INDEPENDENT AUDITORS' REPORT

TO THE SHAREHOLDERS OF VALTERRA RESOURCE CORPORATION

We have audited the accompanying consolidated financial statements of Valterra Resource Corporation, which comprise the consolidated statements of financial position as at December 31, 2017 and 2016, and the consolidated statements of comprehensive loss, changes in equity (deficit) and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Valterra Resource Corporation as at December 31, 2017 and 2016, and its financial performance and its cash flows for the years then ended, in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to note 1 in the consolidated financial statements, which describes matters and conditions that indicate the existence of material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

1. Nature of Operations and Going Concern

Valterra Resource Corporation (the "Company") was incorporated in Alberta on September 26, 1996, continued to the Yukon on May 8, 1997 and subsequently to British Columbia on February 22, 2008. The Company's principal business activities include the acquisition, exploration, and development of natural resource properties for enhancement of value and disposition pursuant to sales agreements or development by way of third party option and/or joint venture agreements. The Company's registered office is 1710 - 1177 West Hastings Street, Vancouver, British Columbia, Canada, V6E 2L3.

The business of exploring for minerals involves a high degree of risk and there can be no assurance that any of the Company's current or future exploration programs will result in profitable mining operations. The recoverability of amounts shown for mineral properties is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain financing to complete their exploration and development, and establish future profitable operations, or realize proceeds from their sale. The carrying value of the Company's mineral properties does not reflect present or future value.

These consolidated financial statements were prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at December 31, 2017, the Company had a working capital deficit of \$625,395 (2016 - working capital of \$40,234). The Company incurred a net loss of \$835,406 for the year ended December 31, 2017 (2016 - \$622,497) and had an accumulated deficit of \$14,187,468 as at December 31, 2017 (2016 - \$13,552,131).

As at December 31, 2017, the Company does not have sufficient capital to meet the requirements for its administrative overhead or maintaining its mineral interests. The Company has relied mainly upon the issuance of share capital to finance its activities. Future capital requirements will depend on many factors including the Company's ability to execute its business plan. The Company will be required to issue share capital to finance future activities through private placements and the exercise of options and warrants. There can be no assurance that such financing will be available to the Company and, therefore, a material uncertainty exists that casts significant doubt over the Company's ability to continue as a going concern.

These consolidated financial statements do not include the adjustments to assets and liabilities that would be necessary should the Company be unable to continue as a going concern. Such adjustment could be material.

2. Basis of Preparation

These consolidated financial statements were prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") on a historical cost basis, except for cash flow information and financial instruments measured at fair value, and incorporate the consolidated financial statements of the Company and Valterra Resource (US) Corporation, an entity wholly-controlled by the Company incorporated in Nevada, USA. All intercompany transactions and balances have been eliminated upon consolidation. The functional and presentation currency of the Company and its subsidiary is the Canadian dollar.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

2. Basis of Preparation, continued

These consolidated financial statements were approved and authorized for issue by the Board of Directors on April 26, 2018.

3. Summary of Significant Accounting Policies

(a) Significant Accounting Estimates and Judgments

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and judgments that affect amounts reported in the consolidated financial statements.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances, and subject to measurement uncertainty. The effect on the consolidated financial statements of changes in such estimates in future reporting periods could be significant. Significant estimates and areas where judgment is applied that have significant effect on the amount recognized in the consolidated financial statements include:

Control

Management consolidates all entities which it is determined that the Company controls.

Control is evaluated on the ability of the Company to direct the activities of the entity to derive variable returns and management uses judgment in determining whether control exists. Judgment is exercised in the evaluation of the variable returns and in determining the extent to which the Company has the ability to exercise its power to generate variable returns.

Going concern

The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay for its ongoing operating expenditures, meet its liabilities for the ensuing year, and to fund planned and contractual exploration programs, involves significant judgment based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances.

