MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The following Management Discussion and Analysis ("MD&A") reports on the operating results, financial condition and business risks of DLC Holdings Corp. ("DLC" or the "Company") and is designed to help the reader understand the results of operations and financial condition of the Company as at and for the nine months ended September 30, 2019. This MD&A should be read in conjunction with the Company's unaudited condensed consolidated interim financial statements for the nine months ended September 30, 2019 and audited consolidated financial statements for the years ended December 31, 2018 and 2017 and the notes thereto which were prepared in accordance with IFRS as issued by the International Accounting Standard Board ("IASB") (the "Financial Statements"). Other information contained in these documents has also been prepared by management and is consistent with the data contained in the Financial Statements. All dollar amounts referred to in this MD&A are expressed in Canadian dollars except where indicated otherwise.

The Company's certifying officers, based on their knowledge, having exercised reasonable diligence, are also responsible to ensure that these filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by these filings. These Financial Statements together with the other financial information included in these filings fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented in this filing. The Board of Directors' approves the Financial Statements and MD&A and ensures that management has discharged its financial responsibilities. The Board's review is accomplished principally through the Audit Committee, which meets periodically to review all financial reports, prior to filing. The Board of Directors has approved the Financial Statements and MD&A, as well as ensured that management has discharged its financial responsibilities as at November 28, 2019.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This MD&A includes "forward-looking statements", within the meaning of applicable securities legislation, which are based on the opinions and estimates of Management and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment regarding the direction of our business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions, or other future performance suggested herein. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "budget", "plan", "continue", "estimate", "expect", "forecast", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar words suggesting future outcomes or statements regarding an outlook. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. These forward looking statements include but are not limited to statements concerning:

- The Company's success at completing future financings

CORPORATE OVERVIEW

The Company was incorporated pursuant to the provisions of the British Columbia Business Corporations Act on March 25, 2011 and is listed for trading on the TSX Venture Exchange ("Exchange") under the symbol DLC. The Company's head office address is 1620 – 609 Granville Street, Vancouver, British Columbia, Canada V7Y 1C3 and its registered and records office address is 2200 – 885 West Georgia Street, Vancouver, British Columbia V6C 3E8.

On April 24, 2018, the Company completed its acquisition of 60.5% of the issued and outstanding share capital of Ceniako Ltd. ("Ceniako"), a private corporation duly incorporated under the laws of Cyprus and 100% of the issued and outstanding share capital of Craven House Industries Ltd. ("Craven House"), a private corporation duly incorporated under the laws of Ireland; a transaction which constituted a Reverse Takeover under the policies of the TSX Venture Exchange.

The Company issued 28,902,045 Series B Preferred Shares to acquire 60.5% of Ceniako and 35,845,252 Series B Preferred Shares to acquire 100% of Craven House. After completion of the transaction, the shareholders of Ceniako and Craven House held approximately 76.5% of the common and preferred shares of the Company.

Through the acquisition, DLC now controls c.2,500 hectares of land and c.10km of water-front and direct beach-front real estate facing the South Atlantic Ocean in the Bahia province of Brazil. Additionally, the Company owns a substantial macadamia processing facility in South Africa.

In connection with the Reverse Takeover outlined above, DLC has entered into a loan facility, under which the Company has been provided with a loan of \$817,767, of which \$386,280 was repaid in 2018, from KwikBuild Corporation Ltd, a company related to Craven House. The loan facility holds a senior secured position, bears an interest rate of 5% and has a term of five years.

On August 29, 2019, the Company announced the appointment of Ms. Tamra Spink as CFO.

Overall Performance

The Company's investments in Craven House and Ceniako represent holdings in real property. Accordingly, changes to fair value and capital appreciation are anticipated to be on a long-term horizon. The Company prepares valuations with reference to reports provided by professional, independent third-party valuers. Fair value is assessed at each reporting period with indicators of changes to market fundamentals reviewed on an ongoing basis. Management anticipates moderated adjustments as land tenure is robust in its current ownership jurisdictions. Fair value adjustments in the nine months ended September 30, 2019 and year ended December 31, 2018 relate to the depreciating value of buildings on the macadamia facility in South Africa.

