MINERAL MOUNTAIN RESOURCES LTD.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

SIX MONTHS ENDED SEPTEMBER 30, 2018

(Unaudited – Prepared by Management)

1. NATURE OF BUSINESS

Mineral Mountain Resources Ltd. (the “Company”) was incorporated on September 1, 2006 under the laws of British Columbia, Canada and maintains its head office at Suite 401, 1195 West Broadway, Vancouver, British Columbia, Canada, V6H 3X5. Its registered office is located at Suite 2300, 550 Burrard Street, Vancouver, British Columbia, Canada, V6C 2B5. The Company is engaged in the acquisition, exploration, and development of mineral properties in North America. The Company’s common shares are listed on the TSX Venture Exchange (TSX-V) under the symbol “MMV” and on the OTCQX under the symbol “MNRLF”.

2. BASIS OF PREPARATION

These condensed unaudited interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by International Accounting Standards Board (“IASB”), applicable to the preparation of interim financial statements, including International Accounting Standard (“IAS”) 34 *Interim Financial Reporting*. The condensed unaudited interim financial statements do not include all of the disclosures required for a complete set of annual financial statements and should be read in conjunction with the audited annual consolidated financial statements for the year ended March 31, 2018, which have been prepared in accordance with IFRS as issued by the IASB.

These interim consolidated financial statements incorporate the financial statements of the Company and its wholly-owned subsidiaries. All inter-company transactions, balances, income and expenses are eliminated in full on consolidation.

Basis of measurement

These interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments that are measured at fair values. In addition these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Going concern of operations

The Company is an exploration stage company. The Company has a history of losses with no operating revenue. The ability of the Company to recover the costs it has incurred to date on the exploration and evaluation assets is dependent upon the Company being able to identify a commercial ore body, to finance its exploration and development costs and to resolve any environmental, regulatory, or other constraints which may hinder the successful development of the assets. The aforementioned factors indicate the existence of a material uncertainty which may cast significant doubt about the Company’s ability to continue as a going concern.

The Company’s ability to continue as a going concern is dependent on its ability to obtain adequate financing on reasonable terms from lenders, shareholders and other investors and/or to commence profitable operations in the future. Although the Company has been successful in raising funds in the past, there is no assurance that it will be able to obtain adequate financing in which case the Company may be unable to meet its obligations. The directors, after reviewing the current cash position and having considered the Company’s ability to raise funds in the short term, adopt the going concern basis in preparing its consolidated financial statements.

These consolidated financial statements do not include adjustments that would be required if going concern is not an appropriate basis for preparation of the financial statements. These adjustments could be material.

2. BASIS OF PREPARATION (cont'd...)

Functional and presentation currency

These consolidated financial statements are presented in Canadian dollars, which is functional currency of the Company and its subsidiary.

Significant estimates and assumptions

The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the period. Actual results could differ from these estimates. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised. Significant areas requiring the use of management estimates include:

- i) The determination of the fair value of stock options and agent's warrants using stock pricing models, require the input of highly subjective assumptions, including the expected price volatility. Changes in the subjective input assumptions could materially affect the fair value estimate.
- ii) The determination of deferred income tax assets or liabilities requires subjective assumptions regarding future income tax rates and the likelihood of utilizing tax carry-forwards. Changes in these assumptions could materially affect the recorded amounts.

Significant judgments

The preparation of these consolidated financial statements requires management to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in applying the Company's financial statements include:

- i) Recorded costs of exploration and evaluation assets are not intended to reflect present or future values of these assets. The assessment of indications of impairment loss and the reversal of an impairment loss and the measuring of the recoverable amount when impairment tests have been prepared involve judgment. The recorded costs are subject to measurement uncertainty and it is reasonably possible, based on existing knowledge, that change in future conditions could require a material change in the recognized amount.
- ii) The assessment of the Company's ability to continue as a going concern involves judgment regarding future funding available for its exploration projects and working capital requirements and whether there are events or conditions that may give rise to significant uncertainty.
- iii) The classification of financial instruments.
- iv) The determination of whether it is likely that future taxable profits will be available to utilize against any deferred tax assets.
- v) The determination of whether a decline in the fair value of a financial asset classified as available-for-sale is prolonged and /or significant and is therefore an impairment.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out in the Company’s audited annual consolidated financial statements for the year ended March 31, 2018 were consistently applied to all the periods presented unless otherwise noted below.

New accounting policies

New standard IFRS 9 *Financial Instruments* (“IFRS 9”) has been issued by IASB to replace IAS 39 *Financial Instruments: Recognition and Measurement* (“IAS 39”). IFRS 9 introduces extensive changes to IAS 39’s guidance on the classification and measurement of financial assets and introduces a new “expected credit loss model” for the impairment of financial assets. IFRS 9 also provides new guidance on the application of hedge accounting. The standard becomes effective for annual periods beginning on or after January 1, 2018, which is the date of the Company will adopt IFRS 9.

Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward in IFRS 9, so the Company’s accounting policy with respect to financial liabilities is substantially unchanged. All aspects of our accounting policies for financial instruments as disclosed in note 3 to the financial statements for the year ended March 31, 2018 are unaffected.

Future change

A number of new standards and amendments to existing standards have been issued by the IASB that are mandatory for accounting periods beginning on or after January 1, 2019, or later periods. The Company has not applied these new standards in preparing these financial statements. The following pronouncement is considered by the Company to be the most significant of several pronouncements that may affect the financial statements in future periods.

- New standard IFRS 16 *Leases* (“IFRS 16”) has been issued by the IASB to replace IAS 17 *Leases* and the related interpretive guidance. IFRS 16 applies a control model to the identification of leases, distinguishing between a lease and a service contract on the basis of whether the customer controls the asset being leased. For those assets determined to meet the definition of a lease, IFRS 16 introduces significant changes to the accounting by lessees, introducing a single, on-balance sheet accounting model that is similar to current finance lease accounting, with limited exceptions for short-term leases or leases of low value assets. Lessor accounting is not substantially changed. The mandatory effective date of IFRS 16 is for annual periods beginning on or after January 1, 2019, with early adoption permitted for entities that have adopted IFRS 15 *Revenue*. The Company is currently evaluating the impact of adopting IFRS 9 on its consolidated financial statements.

Other new standards or interpretations with future effective dates are either not applicable or not expected to have a significant impact on the Company’s financial statements.

7. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Rochford Project, South Dakota

The Company's Rochford project is located in the Rochford Mining District of the Black Hills, South Dakota. The Rochford project includes the following properties:

Rochford Claims

During the year ended March 31, 2013, the Company staked 289 unpatented mineral claims ("Rochford Claims") situated in the Rochford Mining District of the Black Hills, South Dakota, at a cost of \$191,390.

During the year ended March 31, 2017, the Company staked an additional 150 unpatented federal lode mining claims for approximately \$81,400.

BHB Claims

On March 7, 2016, the Company and its wholly-owned US subsidiary entered into a purchase and sale agreement ("BHB Agreement") with four individuals (collectively the "Owners") to purchase a 100% interest in 19 unpatented lode mineral claims ("BHB Claims") located in the Rochford Mining District and the historical database pertaining to the BHB Claims in consideration of 4,000,000 shares of the Company (issued during the year ended March 31, 2017 with a fair value of \$1,500,000).

In addition, the Company agreed to grant the Owners a collective 2% net smelter returns royalty ("NSR") on the BHB Claims, a collective 1% NSR on the Company's Rochford Claims and a collective 1.5% NSR on claims falling within the area of mutual interest ("Area of Interest Claims Royalty"). The Area of Interest Claims Royalty will only be granted if the acquired property or properties are not already burdened with a royalty.

Standby Property

On September 2, 2016, the Company and its wholly-owned US subsidiary entered into an option agreement to acquire a 100% interest in the 9 patented lode mineral claims located in the Rochford Mining District. To earn its 100% interest, the Company is required to make cash payments of US\$500,000 to the optionor over a three year period as follows:

- pay US\$150,000 by upon execution of the option agreement (paid);
- pay additional US\$100,000 by September 2, 2017 (paid);
- pay additional US\$100,000 by September 2, 2018 (paid); and
- pay additional US\$150,000 by September 2, 2019.

In addition, the Company agreed to grant the optionor a 2% NSR and the Company has the option to purchase up to one-half of the NSR (1% NSR) at the price of US\$1,500,000 for 1% NSR or a proportionate amount if the Company purchases less than 1% of the NSR.

On September 23, 2016, the Company purchased a digital database relating to the Standby property in consideration of US\$75,000 (paid) and 500,000 common shares of the Company (issued with a fair value of \$220,000).

Share issuance (cont'd...)

During the year ended March 31, 2018, the Company:

- a) Completed a non-brokered private placement of 14,456,000 units at a price of \$0.20 per unit for gross proceeds of \$2,891,200. Each unit is comprised of one common share and one share purchase warrant; each warrant entitles the holder to acquire one additional common share for a period of 24 months at an exercise price of \$0.35 in the first 12 months and at an exercise price of \$0.50 in the second 12 months. No value was allocated to the warrants based on the residual method. The Company paid \$85,712 as a finders' fee. The Company also incurred filing and other expenses of \$21,855 in connection with the private placement.
- b) Issued 500,000 common shares at \$0.30 per share per share from the exercise of stock options for gross proceeds of \$150,000. Accordingly, \$143,775 was transferred from share-based payments reserve to share capital.
- c) Issued 815,364 common shares at prices ranging from \$0.25 to \$0.40 per share from the exercise of warrants for gross proceeds of \$314,146.