Impairment of long-lived assets

The carrying value of mineral property acquisition costs is reviewed each reporting period to determine whether there is any indication of impairment. The determination of the impairment involves the application of a number of significant judgments and estimates to certain variables including metal price trends, plans for properties, and the results of exploration and evaluation to date.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

3. Summary of Significant Accounting Policies, continued

(a) Significant Accounting Estimates and Judgments, continued

Determination of, and provision for, reclamation and remediation obligations

The Company assesses its provision for asset retirement obligations on an annual basis or when new material information becomes available. Accounting for reclamation and remediation obligations requires management to make estimates of the future costs the Company will incur to complete the reclamation and remediation work required to comply with existing laws and regulations. Actual costs incurred may differ from those amounts estimated. Also, future changes to environmental laws and regulations could increase the extent of reclamation and remediation work required to be performed by the Company. Increases in future costs could materially impact the amounts charged to operations for reclamation and remediation.

Share-based payments

Share-based payments are determined using the Black-Scholes option pricing model at the date of grant and are expensed to net loss over each award's vesting period. The Black-Scholes option pricing model utilizes subjective assumptions such as expected price volatility and expected life of the option. Changes in these input assumptions can significantly affect the fair value estimate.

Deferred taxes

The Company recognizes a deferred tax asset to the extent recovery is probable. Assessing the recoverability of deferred tax assets requires management to make significant estimates of future taxable profit against which deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilized. In addition, changes in tax laws could limit the ability of the Company to obtain tax deductions in future periods.

(b) Mineral Properties

All expenditures related to the acquisition of mineral properties are capitalized on a property-by-property basis, net of recoveries which are recorded when receivable, until these mineral properties are placed into commercial production, sold or abandoned. If commercial production is achieved from a mineral property, the related mineral properties are tested for impairment and reclassified to mineral property in production. If a mineral property is sold or abandoned, the related capitalized costs will be expensed to profit or loss in that period.

All expenditures related to the exploration and evaluation of mineral properties, net of recoveries which are recorded when receivable, are expensed to net loss in the period in which they are incurred.

From time to time, the Company may acquire or dispose of all or part of its mineral property interests under the terms of property option agreements.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

3. Summary of Significant Accounting Policies, continued

(b) Mineral Properties, continued

Options are exercisable entirely at the discretion of the optionee, and accordingly, option payments are recognized when paid or received. If recoveries are received and exceed the capitalized expenditures, the excess is reflected in profit or loss.

All capitalized mineral property costs are reviewed at each reporting date, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment. When the carrying value of a property exceeds its net recoverable amount that may be estimated by quantifiable evidence of an economic geological resource or reserve, joint venture expenditure commitments or the Company's assessment of its ability to sell the property for an amount exceeding the carrying value, provision is made for the impairment in value. The amounts capitalized for mineral properties represent costs incurred to date less write-downs, and are not intended to reflect present or future values.

The Company recognizes an estimate of the liability associated with statutory, contractual, constructive or legal obligations associated with site closure and property retirement costs in the period in which the liability is incurred if a reasonable estimate of fair value can be made. The estimated fair value or present value of future cash flows is capitalized to the related mining acquisition assets with a corresponding increase in the rehabilitation provision in the period incurred. The capitalized amount will be depreciated on a unit-of-production basis over the estimated life of the ore reserve.

The amount of the provision will be increased each reporting period due to the passage of time and the amount of accretion is charged to profit or loss. The provision can also increase or decrease due to changes in regulatory requirements, discount rates, and assumptions regarding the amount and timing of future rehabilitation expenditures. Any changes are recorded directly to the related mining assets with a corresponding change to the rehabilitation provision. Actual rehabilitation expenditures incurred are charged against the rehabilitation provision to the extent of the liability recorded.

(c) Reclamation Bonds

Reclamation bonds are recorded at amortized cost and held by government agencies or in trust.

