCH METALS EVALUATING DATASET ON GORILLA LAKE URANIUM PROPERTY, ATHABASCA, SASKATCHEWAN, CANADA

*Vancouver, Canada – December 13<sup>th</sup>, 2021* - **Trench Metals Corp.** (the “Company”) (TSXV: **TMC**, FWB: **33H2**) is pleased to announce that the Company is in the process of completing a detailed evaluation of its updated exploration datasets on the Gorilla Lake Uranium Property, which covers 6,949 hectares in the western Athabasca Basin. The intention of this evaluation is to build on the Company’s recent exploration work to define and prioritize uranium exploration targets and to design the spring 2022 field program. The 2021 program consisted of Shaw drilling of prospective radioactive anomalies as well as surface investigation with advanced Scintillometers, such as the Radiation Solutions RS125, which provides accurate real time analysis of gamma radiation, a product of uranium decay. Previous exploration included airborne magnetic survey and a MEGATEM as well as ground EM survey and diamond drilling. At present, the Company is evaluating targets for a uranium deposit type, similar to the Cluff Lake Mine, which lies ~8km south of the Gorilla Lake Property and produced approximately 62.5 million pounds of uranium between 1980 and 2002.

Peter Born P.Geol., is the designated Qualified Person as defined by National Instrument 43-101 and is responsible for, and has approved, the technical information contained in this release.

#### **About Trench Metals Corp**

**Trench Metals Corp.** is a mineral exploration company with a focus on uranium. We create value for our shareholders by engaging in promising mineral exploration opportunities. Our main goal is the advancement of various projects from discovery all the way to production. This vertically integrated strategy allows Trench Metals to achieve exceptional shareholder value through the entire life-cycle of the mining process.

**Trench Metals Corp.** has the right to acquire a 100% interest in two highly prospective uranium project in Saskatchewan’s Athabasca Uranium district. Higginson Lake Uranium Project which covers an area of approximately 2312 hectares and is 52 kilometers northeast of the town of

Stony Rapids, which is accessible by Highway 905 and 964. The Higginson Lake Uranium Project host two historic drill indicated reserves, totaling 4,800,000 lbs of U308. And the Gorilla Lake Uranium Project which comprises of nearly 7000ha in the Northern Mining District of Saskatchewan near the Shea Creek uranium deposit. The Athabasca District is home to the highest grade of uranium deposits in the world and accounts for 18% of global uranium production
