## **INDEPENDENT AUDITOR'S REPORT**

**To the Shareholders of Clean Energy Transition Inc.:**

### **Opinion**

We have audited the consolidated financial statements of Clean Energy Transition Inc. (the "Company"), which comprise the consolidated statements of financial position as at April 30, 2025 and 2024, and the consolidated statements of loss and comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a material accounting policy information.

In our opinion, the accompanying consolidated financial statements presents fairly, in all material respects, the consolidated financial position of the Company as at April 30, 2025 and 2024, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS") Accounting Standards as issued by the International Accounting Standards Board ("IASB").

### **Basis for Opinion**

We conducted our audits in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audits of the Consolidated Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audits of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Material Uncertainty Related to Going Concern**

We draw attention to Note 1 in the consolidated financial statements, which indicates that the Company incurred a net loss during the year ended April 30, 2025 and, as of that date, had an accumulated deficit of \$60,452,742. As stated in Note 1, these events or conditions, along with other matters as set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

### **Key Audit Matters**

In addition to the matter described in the material uncertainty related to going concern section, we did not identify any other matter to be considered as the key audit matters and should be communicated in our report

### **Other Information**

Management is responsible for the other information. The other information comprises the information included in the Management's Discussion and Analysis ("MD&A") but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements, or our knowledge obtained in the audits, or otherwise appears to be misstated.

We obtained the MD&A prior to the date of this auditor's report. If based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

### **Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards as issued by the IASB, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

### **Auditor's Responsibilities for the Audit of the Consolidated Financial Statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

**MS PARTNERS LLP**  
**CHARTERED PROFESSIONAL ACCOUNTANTS**

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

For the matters communicated to those charged with governance, we determined those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We described these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Nick Miseros.

**1) Nature of Operations and Going Concern**

Clean Energy Transition Inc. (“transition.inc” or the “Company”) was incorporated on January 10, 1985 under the laws of the Province of British Columbia, Canada and is a public company listed on the TSX Venture Exchange (the “TSX-V”), trading under the symbol “TRAN.” On May 29, 2024, the Company announced it had filed articles of amendment in accordance with the Business Corporations Act (British Columbia) and, effective immediately, completed its legal name change from “Rogue Resources Inc.” to “Clean Energy Transition Inc.” pursuant to such filing. In connection with the name change, the Company also changed its ticker symbol on the TSX-V from “RRS” to “TRAN.”

The registered and records office of the Company is 250 Howe Street, 20th Floor, Vancouver, British Columbia V6C 3R8. The head office of the Company is Suite 200, 150 King St West, Toronto, Ontario, M5H 1J9.

The Company’s principal business activity had recently been focused on producing and selling dimensional limestone into the landscape market from its two operating quarries, Johnston Farm Quarry near Bobcaygeon, Ontario (“Johnston Farm Quarry” or “Bobcaygeon”) and Speiran Quarry near Orillia, Ontario (“Speiran Quarry” or “Orillia”). The Company has now sold both operating quarries and no longer earns revenue from that business segment. Clean Energy Transition Inc. pivoted to focus across three main areas. First, the Company continues to be engaged in the exploration and development of mineral properties in Canada, focused on advancing its silica/quartz business with the Snow White Project in Ontario and the Silicon Ridge Project in Québec. Secondly, the Company is working on advancing low carbon production opportunities in a Critical Minerals division. Finally, transition.inc has a third area of focus, identifying new business opportunities related to the energy transition.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current production activities or exploration programs will result in profitable mining operations. These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which presume the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. The recoverability of the amounts shown for producing assets are dependent on the ability of the Company to generate enough revenue and income from commercial production of limestones which is affected by market conditions, including the level of competition from alternative products, as well as general cost pressures such as labour and maintenance expense. Exploration and evaluation assets are dependent upon the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain necessary financing to complete the evaluation and development of commercially viable reserves and upon future profitable production or proceeds from the disposition of exploration and evaluation assets.

In order to meet future expenditures and cover administrative costs, the Company will need to raise additional financing. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or available under terms favourable to the Company. As at April 30, 2025, the Company has an accumulated deficit of (\$60,452,742) (as at April 30, 2024: (\$59,962,856)). For the year ended April 30, 2025, the Company had a net loss of (\$490,349) (year ended April 30, 2024: (\$1,420,425)).

Management is aware, in making its assessment, of material uncertainties related to events or conditions that could cast significant doubt upon the Company’s ability to continue as a going concern. The Company’s continuance as a going concern is dependent upon its ability to obtain adequate financing or to reach profitable levels of operation. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operation. If the going concern assumption is not appropriate, material adjustments to the consolidated financial statements may be required. No adjustments to the carrying values of the assets and liabilities have been made in these consolidated financial statements.

**2) Material Accounting Policies**

**a) Basis of Presentation**

**Statement of Compliance**

These consolidated financial statements of the Company for the years ended April 30, 2025 and 2024 have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”), and interpretations of the International Financial Reporting Interpretation Committee (“IFRIC”).

**Basis of Measurement**

These consolidated financial statements have been prepared on a historical cost basis except for financial instruments that have been measured at fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The accounting policies set out below were consistently applied to all periods presented unless otherwise noted.

These consolidated financial statements were approved and authorized by the Board of Directors of the Company on August 27, 2025. The Board of Directors of the Company has the power to amend the consolidated financial statements after issue.

**Foreign Currencies**

The presentation currency and the functional currency of the Company and its subsidiaries is the Canadian dollar.

Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on the dates of the transactions. At each financial position reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date of the statement of financial position. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Gains or losses upon translations is recorded in profit or loss.

**b) Consolidation Principles**

The Company operates four subsidiaries: 2723493 Ontario Inc. (formerly known as “Rogue Stone”), 2712428 Ontario Inc. (formerly known as “BobOpCo”) and 2701674 Ontario Inc. (formerly known as “OrilliaOpCo”) and Clean Metals Inc. Subsidiaries are entities controlled by the Company. Control exists when an entity is exposed to, or has rights to variable returns from its involvement with the entity and has the ability to affect these returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Intercompany balances and transactions, and any unrealized income and expenses arising from intercompany transactions, are eliminated in preparing the consolidated financial statements. See Note 5 for further details on the Company’s subsidiaries. At April 30, 2025, only Clean Metals Inc. remains active.

**c) Cash and Cash Equivalents**

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments with maturities within six months held for the purpose of meeting short-term cash commitments rather than for investing purposes. The Company did not have cash equivalents as at April 30, 2025 and 2024.

