## **INTRODUCTION**

The following Management's Discussion and Analysis ("MD&A") provides information that management considers to be relevant to an assessment and understanding of Akwaaba Mining Ltd. (Formerly Castle Peak Mining Ltd.) ("Akwaaba" or the "Company") financial condition as at September 30, 2022 and the results of its operations and cash flows for the nine month period ended September 30, 2022 and follows the requirements of National Instrument 51-102 ("NI 51-102").

This discussion should be read in conjunction with the Company's unaudited financial statements and the related notes for nine month period ended September 30, 2022 which have been prepared in accordance with International Financial Reporting Standards ("IFRS") and the Company's annual audited financial statements and the related notes for the year ended December 31, 2021 which have been prepared in accordance with IFRS. All dollar amounts included therein and in the following MD&A are expressed in Canadian Dollars unless otherwise noted.

We report in accordance with IFRS and the following disclosures, and associated consolidated financial statements, are presented in accordance with IFRS. This MD&A is prepared as at August 11, 2022 and includes certain statements that may be deemed "forward looking statements". We direct readers to the sections entitled "Risk Factors" and "Forward Looking Statements" in this MD&A.

Further information can be obtained from the Company's filings on the SEDAR website at [www.sedar.com](http://www.sedar.com).

## **HIGHLIGHTS**

- On February 8, 2022, the Company announced a name change to Akwaaba Mining Ltd and new ticker symbol "TSXV: AML", formerly "Castle Peak Mining Ltd." and "TSXV: CAP", respectively.

The Board recommended the change of the Company's name to "Akwaaba Mining Ltd." as part of its marketing strategy to strengthen the Ghanaian footprint of the Company beyond its geographical involvement. The word "Akwaaba" means "Welcome" in the Akan languages spoken in Ghana. With the name change, the Company will be able to better reflect and improve ties with the local Ghanaian community.

- On February 15, 2019, the Company entered into an agreement ("Agreement") to purchase the Kunsu Prospecting License located in the Ahafo Ano South District of the Ashanti Region of Ghana (the "Property") from Wononuo Investment Limited ("Wononuo"), who was the holder of 100% undivided interest and title of the license (the "Purchase Transaction").

On November 1, 2021, and pursuant to the Purchase Transaction, Wononuo transferred the Property to the Company in exchange for a total purchase price of US\$2,000,000 as follows:

- a) A non-refundable down payment of US \$200,000 (\$262,500 paid on July 10, 2018);
- b) A non-refundable second deposit of US \$200,000 upon signing of the Definitive Agreement (\$270,920 paid on February 15, 2019);
- c) A non-refundable third deposit of US \$100,000 (\$132,880 paid on May 29, 2019);
- d) A non-refundable fourth deposit of US \$100,000 payable on presentation and evaluation of the full exploration technical report (\$130,860 paid on October 23, 2019);
- e) A non-refundable fifth deposit of US \$400,000 payable on obtaining shareholder approval on the Annual General Meeting (\$527,320 paid on December 16, 2019);
- f) A non-refundable sixth deposit of US \$350,000 (\$444,640 paid on December 18, 2020);
- g) A non-refundable seventh deposit of US \$300,000 following successful review of the results of the resource evaluations that are to be satisfactory to the Purchaser (\$370,268 paid on April 26, 2021); and
- h) On October 27, 2021, the Company granted a 1.5% Net Smelter Royalty (NSR) to Wononuo in lieu of the eighth and final deposit of US \$350,000 at closing of the Purchase Transaction.

