Consolidated Statements of Cash Flows	8
Notes to the Consolidated Financial Statements	9 - 27

Independent Auditor's Report

To the Shareholders of Monarca Minerals Inc.

Opinion

We have audited the consolidated financial statements of Monarca Minerals Inc. and its subsidiaries (the "Company"), which comprise the consolidated statements of financial position as at November 30, 2023 and 2022, and the consolidated statements of operations and comprehensive loss, consolidated statements of changes in shareholders' equity (deficiency) and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as at November 30, 2023 and 2022, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to Note 1 in the consolidated financial statements, which indicates that the Company incurred a net loss during the year ended November 30, 2023 and, as of that date, the Company's current liabilities exceeded its current assets and the Company's long-term debt was in default. As stated in Note 1, these events or conditions, along with other matters as set forth in Note 1, indicate that material uncertainties exist that cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Except for the matter described in Material uncertainty related to going concern section, we have determined that there were no additional key audit matters to communicate in our report.

Other information

Management is responsible for the other information. The other information comprises Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risks of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner of the audit resulting in this independent auditor's report is Chris Milios.

1. Nature of Operations and Going Concern

Monarca Minerals Inc. (the “Company” or “Monarca”), was incorporated on March 22, 1995 under the Canada Business Corporations Act. The Company’s shares are traded on the TSX Venture Exchange under the trading symbol MMN. The Company is in the process of exploring and evaluating its exploration and evaluation property interests in Mexico. The address of the Company’s corporate office and principal place of business is 390 Bay Street, Suite 806, Toronto, Ontario, Canada.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company’s title. Property title may be subject to government licensing requirements or regulations, social licensing requirements, unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory and environmental requirements. The Company’s assets may also be subject to increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and restrictions and political uncertainty.

The Company presently has no proven reserves, and on the basis of information to date, has not yet determined whether any of its exploration and evaluation property interests contain economically recoverable ore resources. The Company is dependent on raising funds through the issuance of shares and/or attracting joint venture partners in order to undertake expanded exploration and development of its exploration and evaluation properties.

At November 30, 2023, the Company had a working capital deficit of \$4,253,757, including past due debts, (November 30, 2022 - \$3,334,762) and had incurred losses since inception, and at November 30, 2023, had an accumulated deficit of \$33,474,038 (November 30, 2022 - \$33,615,511). In addition, the Company’s long-term debt, secured by certain exploration property interests, was in default as at November 30, 2023 and 2022 (see Note 10). The ability of the Company to continue as a going concern is dependent upon its ability to raise sufficient funds to meet its obligations as they become due. While the Company has been successful in securing financing in the past, there is no assurance that it will be able to do so in the future. Because of continuing operating losses, the Company’s continuance as a going concern is dependent on its ability to obtain adequate financing and to reach profitable levels of operation. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operation.

These consolidated financial statements have been prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to meet its commitments, continue operations and realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. They do not reflect adjustments to the carrying values of assets and liabilities which may be necessary should the Company be unable to do so and, therefore, be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the consolidated financial statements. Such adjustments could be material. Material uncertainties as mentioned above cast significant doubt upon the Company’s ability to continue as a going concern.

2. Basis of Presentation

Statement of Compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and the Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”), effective for the Company’s reporting for the years ended November 30, 2023 and 2022.

The preparation of consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

These consolidated financial statements of the Company for the years ended November 30, 2023 and 2022 were approved and authorized for issue by the Board of Directors on April 1, 2024.

These consolidated financial statements have been prepared on a going concern basis, under the historical cost basis. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

3. Recent Accounting Pronouncements

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods commencing on or after January 1, 2023. Many are not applicable or do not have a significant impact to the Company and have been excluded.

Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2)

In February 2021, the IASB issued ‘Disclosure of Accounting Policies’ with amendments that are intended to help preparers in deciding which accounting policies to disclose in their financial statements. The amendments are effective for year ends beginning on or after January 1, 2023.