**d) Marketable Securities**

Marketable securities represent investments in public companies and have been designated as fair value through other comprehensive income (loss). The investments are reported at fair value based on quoted market prices with unrealized gains or losses excluded from operations and reported as other comprehensive income or loss.

e) **Financial Instruments**

i. Classification

The Company classifies its financial instruments in the following categories: at fair value through profit or loss (“FVTPL”), at fair value through other comprehensive income (loss) (“FVTOCI”) or at amortized cost. The Company determines the classification of financial assets at initial recognition. The classification of debt instruments is driven by the Company’s business model for managing financial assets and their contractual cash flow characteristics. Equity instruments that are held for trading are classified as FVTPL. For other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by- instrument basis) to designate them as at FVTOCI. Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL or if the Company has opted to measure them at FVTPL. The following table shows the classification:

<b><u>Financial assets/liabilities</u></b>	<b><u>Classification</u></b>
Cash	Amortized cost
Marketable securities	FVTOCI
Accounts receivable	Amortized cost
Accounts payable and accrued liabilities	Amortized cost
Due to related parties	Amortized cost

ii. Measurement

*Financial assets and liabilities at amortized cost*

Financial assets and liabilities at amortized cost are initially recognized at fair value plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment.

*Financial assets and liabilities at FVTPL*

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed in the consolidated statements of loss and comprehensive loss. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are included in the consolidated statements of loss and comprehensive loss in the period in which they arise.

iii. Impairment of financial assets at amortized cost

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If, at the reporting date, the financial asset has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to the twelve month expected credit losses. The Company shall recognize in the consolidated statements of loss and comprehensive loss, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

iv. Derecognition of financial assets

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire, or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity. Gains and losses on derecognition are generally recognized in the consolidated statements of loss and comprehensive loss.

---

**Clean Energy Transition Inc.**  
**Notes to the Consolidated Financial Statements**  
**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

---

v. **Derecognition of financial liabilities**

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expired. The Company also derecognizes a financial liability when the terms of the liability are modified such that the terms and/or cash flows of the modified instrument are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value. Gains and losses on derecognition are generally recognized in the consolidated statements of loss and comprehensive loss.

f) **Other Comprehensive Income (Loss)**

Other comprehensive income (loss) represents the change in net equity for the period that arises from unrealized gains and losses on FVTOCI financial instruments. Amounts included in other comprehensive income (loss) are shown net of tax. Cumulative changes in other comprehensive income (loss) are included in reserves which is presented as a category in equity.

g) **Inventory**

The Company valued its limestone inventory at the lower of cost, determined on a weighted average basis, and net realizable value. Net realizable value is defined as the expected selling price in the ordinary course of business minus the cost of completion. There is no inventory at year ends April 30, 2025 and 2024.

h) **Equipment**

Equipment is recorded at cost and depreciated over its estimated useful life. The cost of an item includes the purchase price and directly attributable costs to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Where an item of equipment comprises major components with different useful lives, the components are accounted for as separate items of equipment.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the statement of loss and comprehensive loss during the financial period in which they are incurred.

Depreciation on equipment is recognized on a straight-line basis over their estimated useful lives. Depreciation methods, useful lives and residual values are reviewed at each financial year end and are adjusted if appropriate.

The Company's equipment has useful lives as follows:

	<u>Useful life</u>
Equipment	3-8 years

i) **Exploration and Evaluation Assets**

Prior to the year ended April 30, 2025, the Company recorded exploration and evaluation expenditures include the cost of acquiring licenses, costs associated with exploration and evaluation activities, and the fair value (at acquisition date) of exploration and evaluation assets acquired as assets on the Company's Consolidated Statement of Financial Position. For the year ended April 30, 2025, the Company now treats these expenditures as Exploration and Evaluation Expenditures (see Note 2 j below).

Exploration and evaluation assets are assessed for impairment if (i) sufficient data exists to determine technical feasibility and commercial viability, and (ii) facts and circumstances suggest that the carrying amount exceeds the recoverable amount.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, which management has determined to be indicated by a feasibility

study, exploration and evaluation assets attributable to that area of interest are first tested for impairment and the balance is reclassified as producing assets.

Recoverability of the carrying amount of any exploration and evaluation asset is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest. It is management's judgment that none of the Company's exploration and evaluation assets have reached the development stage and as a result are all considered to be exploration and evaluation assets.

Although the Company has taken steps to verify title to mineral properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property may be subject to unregistered prior agreements and non-compliance with regulatory requirements. The Company is not aware of any disputed claims of title.

**j) Exploration and Evaluation Expenditures**

Exploration expenditures relate to acquisition of exploration properties and mineral rights and exploration efforts thereon consisting of geological, geophysical, geochemical, sampling, drilling, trenching, analytical test work, assaying, mineralogical, metallurgical, and other similar efforts that are performed to locate, investigate, and delineate mineral deposits on claims in which the Company has an economic interest.

Exploration and evaluation expenditures are expensed as incurred until technical feasibility and commercial viability of extracting a mineral resource are demonstrable. The demonstration of the technical feasibility and commercial viability is the point at which management determines that it will develop the project. This typically includes, but is not limited to, the completion of an economic feasibility study; the establishment of mineral reserves; and the receipt of the applicable construction and operating permits for the project. Upon demonstrating the technical feasibility and commercial viability of establishing a mineral reserve, in accordance with IFRS 6, Exploration for and Evaluation of Mineral Resources, the Company will capitalize any further expenditures on a prospective basis and perform impairment tests as required under IAS 36, Impairment of Assets.

**k) Producing Assets**

Producing assets are carried at cost, less accumulated depletion and any accumulated impairment charges. Expenditures of mineral properties include:

- i. Acquisition costs which consist of payments for property rights and leases, including the estimated fair value of exploration properties acquired as part of a business combination or the acquisition of a group of assets.
- ii. Exploration, evaluation and project investigation costs incurred on an area of interest once a determination has been made that a potential quarry or mine contains economically recoverable material (in the case of a mining property, this can be Mineral Resources and Mineral Reserves ("R&R")) and there is a reasonable expectation that costs can be recovered by future exploitation or sale of the property. Exploration, evaluation and project investigation expenditures made prior to a determination that a quarry or mine has economically recoverable material are expensed as incurred.
- iii. Deferred stripping costs which represent the cost incurred to remove overburden and other waste materials. Stripping costs incurred prior to the production phase of the quarry or mine are capitalized and included as part of the carrying value of the mineral property. During the production phase, stripping costs which provide probable future economic benefits, identifiable improved access to the ore body and which can be measured reliably are capitalized to mineral properties. Capitalized stripping costs are amortized on a unit-of-production basis over the forecast production amounts to which they relate.
- iv. Development costs incurred on an area of interest once management has determined that a property is capable of economical commercial production are capitalized. Development costs

are directly attributable to the construction of a quarry or mine. When additional development expenditures are made on a property after commencement of production, the expenditure is capitalized as mineral property when it is probable that additional economic benefit will be derived from future operations. Development costs are amortized using a unit-of-production basis over the forecast production amounts to which they relate.

