

Strikewell Energy Corp.

Management's Discussion and Analysis

September 30, 2020

The following management's discussion and analysis ("MD&A") for Strikewell Energy Corp. was prepared by management based on information available as at November 24, 2020. This MD&A should be reviewed together with the unaudited condensed interim consolidated financial statements (the "Interim Financial Statements") for the quarter ended September 30, 2020, and the MD&A and audited annual consolidated financial statements for the year ended December 31, 2019. The Company's unaudited condensed interim consolidated financial statements and year-end audited annual consolidated financial statements are filed on SEDAR and are available for review at www.sedar.com.

As used in this MD&A, the terms "we", "us", "our", "Strikewell" and the "Company" refer to Strikewell Energy Corp. and our subsidiaries, Strikewell Capital Corp. ("Strikewell Capital") and ZNX Energy Ltd. ("ZNX"), unless the context clearly requires otherwise.

Unless otherwise noted, all dollar amounts are expressed in Canadian dollars ("C\$" or "\$") and any references to common shares are in the capital of Strikewell Energy Corp., unless the context clearly requires otherwise.

Barrels of oil equivalent ("boe") amounts have been calculated using a conversion rate of six thousand cubic feet ("MCF") of natural gas per barrel ("bbl") of oil or natural gas liquids ("6:1"). A conversion ratio of six MCF to one bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Boe disclosure may be misleading, particularly if used in isolation.

Forward-Looking Statements

Certain information in this MD&A and the documents incorporated by reference contain forward-looking statements, which includes forward-looking information within the meaning of applicable Canadian securities laws. Forward-looking statements are statements which relate to future events or our future performance, including our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may", "should", "expects", "plans", "anticipates", "believes", "estimates", "predicts", or "potential" or the negative of these terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks described in the section titled "Risk Factors" commencing on page 12 and "Risks Relating to the Industry" commencing on page 14 of this MD&A, that may cause the Company's or the industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. No assurance can be given that any of the events anticipated by the forward-looking information and statements will occur or, if they do occur, what benefits we will obtain from them. This MD&A contains forward-looking information and statements, which may include, but are not limited to: statements with respect to the financial and operating performance of the Company and its subsidiary; investment objectives and strategies; the business goals and strategies; forecast operating and financial results; planned capital expenditures; potential future market for our products; our plans for, and results of, exploration and development activities; our treatment under governmental regulatory and royalty regimes and tax laws; competitive advantages; business prospects and opportunities; costs and timing of developmental new projects; our management's assessment of future plans and operations; our anticipated liquidity and various matters that may impact such liquidity; and requirements for additional capital.

While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgement regarding the direction of our business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions or other future performance suggested in this MD&A. These assumptions, which include: management's current expectations; estimates and assumptions about certain projects and the markets we operate in; the global economic environment; interest rates; estimates of

quantities of oil and natural gas from our properties; our ability to generate sufficient cash flow from operations to meet our current and future obligations and other risks and uncertainties described from time to time in the filings we make with securities regulatory authorities; the impact of increasing competition; our ability to obtain qualified staff, equipment and services in a timely and cost efficient manner; the ability of the operator of the projects in which we have an interest to operate the field in a safe, efficient and effective manner; future commodity prices; currency, exchange and interest rates; the regulatory framework regarding royalties, taxes and environmental matters in the jurisdictions in which we operate; may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking information and statements, including, but not limited to: the failure of the Company to execute our business plans; general economic conditions as they affect us; risks arising from our operations generally; competition; volatility of, and assumptions regarding oil and gas prices; accuracy of cost estimates; fluctuations in commodities prices; fluctuations in product supply and demand; accuracy of our reserves, resources and future production estimates; our ability to replace and expand oil and gas reserves; the reliability of our assets; risks associated with technology and its application to our business; changes in the applicable regulatory framework, including changes in regulatory approval process and land-use designations, royalty, tax, environmental, greenhouse gas, carbon and other laws or regulations, or changes to the associated with compliance; our ability to control our operating costs, general administrative and other expenses; other factors beyond our control; insufficient investor interest in our securities which may impact on our ability to raise additional financing as required; and those factors described in the section titled "Risk Factors" in this MD&A.