(d) Related Party Transactions

Parties are considered related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered related if they are subject to common control. Related parties may be individuals or corporate entities. A transaction is considered a related party transaction when there is a transfer of resources or obligations between related parties.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

3. Summary of Significant Accounting Policies, continued

(e) Foreign Currency Translation

Amounts recorded in foreign currency are translated into Canadian dollars as follows:

- (i) Monetary assets and liabilities, at the rate of exchange in effect as at the reporting date;
- (ii) Non-monetary assets and liabilities, at the exchange rates prevailing at the time of the acquisition of the assets or assumption of the liabilities; and
- (iii) Revenues and expenses (excluding amortization, which is translated at the same rate as the related asset), at the exchange rates in effect on the date of the transaction.

Gains and losses arising from this translation of foreign currency are included in the determination of net loss.

(f) Share Capital

Equity units

Proceeds from the issue of units, consisting of common shares and share purchase warrants, are first allocated to common shares based on the quoted market value of the common shares at the time the units are priced, and the balance, if any, is allocated to the attached warrants. Share issue costs are netted against share proceeds prorated to common shares and share purchase warrants.

Flow-through units

Flow-through shares entitle a company that incurs certain resource expenditures in Canada to renounce them for tax purposes allowing the expenditures to be deducted for income tax purposes by the investors who purchased the shares.

Any excess difference between the market value of the common shares, plus any attached share purchase warrants, and proceeds received is deemed equal to an estimated premium investors pay for the flow-through feature and is initially recorded as a liability. The amount recorded as a liability relating to the sale of tax benefits is reversed when the obligation is fulfilled. The difference between the amount originally recorded as a liability and the estimated income tax benefits on date of renouncement is recognized in profit or loss. The tax effect of the renunciation is recorded at the time expenditures are made, which may differ from the effective date of renunciation.

(g) Non-monetary Consideration

Shares issued for non-monetary consideration to non-employees are recorded at the fair value of the goods or services received. When such fair value cannot be estimated reliably, fair value is measured based on the quoted market value of the Company's shares on the date of share issuance. Shares to be issued, which are contingent upon future events or actions, are recorded by the Company when it is reasonably determinable that the shares will be issued.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

3. Summary of Significant Accounting Policies, continued

(h) Share-based Payments

Share-based payments for employees are measured at fair value of the instruments issued on the date of grant and amortized over the vesting period. Share-based payments for non-employees are measured at either the fair value of the goods or services received or the fair value of the equity instrument issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded on the date the goods or services are received. The fair value of stock options is charged to profit or loss using the graded vesting method, with the offset credit to share-based payment reserve.

Consideration received on the exercise of stock options is recorded as share capital and the related fair value previously recorded is transferred from share-based payment reserve to share capital.

Upon expiry, related fair value previously recorded is transferred from share-based payment reserve to deficit.

(i) Income Taxes

The Company follows the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax basis. Deferred tax assets and liabilities are measured using enacted or substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in profit or loss in the period that includes the enactment date. Deferred tax assets also result from unused tax losses carried forward, resource related tax pools and other deductions. A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

(j) Loss per Share

Basic loss per share is computed by dividing the net loss available to common shareholders by the weighted average number of shares outstanding during the reporting period.

Diluted loss per share is computed similar to basic loss per share except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options, warrants and similar instruments. It assumes that the proceeds of such exercise would be used to repurchase common shares at the average market price during the period. However, the calculation of diluted loss per share excludes the effects of various conversions and exercise of options, warrants and similar instruments that would be anti-dilutive.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

3. Summary of Significant Accounting Policies, continued

(k) Financial Instruments

The Company classifies its financial assets in the following categories: at fair value through profit or loss, available-for-sale or loans and receivables. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at recognition.

Fair value through profit or loss ("FVTPL")

FVTPL financial assets are initially recognized at fair value with changes in fair value recorded through profit or loss.