- v. Depletion was measured upon the extraction of tons (short tons) from the producing asset. As of April 30, 2025, the Company no longer held producing assets. There was \$nil depletion for the year ended April 30, 2025 (year ended April 30, 2024: \$4,438)

**l) Impairment of Non-Financial Assets**

Impairment tests on non-financial assets, right-of-use assets, equipment and producing assets, are performed whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount, which is the higher of value in use and fair value less costs to sell, the asset is written down accordingly. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period.

Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the asset's cash-generating unit, which is the lowest group of assets in which the asset belongs for which there are separately identifiable cash inflows that are largely independent of the cash inflows from other assets. Each of the Company's producing properties and each right-of-use asset is considered to be a cash-generating unit for which impairment testing is performed.

An impairment loss is recognized in the consolidated statements of loss and comprehensive loss.

**m) Exploration Tax Credits**

The Company recognizes mineral exploration tax credits against the exploration and evaluation assets when the amount to be received can be reasonably estimated and collection is reasonably assured.

**n) Decommissioning Liabilities**

The Company is subject to various government laws and regulations relating to environmental disturbances caused by exploration and evaluation activities. The Company records the present value of the estimated costs of legal and constructive obligations required to restore the exploration sites in the period in which the obligation is incurred. The nature of the rehabilitation activities includes restoration, reclamation and re-vegetation of the affected exploration sites.

The rehabilitation provision generally arises when the environmental disturbance is subject to government laws and regulations. When the liability is recognized, the present value of the estimated costs is capitalized by increasing the carrying amount of the related mineral property assets. Over time, the discounted liability is increased for the changes in present value based on current market discount rates and liability specific risks. No decommissioning liabilities are recorded.

Additional environmental disturbances or changes in rehabilitation costs will be recognized as additions to the corresponding assets and rehabilitation liability in the period in which they occur.

**o) Non-monetary Consideration**

Agent's warrants, stock options and other equity instruments issued as purchase consideration in non-monetary transactions are recorded at fair value determined by management using the Black-Scholes option pricing model. The fair value of the shares issued is based on the trading price of those shares on the TSX-V on the date of the agreement to issue shares as determined by the Board

of Directors. Proceeds from unit placements are allocated between shares and warrants issued using the residual method. Under this method, the proceeds are allocated first to shares based on the fair value of the shares at the time the units are priced and any residual value is allocated to the warrants.

**p) Investment in Associates**

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The results, assets and liabilities of associates are incorporated using the equity method of accounting. Under the equity method, investments in associates are initially recognized in the consolidated statements of financial position at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive income (loss) of the associate.

When the Company's share of losses of an associate exceeds the Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Company's net investment in the associate), the Company discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of that associate.

Any excess of the Company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

If the Company no longer has significant influence over an associate, the investment in associates is derecognized and recognizes in profit or loss the difference between the sum of the proceeds received and any retained interest, and the carrying amount of the investment in the associate at the date significant influence is lost.

**q) Share Capital**

**i. Flow-through units or shares**

The Company will from time-to-time issue flow-through units or common shares to finance a significant portion of its exploration program. Pursuant to the terms of the flow-through unit/share agreements, these shares transfer the tax deductibility of qualifying resource expenditures to investors. The proceeds received from flow-through units are allocated between shares, warrants and liability component related to the flow-through units using the residual method. Proceeds are first allocated to shares according to the quoted price of existing shares at the time of issuance, then to warrants, and the residual proceeds are allocated to liability component related to the flow-through units. Upon expenses being incurred, the Company derecognizes the liability and credits deferred income tax recovery when the entity renounces the tax benefits to the shareholders. Costs incurred in connection with the issuance of flow-through shares reduce the flow-through liability on a pro-rata basis.

Proceeds received from the issuance of flow-through shares are restricted to be used only for Canadian resource property exploration expenditures within a two-year period. The portion of the proceeds received but not yet expended at the end of the Company's period is disclosed separately as flow-through expenditure commitments.

The Company is also subject to a Part XII.6 tax on unspent flow-through proceeds, renounced under the Look-back Rule, in accordance with Government of Canada flow-through regulations. When applicable, this tax is accrued as a financial expense until paid.

**ii. Share based compensation**

The share option plan allows Company employees and consultants to acquire shares of the Company. The fair value of options granted is recognized as an employee or consultant expense with a corresponding increase in equity. An individual is classified as an employee when the

individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee.

The fair value is measured at grant date, and each tranche is recognized using the graded vesting method over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest.

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at the fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

iii. Share issuance costs

Costs directly identifiable with the raising of share capital financing are charged against share capital. Share issuance costs incurred in advance of share subscriptions are recorded as non-current deferred assets. Share issuance costs related to uncompleted share subscriptions are charged to the statement of loss and comprehensive loss.

iv. Nature and purpose of reserves

The reserves recorded in equity on the Company's consolidated statements of financial position includes amounts used to recognize the fair value of stock option grants, warrants and compensation warrants prior to exercise, expiry or cancellation and the fair value of other share-based consideration recorded at the date of issuance. If and when any stock options or warrants are ultimately exercised, the applicable amounts of their fair values in the reserves account are transferred to share capital.

r) **Income Taxes**

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognized through profit or loss except to the extent that it relates to a business combination or items recognized directly in equity or in other comprehensive income or loss.

Current income taxes are recognized for the estimated income taxes payable or receivable on taxable income or loss for the current year and any adjustment to income taxes payable in respect of previous years. Current income taxes are determined using tax rates and tax laws that have been enacted or substantively enacted by the year-end date.

Deferred tax assets and liabilities are recognized where the carrying amount of an asset or liability differs from its tax base, except for taxable temporary differences arising on the initial recognition of goodwill and temporary differences arising on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction affects neither accounting nor taxable profit or loss.

Recognition of deferred tax assets for unused tax losses, tax credits and deductible temporary differences is restricted to those instances where it is probable that future taxable profit will be available against which the deferred tax asset can be utilized. At the end of each reporting period, the Company reassesses unrecognized deferred tax assets. The Company recognizes a previously unrecognized deferred tax asset to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

s) **Earnings (Loss) Per Share**

Basic earnings (loss) per share is calculated by dividing net income (loss) by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share is calculated using the treasury stock method, which assumes that cash that would be received on the exercise of stock options is applied to purchase shares at the average price during the period. The

difference between the shares issued on the exercise of the stock options and the number of shares purchased under this computation, on a weighted average basis, is added to the number of shares outstanding. Anti-dilutive stock options are not considered in computing diluted earnings per share. Stock options are typically dilutive when the Company has income for the year and the average market price of the common shares during the year exceeds the exercise price of the options.

t) **Leases**

At inception, the Company assesses whether a contract contains an embedded lease. A contract contains a lease when the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration.

The Company, as lessee, is required to recognize a right-of-use asset ("ROU asset"), representing its right to use the underlying asset, and a lease liability, representing its obligation to make lease payments. The Company may elect to not apply IFRS 16 *Leases* to leases with a term of less than 12 months or to low value assets, which is made on an asset by asset basis.

