

DLC HOLDINGS CORP.

CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)

FOR THE YEAR ENDED DECEMBER 31, 2018

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
DLC Holdings Corp.

Opinion

We have audited the accompanying consolidated financial statements of DLC Holdings Corp. (the "Company"), which comprise the consolidated statements of financial position as at December 31, 2018 and 2017, and the consolidated statements of income (loss) and comprehensive income (loss), cash flows and changes in shareholders' equity for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2018 and 2017, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for Opinion

We conducted our audits in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 1, of the consolidated financial statements, which indicates that the Company has an accumulated deficit of \$8,993,638 as at December 31, 2018 and, as of that date, the Company's current liabilities exceeded its current assets by \$48,968. As stated in Note 1, these events and conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Other Information

Management is responsible for the other information. The other information obtained at the date of this auditor's report includes Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Erez Bahar.

DLC HOLDINGS CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
FOR THE YEAR ENDED DECEMBER 31, 2018

1. NATURE OF OPERATIONS AND GOING CONCERN

DLC Holdings Corp. ("DLC") (with its subsidiaries, collectively, the "Company") is an investment company investing in agricultural land and in the food processing industry. The Company was incorporated pursuant to the provisions of the British Columbia Business Corporations Act on March 25, 2011 and is listed for trading on the TSX Venture Exchange ("Exchange") under the symbol DLC.

This Company's head office address is 1600 - 609 Granville Street, Vancouver, British Columbia, Canada V7Y 1C3, and its registered and records office address is 2200 – 885 West Georgia Street, Vancouver, British Columbia V6C 3E8.

On April 24, 2018 the Company announced that it has completed the acquisition of 60.5% of the issued and outstanding share capital of Ceniako Ltd. ("Ceniako") a private corporation duly incorporated under the laws of Cyprus; and 100% of the issued and outstanding share capital of Craven House Industries Ltd. ("Craven House"), a private corporation duly incorporated under the laws of Ireland. The acquisitions constituted a Reverse Takeover ("RTO") under the policies of the Exchange (Note 4).

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis, which contemplates that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, these consolidated financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

As at December 31, 2018, the Company has a cash balance of \$55,041, negative working capital of \$48,968, and a history of losses and has accumulated a deficit of \$8,993,638 as at December 31, 2018. Management believes that the Company likely has sufficient funds from which to fund on-going operating requirements for the near term, however, these factors indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

2. BASIS OF PREPARATION

Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). The Company's financial statements were authorized for issue by the Board of Directors on April 30, 2019.

Basis of presentation

The consolidated financial statements have been prepared on a historical cost basis except for certain financial assets that are measured at fair value. All dollar amounts presented are in Canadian dollars unless otherwise specified.

These consolidated financial statements incorporate the financial statements of the Company and its controlled subsidiaries.

The consolidated financial statements reflect the historic results of Craven House and Ceniako as a continuing entity as if they had been operating as a consolidated entity from inception. The non-controlling interest (39.5%) in Ceniako has been presented as an existing position in the historical accounts of the financial statements. The financial operations of DLC are consolidated as of the RTO date of April 24, 2018.

2. BASIS OF PREPARATION (cont'd...)

Use of judgments and estimates

The preparation of these consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Accounting estimates will, by definition, seldom equal the actual results. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The key areas of judgment applied in the preparation of the consolidated financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

Investment entities

The Company has judged that certain of its controlled subsidiaries qualify as investment entities. The primary functions of the private companies detailed in Note 6 was judged to be consistent with the requirements of the investment entity exemption under IFRS 10 *Consolidated financial statements*. Specifically, those entities have the specific function of providing returns on a capital appreciation basis and are evaluated by management on a fair value basis.

Determination of functional currency

The functional currency of each of the subsidiaries and the Company were assessed to determine the economic substance of the currency in which each entity performed its operations. The functional currency determination was conducted through an analysis of the consideration factors identified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*. The determination of functional currency involves certain judgments to determine the primary economic environment and the Company reconsiders the functional currency if there are changes in events and conditions of the factors used in the determination of the primary economic environment.

Going concern

The assessment of the Company's ability to continue as a going concern involves judgment regarding future funding available for its operations and working capital requirements as discussed in Note 1.