OUTLOOK

DLC's strategy is to further its investment in agricultural land and in the food processing industry.

Prior to April 24, 2018, the loss and comprehensive income (loss) reflect the consolidated activities of Craven House and Ceniako. Craven House and Ceniako are inactive with the financial results reflecting foreign exchange adjustments applied to investment holdings and minor administrative expenses. The significant loss in the three months ended December 31, 2018 includes a non-cash listing expense of \$4,253,684 which is a valuation of the Reverse Takeover consideration.

RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2019

The Company reported a net loss of \$642,775 in the three months ended September 30, 2019 compared to an income of \$44,818 for the three months ended September 30, 2018. The majority of the net loss comprised of a foreign exchange loss of \$626,007 (2018 – gain of \$63,911). The foreign exchange recorded is largely attributable to the end of period adjustment of the Company's investments in subsidiaries which are held in Brazil and tangible assets held in Argentina to current rates.

As a result of the acquisition of DLC by Ceniako and Craven House shareholders, the operations of DLC have been incorporated into the financial results of the Company as of April 24, 2018. In the three months ended September 30, 2019, the Company incurred transfer agent and filing fees of \$1,332 (2018 - \$2,678), consulting fees of \$nil (2018 - \$6,300), management fees of \$3,500 (2018 - \$15,000) and professional fees

of \$21,934 (2018 - \$4,421). These costs derive from the management of a public entity. Professional fees were more significant for the three months ended September 30, 2019 as the Company worked to manage the affairs and agreements with respect to its macadamia facility. Additionally, the interest expense of \$10,468 (2018 - \$11,293) relates to debt instruments acquired under the Reverse Transaction being a promissory note, long term loan and the KwikBuild Loan as well as a new related party loan facility in the current period.

In the three months ended September 30, 2019, the Company recorded a fair value adjustment expense of \$4,639 (2018 - \$3,224) to account for the depreciating value of buildings on the macadamia facility in South Africa and service vehicle in North America.

In the three months ended September 30, 2019, the Company recorded a loss on marketable securities of \$3,976 (2018 – gain of \$50,400) of which \$341 was a realized loss on the sale of marketable securities and \$3,635 was an unrealized loss and related to the mark to market of the Company's marketable securities holdings. Additionally, the Company recognized other income of \$20,156 (2018 – loss of \$24,801) from the leasing of its South Africa assets and \$8,861 (2018 – loss of \$564) from interest and investment income.

In the three months ended September 30, 2019, the Company recorded a currency translation adjustment loss of \$503,218 (2018 – \$417,003) due to the translation of the Company's entities with foreign functional currencies to the Company's presentation currency of Canadian dollars.

RESULTS OF OPERATIONS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2019

The Company reported a net loss of \$334,970 in the nine months ended September 30, 2019 compared to \$4,006,022 for the nine months ended September 30, 2018. The majority of this net loss comprised a foreign exchange loss of \$317,178 (2018 – gain of \$240,114). The foreign exchange recorded is largely attributable to the end of period adjustment of the Company's investments in subsidiaries which are held in Brazil and tangible assets held in Argentina to current rates.

As a result of the acquisition of DLC by Ceniako and Craven House shareholders, the operations of DLC have been incorporated into the financial results of the Company as of April 24, 2018. In the nine months ended September 30, 2019, the Company recorded a currency translation adjustment loss of \$1,303,294 (2018 – \$100,460) due to the translation of the Company's entities with foreign functional currencies to the Company's presentation currency of Canadian dollars.

LIQUIDITY AND CAPITAL RESOURCES

The Company defines capital as consisting of the components of shareholder's equity. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to manage the cost of capital at acceptable levels of risk.

The Company manages its capital structure to maximize its financial flexibility making adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets and business opportunities. The Company does not presently utilize any quantitative measures to monitor its capital, but rather relies on the expertise of the Company's management to sustain the future development of the business.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. As at September 30, 2019, the Company is not subject to any externally imposed capital requirements or debt covenants.

The Company has the following long-term debt instruments as at September 30, 2019:

Promissory note

The Company has issued a promissory note of \$157,500 due to a company controlled by the Company's CEO. The promissory note bears interest at rate of 6%, is due on November 7, 2019 and is unsecured. As at September 30, 2019, the promissory note has accrued interest of \$27,366.