The Company recognizes a ROU asset and a lease liability at the commencement of the lease. The ROU asset is initially measured on the initial amount of the lease liability, plus initial direct cost, less any incentives received. It is subsequently measured at cost less accumulated depreciation, impairment losses and adjusted for certain re-measurements of the lease liability. The ROU asset is depreciated from the commencement date over the shorter of the lease term or the useful life of the underlying asset. The ROU asset is subject to testing for impairment if there is an indicator of impairment.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by the interest rate implicit in the lease, or if that rate cannot be readily determined, the incremental borrowing rate. The incremental borrowing rate is the rate which the operation would have to pay to borrow over a similar term and with similar security, the funds necessary to obtain an asset of similar value to the ROU asset in a similar economic environment.

The lease liability is subsequently increased by the interest cost on the lease liability and decreased by lease payments made.

Variable lease payments that do not depend on an index or a rate not included in the initial measurement of the ROU asset and lease liability are recognized as an expense in the consolidated statements of comprehensive loss in the period in which they are incurred. For short-term leases (lease terms of 12 months or less) and leases of low-value or immaterial assets, the Company has opted to recognize these lease payments as expenses on the consolidated income statement. This expense is presented within operating expenses.

The ROU assets are presented within "Right-of-use assets" and the lease liabilities are presented in "Lease liability" on the consolidated statements of financial position.

u) **Revenue Recognition**

The Company's revenue in 2025 was earned from bulk quartz sold as samples from its Snow White exploration site. In 2024, its revenue consisted of limestone sales from its two active quarries, Orillia and Bobcaygeon. The Company has sold both operating quarries and no longer earns revenue from that business segment. The Company follows IFRS 15 *Revenue from Contracts with Customers* ("IFRS 15") to recognize revenue. IFRS 15 establishes a single five-step model framework for determining the nature, amount, timing and uncertainty of revenue and cash flows arising from a contract with a customer.

The following steps are used to determine whether, how much and when revenue is recognized:

- Identify the contract with the customer;
- Identify the performance obligation in the contract;
- Determine the transaction price;

- Allocate the transaction price to the performance obligation in the contract; and
- Recognize revenue when or as the Company satisfies a performance obligation.

IFRS 15 requires entities to recognize revenue when 'control' of goods or services transfers to the customer. Revenue from the sale of limestone products is recognized at a point in time when control over the goods has been transferred to the customer, which is when the product is loaded on the customer's vehicle. The sales price is determined based on the Company's price list and the weight of the product sold.

IFRS 15 requires entities to apportion the transaction price attributable to contracts from customers to distinct performance obligations on a relative standalone selling price basis. In accordance with the terms of the sales orders, all performance obligations are met when the products are loaded and control of the goods have been transferred to the customer.

### **3) Critical Accounting Judgments and Estimates**

The preparation of these consolidated financial statements requires management to make judgments and estimates that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The consolidated financial statements include estimates which, by their nature, are uncertain. The impact of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and may affect both the period of revision and future periods.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the statement of financial position date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

a. Determination of cash generating units

In performing impairment assessments of corporate assets, assets that cannot be assessed individually are grouped together into the smallest group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. Management is required to exercise judgment in identifying these cash generating units ("CGUs").

b. Recoverability of asset carrying values

Management is required to assess impairment in respect of intangible exploration and evaluation assets. Note 9 discloses the carrying value of these assets. The triggering events for the impairment of exploration and evaluation assets are defined in *IFRS 6 Exploration and Evaluation of Mineral Resources*

Impairment of exploration and evaluation assets is assessed at the CGU level. The Company has used each of its mineral properties to establish its CGUs. In making the assessment, management is required to make judgments on the status of each project and the future plans towards finding commercial reserves. The nature of exploration and evaluation activity is such that only a proportion of projects are ultimately successful and some assets are likely to become impaired in future periods.

The Company assesses its equipment and producing assets for possible impairment if there are events or changes in circumstances that indicate that carrying values of the assets may not be recoverable, or at least annually.

The assessment of any impairment of equipment and producing assets is dependent upon estimates of recoverable amounts that take into account factors such as production estimates, decline in sales volumes, economic and market conditions affecting prices, timing of cash flows, future development costs, and the useful lives of assets and their related salvage values.

c. Classification of exploration and evaluation assets

Judgement is required in determining whether technical feasibility and commercial viability have been established by an economically viable extraction operation and commitment of sufficient financial resources to pursue development in determining whether the exploration and evaluation assets should be reclassified to producing assets.

d. Depreciation and depletion

Depletion of producing assets is provided using the unit-of-production method based on the production volume forecast, as determined annually by management and independent engineers.

e. Fair value of assets acquired and consideration

The fair value of consideration to acquire the assets (Note 7) comprised of common shares and cash. Common shares were valued on the date of issuance. The Company applied IFRS 2 *Share-based Payments* in accounting for the acquisitions.

f. Determination of control of subsidiaries and significant influence

Judgment is required to determine when the Company has control of subsidiaries or joint control or joint arrangements. This requires an assessment of the relevant activities of the investee, being those activities that significantly affect the investee's returns, including operating and capital expenditure decision-making, financing of the investee, and the appointment, remuneration and termination of key management personnel; and when the decisions in relation to those activities are under the control of the Company or require unanimous consent from the investors. Judgment is also required when determining the classification of a joint arrangement as a joint venture or a joint operation through an evaluation of the rights and obligations arising from the arrangement. Changes to the Company's access to those rights and obligations may change the classification of that joint arrangement. Based on assessment of the relevant facts and circumstances, the Company concluded that it controls 2723493 Ontario Inc., 2712428 Ontario Inc. 2701674 Ontario Inc. and Clean Metals Inc.

The Company applies the equity method to account for its investments when the Company determines that it has significant influence in the investees. Significant influence is the power to participate in the financial and operating policy decision of the investee but not control of those policies and management uses judgment in determining whether significant influence exists. Judgment is exercised in the evaluation of its voting power and potential voting rights by examining all facts and circumstance in determining its powers to participate in the financial and operating policy decisions of an investee.

g. Accrued liabilities

The Company has applied judgment in recognizing accrued liabilities, including judgment as to whether the Company has a present obligation (legal or constructive) as a result of a past event; whether it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and whether a reliable estimate can be made of the amount of the obligation.

h. Share based compensation

The Company has applied estimates in the inputs used in accounting for share based compensation in the consolidated statements of loss and comprehensive loss.

i. Deferred income tax assets

The Company has applied judgment in the inputs used in assessing the recoverability of deferred income tax assets to the extent that the deductible temporary differences will reverse in the foreseeable future and that the Company will have future taxable income.