The key areas of estimates applied in the preparation of the consolidated financial statements that could result in a material adjustment to the carrying amounts of assets and liabilities are as follows:

Valuation of RTO consideration

Pursuant to the guidance of IFRS 3, the fair value of the equity of the accounting acquirer is used to measure the consideration transferred for its interest in the accounting acquirer unless the equity interests of the accounting acquiree are more reliably measured. Management determined that the fair value measurements of the accounting acquirers', being Ceniako and Craven House, investments provided a basis for a more reliable fair value measurement of the consideration transferred. This entailed reliance on estimates with respect to the investments of Ceniako and Craven House to provide the fair value of the net assets of the accounting acquirers. The valuation of the net assets provided a residual fair value per equity instrument of the accounting acquirers estimated to be \$0.21 per share (Note 4).

2. BASIS OF PREPARATION (cont'd...)

Use of judgments and estimates (cont'd...)

Valuation of investments

The Company recognizes its tangible assets (Note 7) and investments in subsidiaries (Note 6) at fair value. The material composition of these assets is land in Brazil. The Company therefore engages third party valuers to provide periodic valuations of those holdings. These valuations are determined using level 3 inputs which involve considerable estimates as the inputs used to value these financial instruments are based on unobservable market data. There is inherent uncertainty and imprecision in estimating the factors that can affect fair value, and in estimating fair values generally, when observable market data is not available. Between third party valuations, management reviews assumptions and market conditions, including any impact of political or legal risk of foreign jurisdictions, to adjust fair value estimations. Changes in assumptions and inputs used in valuing financial instruments could affect reported fair values.

Deferred income tax

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful operations of the Company. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future income tax provisions or recoveries could be affected.

Impairment of long lived assets

The carrying value of long lived assets is reviewed each reporting period to determine whether there is any indication of impairment. If the carrying amount of an asset exceeds its recoverable amount, the asset is impaired and an impairment loss is recognized in the consolidated statement of loss. The assessment of fair values, including those of the cash generating units (the smallest identifiable group of assets that generate cash inflows that are largely independent of the cash inflow from other assets or groups of assets – "CGUs") for purposes of impairment testing, require the use of estimates and assumptions for discount rates, foreign exchange rates, future capital requirements and operating performance. Changes in any of the assumption or estimates used in determining the fair value of long lived assets could impact the impairment analysis.

3. SIGNIFICANT ACCOUNTING POLICIES

Consolidation

These consolidated financial statements incorporate the financial statements of the Company and its controlled subsidiaries which exist for the purpose of executing the Company's business operations. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. All significant intercompany transactions and balances have been eliminated.

DLC HOLDINGS CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
FOR THE YEAR ENDED DECEMBER 31, 2018

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Consolidation (cont'd...)

The consolidated financial statements include:

Name of entity	Activity	Country of Incorporation	Ownership	Functional Currency
DLC Holdings Corp.	Management company	Canada	-	Canadian dollar
Superior Macadamias (Pty) Ltd.	Investment in agricultural industry.	South Africa	100%	South African Rand
Desmond Agricultural Products Ltd.	Inactive.	Ireland	100%	Euro
DLC North America LLC	Investment company	USA	100%	US Dollar
Craven House Industries Limited	Management activities of holding companies including holding, acquiring, selling or otherwise disposing of shares in companies and all related activities.	Republic of Ireland	100%	Euro
Ceniako Ltd.	Management activities of holding companies including holding, acquiring, selling or otherwise disposing of shares in companies and all related activities.	Cyprus	60.5%	Euro

A subsidiary is an entity over which the Company has control, where control indicates exposure or rights to variable returns and the ability to affect those returns through power over the investee. Where an entity obtains funds for the purpose of providing investment management services, invests funds solely for returns from capital appreciation and/or investment income and measures and evaluates the performance of substantially all of its investments on a fair value basis, the Company applies the investment entity exemption under IFRS 10. These entities are not consolidated and are recorded on a fair value basis (Note 6).

Currency Translation

IFRS requires that the functional currency of each entity in the consolidated group be determined separately in accordance with the indicators as per International Accounting Standards ("IAS") 21 *The Effects of Changes in Foreign Exchange Rates* and should be measured using the currency of the primary economic environment in which the entity operates (the "functional currency").