Definition of Accounting Estimates (Amendments to IAS 8)

IAS 8 – In February 2021, the IASB issued ‘Definition of Accounting Estimates’ to help entities distinguish between accounting policies and accounting estimates. The amendments are effective for year ends beginning on or after January 1, 2023.

Classification of Liabilities as Current or Non-current (Amendments to IAS 1)

IAS 1 – Presentation of Financial Statements (“IAS 1”) was amended in January 2020 to provide a more general approach to the classification of liabilities under IAS 1 based on the contractual arrangements in place at the reporting date. The amendments clarify that the classification of liabilities as current or noncurrent is based solely on a company’s right to defer settlement at the reporting date. The right needs to be unconditional and must have substance. The amendments also clarify that the transfer of a company’s own equity instruments is regarded as settlement of a liability, unless it results from the exercise of a conversion option meeting the definition of an equity instrument. The amendments are effective for annual periods beginning on January 1, 2024.

4. Significant Accounting Policies

These annual consolidated financial statements have been prepared by the Company in accordance with IFRS, using the following significant accounting policies:

(a) Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries:

- Oremexico S.A. de C.V., (“Oremexico”), incorporated under the federal laws of Mexico on July 27, 2007;
- Monarca Mining S de R.L de C.V (“Monarca Mining”), incorporated under the federal laws of Mexico and acquired September 26, 2007.

Subsidiaries consist of entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company and are de-consolidated from the date control ceases. The financial statements include all the assets, liabilities, revenues, expenses and cash flows of the Company and its subsidiaries after eliminating inter-entity balances and transactions.

(b) Critical Judgments and Estimation Uncertainties

The preparation of consolidated financial statements in conformity with IFRS requires the Company’s management to make judgments, estimates and assumptions about future events that affect the amounts reported in the consolidated financial statements and related notes to the financial statements. Although these estimates are based on management’s best knowledge of the amount, event or actions, actual results may differ from those estimates and these differences could be material.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

i. Assets’ Carrying Values and Impairment Charges

In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

ii. Estimation of Decommissioning and Restoration Costs and the Timing of Expenditure

Decommissioning, restoration and similar liabilities are estimated based on the Company’s interpretation of current regulatory requirements and constructive obligations and are measured at fair value. Fair value is determined based on the net present value of estimated future cash expenditures for the settlement of decommissioning, restoration or similar liabilities that may occur upon decommissioning of the mine. Such estimates are subject to change based on changes in laws and regulations and negotiations with regulatory authorities.

4. Significant Accounting Policies – continued

iii. Income, value added, withholding and other taxes

The Company is subject to income, value added, withholding and other taxes. Significant judgment is required in determining the Company's provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Company's income, value added, withholding and other tax liabilities requires interpretation of complex laws and regulations. The Company's interpretation of taxation law as applied to transactions and activities may not coincide with the interpretation of the tax authorities. All tax related filings are subject to government audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made.

iv. Share-Based Payments

Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviors and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

v. Commitments and Contingencies

Refer to Notes 1, 6 and 15.

vi. Convertible debt

The classification of the Company's convertible debentures required Management to analyze the terms and conditions of debentures and use judgment to assess whether the debentures are a liability, equity, or a combination of the two. IAS 32 – Financial Instruments – Presentation ("IAS 32"), provides the criteria for Management to assess these complicated financial instruments to determine their appropriate classification(s). Factors considered are, but not limited to, whether the Company has a future obligation to settle the instrument in cash or exchange other assets or liabilities, the currency of settlement and if the settlement is already known to be equity, the amount will not vary based on the Company's future share price.

(c) Equipment

Equipment is stated at cost less accumulated amortization and any accumulated impairment losses. Where an item of equipment is comprised of major components having different useful lives, they are accounted for as separate items of equipment.

The gain or loss arising on the disposal or retirement of an item of equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the consolidated statement of operations.

4. Significant Accounting Policies – continued

(c) Equipment continued

Expenditures to replace a component of an item of equipment that is accounted for separately are capitalized with the existing carrying amount of the component written off. Other subsequent expenditures are capitalized if future economic benefits will arise from the expenditure. All other expenditures, including repair and maintenance, are recognized in the consolidated statement of operations as incurred.