#### **4) New IFRS Pronouncements**

a) Accounting standards adopted for the year

Amendment to IAS 1 and IFRS Practice Statement 2 – Disclosure of Accounting Policies

The International Accounting Standards Board (“IASB”) amended IAS 1 Presentation of Financial Statements to require entities to disclose their material rather than their significant accounting policies. The amendments define what is material accounting policy information and explain how to identify when accounting policy information is material. They further clarify that immaterial accounting policy information does not need to be disclosed. If it is disclosed, it should not obscure material accounting information. To support this amendment, the IASB also amended IFRS Practice Statement 2 Making Materiality Judgements to provide guidance on how to apply the concept of materiality to accounting policy disclosures. These amendments are effective for annual periods beginning on or after January 1, 2023. The Company has modified certain disclosures to reflect this new IFRS pronouncement.

IAS 8, Accounting Policies, Changes in Accounting Estimates and Errors (“IAS 8”) - Definition of Accounting Estimates

In February 2021, the IASB issued amendments to IAS 8, in which it introduces a new definition of “accounting estimates.” The amendments are designed to clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. The amended standard explains how entities use measurement techniques and inputs to develop accounting estimates and states that these can include estimation and valuation techniques. The amendments become effective for annual reporting periods beginning on or after January 1, 2023. The Company has determined that adoption of these amendments has no material effect on the Company's consolidated financial statements. There was no impact by the adoption of this new standard.

- b) New standards, amendment and interpretation not yet adopted

IAS 1, Presentation of Financial Statements (“IAS 1”) - Classification of Liabilities as Current or Non-Current

In January 2020, the IASB issued amendments to IAS 1. The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the consolidated statements of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. The amendments include clarifying the classification requirements for debt a company might settle by converting it into equity. The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with earlier application permitted.

IFRS 18, Presentation and Disclosure in Financial Statements

On April 4, 2024, the IASB published a new standard IFRS 18 “Presentation and Disclosure in Financial Statements” that will replace IAS 1 “Presentation of Financial Statements. IFRS 18 includes a number of changes including, among other things, prescribed sub-totals and classifications in the financial statements, guidance on whether information should be included in the financial statements or the notes and the introduction of disclosures on management-defined performance measures (MPM). This standard is effective for annual reporting periods beginning on or after January 1, 2027.

The standards and amendments to standards and interpretations which have been issued but are not yet effective are not expected to have a significant effect on the Company's consolidated financial statements. The Company has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

**(Expressed in Canadian Dollars)**

**5) Subsidiaries**

2723493 Ontario Inc. was incorporated on October 25, 2019 under the laws of the Province of Ontario. 2723493 Ontario Inc. issued 100 common shares at \$1 per share to the Company on October 25, 2019. The principal activity was to produce and distribute limestone. The Company has 100% of the ownership interest and voting power of 2723493 Ontario Inc..

2712428 Ontario Inc. was incorporated on August 20, 2019 under the laws of the Province of Ontario. 2712428 Ontario Inc. issued 85 common shares to the Company and 15 common shares to QMX8 Bobcaygeon Inc. on August 20, 2019 at \$1 per share (Note 9). The principal activity of 2712428 Ontario Inc. was to produce limestone from the Johnston Farm Quarry near Bobcaygeon, Ontario. On April 29, 2024, the Company returned the Johnston Farm Quarry to QMX8 Bobcaygeon Inc. in exchange for the 15 common shares it held in 2712428 Ontario Inc. and the extinguishment of the vendor mortgage (\$700,000) and associated liabilities.

2701674 Ontario Inc. was incorporated on June 14, 2019 under the laws of the Province of Ontario. 2701674 Ontario Inc. issued 1 common share at \$1 per share to the Company on June 14, 2019. The principal activity of 2701674 Ontario Inc. was to produce limestone from the Speiran Quarry near Orillia, Ontario, an acquisition that closed on March 3, 2020. The Company has 100% of the ownership interest and voting power of 2701674 Ontario Inc. 2701674 Ontario Inc.. On February 23, 2024, the Company announced the sale of the Speiran Quarry for gross proceeds of \$1.85 million. The sale completed on April 29, 2024.

Clean Metals Inc. was incorporated on May 31, 2024 under the laws of the Province of Ontario. Clean Metals Inc. issued 1 common share at \$1 per share to the Company on May 31, 2024. The principal activity of Clean Metals Inc. is the exploration and development of the Company's Aurora Nickel Project in Timmins, Ontario.

**6) Marketable Securities**

**i) For the year ended April 30, 2025**

In the year ended April 30, 2025, the Company sold 1,580,500 shares of EV Nickel Inc. ("EVNi") (held as marketable securities at FVTOCI), for proceeds of \$954,458, realizing a gain of \$681,217 (including an unrealized gain of \$656,779 previously recognized in OCI). Unrealized losses for the year of \$493,920 were recorded on these marketable securities in OCI as well.

At April 30, 2025, the Company held 1,168,500 shares of EVNi with a market value of \$0.24 per share or \$280,440.

Balance, April 30, 2024	\$ -

<b>Balance, April 30, 2025</b>	<b>\$280,440</b>

\*Value based on the adjusted cost base of the shares at the time of sale.

**i) For the year ended April 30, 2024**

In January 2024, the Company sold 7,183,683 shares of EVNi. As at January 31, 2024, the Company held 2,750,000 common shares of EVNi, representing approximately 3% of EVNi's outstanding common shares at the time. As such, the Company no longer considers itself to have significant influence over EVNi. The remaining EVNi shares are now considered FVTOCI and recorded at fair market value with changes in value including in Other Comprehensive Income.

In the year ended April 30, 2024, the Company sold 1,000 shares of EVNi (held as marketable securities at FVTOCI), realizing a gain of \$447 (including an unrealized gain of \$407 previously recognized in OCI).

**Silicon Ridge Project**

Pursuant to an option agreement dated August 15, 2014, the Company acquired an option to earn a 100% interest in the Silicon Ridge property located northeast of Québec City, for a payment of 850,000 shares (issued). The property is subject to a 2% NSR, of which one-half (1%) may be purchased for \$500,000 and the remaining one-half (1%) may be purchased for a further \$1,000,000.

In April 2021, the Company received notice of refusal from Québec's Ministère des Forêts, de la Faune et des Parcs ("MFFP") regarding the permit application for the Company's Silicon Ridge Project ("Project"). The Company assesses the carrying value of its mineral properties for indication of impairment at each quarter end. On January 31, 2022, the Company concluded based on further discussion and evaluation to write-down the property's exploration costs to \$nil. An impairment of \$5,659,992 was recorded during the year ended April 30, 2022. The Company plans to continue to engage with the MFFP to negotiate a fair resolution for the Project.

**Snow White Project**

At October 31, 2023, the Company wrote down the full carrying value of the Snow White asset to \$nil as it did not expect to initiate further exploration on the project until the Company has sufficient funding to do so.