The forward-looking information is based on the estimates and opinions of our management at the time they are made. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Readers of this MD&A are cautioned not to rely on such forward-looking information and statements. The forward-looking information in this MD&A is made as of November 24, 2020 and the Company assumes no obligation to update or revise them to reflect new events or circumstances, except as required by law.

Description of Business

We are a reporting issuer in the Provinces of British Columbia and Alberta and our common shares are listed on the TSX Venture Exchange (the "TSXV") under the symbol "SKK".

We are in the oil and gas business. We own producing petroleum and natural gas interests near Garrington, Alberta, through our wholly owned subsidiaries Strikewell Capital and ZNX.

Overall Performance

Garrington, Alberta:

The Company owns a 100% working interest in a producing Garrington area oil well with 640 acres of related oil and gas petroleum rights.

The initial 10% working interest in the Garrington property was acquired effective September 1, 2009 through Strikewell Capital.

An additional 80% working interest was acquired through a purchase and sale agreement which closed on October 9, 2015 through Strikewell Capital. Additional details regarding the purchase and sale agreement are described below on page 7 under the heading "Liquidity and Capital Resources".

On March 20, 2020, the final 10% working interest was acquired through a debt reduction and share property transfer agreement (the "Agreement") between Strikewell and Summus Solutions

N.V. ("Summus"). Additional details regarding the Agreement are described on page 5 under the heading "Discussion of Operations".

The Company has incurred a net loss of \$1,474,117 (2019 - \$1,641,781), is currently unable to self-finance operations, has a working capital deficiency of \$5,161,101 (December 31, 2019 - \$3,431,705) an accumulated deficit of \$38,058,192 (December 31, 2019 - \$36,458,886), limited resources, no significant source of operating cash flow and no assurances that sufficient funding will be available to conduct further exploration and development of its petroleum and natural gas interests. The Company will require additional equity and/or debt financing to meet its administrative overhead costs, to continue exploration work on its petroleum and natural gas interests and settle its current and long-term liabilities.

Ongoing global economic instability has had a negative impact on many segments of the world economy due to several factors including, without limitation: the effects of the subprime lending and general credit market crises, volatile energy costs, slower economic activity, decreased consumer confidence, reduced corporate profits and capital spending, adverse business conditions, increased unemployment and liquidity concerns. Natural gas and oil prices respond to consumer and industrial demand. Accordingly, the general current economic conditions have resulted in a decreased demand for natural gas and oil products, both domestically and abroad, and have had a negative effect on natural gas and oil prices. We cannot predict the timing or duration of economic slowdowns or the timing or strength of subsequent economic recoveries, worldwide or in our industry, and cannot predict the extent to which economic slowdowns will impact our business.

The outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures that includes the implementation of travel bans, self-imposed quarantine periods and physical distancing. This created a dramatic slowdown in the global economy and global energy consumption has been materially impacted resulting in lower oil and natural gas prices throughout globe, including Canada. Oil and natural gas prices have been further impacted through increased global supply as a result of the collapse in the OPEC+ negotiations to curtail production from two of the world's largest energy producers: Saudi Arabia and Russia. As a result of unprecedented energy prices, many energy companies have shut in their production until better commodity prices can be realized. On April 30, 2020, the facility operator, which the Company uses to send its associated gas, shut the facility in along with its production in the surrounding area. The Company was not able to transfer its associate gas production to any other facility due to a dearth of pipeline infrastructure in the area. Therefore, effective April 30, 2020, the Company was forced to shut its production until the facility was online again. The Company received notification from its facility operator that the operator was reopening the facility and therefore, Strikewell resumed its production effective August 4, 2020.

Selected Quarterly Financial Information

The following table contains a summary of our financial results for the three-month and nine-month periods ended September 30, 2020 and 2019:

(C\$)	Three-month period ended September 30		Nine-month period ended September 30	
	2020	2019	2020	2019
Total Gross Revenues	101,029	137,429	274,221	465,001
Net Loss	(521,293)	(518,552)	(1,474,117)	(1,641,781)
Basic and Diluted Loss per Share	(0.06)	(0.06)	(0.17)	(0.19)
Total Assets	1,083,174	957,414	1,083,174	957,414
Total Long-term Financial Liabilities	12,716,441	12,612,039	12,716,441	12,612,039

Our revenue performance and the income we realize varies from period to period in relation to the number of wells we have in production, our production volumes and the prices we receive for our commodities from time to time. We have not developed any new wells during the financial periods presented. Historically, commodity prices and hence the prices we realize, are subject to variations arising from market supply and demand fundamentals beyond our control.