Under IFRS, the results and financial position of all the Company's entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities are translated at the closing rate at the date of the consolidated statement of financial position;
- income and expenses are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the date of the transaction); and
- all resulting exchange differences are recognized as a separate component of equity.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the exchange rate at that date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Financial Instrument measurement and valuation

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 Unadjusted quoted prices in active markets for identical assets liabilities;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 Inputs that are not based on observable market data.

The measurement of the Company's financial instruments is disclosed in Note 14 to these financial statements. Any financial instrument that is valued using level 2 or level 3 inputs will involve estimation uncertainty.

Financial assets

The Company classifies its financial assets in the following subsequent measurement categories:

- amortized cost;
- fair value through other comprehensive income ("FVOCI"); or
- fair value through profit or loss ("FVPL").

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows. For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at FVOCI.

Classification of financial assets at amortized cost

The Company classifies its financial assets at amortized cost only if both of the following criteria are met:

- the asset is held within a business model with the objective of collecting the contractual cash flows, and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding.

Classification of financial assets at fair value through other comprehensive income

The Company classifies its equity investments at FVOCI for which are not held for trading and the Company has made an irrevocable election at initial recognition to recognize changes in fair value through other comprehensive income rather than profit or loss as these are strategic investments. Upon disposal of these equity investments, any balance within the other comprehensive income reserve for these equity investments is reclassified to retained earnings and is not reclassified to profit or loss. In addition, the other comprehensive income reserve for an impaired equity investment is not reclassified to profit or loss.

Classification of financial assets at fair value through profit or loss

The Company classifies the following financial assets at FVPL:

- financial assets which are managed and performance evaluated on a fair value basis;
- equity investments that are held for trading;
- equity investments for which the Company has not elected to recognize fair value gains and losses through other comprehensive income; and
- derivative financial instruments.

The Company's cash and receivables are classified as amortized cost. The Company's marketable securities and investments in subsidiaries are carried at FVPL.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Financial Instrument measurement and valuation (cont'd...)

Financial liabilities

The Company classifies its financial liabilities as amortized cost or FVPL. Financial liabilities are subsequently measured at amortized cost, except for those at FVPL such as derivative financial instruments and contingent consideration payables.

The FVPL option can be elected for financial liabilities if:

- it eliminates or significantly reduces an accounting mismatch;
- the financial liability is part of a portfolio that is managed and evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; or
- there is an embedded derivative in the financial or non-financial host contract and the derivative is not closely related to the host contract.

This irrevocable election is made at initial recognition and these financial liabilities cannot be reclassified out of the category while they are held or issued.

The Company's financial liabilities are carried at amortized cost other than balances due to broker which are carried at FVPL as part of a specific investment strategy.

Impairment

The Company applies the simplified approach permitted by IFRS 9 (5.5.15), which requires expected lifetime losses to be recognized from initial recognition of the financial assets on its trade receivables. The Company does not have any material trade receivables subject to significant credit risk at this time.

Investments

All investments at fair value are classified upon initial recognition at FVPL, with changes in fair value reported in profit or loss. The Company's investments at FVPL constitute a group of financial assets which are managed and performance evaluated on a fair value basis. Subsequent to initial recognition, all investments are measured at fair value. Gains and losses arising from changes in the fair value of the investments at fair value through profit or loss are presented in profit or loss in the period in which they arise.

The determination of fair value requires judgment based on market information, where available and appropriate. At the end of each financial reporting period, the Company's management estimates the fair value of investments as discussed below. Such valuation changes are reflected in the financial statements. A fair value hierarchy is summarized in Note 14 that distinguishes the significance of the inputs used in determining the fair value measurements of various financial instruments.

Tangible assets

Tangible assets are measured at fair value at the reporting period date. The value of tangible assets is originally recorded at cost, being the fair value at the date of acquisition. Thereafter, at each reporting date, the fair value may, depending upon the circumstances, be adjusted using one or more of the valuation inputs included in Level 3. The valuation of the tangible assets at each reporting date is determined using valuation techniques such as recent arm's length market transactions, adjustment for changes in market conditions, or third party expert valuation.