Available-for-sale ("AFS")

AFS financial assets are non-derivatives that are either designated as available-for-sale or not classified in any of the other financial asset categories and are recognized at fair value and subsequently carried at fair value. Changes in the fair value of AFS financial assets other than impairment losses are recognized as other comprehensive loss and classified as a component of equity.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are classified as current assets or non-current assets based on their maturity date. Loans and receivables are initially recognized at fair value and subsequently carried at amortized cost less any impairment.

Impairment of financial assets

At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

Financial liabilities

The Company classifies its financial liabilities in the following categories: other financial liabilities and derivative financial liabilities.

Other financial liabilities are non-derivatives and are recognized initially at fair value, net of transaction costs incurred, and are subsequently stated at amortized cost.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

3. Summary of Significant Accounting Policies, continued

(k) Financial Instruments, continued

Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in profit and loss over the period to maturity using the effective interest method.

Other financial liabilities are classified as current or non-current based on their maturity date.

(l) Future Accounting Standards Changes

IFRS 9: *Financial Instruments* will eventually form a complete replacement for IAS 39: *Financial Instruments: Recognition and Measurement*.

All financial assets are classified as measured at amortized cost or at fair value based on the Company's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. Financial liabilities are classified as subsequently measured at amortized cost except for financial liabilities classified at fair value through profit and loss, financial guarantees and certain other exceptions.

The mandatory effective date of IFRS 9 is for annual periods beginning on January 1, 2018. The Company is currently assessing the impact of IFRS 9.

4. Financial Instruments

(a) Categories of Financial Instruments

The Company's financial instruments include cash, reclamation bond, accounts payable and accrued liabilities and due to related parties. The Company has classified its financial instruments into the following categories:

Financial Instrument	Category	Carrying Value
Cash	FVTPL	Fair Value
Reclamation Bond	Loans and Receivables	Amortized Cost
Accounts Payable and Accrued Liabilities	Other Financial Liabilities	Amortized Cost
Due to Related Parties	Other Financial Liabilities	Amortized Cost

(b) Fair Value

The carrying values of accounts payable and accrued liabilities and due to related parties approximate their fair values due to the short period to maturity. The reclamation bond is non-interest-bearing, has no maturity date and carrying value approximates fair value.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

4. Financial Instruments, continued

(c) Financial Risk Management

The Company's financial instruments are exposed to certain financial risks, including liquidity risk, currency risk, credit risk, interest rate risk and other price risk. The Company's exposure to these risks and its methods of managing the risks are summarized as follows:

(i) Liquidity Risk

Liquidity risk is the risk that the Company will be unable to meet financial obligations as they fall due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due by forecasting cash flows for operations, anticipated investing and financing activities and through management of its capital structure.

As at December 31, 2017, all of the Company's financial liabilities are either past due or have contractual maturities of less than 90 days. The Company does not have sufficient resources to meet requirements for administrative overhead, maintaining its mineral interests and continuing with its exploration program in the following twelve months. The Company will be required to raise additional capital in the future to fund its operations.

(ii) Currency Risk

The Company is exposed to currency risk to the extent expenditures incurred or funds received and balances maintained by the Company are denominated in currencies other than the Canadian dollar (primarily US dollars).

The Company does not manage currency risks through hedging or other currency management tools. As at December 31, 2017, cash totalling \$44 (2016 - \$nil) was held in US dollars. As at December 31, 2017, accounts payable and accrued liabilities totalling \$16,899 (2016 - \$189) and due to related parties totalling \$4,149 (2016 - \$nil) were payable in US dollars.

Based on forecast exchange rate movements for the next twelve months assuming all other variables remain constant, the Company considers its financial performance and cash flows would not be materially affected by a weakening or strengthening of the US dollar.

(iii) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge its contractual obligations. The Company is exposed to credit risk mainly in respect to managing its cash, which is held with a Canadian financial institution. The Company mitigates credit risk by risk management policies that require significant cash deposits be invested with Canadian chartered banks rated BBB or better, or commercial paper issuers R1/A2/P2 or higher. All investments must be less than one year in duration.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

4. Financial Instruments, continued

(c) Financial Risk Management, continued

(iv) Interest Rate Risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is not exposed to material interest rate risk.