The discussion and analysis of our financial condition and results of operations is based on our Interim Financial Statements, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Application of IFRS requires the use of estimates, judgements and assumptions that affect the reported amounts of assets and liabilities as of the date of the Interim Financial Statements as well as the revenues and expenses reported during the period. Changes in these estimates, judgements and assumptions will occur as a result of future events, and accordingly, actual results could differ from amounts estimated. Our reporting currency is Canadian dollars.

Discussion of Operations

Nine-month period ended September 30, 2020 compared to the nine-month period ended September 30, 2019:

A net loss of \$1,474,117 was realized in the nine-month period ended September 30, 2020 compared to \$1,641,781 for the same period in 2019. The decrease in net loss is primarily due to decreased interest and accretion on loans and notes payable of \$1,507,533 compared to \$1,638,979 in the nine-month period ended September 30, 2019. Also, as a result of the debt reduction and share transfer agreement (details below on page 5), the Company recognized a gain on the forgiveness of loan of \$160,938 in the nine months ended September 30, 2020 compared to \$nil in the same period of 2019.

Gross revenue from petroleum and natural gas operations for the nine-month period ended September 30, 2020 decreased to \$274,221 compared to \$465,001 for the same period in 2019 primarily due to the Company's well being shut in for three months.

Direct expenses for the nine-month period ended September 30, 2020 decreased to \$277,420 consisting of \$207,953 in production expenses and non-cash depletion expenses of \$69,467 compared to direct expenses of \$289,860, consisting of \$229,860 in production expenses and non-cash depletion expenses of \$60,000 for the same period in 2019. The decrease is primarily due to the Company's well being shut in for three months.

Operating loss for the nine-month period ended September 30, 2020 was \$43,872 compared to an operating income of \$78,849 for the same period in 2019.

On January 1, 2019, the Company entered into a new Promissory Note with Mr. John R. Hislop ("Mr. Hislop") in the amount of \$7,032,615 at an interest rate of 15% per annum for a period of 7 years, expiring on December 31, 2025 (the "Hislop Promissory Note"). The Hislop Promissory Note replaces the New Vendor Note of \$4,018,636 plus accrued interest which expired on December 31, 2018.

On January 1, 2019, the Company entered into a new Promissory Note with Caravel in the amount of \$3,805,522 at an interest rate of 15% per annum for a period of 7 years, expiring on December 31, 2025 (the "Caravel Promissory Note"). The Caravel Promissory Note replaces the New Second Note of \$2,174,584 plus accrued interest which expired on December 31, 2018.

The Company and Mr. Hislop have a loan agreement with a principal balance of \$865,924, secured by the assets of the Company. This loan had an interest rate of 10% per annum payable semi-annually and it matured on June 1, 2019. At the inception of the loan, the loan was revalued using an estimated effective interest rate of 30% based on comparable market interest rates and a gain of \$971,118 was recorded in contributed surplus to reflect the benefit having been received from a

party in their capacity as an equity holder. This promissory note was renewed on June 1, 2019 with an updated maturity date of June 1, 2026 and an interest rate of 15%. All other terms of the loan remain the same.

On March 20, 2020, the Company announced the closing of the debt reduction and share property transfer agreement between Strikewell and Summus Solutions N.V. ("Summus"). Pursuant to the Agreement, Strikewell acquired 100% of the shares of ZNX Energy Ltd. ("ZNX") effective October 31, 2019 for the purchase price of \$195,000 (the "Purchase Price"). The acquisition was subject to the approval of the TSXV which was obtained in January 2020. The Purchase Price was paid and satisfied at the closing of the transaction, by way of a reduction of the debt owing from Summus.

Following the closing of the transaction, ZNX is now a wholly owned subsidiary of Strikewell, including indirect ownership of all of ZNX's assets. Strikewell now owns a 100% working interest in the Garrington Property, encompassing an area of 640 acres with one producing Pekisko oil well, the Garrington 06-06-035-02W5 and associated production assets.