Basic and diluted loss per share

The calculation of basic and diluted loss per share for the six months ended September 30, 2018 was based on the loss attributable to common shareholders of \$620,693 (2017 - \$441,986) and a weighted average number of common shares outstanding of 68,049,514 (2017 - 51,915,172).

At September 30, 2018, 5,875,000 stock options (2017 - 4,835,000), 19,279,498 warrants (2017 - 8,493,862), and nil agent's warrants (2017 - 83,100) were excluded from the diluted weighted average number of common shares calculation as their effect would have been anti-dilutive.

12. SHARE-BASED PAYMENTS

Stock options

The Company has adopted an incentive rolling stock option plan (the "Plan") under which it is authorized to grant options to directors, officers, employees and consultants enabling them to acquire up to a maximum of 10% of the issued and outstanding common shares of the Company. The options can be granted for a maximum term of 5 years and vest as determined by the board of directors. Options granted to employees or consultants performing investor relations will vest in stages over 12 months with no more than one quarter of the options vesting in any three month period. The exercise price of options granted under the Plan shall not be less than the closing price of the Company's shares on the trading day immediately preceding the date of grant, less the discount permitted under the TSX-V's policies.

14. CAPITAL MANAGEMENT

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern, pursue exploration of its mineral property interest and to maintain a flexible capital structure for the benefits of its stakeholders. In the management of capital, the Company includes components of shareholders' equity in the definition of capital.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristic of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue common shares or dispose of assets.

Management reviews the capital structure on a regular basis to ensure that the Company's capital management objectives are achieved. There was no change in the Company's approach to capital management from the prior year. The Company's capital is not subject to any external restrictions.

15. COMMITMENTS

The Company has obligations under an operating lease for its corporate office facility. The lease expires by 2019 and the minimum remaining commitment for the fiscal year 2019 is \$48,786.

16. FINANCIAL INSTRUMENTS

The Company classified its financial instruments as follows: cash and cash equivalents and restricted cash classified as loans and receivables and measured at amortized cost; trade and other payables and amounts due to related parties as other financial liabilities and measured at amortized cost. The carrying amount of financial assets and liabilities carried at amortized cost is a reasonable approximation of fair value due to the relatively short period to maturity of these financial instruments.

Financial risk management

The Company's financial risks arising from its financial instruments are credit risk, liquidity risk, interest rate risk and foreign exchange rate risk. The Company's exposures to these risks and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Credit risk

Credit risk is the risk of potential loss to the Company if the counter party to a financial instrument fails to meet its contractual obligations. The credit risk of the Company is associated with cash and cash equivalents and restricted cash. The credit risk with respect to its cash and cash equivalents and restricted cash is minimal as they are held with high-credit quality financial institutions. Management does not expect these counterparties to fail to meet their obligations.

Liquidity risk

Liquidity risk is the risk that the Company will not meet its obligations associated with its financial liabilities as they fall due. The Company performs cash flow forecasting for each fiscal year to ensure there is sufficient cash available to fund its projects and operations. As at September 30, 2018, the Company had a cash and cash equivalents balance of \$198,020 and current liabilities of \$682,150. The Company's financial liabilities include trade and other payables which have contractual maturities of 30 days or are due on demand.

At present, the Company's operations do not generate cash flow. The Company's primary source of funding has been the issuance of equity securities through private placements and the exercise of stock options and warrants. Despite previous success in acquiring these financings, there is no guarantee of obtaining future financings.

Interest rate risk

Interest risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in the market interest rates. The Company is exposed to interest rate risk to the extent that the cash maintained at the financial institutions. The interest rate risks on cash and cash equivalents and restricted cash are not considered significant due to their short-term nature and maturity.

Foreign exchange rate risk

Foreign exchange risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company funds certain operations, exploration and administrative expenses in the United States by using US dollars converted from its Canadian bank accounts. At September 30, 2018, the Company had financial assets of \$148,257 and financial liabilities of \$336,673 denominated in United States dollars. A 10% strengthening of the US dollar would affect net loss by approximately \$18,800. The Company does not hedge its foreign exchange risk.

17. FAIR VALUE MEASUREMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

As at September 30, 2018 and March 31, 2018, the Company has no financial assets or financial liabilities measured at fair value. There have been no changes in these levels and no changes in classifications during the six months ended September 30, 2018.