Financial assets – Investments in subsidiaries

Investments in subsidiaries are measured at fair value at the reporting period date. The value of private company securities which are not traded in an active market are originally recorded at cost, being the fair value at the date of acquisition. Thereafter, at each reporting date, the fair value may, depending upon the circumstances, be adjusted using one or more of the valuation inputs included in Level 3. The Company's unconsolidated subsidiaries are dormant with the exception of land holdings as detailed in Note 6. Therefore, the Company employs valuation techniques at reporting dates consistent with real property valuation such as recent arm's length market transactions, adjustment for changes in market conditions, or third party expert valuation.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Impairment of non-financial assets

The carrying amount of the Company's non-financial assets is reviewed at each reporting date to determine whether there is any indication of impairment. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. An impairment loss is recognized whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognized in the statement of loss and comprehensive loss.

The recoverable amount of assets is the greater of an asset's fair value less cost of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs. An impairment loss is only reversed if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount, however, not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognized in previous years. Assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment.

Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability, the unwinding of the discount is recognized as finance costs. The Company does not have any provisions for the years presented.

Share capital

Common and preferred shares are classified as share capital. Incremental costs directly attributable to the issuance of common and preferred shares are recognized as a deduction from equity, net of any tax effects.

Loss per share

The Company presents basic and diluted earnings (loss) per share ("EPS") data for its common shares. Basic EPS is calculated by dividing the profit or loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Dilutive loss per share is calculated by dividing the earnings (loss) by the weighted average number of common shares outstanding assuming that the proceeds to be received on the exercise of dilutive share options and warrants are used to repurchase common shares at the average market price during the period. In the Company's case, diluted loss per share is the same as basic loss per share, as the effect of outstanding share options and warrants on loss per share would be anti-dilutive.

Contingently issuable shares are not considered outstanding common shares and consequently are not included in loss per share calculation.

Income taxes

Current tax is the expected tax payable or receivable on the taxable income or loss for a year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

DLC HOLDINGS CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
FOR THE YEAR ENDED DECEMBER 31, 2018

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Income taxes (cont'd...)

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purpose. Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable operations, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantially enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax assets and liabilities, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Standards issued or amended but not yet effective

IFRS 16 Leases

IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation and disclosure of leases, including guidance for both parties to a contract, the lessee and the lessor. The new standard eliminates the classification of leases as either operating or finance leases, as is required by IAS 17 *Leases*, and instead introduces a single lessee accounting model. IFRS 16 is effective for annual periods beginning on or after January 1, 2019. The impact of IFRS 16 on the Company's consolidated financial statements is not anticipated to be material.

IFRIC 23 Uncertainty Over Income Tax Treatments

IFRIC 23 clarifies how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over income tax treatments. It is effective for annual periods beginning on or after January 1, 2019 with early adoption permitted. The Company does not expect that the adoption of this standard will have a material effect on the Company's consolidated financial statements.

4. REVERSE TAKEOVER

On April 24, 2018 the Company completed the acquisition of 60.5% of the issued and outstanding share capital of Ceniako and 100% of the issued and outstanding share capital of Craven House. The Company issued 28,902,045 Series B Preferred Shares to acquire 60.5% of Ceniako and 35,845,252 Series B Preferred Shares to acquire 100% of Craven House. After completion of the transaction, the shareholders of Ceniako and Craven House held approximately 76.5% of the common and preferred shares of the Company.

Accordingly, the transaction is treated as an issuance of shares by Ceniako and Craven House for the net assets of DLC and the Company's listing status or a reverse takeover ("RTO") as DLC did not qualify as a business according to the definition in IFRS 3. The RTO is therefore accounted for in accordance with guidance provided in IFRS 2, "Share-Based Payment" and IFRS 3 "Business Combinations".