The closing adjustments assigned net liabilities, owing by ZNX to the Company, to Summus which as of October 31, 2019 amounted to \$351,006. In addition, a loan owing from ZNX to Summus in the amount of \$160,428 was forgiven and a loan owing to ZNX from Warrior Oil & Gas Holdings of \$23,302 was assigned to Summus. The net liability to the Company was offset by the Purchase Price for a net balance owing of \$156,006. The net balance of the debt owing to the Company accrues interest at a rate of 10% per annum, compounding monthly from January 1, 2020 to June 30, 2020. The interest rate will increase to 25% per annum, compounding monthly from July 1, 2020 until it is paid in its entirety. The net balance is due in full on September 30, 2020. The net balance and accrued interest owing can be paid to the Company at any time without penalty. As of September 30, 2020, the balance owing to the Company is \$174,434, which includes \$18,428 in accrued interest.

Third Quarter

Three-month period ended September 30, 2020 compared to the three-month period ended September 30, 2019:

A net loss of \$521,293 was realized in the three-month period ended September 30, 2020 compared to \$518,552 for the same period in 2019. The increase in net loss is primarily due to decreased revenue due to the Company's well being shut in for three months during the second and third quarter.

Gross revenue from petroleum and natural gas operations for the three-month period ended September 30, 2020 decreased to \$101,029 compared to \$137,429 for the same period in 2019 primarily due the Company's well being shut in for three months.

Direct expenses for the three-month period ended September 30, 2020 increased to \$91,387 consisting of \$68,987 in production expenses and non-cash depletion expenses of \$22,400 compared to direct expenses of \$89,567, consisting of \$69,567 in production expenses and non-cash depletion expenses of \$20,000 for the same period in 2019.

Operating income for the three-month period ended September 30, 2020 was \$6,951 compared to an operating income of \$22,000 for the same period in 2019.

Strikewell received notification from its facility operator that the operator will be reopening the facility and therefore, Strikewell resumed production effective August 4, 2020.

On August 6, 2020, the Company held its annual general meeting and all resolutions placed before the shareholders were voted in favour. For additional information, please refer to the Company's Information Circular filed on SEDAR and available for review at www.sedar.com.

On September 30, 2020, the Company entered into an Assignment of Debt with Mr. Hislop (the "Assignment"). As of September 30, 2020, Summus is indebted to Strikewell in the aggregate amount of \$174,434 (the "Summus Indebtedness") and Strikewell is indebted to Mr. Hislop in the aggregate amount of approximately \$12,923,423 (the "Strikewell Indebtedness"). Pursuant to the Assignment, the Company assigned the entire amount of the Summus Indebtedness in the amount of \$174,434 to Mr. Hislop, payable by way of a debt reduction of the Strikewell Indebtedness in the amount of \$174,434. The transaction is subject to the approval of the TSX Venture Exchange.

Summary of Quarterly Results

The following table presents selected unaudited interim consolidated financial information for the last eight quarters:

(C\$)	2020		2019				2018	
Period Ended	Q3	Q2	Q1	Q4	Q3	Q2	Q1	Q4
Total Gross Revenues	101,029	20,072	153,120	180,592	137,429	161,649	165,923	104,214
Net Loss	(521,293)	(590,994)	(361,829)	(486,298)	(518,552)	(577,739)	(545,490)	(669,069)
Basic and Diluted Loss per Share	(0.06)	(0.07)	(0.04)	(0.06)	(0.06)	(0.07)	(0.06)	(0.07)

Our revenue performance and the income we realize varies from period to period in relation to the number of wells we have in production, our production volumes and the prices we receive for our commodities from time to time. We have not developed any new wells during the financial periods presented.

Liquidity and Capital Resources

Cash at September 30, 2020 was \$112,791 compared to \$127,152 at September 30, 2019. As of September 30, 2020, we had a net working capital deficiency of \$5,161,101 compared to \$2,981,590 at September 30, 2019.

As at September 30, 2020, we had no long-term capital expenditure commitments. Our long-term liabilities are our loans and notes payable described below, and a decommissioning liability.