Amortization is computed using the following methods over the useful lives of the assets at the following rates:

Asset	Basis	Rate
Software	declining balance	100%
Leasehold improvements	straight-line	7 years
Site vehicles	declining balance	30%

(d) Exploration and Evaluation Properties

All expenditures on exploration and evaluation activities, including costs incurred to acquire and secure exploration property licenses, are recorded as exploration expenses until it has been established that a mineral property is commercially viable.

(e) Impairment

At the end of each reporting period the carrying amounts of the Company's non-current assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any.

The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the consolidated statement of operations for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in the consolidated statement of operations.

(f) Restoration, Rehabilitation and Environmental Obligations

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration or development of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as soon as the obligation to incur such costs arises. The timing of the actual rehabilitation

4. Significant Accounting Policies – continued

(f) Restoration, Rehabilitation and Environmental Obligations - continued

expenditure is dependent on a number of facts such as the life and nature of the asset, the operating license conditions and, when applicable, the environment in which the mine operates.

Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using the unit-of production method. The corresponding liability is progressively increased as the effect of discounting unwinds creating an expense recognized in operations.

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding asset, except where a reduction in costs is greater than the carrying amount of the related assets, in which case the asset is reduced to nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company may in the future be affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

As at November 30, 2023 and 2022, the Company has no material restoration, rehabilitation or environmental obligations.

(g) Income Taxes

Income tax on the earnings or loss for the periods presented comprises current and deferred tax. Income tax is recognized in operations except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at year end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is provided using the temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the statement of financial position reporting date applicable to the period of expected realization or settlement.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax liabilities are generally recognized for all taxable temporary differences. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

4. Significant Accounting Policies – continued

(h) Share-Based Payments

The Company has a stock option plan as described in Note 7(b). The fair value of options issued to directors, officers and employees is recognized as an expense over their vesting period, with a corresponding increase in share-based payments reserve. The fair value of broker warrants issued to agents in conjunction with public offerings is charged to share issue costs with an offsetting amount recorded to share purchase warrants reserve.

When options are exercised, the proceeds received, together with any amount in share-based payments reserve are credited to share capital.

Fair value is estimated using the Black-Scholes option pricing model that takes into account, as of the grant date, the exercise price, the estimated expected life of the option, the current price of the underlying stock and its estimated expected volatility, estimated expected dividends on the stock and the risk-free interest rate over the estimated expected life of the option. A forfeiture rate is estimated on the grant date and is adjusted to reflect the actual number of options that vest.

For share-based payments granted to non-employees, the Company measures the goods and services received directly at their fair value, unless that fair value cannot be estimated reliably, in which case they are also measured using the fair value of the equity instruments granted.

(i) Loss per Share

Basic loss per common share has been computed by dividing the loss applicable to common shareholders by the weighted-average number of common shares outstanding during the representative periods. Diluted loss per common share is determined whereby the deemed proceeds on the exercise of share options and other dilutive instruments are considered to be used to reacquire common shares at the average price for the period with the incremental number of shares being included in the denominator of the diluted loss per share calculation. The diluted loss per share calculation excludes any potential conversion of options and warrants that would decrease the loss per share. For the periods presented, all convertible instruments, options and warrants were excluded from the calculation of diluted loss per share because they were anti-dilutive.

(j) Foreign Currency Translation

The financial statements of the Company and its subsidiaries are prepared using their functional currencies. Functional currency is the currency of the primary economic environment in which an entity operates. The functional currency of the parent company and its subsidiaries is the Canadian dollar. The presentation currency of the Company is the Canadian dollar.

Foreign currency transactions are translated into the functional currency using exchange rates prevailing at the dates of the transactions. At the end of each reporting period, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at that date. Non-monetary assets and liabilities are translated using the historical rate on the date of the transaction. Non-monetary assets and liabilities that are stated at fair value are translated using the historical rate on the date that the fair value was determined. All gains and losses on translation of these foreign currency transactions are charged to the consolidated statement of operations.