DLC HOLDINGS CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
FOR THE YEAR ENDED DECEMBER 31, 2018

4. REVERSE TAKEOVER (cont'd...)

The fair value of the net assets of DLC as at April 24, 2018, and the listing expense, are as follows:

Purchase Price	
Fair value of shares of DLC retained by DLC shareholders (19,902,130 shares at a price of \$0.21 per share)	\$ 4,253,056
Net Assets Acquired	
Cash	\$ 696,282
Receivables	18,904
Tangible assets (Note 7)	551,604
Accounts payable and accrued liabilities	(42,187)
Due to related parties (Note 11)	(100,286)
Promissory note (Note 8)	(171,300)
Long-term loans (Note 9)	<u>(953,645)</u>
Net assets (liabilities)	\$ <u>(628)</u>
Listing expense	\$ 4,253,684

5. MARKETABLE SECURITIES

Marketable securities	Total
Balance, December 31, 2016 and 2017	\$ -
Purchased	659,363
Proceeds on sale	(248,349)
Loss on sale of marketable securities	(48,962)
Unrealized loss on mark to market	(112,324)
Foreign exchange	<u>10,426</u>
Balance, December 31, 2018	\$ 260,154

The Company has investments in certain marketable securities of publicly traded companies. Balances due to broker represent purchases made on margin. Purchases on margin are limited to 25% of securities held. There is no collateral pledged against the brokerage account.

6. INVESTMENTS IN SUBSIDIARIES

Investments in subsidiaries	Craven House investments	Ceniako investments	Total
Balance, December 31, 2016	\$ 7,016,465	\$ 9,991,533	\$ 17,007,998
Foreign exchange differences	(916,317)	-	(916,317)
Translation differences	<u>524,653</u>	<u>771,550</u>	<u>1,296,203</u>
Balance, December 31, 2017	6,624,801	10,763,083	17,387,884
Foreign exchange differences	(1,179,448)	(268,983)	(1,448,431)
Translation differences	<u>123,708</u>	<u>397,198</u>	<u>520,906</u>
Balance, December 31, 2018	\$ 5,569,061	\$ 10,891,299	\$ 16,460,359

Financial asset investments of Craven House represent part ownership of the share capital of the following companies:

- 50.1% - Finishtec Acabamentos Tecnicos Em Metais Ltda – ME (Brazil); and
- 99.9% - Universal Properties Brasil Administracao de Imoveis Ltda (Brazil).

DLC HOLDINGS CORP.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in Canadian Dollars)

FOR THE YEAR ENDED DECEMBER 31, 2018**6. INVESTMENTS IN SUBSIDIARIES (cont'd...)**

The Craven House holdings in turn own approximately 500 hectares of land in Bahia, Brazil. The land is suitable for the cultivation of macadamias and coconuts. It presently has no operations.

Financial asset investments of Ceniako represent ownership of 100% of the issued and outstanding share capital Woodford Empreendimentos Imobiliarios LTDA (Brazil). The Ceniako holdings in turn own approximately 2,000 hectares of land in Bahia. The land is suitable for the cultivation of macadamias and coconuts. It is presently has no operations.

As the composition of the holdings of the investments in subsidiaries is materially land holdings, the Company does not anticipate significant short term fluctuations in fair value in the shares of the private companies.

7. TANGIBLE ASSETS

The development land represents a plot of land in Salta, Argentina. The macadamia facility consists of a package of land, buildings and equipment acquired with DLC and located in South Africa.

8. PROMISSORY NOTE

With the completion of the RTO, the Company has assumed a promissory note of \$157,500 due to a company controlled by the Company's CEO. The promissory note bears interest at rate of 6%, is due on November 7, 2020 and is unsecured. As at December 31, 2018, the promissory note has accrued interest of \$20,298.

9. LOANS

With the completion of the RTO, the Company assumed loans of \$128,706, due to a company controlled by the Company's CEO ("Related Party Loans"). The Related Party Loans bear interest at a rate of 6%, are due on June 1, 2020 and are unsecured. As at December 31, 2018, there is \$141,699 owing (principal and interest) to this related company.