Related Party Loans

The Company has issued loans of \$128,706, due to a company controlled by the Company's CEO ("Related Party Loans"). The Related Party Loans bear interest at a rate of 6%, are due on June 1, 2021 and are unsecured. In the period ended September 30, 2019, the Company was issued a loan of US\$45,000 by a company controlled by the Company's CEO which accrues interest at a rate of 6%.

KwikBuild Loan

In conjunction with the RTO transaction, DLC entered into a loan facility, under which the Company was provided with a loan from KwikBuild Corporation Ltd, a subsidiary of Craven Industrial Holdings PLC ("KwikBuild Loan"). The KwikBuild Loan holds a senior secured position, bears an interest rate of 5% and has a term of five years. This is a related party transaction as the Company has directors in common with Craven Industrial Holdings PLC.

KwikBuild Loan	Principal	Interest	Total
Balance, December 31, 2018	\$ 460,398	\$ 25,452	\$ 485,850
Proceeds	31,369	-	31,369

Balance, September 30, 2019	\$ 478,186	\$ 42,502	\$ 520,688

The Company incurred a comprehensive loss of \$1,638,264 for the nine months ended September 30, 2019 (2018 – \$4,106,482). During the period ended September 30, 2019, the Company's operations provided net cash loss of \$63,130 (2018 – net inflow of of \$6,913). In the period ended September 30, 2019, the Company sold marketable securities proceeds of \$41,250 (2018 - \$27,398) which was applied against its margin trading, along with investment income, in the amount of \$69,228 (2018 - \$Nil). In the period, the Company was extended a loan of \$59,816 from a related party and additional funds on its Kwikbuild loan of \$31,369. Additionally, the Company provided \$17,422 in loaned funds to a subsidiary of Kwikbuild. These activities resulted in an overall balance of \$27,860 in cash as at September 30, 2019, a net decrease of \$27,181 from December 31, 2018.

At September 30, 2019, the Company had working capital of \$9,003. Additional draw-downs are available under the KwikBuild loan facility described above to meet working capital working needs as required and Management therefore believes that the Company likely has sufficient funds from which to fund on-going operating requirements for the near term. The Company has a history of losses and has accumulated a deficit of \$9,242,043 as at September 30, 2019.

The condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis, which contemplates that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, the condensed consolidated interim financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

OFF-BALANCE SHEET ARRANGEMENT

The Company currently has no off-balance sheet arrangement.

The RTO was a related party transaction as the Company has directors in common with the vending private companies of Ceniako and Craven House.

PROPOSED TRANSACTIONS

The Company does not have any proposed transactions other than as disclosed elsewhere in this document.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of these consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date

**DLC HOLDINGS CORP.
MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2019**

of the consolidated financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Accounting estimates will, by definition, seldom equal the actual results. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The key areas of judgment applied in the preparation of the consolidated financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

Investment entities

The Company has judged that certain of its controlled subsidiaries qualify as investment entities. The primary functions of the private companies owned by Ceniako and Craven House was judged to be consistent with the requirements of the investment entity exemption under IFRS 10 *Consolidated financial statements*. Specifically, those entities have the specific function of providing returns on a capital appreciation basis and are evaluated by management on a fair value basis.

Determination of functional currency

The functional currency of each of the subsidiaries and the Company were assessed to determine the economic substance of the currency in which each entity performed its operations. The functional currency determination was conducted through an analysis of the consideration factors identified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*. The determination of functional currency involves certain judgments to determine the primary economic environment and the Company reconsiders the functional currency if there are changes in events and conditions of the factors used in the determination of the primary economic environment.

Going concern

The assessment of the Company's ability to continue as a going concern involves judgment regarding future funding available for its operations and working capital requirements.

The key areas of estimates applied in the preparation of the consolidated financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

Valuation of RTO consideration

Pursuant to the guidance of IFRS 3, the fair value of the equity of the accounting acquirer is used to measure the consideration transferred for its interest in the accounting acquiree unless the equity interests of the accounting acquiree are more reliably measured. Management determined that the fair value measurements of the accounting acquirers', being Ceniako and Craven House, investments provided a basis for a more reliable fair value measurement of the consideration transferred. This entailed reliance on estimates with respect to the investments of Ceniako and Craven House to provide the fair value of the net assets of the accounting acquirers. The valuation of the net assets provided a residual fair value per equity instrument of the accounting acquirers estimated to be \$0.21 per share.