(v) Other Price Risk

Other price risk is the risk that the future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is not exposed to material other price risk.

5. Capital Management

The Company's capital includes components of equity (deficit). The Company's objectives in managing its capital are to maintain the ability to continue as a going concern and to continue to explore the Company's mineral properties for the benefit of its stakeholders.

To effectively manage the Company's capital requirements, the Company has a planning and budgeting process in place setting out the expenditures required to meet its strategic goals. The Company compares actual expenses to budget on all exploration projects and overhead to manage costs, commitments and exploration activities.

As the Company is in the exploration stage, its operations have been substantially funded by the issuance of equity instruments. The Company will continue to rely on equity issuances for future funding depending upon market and economic conditions at the time. There have been no changes in the Company's approach to capital management during the year ended December 31, 2017.

6. Mineral Properties

Mineral property acquisition costs as at December 31, 2017, were as follows:

	Swift Katie	Weepah	Total
	\$	\$	\$

Additions	700	109,286	109,986
Balance as at December 31, 2017	194,897	109,286	304,183

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

6. Mineral Properties, continued

Swift Katie

Pursuant to an agreement dated July 21, 2006, as amended, a private company controlled by a director of the Company, acquired an option to purchase the property located near Salmo, British Columbia. The option was subsequently assigned to the Company for \$2,500.

The property is subject to a 3% net smelter royalty ("NSR") of which the Company has the option to purchase one-half (1.5%) for \$1,000,000 per 1% and the option to purchase a further one-sixth (0.5%) for an additional \$1,500,000 at any time prior to the commencement of commercial production.

Beginning December 31, 2010 and annually thereafter, the Company is required to make an annual advance minimum royalty ("AMR") payment of \$50,000. These payments will be adjusted annually according to the Consumer Price Index base of December 31, 2006 and are deductible from future NSR payments (2017 - paid subsequent to year-end).

In addition to the NSR and the AMR, if the Company completes a positive feasibility study, the Company will issue 250,000 common shares to the optionors and if the Company achieves commercial production, the Company will issue 500,000 common shares to the optionors.

Weepah

Pursuant to an agreement dated June 23, 2017, the Company has the right to acquire a 100% interest in certain unpatented and patented mining claims in Esmeralda County, Nevada. To acquire the interest, the Company is required to make the following payments:

- US\$100,000 at closing (paid via issuance of 2,598,680 common shares on July 6, 2017 with a fair value of \$0.03 per share);
- US\$100,000 on June 23, 2018 (which may be paid in common shares);
- US\$200,000 on June 23, 2019;
- US\$200,000 on June 23, 2020; and
- US\$400,000 on June 23, 2021.

The property is subject to NSR royalties totaling 3% of which the Company may reduce to 2% for US\$2,500,000. AMR payments will be due upon the anniversary of the option exercise as follows: US\$25,000 on first, second and third anniversaries, and US\$35,000 on subsequent anniversaries.

Environmental

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest.

Valterra Resource Corporation

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

6. Mineral Properties, continued

The Company conducts its mineral exploration activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company. Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions. If the restrictions adversely affect the scope of exploration and development on the mineral properties, the potential for production on the properties may be diminished or negated.

Title to Mineral Properties

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyance history of many mineral properties. The Company has investigated title to its mineral property interests in accordance with industry standards for the current stage of exploration of such properties and, to the best of its knowledge, title to its properties are in good standing; however, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

Realization of Assets

Realization of the Company's investment in mineral properties is dependent upon the establishment of legal ownership, the obtaining of permits, the satisfaction of governmental requirements, the attainment of successful production from the properties, or from the proceeds of their disposal. The attainment of commercial production is in turn dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of the property interest, and upon future profitable production.