During the year ended April 30, 2025, the Company sold quartz to two customers to test chemical composition and to determine if they would be suitable for the production of their specific silicon and ferrosilicon alloys. The Company recorded revenue of \$126,585 and cost of sales of \$148,439.

**Langmuir Property**

Pursuant to an option agreement dated July 13, 2004, the Company acquired a 100% interest in two claims on the Langmuir property near Timmins, Ontario. The optionor is entitled to receive a 2% NSR. The Company may at any time purchase 1% of the NSR for \$500,000. The property is an exploration and evaluation asset

**Clean Energy Transition Inc.**  
**Notes to the Consolidated Financial Statements**  
**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

that hosts a nickel and copper mineral resource and other prospective nickel/copper targets. Subsequent to the agreement, the Company staked a further 72 claims which form part of the Langmuir property.

On March 4, 2021 the Company sold its ownership and rights in the Langmuir property to EVNi, a private company incorporated under the laws of Ontario, conditional on the following:

- EVNi to close the first tranche of its previously announced non-brokered private placement for proceeds of more than \$1,500,000 (completed);
- The Company to be granted shares for >20% in EVNi and been paid \$150,000 in cash (completed);
- The Company to transfer the Langmuir Project claims to EVNi (completed).

In addition to the consideration paid at closing, a future payment will be received by the Company based on the size of an updated new mineral resource estimate. This payment will be up to a maximum of \$5,000,000 paid in cash, EVNi shares, or a combination thereof to be determined by EVNi.

In April 2022, the Company amended the Langmuir Asset Purchase Agreement, granting until the end of 2023 for EVNi to complete an updated mineral resource estimate. The extension was granted to allow for additional drilling across the Langmuir property, including on the W4 deposit which has an historic resource already and is currently completing metallurgical test work to be fully incorporated into any updated resource. In exchange for this amendment, EVNi agreed to provide the Company with access to an advance on the New Resource Payment, the advance carried an interest rate of 6%.

The Company acquired 6,666,667 shares of EVNi at a fair value of \$0.30 per share. The \$2,000,000 value was recorded as an investment in associates (see Note 11).

In the year ended April 30, 2021, the Company recorded a gain on property sold of \$1,956,718:

Shares of EVNi received	\$	2,000,000
Cash received		150,000
Cash transferred to EVNi		(5,000)
Langmuir property transferred to EVNi		(188,282)
<b>Gain on property sold</b>	<b>\$</b>	<b>1,956,718</b>

On September 14, 2023, EVNi announced the agreement between it and Rogue on the final resource payment owed to Rogue related to the sale of the Langmuir property in March 2021. The payment was calculated based on EVNi's updated mineral resource estimate filed on July 26, 2023. The total value of the payment is \$772,262. EVNi elected to pay the balance owing net of previous funds advanced and accumulated interest, entirely in common shares. Pursuant to the 10-day VWAP as set out in the asset purchase agreement translated to 3,267,016 common shares of EVNi. The Company received these shares in September 2023 and recorded a gain on the asset sale of \$580,160 based the fair value of the shares received and the value of the advance.

**8) Right-of-Use Assets**

<b>Right of use asset</b>	
<b>Value of right-of-use assets as at April 30, 2023</b>	\$ 675,465
Disposals	(495,703)
Depreciation	(179,762)

<b>Lease liability recognized as at April 30, 2024 and 2025</b>	<b>\$ -</b>

At April 30, 2025, the Company has returned all leased equipment and has no recurring monthly lease payments.

**9) Investment in Associates**

**EVNi**

The Company had determined previously it had significant influence but not control of EVNi. As such, its investment had been equity accounted for in its consolidated financial statements. In January 2024, the Company sold 7,183,683 shares and no longer considers itself to have significant influence of EVNi. As at January 31, 2024, the Company held 2,750,000 common shares of EVNi, representing approximately 3% of EVNi's outstanding common shares at that time. The remaining EVNi shares are now considered FVTOCI and recorded at fair market value with changes in value including in Other Comprehensive Income (see Note 6).

The following is a summary of the EVNi investment as at April 30, 2024 and 2025:

Initial investment	\$ 2,000,000
Loss from investment in associates	(290,861)
Balance, April 30, 2022	1,709,139
Loss from investment in associates	(119,882)
Balance, April 30, 2023	1,589,257
Loss from investment in associates	(67,915)
Additional investment in EVNi	196,021
Sale of shares of EVNi (January 2024)	(1,221,226)
Balance moved to Marketable securities	(496,137)
<b>Balance, April 30, 2024 and 2025</b>	<b>\$ -</b>

**10) Accounts Payable and accrued liabilities**

In the year ended April 30, 2024, the Company negotiated settlements with two vendors for previously invoiced professional fees that were included in the Company's accounts payable balance. The settlements provided for the recovery of \$241,122 in professional fees.

**11) Vendor Mortgages**

On October 25, 2019, as part of the consideration for the acquisition of the Bobcaygeon Quarry, the Company took on a vendor mortgage with a principal amount of \$700,000 ("Vendor Mortgage"), incorporating an existing \$350,000 mortgage on title in favour of Inspirit Resources Inc. (a company controlled by 2023115 Ontario Inc. ("Vendor")) and a new \$350,000 mortgage, that was added at closing. The Vendor Mortgages are secured against the Bobcaygeon Quarry and the Class B Aggregate License number 20375, with the Vendor Mortgages listed on title for the quarry until completely repaid. Quarterly interest-only payments are to begin when the property earns a positive net profit; the Vendor Mortgages will have a term of four years from closing of the acquisition and can be completely repaid at any time in lump sum. Interest shall accrue quarterly on the outstanding balance of the mortgages at a rate of 5.25% annualized, until maturity or until full repayment.

**Clean Energy Transition Inc.**  
**Notes to the Consolidated Financial Statements**  
**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

---

On April 29, 2024, the Company returned the Johnston Farm Quarry to QMX8 Bobcaygeon Inc. in exchange for the 15 common shares it held in 2712428 Ontario Inc. and the extinguishment of the Vendor Mortgage (\$700,000) and associated liabilities.

**12) Loan payable**

On March 4, 2020, the Company closed with a leading Canadian, nonbank lender (the “Credit Group”) for a \$1,800,000 term loan (the “Debt Facility”), secured against Orillia and the Company’s remaining assets. The Debt Facility has a 12 month term, extendable to 18 months, with interest-only payments until the principal is due in full at maturity and is subject to an existing general security agreement with the Credit Group. The Debt Facility carries an interest rate equal to the higher of prime plus 8.05% or 12%. In addition, the Company has issued the Credit Group 2,250,000 bonus shares, equal to 10% of the Debt Facility. The agreement also required the Company to raise \$300,000 in new equity capital within 60 days of the closing date. The Company immediately drew the full \$1,800,000 loan amount. A discount rate of 15% was applied to determine the liability component of the loan payable. Financing fees related to the loan were \$46,000 and the bonus shares were valued at \$288,962.