Valuation of investments

The Company recognizes its tangible assets and investment in subsidiaries at fair value. The material composition of these assets is land in Brazil. The Company therefore engages third party valuers to provide periodic valuations of those holdings. These valuations are determined used

**DLC HOLDINGS CORP.
MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2019**

level 3 inputs which involve considerable estimates as the inputs used to value these financial instruments are based on unobservable market data. There is inherent uncertainty and imprecision in estimating the factors that can affect fair value, and in estimating fair values generally, when observable market data is not available. Between third party valuations, management reviews assumptions and market conditions, including any impact of political or legal risk of foreign jurisdictions, to adjust fair value estimations. Changes in assumptions and inputs used in valuing financial instruments could affect reported fair values.

Deferred income tax

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful operations of the Company. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future income tax provisions or recoveries could be affected.

Impairment of long lived assets

The carrying value of long lived assets is reviewed each reporting period to determine whether there is any indication of impairment. If the carrying amount of an asset exceeds its recoverable amount, the asset is impaired and an impairment loss is recognized in the consolidated statement of loss. The assessment of fair values, including those of the cash generating units (the smallest identifiable group of assets that generate cash inflows that are largely independent of the cash inflow from other assets or groups of assets – "CGUs") for purposes of impairment testing, require the use of estimates and assumptions for discount rates, foreign exchange rates, future capital requirements and operating performance. Changes in any of the assumption or estimates used in determining the fair value of long lived assets could impact the impairment analysis.

ADOPTION OF NEW ACCOUNTING STANDARDS

The Company's accounting policies are detailed in the consolidated financial statements for the year ended December 31, 2018. All policies have been adopted consistently across the periods presented, with the exception of the adoption of IFRS 16 as detailed below.

Standards adopted in the period

IFRS 16 Leases

IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation and disclosure of leases, including guidance for both parties to a contract, the lessee and the lessor. The new standard eliminates the classification of leases as either operating or finance leases, as is required by IAS 17 *Leases*, and instead introduces a single lessee accounting model. The Company adopted IFRS 16 on January 1, 2019. The adoption of IFRS 16 did not have an impact on the Company's condensed consolidated interim financial statements.

FINANCIAL INSTRUMENTS

Financial instruments

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial risk factors

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets, including cash and cash equivalents and receivables. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash and cash equivalents with high-credit quality financial

institutions. The Company considers the risk of financial loss on cash and cash equivalents to be remote. The Company's receivables consist materially of GST input tax credits recoverable from the government of Canada and a receivable from a related party. The Company considers credit risk with respect to these amounts to be low.

The Company has not offset any financial assets and financial liabilities in the statement of financial position.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2019, the Company had working capital of \$9,003 (December 31, 2018 – deficiency of \$48,968).

Balances due to broker are supported by the Company's investment in marketable securities. The extension of margin by the broker is limited to 25% of the value of the Company's investment in marketable securities. The ability of the Company to settle balances due to broker may be impacted by significant changes in the value of its investment in marketable securities. Marketable securities may be subject to significant volatility relative to the overall equity market and volatility of the specific securities held. The liquidity of the marketable securities is subject to the characteristics of the individual equities and may or may not be immediately convertible to cash.

The Company's ability to finance its future operating requirements is significantly dependent on the Company's ability to achieve economic returns on its investments. Without these returns, the Company will remain dependent upon the continued financial support of its debtors and shareholders. The Company, as at September 30, 2019, is significantly exposed to liquidity risk.

Market risk

Market risk is the risk of loss that may arise from changes in market factors, such as interest rates, foreign exchange rates, and commodity and equity prices. The Company does not have a practice of trading derivatives.

a) Interest rate risk

The Company's financial asset exposed to interest rate risk consists of cash and cash equivalents. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. The Company does not anticipate interest income on cash to contribute significantly to the operations and returns of the Company and is therefore minimally exposed to interest rate risk on assets.