Exploration and Evaluation Expenditures

Exploration and evaluation expenditures for the years ended December 31, 2017 and 2016, were:

	Swift Katie		Weepah		Total	
	\$	\$	\$	\$	\$	\$
	2017	2016	2017	2016	2017	2016

(Expressed in Canadian Dollars)

7. Reclamation Bond

The Company has posted a non-interest-bearing reclamation bond against any potential land restoration costs that may be incurred in the future. The funds are held in trust and may be released after required reclamation is satisfactorily completed.

As at December 31, 2017, the amount on deposit was \$12,000 (2016 - \$12,000).

8. Related Party Balances and Transactions

Except as disclosed elsewhere in these consolidated financial statements, the Company entered into the following related party transactions:

(a) Fees were charged by a company controlled by a director and officer of the Company as follows:

- \$60,000 (2016 - \$25,000) for office space and administration services;
- \$9,134 (2016 - \$14,024) for consulting services;
- \$32,500 (2016 - \$13,000) for professional services;
- \$42,728 (2016 - \$8,835) for investor relations services;
- \$47,380 (2016 - \$49,270) for geological consulting services; and
- \$5,569 (2016 - \$999) for mark-up on out of pocket expenses.

Accounts payable as at December 31, 2017 were \$113,374 (2016 - \$21,939).

(b) Fees in the amount of \$42,706 (2016 - \$75,580) were charged by or accrued to law firms controlled by a director and officer of the Company and included in professional fees, mineral property acquisition or exploration expenditures or share issue costs where applicable. Amounts payable as at December 31, 2017 were \$33,550 (2016 - \$16,862).

(c) Fees in the amount of \$12,000 (2016 - \$12,000) were charged by an officer of the Company for consulting services. Amounts payable as at December 31, 2017 were \$7,350 (2016 - \$1,000).

(d) Fees in the amount of \$31,750 (2016 - \$56,625) were charged by a company controlled by a director of the Company for geological consulting services. Amounts payable as at December 31, 2017 were \$1,050 (2016 - \$16,160).

(e) Fees in the amount of US\$3,300 (2016 - US\$nil) were charged by a director of the Company (appointed on May 29, 2017) for geological consulting services. Amounts payable as at December 31, 2017 were \$4,149 (US\$3,300) (2016 - \$nil).

(f) Loans totalling \$5,000 (December 31, 2016 - \$nil) are payable to a company controlled by a director and officer of the Company with respect to funds advanced.

These transactions were in the normal course of operations and were measured at the fair value of the services rendered. Amounts due to related parties are unsecured, non-interest-bearing, and have no formal terms of repayment.

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

8. Related Party Balances and Transactions, continued

The key management personnel of the Company are the directors and officers of the Company. The Company has no long-term employee or post-employment benefits. A summary of compensation awarded to key management, including amounts in (c) and (e) above, was as follows:

	2017	2016
Short-term benefits	\$ 16,294	\$ 12,000
Share-based payments	115,316	-
Total	\$ 131,610	\$ 12,000

9. Share Capital

(a) Authorized

Unlimited number of common shares without par value and an unlimited number of preferred shares without par value.

(b) Equity Financings

Year ended December 31, 2016

On October 5, 2016, the Company closed a non-flow-through private placement and issued 16,584,000 units at a price of \$0.05 per unit for gross proceeds of \$829,200. Each unit consisted of one common share and one share purchase warrant exercisable to purchase one common share at an exercise price of \$0.10 for a period of five years.

On October 5, 2016, the Company closed a flow-through private placement and issued 7,090,000 flow-through units at a price of \$0.05 per unit for gross proceeds of \$354,500. Each unit consisted of one flow-through common share and one half share purchase warrant, with each whole warrant exercisable to purchase one common share at an exercise price of \$0.10 for a period of five years.

