1. Nature of Operations and Going Concern

Monarca Minerals Inc. (the "Company" or "Monarca"), was incorporated on March 22, 1995 under the Canada Business Corporations Act. The Company's shares are traded on the TSX Venture Exchange under the trading symbol MMN. The Company is in the process of exploring and evaluating its exploration and evaluation property interests in Mexico. The address of the Company's corporate office and principal place of business is 18 King Street E, Suite 902, Toronto, Ontario.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, social licensing requirements, unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and restrictions and political uncertainty.

The Company presently has no proven reserves, and on the basis of information to date, has not yet determined whether any of its exploration and evaluation property interests contain economically recoverable ore resources. The amounts recorded as exploration and evaluation properties represent deferred exploration costs incurred to date and do not necessarily represent present or future values. The Company is dependent on raising funds through the issuance of shares and/or attracting joint venture partners in order to undertake expanded exploration and development of its exploration and evaluation properties and to ultimately realize profits through future production or sale of the exploration and evaluation properties.

At August 31, 2020, the Company had a working capital surplus of \$472,191 (November 30, 2019 – deficit (\$3,144,547)) and had incurred losses since inception, and at August 31, 2020, had an accumulated deficit of \$29,105,154 (November 30, 2019 - \$30,066,131) which has been funded primarily by the issuance of equity. The ability of the Company to continue as a going concern is dependent upon its ability to raise sufficient funds to meet its obligations as they become due. While the Company has been successful in securing financing in the past, there is no assurance that it will be able to do so in the future. Because of continuing operating losses, the Company's continuance as a going concern is dependent on its ability to obtain adequate financing and to reach profitable levels of operation. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operation.

These unaudited condensed consolidated interim financial statements have been prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to meet its commitments, continue operations and realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. They do not reflect adjustments to the carrying values of assets and liabilities which may be necessary should the Company be unable to do so and, therefore, be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the consolidated financial statements. Such adjustments could be material. Material uncertainties as mentioned above cast significant doubt upon the Company's ability to continue as a going concern.