Interest rates on debts payable are set at fixed rates reducing the Company's exposure to interest rate changes.

b) Foreign currency risk

The Company's investments and assets are located in a number of jurisdictions and therefore exposed to the currency movements of a number of currencies. In addition to the functional currencies of the Company and its subsidiaries, the Company is also exposed to the Brazilian Real and Argentinean Peso on its non-monetary investments which is the jurisdiction of the investments in the unconsolidated subsidiaries of Craven House and Ceniako.

As at September 30, 2019, the Company's net foreign denominated monetary financial instruments are as follows:

	Foreign currency		Canadian dollar equivalent	
US dollar	US\$	(339,634)	\$	(449,777)
Euro	€	(48,495)	\$	(70,017)
South African Rand	R	363,535	\$	31,739

A fluctuation of 10% of the above note currencies against the Canadian dollar would have had an impact of \$48,805 on the net loss for the period.

c) Other price risk

The Company's marketable securities is comprised of individual equities in publicly traded companies. The portfolio is not diversified against geography or industry and is therefore subject to fluctuations in equity markets as well as volatility in individual underlying equities. The Company's exposure to other price risk is assumed to be the value of the marketable securities which are held at FVPL. The Company does not have a specific policy with respect to investment or portfolio requirements.

Under the plan, the exercise price of each option equals the market price of the Company's stock, less an applicable discount, as calculated on the date of grant. The options can be granted for a maximum term of 10 years and vest at the discretion of the Board of Directors.

RISKS AND UNCERTAINTIES

Foreign Operations

All or substantially all of the Company's assets are located in Brazil, South Africa and Argentina, and as a result, the Company's operations are exposed to various levels of political, social, economic, and other risks and uncertainties associated with operating in foreign jurisdictions. These risks and uncertainties include, but are not limited to: changing and unstable political, social and financial conditions, war, terrorism, civil disputes, protests, riots, insurrection, labour unrest, corruption, robbery, production and price controls, import or export controls, currency exchange and currency transfer controls, currency remittances, changes in taxation, government regulations and policies that may restrict employment and the supply of goods and services to citizens and other specific groups, arbitrary nullification of existing licenses, concessions, permits, contracts and other property rights, arbitrary mandates to address shifts in political, social and financial policies and attitudes that directly or indirectly affect the Company's business operations, financial condition or prospects, nationalism and isolationism, trade embargoes, higher rates of inflation, unstable monetary policies, unstable foreign exchange rates and uncertainties with respect to local legal system and respect of the rule of law. The occurrence of or adverse change in these or similar matters will likely have an adverse effect on the business, operations, financial condition of the Company, including but not limited to the loss, destruction, damage and injury to property and personnel, an impairment, reduction, cessation of operations, the loss of potential opportunities, increased costs and inefficiencies and reduced financial results and flexibility. In addition, failure to comply with anti-corruption and anti-bribery legislation of Canada and other jurisdictions may result in significant fines, penalties and other sanctions.

Agricultural Business

The Company's assets are tied to agricultural industry and commodity prices and are therefore exposed to a high degree of risk, often characterized by potential disruption that could result in total crop failure, seasonal windows, perishable inventories, commodity pricing and low margins which require economies of scale and efficiencies for optimal results. In particular, small changes in commodity pricing can have disproportionate effects on profitability and financial results. This pricing, seasonality and variability can impact the Company's return on agricultural investments.

Disruptions

The Company will be subject to both natural and man-made disruptions to agricultural operations, including but not limited to drought, storms, frost and other adverse weather conditions, fires, floods, insect swarms, pestilence, crop failure and other acts of God, industrial accidents, strikes, lock-outs, labour shortages, power shortages, fuel shortages, title or access disputes, including aboriginal or native disputes, wars, terrorism, civil disputes, protests, riots, insurrection, governmental regulations or requirements restricting or otherwise adversely altering free market or normal operations and other adverse events or occurrences beyond the control of the Company or operators. These or similar matters may have a direct impact on farming operations which provide the Company inputs but may also have an indirect impact on other aspects of the agricultural business such as transportation, storage, food processing and distribution, marketing and sales efforts, monetary payments. The occurrence of or an adverse change in these or similar matters will likely have an adverse effect on the business, operations, financial condition, financial results and prospects of the Company. There can be no assurances that these disruptions will not occur, that any such disruption would not be of indefinite duration, and that any such disruption will not result in the loss of an entire seasonal crop yield or complete failure of the Company's investments.