- On April 27, 2021, the company received a \$425,000 loan from Allan Green; CEO and a director of the Company, and Candel & Partners SAS, a private company beneficially owned by Allan Green (together the "lender"). The Loan was unsecured and bears interest at the rate of 8% per annum and payable on the earlier of lender's demand or one year after the date of advance of principal. On December 30, 2021, the Company settled \$442,419 of the outstanding loan, including \$17,419 accrued interest, by issuing common shares of the Company to the lender.
- On August 4, 2021, the company received \$425,000 loan from Grizal Enterprises Ltd. ("Grizal"), a British Virgin Islands registered limited liability Company, and a majority shareholder of the Company. The Loan will be unsecured and bear interest at the rate of 8% per annum and payable on the earlier of lender's demand or one year after the date of advance of principal. On April 01, 2022, the Company settled \$433,942 of the outstanding loan, including \$8,942 accrued interest, by issuing common shares of the Company to the lender.
- On August 19, 2021, the Company incorporated a wholly-owned subsidiary company in the Republic of Ghana named Castle Sika Mining Ltd.

## **KUNSU PROPERTY**

The Kunsu Prospecting License is located approximately 35 Km Northwest of Kumasi and 240 Km Northwest of Accra; the property is centred approximately on Latitude 6°48'00" North and Longitude 1° 56.00" West (WGS84 Zone 30N). The property which is situated in close proximity to the Sefwi gold belt is strategically placed on the Asankragwa-Manso Nkwanta gold belt. The Kunsu concession is about 27 Km north of Asanko Gold's mine, and even closer to the Asanko Esaase gold prospect, all of which are inferred to be underlain by similar geology regionally as Kunsu.

Previous surficial sampling works on the Kunsu concession delineated four major NE-SW trending anomalous gold zones, these are:

- North Grid Anomaly, with strike length of about 3.5km;
- Central Grid Anomaly, with strike length of about 4km;
- South West Grid Anomaly, with strike length of about 0.5km;
- South East Grid Anomaly, with strike length of about 1km.

So far, all subsurface exploration works entailing drilling have been focused on parts of the North Grid Anomaly.

Following the entering into a Definite Agreement with Wononuo Investment Limited ("Wononuo") on February 15, 2019, the Company approved a 145 days follow-up stage exploration exercise which comprised geophysical survey, trenching and drilling works that focused on the North Grid zone of the property. The exercise was designed to in the end deliver to CAP information on the extent and prospectivity of gold mineralization and to provide reliable and sufficient data to define an inferred resource base.

The 145 days staged exploration exercise commenced on the 22nd February, 2019 and has to date covered the 5.8 km Induced Polarization (IP) geophysical survey at the North Grid zone, followed by 882 meters of trenches excavated on the geophysical defined targets. The trench results, as reported on 18 May, 2019, returned significant Au grade (> 100 ppb Au) intersections hosted within quartz vein lodes and provided compelling evidence of significant Au mineralization within the North Grid zone of the Kunsu property.

Due to the satisfactory results of this stage the Company prepared for a drilling exercise of 1,200 meters of RC drilling across the delineated mineralized zone at the North Grid anomaly. The drilling exercise commenced on 29th June, 2019 and ended on the 11th July 2019. A total of thirteen RC holes and 1,420 meters actually drilled covered this program.

The drilling generated a total of 1558 samples including QC samples which were analyzed for Au. Gold mineralization zones >0.1g/t were intercepted in seven (7) out of the thirteen (13) drill holes. Gold grades from drill holes at the West North Grid zone are relatively low but moderate values were intercepted at the bottom of the holes. Gold grade continuity at the West Grid zone has not been established at this stage due to paucity of drill data. Deeper levels of the holes require further testing, as the possible feeder veins may be at depth. Results from drill holes from the East North Grid zone however, returned moderate to significant gold grades of compelling economic interest. The resource estimate tabulated in terms of minimum gold grades (Table 1) for the East North Grid zone, effective September 13, 2019, is classified as at this stage to be an Inferred Resource in accordance with NI 43-101 definitions.

All the samples collected were prepared and analysed at the ALS Laboratories in Kumasi, Ghana. The ALS facility in Kumasi is a commercial laboratory and part of the ALS Group of laboratories that operates under a global quality management system accredited to ISO 9001:2008 with ISO/IEC 17025 certification. The samples were fine crushed to >70% passing 2mm. A 250g subsample is split by riffle splitter and pulverized to >85% passing 75µm. 50 g subsample is taken and fire-assayed with AAS finish.