4. Significant Accounting Policies – continued

(k) Financial Instruments

Financial Assets and Liabilities

Initial recognition and measurement

Non-derivative financial assets within the scope of IFRS 9 are classified and measured as “financial assets at fair value”, as either fair value through profit or loss (“FVPL”) or fair value through other comprehensive income (“FVOCI”), and “financial assets at amortized costs”, as appropriate. The Company determines the classification of financial assets at the time of initial recognition based on the Company’s business model and the contractual terms of the cash flows.

All financial assets are recognized initially at fair value plus, in the case of financial assets not at FVPL, directly attributable transaction costs on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

Subsequent measurement- financial assets at amortized cost

After initial recognition, financial assets measured at amortized cost are subsequently measured at the end of each reporting period at amortized cost using the Effective Interest Rate (“EIR”) method. Amortized cost is

calculated by taking into account any discount or premium on acquisition and any fees or costs that are an integral part of the EIR. The EIR amortization is included in the statements of loss. The Company’s cash, amounts receivable are recorded at amortized cost.

Subsequent measurement – financial assets at FVPL

Financial assets measured at FVPL include financial assets management intends to sell in the short term and any derivative financial instrument that is not designated as a hedging instrument in a hedge relationship. Financial assets measured at FVPL are carried at fair value in the statements of financial position with changes in fair value recognized in other income or expense in the statements of earnings (loss). The Company’s short term investments are measured at FVPL.

Subsequent measurement – financial assets at FVOCI

Financial assets measured at FVOCI are non-derivative financial assets that are not held for trading and the Company has made an irrevocable election at the time of initial recognition to measure the assets at FVOCI. The Company does not measure any financial assets at FVOCI.

After initial measurement, investments measured at FVOCI are subsequently measured at fair value with unrealized gains or losses recognized in other comprehensive income or loss in the statements of comprehensive income (loss). When the investment is sold, the cumulative gain or loss remains in accumulated other comprehensive income or loss and is not reclassified to profit or loss.

Dividends from such investments are recognized in other income in the statements of earnings (loss) when the right to receive payments is established.

Derecognition

A financial asset is derecognized when the contractual rights to the cash flows from the asset expire, or the Company no longer retains substantially all the risks and rewards of ownership.

4. Significant Accounting Policies – continued

(k) Financial Instruments – continued

Impairment of financial assets

The Company's only financial assets subject to impairment are amounts, which are measured at amortized cost. The Company has elected to apply the simplified approach to impairment as permitted by IFRS 9, which requires the expected lifetime loss to be recognized at the time of initial recognition of the receivable. To measure estimated credit losses, amounts receivable have been grouped based on shared credit risk characteristics, including the number of days past due. An impairment loss is reversed in subsequent periods if the amount of the expected loss decreases and the decrease can be objectively related to an event occurring after the initial impairment was recognized.

Financial Liabilities

Initial recognition and measurement

Financial liabilities are measured at amortized cost, unless they are required to be measured at FVPL as is the case for held for trading or derivative instruments, or the Company has opted to measure the financial liability at FVPL. Financial liabilities include accounts payable and accrued liabilities, interest payable, promissory notes and current portion of long-term debt. All financial liabilities are recognized initially at fair value and in the case of long-term debt, net of directly attributable transaction costs.

Subsequent measurement – financial liabilities at amortized cost

After initial recognition, financial liabilities measured at amortized cost are subsequently measured at the end of each reporting period at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on acquisition and any fees or costs that are an integral part of the EIR. The EIR amortization is included in the statements of loss.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires with any associated gain or loss recognized in other income or expense in the statements of loss.

(l) Share Issue Costs

Share issue costs incurred on the issue of the Company's shares are charged directly to share capital.

(m) Compound Financial Instruments

Compound financial instruments comprise convertible debentures that can be converted into common shares at the option of the holder, and the number of shares to be issued does not vary with changes in their fair value.

The liability component is recognized initially at the fair value of a similar liability that does not have an equity conversion option. The equity component is recognized initially at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their carrying amounts. Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The equity component of a compound financial instrument is not re-measured subsequent to initial recognition.