Insurance

It may not be possible for the Company to fully insure itself against all operational risks and losses embedded in its portfolio, and the Company may ultimately decide or be forced to not take out various insurance policies due to high premiums or for other reasons. Should such uninsured damages or losses occur, they could have a substantial adverse affect on the Company, including the complete failure of the business.

Competition

The Company competes for personnel, land acquisitions, and investments. Competitors may have greater financial resources, established and diversified operations, history, goodwill, and other factors that will give them a competitive advantage over the Company. There can be no assurances that the Company will be able to secure resources, services and sales in an environment of increased competition by such competitors.

Government Regulation

The Company's agricultural and land investments will be subject to government legislation, policies and controls. These may include but are not limited to regulations in respect of land use, water use and irrigation rights, fertilizer, hormone, pesticide and antibiotic controls, food inspections, food standards and other environmental and health and safety laws. In addition, any delays in receiving any necessary license, concession, permit or other regulatory approval may cause operational delays resulting in, among other things, inefficiencies, increased costs and untenable crop schedules and/or unfavourable terms for the valuation of land assets. The exercise of discretion by government authorities under existing regulations, modification of existing regulations and the implementation of new regulations affecting the industry are beyond the control of the Company and could have an adverse impact on the business, operations, financial condition, financial results and prospects of the Company.

Failure to comply with applicable laws and regulations may result in enforcement actions resulting in forfeiture of property, payment of administrative, civil and criminal fines and penalties, payment of damages and compensation, and the imposition of corrective measures requiring capital and other expenditures, changes in procedures or other remedial actions.

Environmental Exposure

Operations conducted by the Company's investments have the potential to affect surrounding lands. In the event that investment operations result in loss or damage to neighbouring landowners or other affected persons, the Company may be required to compensate those affected and to take remedial actions that would require significant expenditures, changes in procedures or other remedial actions, which individually or in the aggregate could have an adverse impact on the business, operations, financial condition, financial results and prospects of the Company.

Exchange rate Fluctuations

The Company reports its financial statements in Canadian dollars. In contrast, all or substantially all of its investments are located in South Africa, Brazil and Argentina and are exposed to the South African Rand, Brazilian Real and Argentinean Peso respectively. In addition, the value and cashflows of those investments may be denominated in other currencies, such as the US dollar. As a result, fluctuations in exchange rates, which can be volatile, can have a material effect on working capital, reported fair values, cash flow and reported financial condition and financial results.

Lack of Dividend Policy

The Company does not presently intend to pay cash dividends in the foreseeable future, as any earnings are expected to be retained for use in developing and expanding its business. However, the actual amount of dividends received from the Company will remain subject to the discretion of the Company's Board of Directors and will depend on results of operations, cash requirements and future prospects of the Company and other factors.

Possible Dilution to Present and Prospective Shareholders

The Company may from time to time issue equity securities to finance its operations, acquisitions and other working capital requirements. The issuance of equity securities will result in the dilution of the equity interests of existing shareholders. There can be no assurances that equity securities can in any instance be issued on terms favourable or acceptable to the Company, as the case may be, and if such issuance is nonetheless required, the result will be additional and possibly excessive dilution to the equity interests of existing shareholders.

Dependence of Key Personnel

The Company strongly depends on the business and technical expertise of its management and key personnel. There is little possibility that this dependence will decrease in the near term. As the Company's operations expand, additional general management resources will be required, especially since the Company encounters risks that are inherent in doing business in several countries.

Lack of Trading

A listing of the Common Shares on the Exchange is not a guarantee of liquidity. If an active trading market for the Common Shares does not develop, the liquidity of the Common Shares may be limited and it may be difficult if not impossible for a holder of Common Shares to sell Common Shares. There can be no assurances that an active trading market for the Common Shares will develop or if developed will be sustained for any period of time.

Volatility of Share Price

Market prices for shares of TSX Venture Exchange companies are often volatile. Factors such as announcements of financial results, and other factors could have a significant effect on the price of the Company's shares.