A check sample analysis using similar procedures as ALS, and metallic screen fire assaying (MSFA) were completed at SGS Laboratory Services (GH) Limited located at Tarkwa, Ghana. SGS Laboratory Services GH. Ltd is accredited by SANAS and conforms to the requirements of ISO/IEC 17025:2005. In MSFA both undersize (-75 µm) and oversize (+75 µm) fractions are dried and weighed separately. The oversize fraction is fire-assayed in a single fusion to obtain the

oversize gold (coarse fraction gold). The undersize fraction is fire-assayed in duplicate following ordinary fire assay protocols.

The metallic screen fire analysis on selected samples strongly suggests the presence of coarse gold at Kunsu. Gold grades in coarse fractions (+75 µm) of the samples average 71% higher, compared to the gold grades in the fine fractions (-75 µm) which is normally the size fraction used in standard fire assay techniques for gold analysis. It is therefore likely that any resource calculation based on the current assay values would be the conservative minimum gold content. The screen fire assay results are strong indications that analyzing the Au in coarse fractions (+75 µm) of the samples would likely provide a better gold grade representation, provide upgrade of gold values, and have positive implications on the project by way of upgrading the resource estimates.

**TECHNICAL DISCLOSURE**

Castle Peak's technical disclosure has been reviewed and approved by Prosper Mackenzie Nude, PhD.MAIG, FSEG, who serves as a Qualified Person under the definition in National Instrument 43-101 ('NI 43-101').

The Company is in the business of exploring and evaluating assets in Ghana, Africa and as a result has no revenues. Expenses consist of general corporate administrative costs not attributable to the exploration activities. All costs that are attributable to exploration activities are capitalized to the mineral concessions to which they relate.

On October 31, 2021, the Company completed the purchase transaction of the Kunsu prospecting license in the Ahafo Ano South District of the Ashanti Region of Ghana from Wononuo Investment Limited.

Total liabilities decreased to \$100,343 at September 30, 2022, from \$597,576 at December 31, 2021, primarily due to settlement of \$433,943 loan owing to a majority shareholders of the company, by issuing Company shares.

Net cash used in investing activities for the nine month period ended September 30, 2022 was \$116,199 (December 31, 2021- \$461,886) representing primarily payments for finders fees, consulting and legal fees in Ghana.

Net cash provided by financing activities for the nine month period ended September 30, 2022 was \$nil (December 31, 2021- \$850,000 representing loans due to related parties, advanced by a director and officer of the company and another loan provided by a majority shareholder).

#### **OFF-BALANCE SHEET ARRANGEMENTS**

The Company has no off-balance sheet arrangements.

#### **RELATED PARTY TRANSACTIONS**

As of September 30, 2022, \$12,058 (December 31, 2021 - \$445,306) was owing to a director and officer and to a majority shareholder of the Company. The loan balance as of September 30, 2022 represents accrued interests.

In addition to the loans from related parties discussed above, the Company entered into the following transactions with related parties and key management personnel:

	Nine months ended September 30, 2022	Nine months ended September 30, 2021
Salaries and benefits paid to an officer of the Company <sup>(1)</sup>	\$ 56,805	\$ 56,801

(1) Remuneration attributed to key management personnel is recorded in salaries and benefits.

#### **CRITICAL ACCOUNTING ESTIMATES**

The preparation of the consolidated financial statements in conformity with IFRS requires management to make certain estimates, judgments and assumptions that affect the reported amounts and disclosures of assets and liabilities at the date of the consolidated financial statements and the reported amounts of expenses during the year. Actual results could differ from those estimates and such differences could be significant.