6. Exploration and Evaluation Properties

(a) Tejamen Property, State of Durango

Tejamen is located northwest of Durango, the capital of the State of Durango, Mexico, and consists of certain mineral concessions.

Monarca owns 100% of the mineral rights at Tejamen. In 2007, the Company's surface access rights expired. Following a process that commenced in 2009, the Mexican government awarded the surface rights to the local Ejido (a type of community) of Tejamen in 2012.

The property has been pledged as security for the long-term debt of the Company discussed in Note 10.

(b) San Lucas Property, State of Durango

The San Lucas Property ("San Lucas"), located north of the city of Durango, Durango State, Mexico and consists of certain mineral concessions.

6. Exploration and Evaluation Properties - continued

(c) El Sol Property

On August 3, 2020, the Company sold its 100% interest in the El Sol property located in Durango State, Mexico. The property was sold for US\$300,000 that is payable in three equal instalments to a subsidiary of Southern Silver Exploration Corp;

- i) on signing (received)
- ii) twelve months after signing (received)
- iii) eighteen months after signing (received)

In connection with this agreement, the Company has retained a 2% Net Smelter Return ("NSR") on production from the claim with the acquirer holding an option to purchase the royalty at any time for US\$1,000,000.

(d) San Jose Property

On June 10, 2019, the Company signed an option agreement pursuant to which the Company was granted the option to acquire a 100% interest in certain claims located in Chihuahua, Mexico. The Company was granted the right to evaluate and explore the property for a period of two years upon signing the agreement and can acquire 100% interest at the end of this period in exchange for aggregate payments of \$115,000 within the two-year period as follows:

- i. Payment of US\$5,000 (paid);
- ii. Payment of US\$50,000 on or before June 10, 2020 (paid); and
- iii. Payment of US\$60,000 on or before June 10, 2021 (paid)

7. Share Capital

(a) Common Shares

Authorized: Unlimited number of common shares, without par value

Issued and outstanding common shares:

	Number	Amount
Balance November 30, 2021, 2022 and 2023	126,554,606	\$ 28,862,147

(b) Share Purchase Options

The Company has a 10% rolling share purchase option plan (the "Plan") whereby options may not exceed 10% of the total number of shares issued and outstanding of the Company from time to time on a non-diluted basis. Options granted under the Plan have an exercise price equal to the quoted market price of the Company's shares and vest at the discretion of the Board.

A summary of the status of the Company's stock option plan for the year ended November 30, 2022 and November 30, 2023 is as follows:

	Number of Options	Weighted Average Exercise Price (\$)
Balance November 30, 2021	7,975,000	0.102
Expired	(2,075,000)	0.140
Balance November 30, 2022 and November 30, 2023	5,900,000	0.083

MONARCA MINERALS INC.
Notes to the Consolidated Financial Statements
As at November 30, 2023 and 2022
Expressed in Canadian Dollars

7. Share Capital (continued)

- (d) The weighted average remaining contractual life of the options as at November 30, 2023 is 1.57 years (November 30, 2022 – 2.57 years).
- (e) Share Purchase Warrants Reserve

Transactions involving the Company's share purchase warrants have been summarized as follows:

	Number of warrants	Grant Date Fair Value -net of issue costs (\$)	Weighted Average Exercise Price
Balance, November 30, 2021	56,076,000	944,726	0.0746
Expired	(176,000)	(4,000)	0.0500
Balance, November 30, 2022	55,900,000	940,726	0.0750
Expired	(55,900,000)	(940,726)	0.0750
Balance, November 30, 2023	-	-	-

There are no warrants outstanding at November 30, 2023.

8. Share-Based Payment Reserve

Transactions involving the Company's share-based payments have been summarized as follows:

	Year Ended November 30, 2023	Year Ended November 30, 2022
Balance, beginning of year	\$ 327,315	\$ 629,103
Options issued/(expired) (note 7b)	-	(261,788)
Balance, end of year	\$ 367,315	\$ 367,315

9. Promissory Notes

During 2016 and 2017, the Company received \$400,000 from a company controlled by a Director of the Company. The loans are unsecured, bear interest at 5% and are due on demand.