The Company also issued 120,000 finders' share purchase warrants exercisable to purchase one common share at an exercise price of \$0.10 for a period of five years. The warrants were fair valued at \$0.05 per warrant using the Black-Scholes option-pricing model (Note 9(f)).

On December 29, 2016, the Company closed a flow-through private placement and issued 5,630,215 flow-through units at a price of \$0.05 per unit for gross proceeds of \$281,511. Each unit consisted of one flow-through common share and one half share purchase warrant, with each whole warrant exercisable to purchase one common share at an exercise price of \$0.10 for a period of five years.

(An Exploration Stage Company)

Notes to the Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

(Expressed in Canadian Dollars)

9. Share Capital, continued

(b) Equity Financings, continued

The Company also issued 105,600 finders' share purchase warrants exercisable to purchase one common share at an exercise price of \$0.10 for a period of five years. The warrants were fair valued at \$0.04 per warrant using the Black-Scholes option-pricing model (Note 9(f)).

(c) Non-Cash Issuances

Year ended December 31, 2016

On November 14, 2016, pursuant to a previous bank indebtedness guarantee extension agreement, the Company issued 350,000 units. Each unit consisted of one common share and one share purchase warrant exercisable to purchase one common share for a period of one year at an exercise price of \$0.05. The fair value recognized of \$14,000 was based on the closing quoted market price of \$0.04 per share.

(d) Stock Options

The Company has a rolling stock option plan (the "Plan") allowing for the reservation of common shares issuable under the Plan to a maximum 10% of the number of issued and outstanding common shares of the Company at any given time. The term of stock options granted under the Plan may not exceed ten years and the exercise price may not be less than the closing price of the Company's shares on the last business day immediately preceding the date of grant, less any permitted discount. On an annual basis, the Plan requires approval by the Company's shareholders and submission for regulatory review and acceptance.

On March 27, 2017, a total of 4,200,000 fully vested stock options, exercisable for a period of five years with an exercise price of \$0.05 per share, were granted to directors, officers and consultants.

Stock options outstanding and exercisable as at December 31, 2017 were as follows:

Exercise Price	Expiry Date	Balance		Cancelled / Expired	Balance December 31, 2017
		December 31, 2016	Granted

(f) Fair Value Determination

The weighted average fair value of options granted was \$0.05 (2016 - \$nil) and finders warrants issued was \$nil (2016 - \$0.05). Fair values were estimated using the Black-Scholes option pricing model with the following weighted average assumptions:

	2017	2016
Risk-free interest rate	1.09%	0.90%
Expected share price volatility	183.59%	203.67%
Expected life (years)	5.00	5.00
Expected dividend yield	0.00%	0.00%

The expected volatility assumptions have been developed taking into consideration historical volatility of the Company's share price. The total calculated fair value of share-based payments recognized was as follows:

12. Gain on Settlement of Debt

During the course of negotiating settlements of its debts, the Company recognized a gain on settlement of debt of \$nil (2016 - \$5,200).

13. Flow-through Expenditures

As at December 31, 2017, the Company had completed its remaining commitment to incur qualifying Canadian Exploration Expenditures of \$7,278 (2016 - \$347,221) with respect to a private placement of flow-through shares completed during October 2016. A flow-through share premium of \$35,450 was originally recognized relating to this private placement, of which \$728 (2016 - \$34,722) was reversed upon completion of qualifying expenditure. Included within accounts payable and other liabilities is an amount of \$nil (2016 - \$728) with respect to the remaining flow-through share premium recognized.

As at December 31, 2017, the Company had completed its commitment to incur qualifying Canadian Exploration Expenditures of \$281,511 with respect to a private placement of flow-through shares completed during December 2016.

14. Income Tax

A reconciliation of the income tax expense computed at statutory rates to the reported loss before taxes is as follows:

	2017	2016
Income tax benefit at statutory rate of 26.00% (2016 - 26.00%)	\$ 217,206	\$ 161,849
Permanent differences	(133,924)	10,380
Temporary differences	5,474	(78,361)