The Debt Facility was secured against all of the Company’s assets and was fully repaid on February 2, 2024 including \$314,312 in accrued interest and legal and administrative fees.

**13) Share Capital**

**a) Authorized**

Unlimited number of common shares without par value.

**b) Issued**

**Year ended April 30, 2025**

On December 23, 2024, the Company closed a non-brokered private placement of Flow-Through Units (“FT Units”), whereby it issued 5,312,500 FT Units at a price of \$0.08 per FT Unit for aggregate gross proceeds of \$425,000. Sean Samson, President, CEO, and a director of the Company participated in the Offering, purchasing 375,000 FT Units. Each FT Unit consisted of one flow-through common share and one-half of one common share purchase warrant. Each full warrant entitles the holder thereof to purchase one common share in the capital of the Company at a price of \$0.12 for a period of thirty-six months following the date of issuance. All of the securities issued under the Offering are subject to a four-month and one-day statutory hold period, along with a 15-month contractual hold period from the date of issuance.

**Year ended April 30, 2024**

On February 22, 2024, the Company issued 405,274 shares related to the acquisition of the Snow White project. The fair market value at the time of issuance was \$0.04 per share. The shares were later deemed to be issued in error as the Company had already met all requirements of the agreement. The Company expects to return the shares to treasury and has recorded the value in its accounts receivable balance.

**c) Stock Options**

The Company has adopted an incentive stock option plan (the “Plan”). The essential elements of the Plan provide that the aggregate number of shares of the Company’s capital stock issuable pursuant to options granted under the plan may not exceed 10% of the issued and outstanding shares of the Company at any given time. Stock options granted under the Plan may have a maximum term of ten years. The exercise price of Options granted under the Plan will not be less than the discounted market price of the shares (defined as the last closing market price of the Company’s shares immediately preceding the grant date, less the maximum discount permitted by TSX Venture Exchange Policy), or such other price as may be agreed to by the Company and accepted by the TSX Venture Exchange. Options granted to consultants providing investor relations activities under the Plan are subject to vesting restrictions such that one-quarter of the total options shall vest at three, six, nine and twelve months following the date of the grant.

**Clean Energy Transition Inc.**  
**Notes to the Consolidated Financial Statements**  
**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

On January 11, 2025, 425,000 stock options with an exercise price of \$0.39 expired.

On February 23, 2024, the Company announced that it had granted 1,300,000 stock options to directors, and officers of the Company. The stock options are exercisable at a price of \$0.05 per share and vest over a period of one year, with one half of the options vesting immediately, and one half vesting at the end of the first anniversary of the date of grant. The options were granted for a term of seven years and expire on February 23, 2031.

A summary of the status of the Company's stock options as of April 30, 2025 and 2024 were as follows:

	Options	Weighted Average Exercise Price (\$)
Balance, April 30, 2023	2,685,000	0.18
Expired	(375,000)	0.49
Issued	1,300,000	0.05
Balance, April 30, 2024	3,610,000	0.10
Expired	(425,000)	0.39
<b>Balance, April 30, 2025</b>	<b>3,185,000</b>	<b>0.07</b>

On April 30, 2025, the Company had outstanding and exercisable stock options as follows:

Expiry Date	Exercise Price	Number of Options Exercisable	Number of Options Outstanding
January 15, 2027	\$0.07	680,000	680,000
August 14, 2027	\$0.09	865,000	865,000
December 18, 2027	\$0.08	340,000	340,000
February 23, 2031	\$0.05	1,300,000	1,300,000
<b>Balance, April 30, 2025</b>		<b>3,185,000</b>	<b>3,185,000</b>

As at April 30, 2025, the weighted average remaining contractual life of the Company's share purchase options is 3.6 years and the weighted average exercise price is \$0.07 (April 30, 2024 – 4.2 years and \$0.10).

During the year ended April 30, 2025, the Company recorded \$15,362 (year ended April 30, 2024 - \$25,603) in share-based compensation.

**d) Warrants Outstanding**

A summary of the status of the Company's warrants as at April 30, 2025 and 2024 were as follows:

	Number of Warrants	Weighted Average Exercise Price (\$)
Balance, April 30, 2023	8,313,095	0.13
Expired	(8,313,095)	0.13
Balance, April 30, 2024	-	-
Issued (see Note 13 b.)	2,656,250	0.12
<b>Balance, April 30, 2025</b>	<b>2,656,250</b>	<b>0.12</b>

**Clean Energy Transition Inc.**  
**Notes to the Consolidated Financial Statements**  
**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

**e) Compensation Warrants Outstanding**

A summary of the status of the Company's compensation warrants as at April 30, 2025 and 2024 were as follows:

	Compensation Warrants	Weighted Average Exercise Price (\$)
Balance, April 30, 2023	250,833	0.08
Expired in 2024	(250,833)	0.08
<b>Balance, April 30, 2024 and 2025</b>	<b>-</b>	<b>-</b>

**f) Flow-through shares**

A summary of the status of the Company's flow-through premium liability as at April 30, 2025 and 2024 were as follows:

Balance, April 30, 2023 and 2024	\$ -
Additions	15,582
Settlements	(1,994)
<b>Balance, April 30, 2025</b>	<b>\$13,588</b>

**14) Loss Per Share**

The following is a reconciliation of the denominator in calculating basic and diluted earnings (loss) per share:

	2025	2024
Net loss for the year	\$ (490,349)	\$ (1,420,425)
Basic weighted average number of shares outstanding	38,308,918	36,026,076
Effect on dilutive securities from stock options	-	-
Effect on dilutive securities from warrants	-	-
Diluted weighted average number of shares outstanding	38,308,918	36,026,076
Earnings (loss) per share, basic and diluted	\$ (0.01)	\$ (0.04)

**15) Non-controlling Interest**

The Company previously had an 85% interest in 2712428 Ontario Inc. 15% of 2712428 Ontario Inc.'s equity and total comprehensive income or loss was allocated to the non-controlling interest using the indirect method. At April 29, 2024, the Company received the other 15% interest in 2712428 Ontario Inc. as part of its sale of the Bobcaygeon Quarry and related assets. The non-controlling interest comprises the following amounts:

Balance, April 30, 2022	\$ 193,266
Net loss attributable to non-controlling interest	(7,081)
Balance, April 30, 2023	\$ 186,185
Reversal of net loss attributable to non-controlling interest	(186,185)
<b>Balance, April 30, 2024 and 2025</b>	<b>\$ -</b>

**Clean Energy Transition Inc.**  
**Notes to the Consolidated Financial Statements**  
**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

**16) Related Party Balances and Transactions**

**a) Compensation of key management personnel**

The Company's key management personnel have authority and responsibility for planning, directing and controlling the activities of the Company and consist of its directors, President and Chief Executive Officer, and Chief Financial Officer. Compensation of the directors, officers and/or companies controlled by these individuals for the year ended April 30, 2025 and 2024 were as follows:

	<b>2025</b>	<b>2024</b>
Key management compensation	\$ 405,618	\$ 391,510
Director compensation	8,250	15,000
Share-based compensation	10,044	25,603
Total compensation of key management personnel	<u>\$ 423,912</u>	<u>\$ 432,113</u>

**b) Related party balances**

Amounts due to related parties amounted to \$39,801 as at April 30, 2025 (April 30, 2024 - \$68,956). Amounts due to related parties are unsecured, non-interest bearing and have no specific repayment terms.