During 2023, the Company received \$70,000 from a Director of the Company (note 11(c)). The loan is unsecured, bear interest at 5% and is due on demand.

10. Long-Term Debt

On October 9, 2012, the Company closed a convertible debenture financing for gross proceeds of \$727,500 through the issue of 72.75 units with each unit consisting of \$10,000 in convertible debentures and 100,000 common share purchase warrants, at a purchase price of \$10,000 per unit. Each warrant was exercisable into one common share of the Company at a price of \$0.10, expiring five years from the date of issue.

The debentures were convertible into shares at a price of \$0.10 per common share at the option of the holder. If the average closing price of the Company's shares exceeds \$0.35 for every trading day for 120 consecutive trading days (with the 120th day referred to as the "Triggering Date"), then, (i) the Company ceased to have an obligation to pay any interest that accrues after the Triggering Date and, (ii) before the first anniversary of the Triggering Date, the holder must convert.

The debentures bear interest at 16% per year; 8% is payable in cash and, at the option of the Company, 8% is payable in shares. Interest is payable annually on October 15th of each year. Upon the occurrence of a default the interest rate shall increase to 21% per annum. Certain covenants of this loan were not met as at November 30, 2021. As a result, the loan has been reclassified to current liabilities. Effective April 1, 2020, the Company issued new debentures in settlement of mature debentures and accrued interest.

The debentures matured on October 9, 2017 and on April 1, 2020, the debentures along with all accrued interest were rolled into new debentures. The outstanding amount of the new debentures was \$727,500 plus accrued interest of \$287,945 for a total of \$1,015,445.

As a result of the issuance of the new debentures, a gain of \$312,980 was recorded during the year ended November 30, 2020.

From April 1, 2020 until the maturity date of October 9, 2022, each convertible debenture will be convertible into common shares of the company at the option of the holder at a conversion price of \$0.075 per share for the first 12 months from closing, being an amount of 133,333 shares per \$10,000 principal amount; and at \$0.10 per share thereafter until maturity, being an amount of 100,000 shares per \$10,000 principal amount.

The fair value of the liability component at the time of issue was calculated as the discounted cash flows for the debentures assuming a market interest rate of 18%, which was the estimated rate for the debentures without the equity component of the conversion feature. The residual of the principal less the present value of the liability component was allocated to the conversion option based on their relative fair value, resulting in an allocation of \$121,130 to the conversion option.

Interest shall be paid annually in arrears on each anniversary of the issue date of the debentures and on the maturity date. The rate of interest will be 12% per annum increasing to 21% if certain covenants are not met. The Company will have the option, in its sole discretion, to pay the interest in shares based on the market price of the Company in accordance with the policies of the TSX Venture Exchange.

On October 21, 2020, the Company issued 1,907,600 common shares upon the conversion of \$143,070 of convertible debentures in accordance with the terms of the debenture agreements.

Certain covenants of this loan were not met as at November 30, 2021. As a result, the loan has been reclassified to current liabilities. See Notes 1 and 11.

10. Long-Term Debt (continued)

During 2023, interest of \$296,036 (2022 - \$241,244) was incurred of which \$nil (2022 - \$nil) was paid in cash. Included in interest payable on the consolidated statement of financial position as at November 30, 2023 is \$745,766 relating to this debt (2022 - \$549,151). Payments on the principal amount owing equal to \$nil were made during the year ended November 30, 2023 (2022 - \$nil). The equity conversion option of \$121,130 has expired and the grant date value assigned to the conversion feature has been moved to deficit.

11. Related Party Transactions

During the years ended November 30, 2023 and 2022, the Company entered into the following transactions with related parties that are not subsidiaries of the Company and are not disclosed elsewhere in these consolidated financial statements.