The Company and Mr. Hislop have a loan agreement with a principal balance of \$865,924, secured by the assets of the Company. This loan had an interest rate of 10% per annum payable semi-annually and matured on June 1, 2019. At the inception of the loan, the loan was revalued using an estimated effective interest rate of 30% based on comparable market interest rates and a gain of \$971,118 was recorded in contributed surplus to reflect the benefit having been received from a party in their capacity as an equity holder. This promissory note was renewed on June 1, 2019 with a revised maturity date of June 1, 2026 and an increased interest rate of 15%. All other terms of the loan remain the same. Included in accounts payable and accrued liabilities is accrued interest of \$1,243,900 as at September 30, 2020 (December 31, 2019 - \$1,146,483).

On February 1, 2013, the Company entered into a promissory note with Caravel Management Corp. ("Caravel") for an amount up to \$200,000, which bears interest calculated quarterly at a rate of 15% per annum and matured on January 31, 2018 (the "Caravel Promissory Note"). On January 31, 2018, the Company entered into an amended promissory note with Caravel which was effective February 1, 2018, extending the term of the loan to January 31, 2025. All other terms of the loan remain unchanged. On January 31, 2018, the loan was revalued to account for current comparable market interest rates, and as a result, the effective interest rate was determined to be 18% per

annum and a gain of \$4,833 was deemed to have been received upon the extension of the due date of the loan. This gain was recorded in contributed surplus to reflect the benefit of having been received from a related party. As of September 30, 2020, the Company owes Caravel the principal sum of \$46,500. Included in accounts payable and accrued liabilities is accrued interest of \$53,068 as at September 30, 2020 (December 31, 2019 - \$47,837).

On January 1, 2014, a promissory note between the Company and Mr. Hislop was renewed in the amount of \$4,018,636 (the "New Vendor Note").

On January 1, 2014, a second promissory note between the Company and Caravel was renewed in the amount of \$2,174,584 (the "New Second Note").

The New Vendor Note and the New Second Note were due for repayment on December 31, 2018 and bore interest calculated quarterly at a rate of 15% per annum. Both notes were renewed on January 1, 2019. Additional details regarding the renewed notes are described above on page 4 under the heading "Discussion of Operations".

Included in accounts payable and accrued liabilities is accrued interest of \$2,846,125 as at September 30, 2020 (December 31, 2019 - \$1,625,717).

On August 25, 2015, the Company entered into a promissory note with Mr. Hislop for \$75,000, which bears interest calculated quarterly at a rate of 15% per annum and matures on August 25, 2022. At the inception of the loan, the loan was revalued using an estimated effective interest rate of 30% per annum and a gain of \$34,442 was recorded in contributed surplus to reflect the benefit having been received from a party in their capacity as an equity holder. As of September 30, 2020, the Company owes Mr. Hislop the principal sum of \$75,000. Included in accounts payable and accrued liabilities is accrued interest of \$57,822 as at September 30, 2020 (December 31, 2019 - \$49,315).

On October 9, 2015, the Company closed the agreement of purchase and sale dated June 30, 2015 between Strikewell Capital and Mr. Hislop (the "Agreement"). Pursuant to the Agreement, Strikewell Capital purchased an 80% working interest in the Garrington Property, encompassing an area of 640 acres with one producing Pekisko oil well, the Garrington 06-06-035-02W5 for a purchase price of \$1,000,000 (the "Purchase Price"). The Agreement has an effective date of July 1, 2015. The Purchase Price was paid and satisfied at the closing of the transaction, by way of issuance by Strikewell Capital to Mr. Hislop, a promissory note in the amount of \$1,000,000 (the "Promissory Note"). The Promissory Note is due on June 30, 2022 and bears interest at a rate of 15% per annum. Strikewell Capital may prepay the Promissory Note without penalty. Following the completion of the transaction, Strikewell Capital now owns a 90% working interest in the Garrington Property. Mr. Hislop owns 4,230,769 common shares of the Company, representing 49.04% of the issued and outstanding common shares of the Company. In addition, Mr. Hislop is a brother of Mr. David Hislop, President, Chief Executive Officer and director of the Company. Mr. David Hislop informed the other directors of the Company that he has no material interest in the Agreement, or the transaction contemplated under the Agreement. At the inception of the loan, the loan was revalued using an estimated effective interest rate of 30% per annum and a gain of \$434,002 was recorded in contributed surplus to reflect the benefit having been received from a party in their capacity as an equity holder. As of September 30, 2020, the Company owes Mr. Hislop the principal sum of \$1,000,000. Included in accounts payable and accrued liabilities is accrued interest of \$788,116 as at September 30, 2020 (December 31, 2019 - \$675,616).