**17) Supplemental Cash Flow Information**

	<b>Years Ended April 30,</b>	
	<b>2025</b>	<b>2024</b>
Interest paid	\$ -	\$ 243,591
Non-cash investing and financing activities:		
Share capital issued for exploration and evaluation assets	\$ -	\$ 28,000
Right-of-use assets additions	\$ -	\$ 87,735
Change in accounts payable in exploration and evaluation assets	\$ -	\$ (30,510)
Flow-through share premium income	\$ 1,994	\$ -
Accrued interest	\$ 3,515	\$ -

**18) Financial Instruments and Risk Management**

**Fair value of financial instruments**

The fair value hierarchy established by IFRS 13 *Fair Value Measurement* has three levels to classify the inputs to valuation techniques used to measure fair value described as follows:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the assets or liabilities either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

The carrying values of the Company's cash, accounts receivable, government assistance loan, accounts payable and accrued liabilities, due to related parties, and short term advance approximate their fair values due to the short-term nature of these instruments. The Company's marketable securities, vendor mortgages, and government assistance are Level 1 and lease liability and loan payable are Level 2.

**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

---

**Financial risk factors**

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

*Credit risk*

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk for the Company is primarily associated with its cash. The Company is not exposed to significant credit risk as its cash is placed with a major Canadian financial institution. The Company is exposed to some credit risk on accounts receivable; however, management considers the risk to be low. The aging of accounts receivables is as follows:

		<b>April 30, 2025</b>		April 30, 2024
0 – 30 days	<b>\$</b>	-	\$	-
31 – 90 days		<b>46,725</b>		16,211
Greater than 90 days		<b>16,263</b>		-
Accounts receivable	<b>\$</b>	<b>62,988</b>	\$	16,211

*Liquidity risk*

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company manages its liquidity risk by forecasting cash flows required by operations and anticipated investing and financing activities. As of April 30, 2025, the Company had a cash balance of \$858,135 (April 30, 2024 - \$781,024) to settle current liabilities of \$395,463 (April 30, 2024 - \$388,816). The Company's accounts payable have contractual maturities of less than forty-five days and are subject to normal trade terms.

*Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and other price risk. The Company is not exposed to significant market risk, except as noted below.

*Interest rate risk*

The Company is not exposed to interest rate risk from fluctuations of the interest rate.

*Price risk*

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's profit or loss due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on profit or loss and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company. With its equity holdings accounted for at fair value, fluctuations in market prices of securities would affect the Company's consolidated comprehensive income (loss). A 10% increase in the market price would have increased the Company's consolidated comprehensive income by \$28,044 (April 30, 2024 - \$170,438). A 10% decrease in the market prices would have increased the Company's consolidated comprehensive loss by the same amount.

**Notes to the Consolidated Financial Statements**  
**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

---

**19) Capital Management**

In the definition of capital, the Company includes cash and equity, comprising issued common shares and reserves.

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company is dependent upon revenues and external financings to fund activities. In order to carry out operations, the Company will spend its existing working capital and raise additional funds as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the year. The Company is not subject to externally imposed capital requirements.

**20) Commitments**

As at April 30, 2025, the Company currently has no equipment lease agreements in place.

**21) Segmented Information**

The Company previously operated primarily in two business segments, which were selling quarried limestones from two operating quarries located in Canada and the exploration and development of resource properties located in Canada. The Company's non-current assets of \$2,389 (April 30, 2024 - \$16,717) are located in Canada. The Company's annual revenue of \$126,585 was earned from sales of bulk quartz samples from its Snow White exploration site. In 2024, its revenue of \$498,590 was earned from its operating quarries. At April 30, 2024, the Company had sold both operating quarries and no longer earns revenue from that business segment. It's only remaining business segment is the exploration and development of resource properties located in Canada.

**22) Income Taxes**

	<b>2025</b>	<b>2024</b>
Statutory Canadian corporate tax rate	<b>26.5%</b>	27%
Expected current income tax recovery	\$ (130,000)	\$ (384,000)
Non-deductible permanent differences	1,000	3,000
Share issuance costs	10,000	24,000
Change in estimate and other	1,000	1,000
Change in deferred tax assets not recognized	118,000	356,000
Deferred income tax recovery	\$ -	\$ -

**Clean Energy Transition Inc.**  
**Notes to the Consolidated Financial Statements**  
**Years ended April 30, 2025 and 2024**  
**(Expressed in Canadian Dollars)**

The significant components of the Company's deferred tax assets (liabilities) are as follows:

	2025	2024
Loss carry forwards	\$ 8,035,000	\$ 7,108,000
Share issue costs	12,000	26,000
Equipment	1,000	(109,000)
Lease liability	-	78,000
Marketable securities	(2,947,000)	-
Other	-	(43,000)
Deferred income tax assets	5,101,000	7,060,000
Mineral properties and deferred exploration	1,611,000	1,397,000
Producing assets	532,000	(760,000)
Net deferred income tax assets	7,244,000	7,697,000
Unrecognized deferred tax assets	(7,244,000)	(7,697,000)
	\$ -	\$ -

The Company has not recorded deferred income tax assets based on the extent to which it is more likely than not that sufficient taxable income will not be realized during the carry-forward period to utilize these net deferred income tax assets.

The Company has available non-capital losses for Canadian income tax purposes of approximately \$29,162,000 which may be carried forward to reduce taxable income in future years, if not utilized, expiring as follows:

2026	\$ 531,000
2027	1,213,000
2028	1,393,000
2029	1,505,000
2030	1,909,000
2031	1,443,000
2032	984,000
2033	1,443,000
2034	307,000
2035	496,000
2036	569,000
2037	916,000
2038	1,076,000
2039	716,000
2040	575,000
2041	704,000
2042	1,076,000
2043	8,278,000
2044	2,333,000
2045	3,138,000
	\$ 29,162,000

At April 30, 2025, the Company had unclaimed resource deductions totaling \$8,089,000 (2024- \$7,530,000), share issue costs totaling \$9,990 (2024 - \$24,000) and other undepreciated assets totaling \$2,400 (2024 - \$16,717), which may be used to reduce taxable income in the future.