- (a) Key management includes the Executive Chairman, the Chief Executive Officer, the President, the Chief Financial Officer, the Vice President of Exploration, and the Directors. During the year ended November 30, 2023, the cash compensation paid or payable to key management for services was \$323,997 (2022 - \$386,305). Included in accounts payable and accrued liabilities at November 30, 2023 is \$364,518 (November 30, 2022 - \$240,000) due to Directors and Officers. This amount is unsecured, non-interest bearing and has no specific terms of repayment. Stock based compensation for the year ended November 30, 2023 was \$nil (2022 - \$nil).
- (b) Companies controlled by a director of the Company hold \$751,243 of the long-term debt as at November 30, 2023 (2022 - \$751,243) (note 10). During the year ended November 30, 2023, interest of \$260,512 (2022 - \$212,295) was accrued on the long-term debt payable to these companies and as at November 30, 2023, \$656,275 (2022 - \$395,763) is included in interest payable on the consolidated statement of financial position. This amount is unsecured, bears interest at 21% and is due on demand.
- (c) During the year ended November 30, 2023, interest accrued on the promissory notes (Note 9) totaled approximately \$20,164 (2022 - \$20,164). Included in interest payable on the consolidated statement of financial position as at November 30, 2023 is \$186,952 (2022 - \$166,788) related to this interest. The interest is payable to companies controlled by a director of the Company. This amount is unsecured, bears interest at 5% and is due on demand.
- (d) During the year ended November 30, 2023, legal fees were incurred of \$1,787 (2022 - \$4,782) with a law firm of which a partner is a director of the Company. This amount is included in cost of share issue within equity, or as accounting and legal fees on the consolidated statement of operations. Included in accounts payable and accrued liabilities at November 30, 2023 is \$6,728 (2022 - \$4,711) relating to these fees. This amount is unsecured, non-interest bearing and has no specific terms of repayment.
- (e) See Notes 7b, 9 and 10.

MONARCA MINERALS INC.

Expressed in Canadian Dollars

12. Segmented Information

The Company operates in a single industry segment. Assets by geographic location are as follows:

	<u>November 30, 2023</u>	<u>November 30, 2022</u>
Mexico	\$17,271	\$62,912
Canada	\$15,177	\$36,075

13. Management of Capital Risk

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its exploration and evaluation properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

In the management of capital, the Company includes the components of shareholders' equity, as well as cash. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

The Company's investment policy is to invest its cash in highly liquid short-term interest-bearing investments with maturities 90 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

The Company has not changed its approach to capital management during fiscal 2023 or 2022. The Company and its subsidiaries are not subject to any external capital restrictions. The Company expects that it will be necessary to raise additional capital during the current fiscal year to meet its budgeted exploration and development plans and fund operations.

The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than of the TSX Venture Exchange ("TSXV") which requires adequate working capital or financial resources of the greater of (i) \$50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of 6 months. As of November 30, 2023, the Company was not compliant with the requirement. The impact of this violation is not known and is ultimately dependent on the discretion of the TSXV.

14. Financial Risk Management

**Financial instrument classification
Under IFRS 9**

Financial assets

Cash	Amortized cost
Amounts receivable	Amortized cost
Short term investment	FVPL

Financial liabilities

Accounts payable and accrued liabilities	Amortized cost
Interest payable	Amortized cost
Promissory notes	Amortized cost
Long-term debt	Amortized cost

Fair Value Hierarchy and Liquidity Risk Disclosure:

The fair value hierarchy has the following levels: (a) quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1); (b) inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices) (Level 2); and (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3). At November 30, 2023, the Company's financial instruments carried at fair value, consisting of short term investments, were classified as level 2 within the fair value hierarchy.

The fair value of cash, amounts receivable, accounts payable and accrued liabilities, interest payable, promissory notes and current portion of long-term debt approximate their carrying value due to their short-term to maturity.

The Company is exposed to certain financial risks, including currency risk, credit risk, liquidity risk, interest rate risk, and price risk. The Company may be exposed to risks of varying degrees of significance which could affect its ability to achieve its strategic objectives. The main objectives of the Company's risk management processes are to ensure that the risks are properly identified and that the capital base is adequate in relation to those risks. There have been no significant changes in the risks or the Company's objectives, policies and procedures related to risk management during fiscal 2023 and 2022.