Related Party Loans	Principal	Interest	Total
Balance, December 31, 2016 and 2017	\$ -	\$ -	\$ -

FOR THE YEAR ENDED DECEMBER 31, 2018

10. SHARE CAPITAL AND RESERVES (cont'd...)

c) Escrow

The Class B Preferred Shares issued in relation to the RTO on April 24, 2018 and any common shares issued resulting from the conversion of these Class B Preferred Shares, are subject to standard escrow provisions as determined by the Exchange. 10,440,832 of the Class B Preferred Shares were released from escrow following completion of the RTO, and the remainder of these escrowed shares will be released as follows:

Escrow Release Date	Shares To Be Released
April 24, 2019	9,712,215
October 24, 2019	9,712,215
April 24, 2020	9,712,215
October 24, 2020	9,712,215
April 24, 2021	<u>9,712,215</u>
Total Class B Preferred Shares under escrow	48,561,075

d) Stock option plan

The Company has a stock option plan under which it is authorized to grant to executive officers and directors, employees and consultants stock options enabling them to acquire up to 10% of the issued and outstanding common stock of the Company. Under the plan, the exercise price of each option equals the market price of the Company's stock, less an applicable discount, as calculated on the date of grant. The options can be granted for a maximum term of 10 years and vest at the discretion of the Board of Directors.

As at December 31, 2018, there are no stock options outstanding.

11. RELATED PARTY TRANSACTIONS

Key Personnel Compensation

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers. The remuneration of directors and key management personal during the years ended December 31, 2018 and 2017 are as follows:

Type of Service	Nature of Relationship	2018	2017
Management fees	Emprise Capital Corp., a company with an officer in common	\$ 42,976	\$ -

DLC HOLDINGS CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
FOR THE YEAR ENDED DECEMBER 31, 2018

11. RELATED PARTY TRANSACTIONS (cont'd...)

The following details amounts due to related parties:

Type of Service	Nature of Relationship	December 31, 2018	December 31, 2017
Management fees	Desmond Holdings Ltd., a company owned by the CEO	\$ 19,911	\$ -
Management fees	Emprise Capital Corp., a company with an officer in common	99,844	-
Loan, unsecured non-interest bearing	92 Spring LLC, director in common	<u>27,284</u>	-
		<u>\$ 147,039</u>	<u>\$ -</u>

Balances are due on demand and unsecured.

In addition to the balances above, the promissory note (Note 8), Related Party Loans (Note 9), and KwikBuild Loan (Note 9) are due to related parties.

Other income recorded on the statement of loss and comprehensive loss derives from lease income in South Africa which was received from a related party company.

The RTO was a related party transaction as the Company has directors in common with the vending private companies of Ceniako and Craven House.

12. INCOME TAXES

Income tax expense differs from the amount that would be computed by applying the Canadian statutory income tax rate of 27.00% (2017 - 27.00%) to income before income taxes. The reasons for the differences are as follows:

	2018	2017
Income before income tax	\$ (6,048,510)	\$ (994,061)
Statutory income tax rate	<u>27.00%</u>	<u>27.00%</u>
Income tax expense computed at Canadian statutory rates	(1,633,000)	(268,000)
Items not deductible for tax purposes	1,335,000	-
Differences between Canadian and foreign tax rates	75,000	-
Unused tax losses and tax offsets not recognized in tax assets	<u>127,601</u>	<u>135,715</u>
Income tax (recovery) expense	<u>\$ (95,399)</u>	<u>\$ (132,285)</u>

DLC HOLDINGS CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
FOR THE YEAR ENDED DECEMBER 31, 2018

12. INCOME TAXES (cont'd...)

The Company recognizes tax benefits on losses or other deductible amounts where the probable criteria for the recognition of deferred tax assets has been met. The Company's unrecognized deductible temporary differences and unused tax losses for which no deferred tax asset is recognized consist of the following amounts:

	2018	2017
Non-capital losses	\$ 542,000	\$ 3,000
Equipment	27,000	17,000
Marketable securities	<u>116,000</u>	<u>(115,399)</u>
Unrecognized deductible temporary differences	\$ 685,000	\$ (95,399)

As at December 31, 2018, the Company has US non-capital losses of \$27,000, South African non-capital losses of \$542,000 and Canadian non-capital losses of \$1,966,000, along with small losses in Cyprus and Ireland that may be applied to reduce future taxable income. If these losses are not used to offset future income, they will expire through the year ended December 31, 2038.

13. SEGMENTED INFORMATION

The Company operates in one segment, being investment.

