## Geochemical Survey Update:

The proposed plan included 1,469 till sample locations across the Gander Main claim block. As of December 5, 2022 field teams had completed the high priority samples. The teams were able to collect samples at 874 of the 937 high priority locations, as shown on the map below. Work has continued to collect the remainder of the samples.

This initial batch of high priority samples is being prepared and will be shipped to the lab at the end of this week. The remainder of the samples are expected to be collected, prepared, and shipped to the lab in the next two weeks. The samples will be processed using ALS AuMe-TL43. The Company expects to receive assay results during the first quarter of 2023.

Samuel Pelaez, the Company's President and CEO stated: "We are excited to be sending material to the lab for the first time since the Company's acquisition of the Gander Property; a property that has never been systematically tested for mineral occurrences. Together with our geophysical surveys, the geochemical survey will assist in delineating high prospectivity areas for detailed subsequent exploration."

### **About the Gander Property:**

The Company's wholly-owned Gander Property consists of 8,875 hectares and is immediately adjacent to the Queensway property along the Central Newfoundland Gold Belt owned by New Found Gold. The Company also holds title to the 975-hectare Weir Pond Property which lies 25 km north of Gander, and to the 1,050-hectare Island Pond Property which lies 48 km north of Gander. The properties straddle a major geological contact between the Dunnage and Gander Zones.

### **About Gossan Resources:**

Gossan Resources Limited holds mineral exploration and development properties located in Manitoba, Northwestern Ontario and Newfoundland. The Company's focus is to advance exploration and drilling of its Glitter Property, located in the zinc-copper-silver rich polymetallic Sturgeon Lake Greenstone Belt of Northwestern Ontario. The Company holds a gold initiative with the Gander Gold Property in Newfoundland as well as a broadly diversified portfolio of multi-element properties. These properties are prospective for hosting gold, base metals and platinum group elements, as well as specialty "green-battery metals", nickel, cobalt, vanadium, titanium, tantalum, lithium and chromium. Gossan also has a deposit of high-purity, magnesium-rich dolomite, and holds advance and production royalty interests in a

high-purity silica sand deposit. The Company trades on the TSX Venture and the Frankfurt/Freiverkehr & Xetra Exchanges and currently has 66,801,471 Common Shares outstanding.

### **Cautionary Statement on Forward-Looking Information**

Neither the TSX Venture Exchange ("**TSXV**") nor its Regulation Services Provider (as that term is defined in the policies of the TSXV) accepts responsibility for the adequacy or accuracy of this release.

No stock exchange, securities commission or other regulatory authority has approved or disapproved the information contained herein. This news release contains forward-looking information which is not comprised of historical facts. Forward-looking information involves risks, uncertainties and other factors that could cause actual events, results, performance, prospects and opportunities to differ materially from those expressed or implied by such forward-looking information. Forward looking information in this news release includes, but is not limited to, uncertainty over the outcome of any litigious matters, the Company's objectives, goals or future plans, statements regarding exploration results and exploration plans. Factors that could cause actual results to differ materially from such forward-looking information include, but are not limited to, capital and operating costs varying significantly from estimates, the preliminary nature of metallurgical test results, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, uncertainties relating to the availability and costs of financing needed in the future, changes in equity markets, inflation, fluctuations in commodity prices, delays in the development of projects and the other risks involved in the mineral exploration and development industry, and those risks set out in the Company's public documents filed on SEDAR. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this news release are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.