(a) Currency Risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company operates in Canada and Mexico and a portion of its expenses are incurred in Mexican Pesos and United States dollars. A significant change in the currency exchange rates between the Canadian dollar relative to the Mexican Peso and US dollars could have an effect on the Company's results of operations, financial position or cash flows. The Company has not hedged its exposure to currency fluctuations.

At November 30, 2023 and 2022, the Company is exposed to currency risk through the following assets and liabilities denominated in Mexican Pesos ("MP\$"):

	2023		2022	
Cash	MP\$	15,926	MP\$	280,063
Amounts receivable and prepaid expenses		87,483		465,953
Accounts payable and accrued liabilities		(1,586,928)		(1,638,870)
Total	MP\$	(1,483,519)	MP\$	(892,854)
Canadian dollar equivalent	CAD\$	(116,053)	CAD\$	(62,646)

MONARCA MINERALS INC.
Notes to the Consolidated Financial Statements
As at November 30, 2023 and 2022
Expressed in Canadian Dollars

14. Financial Risk Management - continued

At November 30, 2023 and 2022, the Company is exposed to currency risk through the following assets and liabilities denominated in United States Dollars ("US\$"):

	2023		2022	
Cash	US\$	436	US\$	6,002
Total	US\$	436	US\$	6,002
Canadian dollar equivalent	CAD\$	578	CAD\$	8,107

(b) Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations.

The majority of the Company's cash is held through large Canadian financial institutions. The Company is also exposed to credit risk on its amounts receivable which are unsecured. The Company considers the risk of loss to be low. There have been no significant changes to how management manages credit risk during 2023 and 2022.

(c) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure. Accounts payable, accrued liabilities, interest payable, promissory notes and current portion of long-term debt are due within the current operating period.

The Company's expected sources of cash flow in the upcoming year are equity financings. The Company will require additional cash to finance operations. There have been no changes to how management manages liquidity risk during 2023 and 2022.

(d) Interest Rate Risk

Interest rate risk is the risk borne by an interest-bearing asset or liability as a result of fluctuations in interest rates. The Company has cash balances maintained in Canada. The Company's current policy is to invest excess cash in GICs issued by Canadian banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its bank. The Company's interest-bearing debt is at a fixed interest rate and is therefore not impacted by changes in interest rates.

(e) Price Risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company does not actively manage this risk as it is considered a low risk area given the Company is not a producing entity.

14. Financial Risk Management - continued

(f) Sensitivity Analysis

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a twelve-month period.

- Based on the net exposures as at November 30, 2023 (as seen in Note 14(a)), and assuming that all other variables remain constant, a 10% depreciation or appreciation of the Canadian dollar against the Mexican Peso and US dollar would not result in a material change to the Company's loss.
- Price risk is remote since the Company is not a producing entity.
- A change in interest rates of 1% would result in a corresponding change in net loss for the year of approximately \$20,737 based on the cash balance at November 30, 2023.

15. Commitments and Contingencies

Environmental

The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

Consulting Contracts

The Company has granted a consultant a silver purchase option whereby the consultant may purchase 100,000 ounces of silver per year at a price of USD \$27.50 per ounce for the first five years of production at any producing mine of the Company.

Legal Proceedings

The Company is from time to time involved in various claims, legal proceedings and complaints arising in the normal course of business. The Company cannot reasonably predict the likelihood or outcome of these actions. The Company does not believe that adverse decisions in any pending or threatened proceedings related to any matter, or any amount which may be required to be paid by reason thereof, will have a material effect on the financial condition or future results of operations. As at November 30, 2023 and 2022, no amounts have been accrued related to such matters.

The Company has discontinued mining operations in various jurisdictions and has written down the carrying value of the related assets to nominal amounts. An estimate of the total liability, if any, for which the Company might become obligated as a result of its role as operator, guarantor or indemnifier, is not determinable, nor expected to be material, and no amount has been provided for in these consolidated financial statements.

Exploration and Evaluation Properties

In order to maintain the Company's mineral concessions and titles in good standing the Company is required to pay fees semi-annually to the Secretaria de Economia in Mexico. Minimum annual commitments of approximate \$47,000.