---

The fair value of the Company's cash, receivables, accounts payable and accrued liabilities and loans due to related parties approximate carrying value due to their short terms to maturity. The Company classifies its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value. The fair value hierarchy is as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

**Credit risk**

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's credit risk is primarily attributable to cash and receivables. The Company's cash are held with a major Canadian chartered bank and management believes the risk of loss to be remote. Receivables consist of input tax credits receivable from the Government of Canada. The Company does not believe it is subject to significant credit risk in relation to its receivables.

**Liquidity risk**

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. As at September 30, 2022, the Company had cash of \$78,436 and current liabilities of \$100,343. The Company intends to raise additional equity financing or related party debt financing in the coming period to meet its obligations.

**Market risk**

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

a) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of the Company's financial instruments will fluctuate due to changes in market interest rates. The Company is exposed to interest rate risk on its cash balances which earn interest at variable market interest rates, however, this exposure is considered to be minimal. The Company has no interest-bearing debt, and therefore, is not exposed to risk in the event of interest rate fluctuations.

b) Currency risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company's expenditures are predominantly in Canadian dollars, and US dollars. The Company has financial assets and liabilities denominated in US dollars as at September 30, 2022. Based on the Company's net exposure as at September 30, 2022, a 10% depreciation or appreciation of the Canadian dollar against the US dollar would result in an impact on profit or loss of \$1,798.

c) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold, individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

**RISK FACTORS**

This MD&A does not include all of the information required for full risk factors discussion and should be read in conjunction with the Company's annual financial statements for the year ended December 31, 2021.

**INTERNAL CONTROLS**

Internal controls over financial reporting are procedures designed to provide reasonable assurance that transactions are properly authorized, assets are safeguarded against unauthorized or improper use, and transactions are properly recorded and reported. A control system, no matter how well designed and operated, can provide only reasonable, and not absolute, assurance with respect to the reliability of financial reporting and financial statement preparation. Akwaaba has undertaken to put into place a system of internal controls appropriate for its size, and reflective of its operations. The Company's certifying officers are responsible for establishing and maintaining disclosure controls and procedures for the Company, and have concluded based on an evaluation As at December 31, 2020, that the disclosure controls and procedures for the Company are effective.

"intend" and similar expressions or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, have been used to identify forward looking information.

Forward looking information is subject to a variety of known and unknown risks, uncertainties and other factors that could cause actual events or results to differ from those expressed or implied by the forward looking information, including, without limitation:

- risks related to commodity price fluctuations, including gold price volatility;
- risks related to the exploration and evaluation of our mineral property including general operating risks;
- risks related to the fact that we are a new company with no exploration and evaluation assets in production or development and no history of production or revenue;
- uncertainties related to title to our exploration and evaluation assets and surface rights;
- risks and uncertainties relating to the interpretation of drill results and the geology, grade and continuity of our mineral deposits;
- risks related to governmental regulations, including environmental regulations;
- increased costs and restrictions on operations due to compliance with environmental laws and regulations;
- increased costs affecting the mining industry;
- increased competition in the mining industry for properties, qualified personnel and management;
- risks related to some of our directors' and officers' involvement with other natural resource companies;
- risks related to the delay in obtaining or failure to obtain required permits, or non-compliance with permits that have been obtained;
- risks related to our ability to obtain adequate financing for our planned exploration and evaluation activities and to complete further exploration programs;
- risks related to general economic conditions;
- recent market events and conditions; and
- currency fluctuations.

This list is not exhaustive of the factors that may affect any of our forward-looking information. Although we have attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Forward-looking information involves statements about the future and is inherently uncertain, and our actual achievements or other future events or conditions may differ materially from those reflected in the forward-looking information due to a variety of risks, uncertainties and other factors. Our forward-looking information is based on the beliefs, expectations and opinions of management on the date the statements are made and we do not assume any obligation to update forward looking information, whether as a result of new information, future events or otherwise, other than as required by applicable law. For the reasons set forth above, prospective investors should not place undue reliance on forward looking information.