The Company's non-current assets, excepting financial instruments are situated as follows:

December 31, 2018	South Africa	Argentina	Total
Development land	\$ -	\$ 498,128	\$ 498,128
Macadamia facility	<u>494,354</u>	<u>-</u>	<u>494,354</u>
Total	\$ 494,354	\$ 498,128	\$ 992,482

December 31, 2017	Argentina
Development land	\$ 457,901

DLC HOLDINGS CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
FOR THE YEAR ENDED DECEMBER 31, 2018

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial instruments by category	Fair value through profit or loss		Amortized cost	
	December 31, 2018	December 31, 2017	December 31, 2018	December 31, 2017
<i>Financial assets</i>				
Cash	\$ -	\$ -	\$ 55,041	\$ -
Receivables	-	-	32,440	1,573

(1) The fair value Level 3 inputs include an independent valuation performed on the investment.

Financial risk factors

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets, including cash, receivables and marketable securities. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions. The Company considers the risk of financial loss on cash to be remote. The Company's receivables consist materially of GST input tax credits recoverable from the government of Canada and a receivable from a related party. The Company considers credit risk with respect to these amounts to be low.

The Company has not offset any financial assets and financial liabilities in the statement of financial position..

DLC HOLDINGS CORP.
 NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
 (Expressed in Canadian Dollars)
FOR THE YEAR ENDED DECEMBER 31, 2018

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Financial risk factors (cont'd...)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at December 31, 2018, the Company had working capital deficit of \$48,968 (2017 – \$59,338).

Balances due to broker are supported by the Company's investment in marketable securities. The extension of margin by the broker is limited to 25% of the value of the Company's investment in marketable securities. The ability of the Company to settle balances due to broker may be impacted by significant changes in the value of its investment in marketable securities. Marketable securities may be subject to significant volatility relative to the overall equity market and volatility of the specific securities held. The liquidity of the marketable securities is subject to the characteristics of the individual equities and may or may not be immediately convertible to cash.

The Company's ability to finance its future operating requirements is significantly dependent on the Company's ability to achieve economic returns on its investments. Without these returns, the Company will remain dependent upon the continued financial support of its debtors and shareholders. The Company, as at December 31, 2018, is significantly exposed to liquidity risk.

Market risk

Market risk is the risk of loss that may arise from changes in market factors, such as interest rates, foreign exchange rates, and commodity and equity prices. The Company does not have a practice of trading derivatives.

a) Interest rate risk

The Company's financial asset exposed to interest rate risk consists of cash. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. The Company does not anticipate interest income on cash to contribute significantly to the operations and returns of the Company and is therefore minimally exposed to interest rate risk on assets.

Interest rates on debts payable are set at fixed rates reducing the Company's exposure to interest rate changes.

b) Foreign currency risk

The Company's investments and assets are located in a number of jurisdictions and therefore exposed to the currency movements of a number of currencies. In addition to the functional currencies of the Company and its subsidiaries, the Company is also exposed to the Brazilian Real and Argentinean Peso on its non-monetary investments which is the jurisdiction of the investments in the unconsolidated subsidiaries of Craven House and Ceniako.

As at December 31, 2018, the Company's net foreign denominated monetary financial instruments are as follows:

	Foreign currency		Canadian dollar equivalent	
US dollar	US\$	(313,759)	\$	(428,030)
Euro	€	(42,645)	\$	(66,582)
South African Rand	R	474,414	\$	44,975

A fluctuation of 10% of the above note currencies against the Canadian dollar would have had an impact of \$44,965 on the net loss for the year.

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Financial risk factors (cont'd...)

Market risk (cont'd...)

c) Other price risk

The Company's marketable securities is comprised of individual equities in publicly traded companies. The portfolio is not diversified against geography or industry and is therefore subject to fluctuations in equity markets as well as volatility in individual underlying equities. The Company's exposure to other price risk is assumed to be the value of the marketable securities which are held at FVPL. The Company does not have a specific policy with respect to investment or portfolio requirements.

15. CAPITAL MANAGEMENT

The Company defines capital as consisting of the components of shareholder's equity. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to manage the cost of capital at acceptable levels of risk.

The Company manages its capital structure to maximize its financial flexibility making adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets and business opportunities. The Company does not presently utilize any quantitative measures to monitor its capital, but rather relies on the expertise of the Company's management to sustain the future development of the business.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