The Company has incurred a net loss of \$1,474,117 (2019 - \$1,641,781), is currently unable to self-finance operations, has a working capital deficiency of \$5,161,101 (December 31, 2019 - \$3,431,705), an accumulated deficit of \$38,058,192 (December 31, 2019 - \$36,458,886), limited resources, no significant source of operating cash flow and no assurances that sufficient funding will be available to conduct further exploration and development of its petroleum and natural gas interests. The Company will require additional equity and/or debt financing to meet its administrative overhead costs, and to continue exploration work on its petroleum and natural gas

interests in 2020. The application of the going concern concept is dependent upon the Company's ability to generate future profitable operations, raise additional capital through debt and/or equity financing and its debtors' continued forbearance on the Company's outstanding debt. Management is actively seeking to raise the necessary capital to meet its funding requirements and has undertaken available cost cutting measures. There can be no assurance that management's plan will be successful.

The outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures that includes the implementation of travel bans, self-imposed quarantine periods and physical distancing. This created a dramatic slowdown in the global economy and global energy consumption has been materially impacted resulting in lower oil and natural gas prices throughout globe, including Canada. Oil and natural gas prices have been further impacted through increased global supply as a result of the collapse in the OPEC+ negotiations to curtail production from two of the world's largest energy producers: Saudi Arabia and Russia. As a result of unprecedented energy prices, many energy companies have shut in their production until better commodity prices can be realized. On April 30, 2020, the facility operator, which the Company uses to send its associated gas, shut the facility in along with its production in the surrounding area. The Company was not able to transfer its associate gas production to any other facility due to a dearth of pipeline infrastructure in the area. Therefore, effective April 30, 2020, the Company was forced to shut its production until the facility was online again. The Company received notification from its facility operator that the operator was reopening the facility and therefore, Strikewell resumed its production effective August 4, 2020.

Due to the shut-in during part of the second and third quarters, we had reduced monthly cash inflows from the sale of our produced oil and gas products. Our objective is to meet our operating and capital requirements by a combination of cash flow from future well production, and re-investment of current capital. Production volumes and the market price that we realize for the oil and gas we produce and sell, determine our revenue from operations and consequently our ability to generate capital from operations is substantially dependent on the price of oil and natural gas. Future cash flows and the continued availability of capital from operations are subject to a number of uncertainties, such as production rates, the price of oil and gas, and the results of our drilling programs.

We have no assurance that additional funding will be available for the exploration and development of future projects. There can be no assurance that we will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in delays or indefinite postponement of further exploration and development of any projects with the possible loss of such properties. There can be no assurance that we will be able to engage in such financings in light of factors such as the market demand for our securities, the state of financial markets generally and other relevant factors. If such a method of financing is employed by our Company, it will result in increased dilution to the existing shareholders each time a financing involving equity is conducted.

Off-Balance Sheet and Other Financial Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

We do not have any commitments under oil and gas forward sales contracts or other types of hedging arrangements which might expose us to commodity price or production volume risks.

Transactions between Related Parties

For the nine-month period ended September 30, 2020, the Company paid \$14,600 (2019 - \$13,500) to directors and officers of our Company for their services. Mr. Scott Hislop, Chief Financial Officer,

received \$4,500. Mr. Alistair Palmer and Mr. Peter Bryant, Directors, each received \$4,500 for their services for the nine-month period ended September 30, 2020 and 2019. Also, Mr. Les Tipton, Director for ZNX received \$1,100 for his services.

On November 1, 2011, the Company entered into a Revised Management Services Agreement ("Revised MSA") with Caravel, a private management company wholly owned by Mr. Hislop, a shareholder and debt holder of the Company. Pursuant to the Revised MSA, a monthly administrative fee of \$5,000 plus any out of pocket expenses and specialized management expenses incurred shall be paid to the management company. During the nine-month period ended September 30, 2020, a total of \$45,000 (2019 - \$45,000) has been paid or accrued to Caravel for administration fees.

On June 1, 2019, the Company entered into an amended loan agreement with Mr. Hislop. This loan has a principal balance of \$865,924, is secured by the assets of the Company and bears interest at 15% per annum payable semi-annually. The loan is described in detail on page 6 under the heading "Liquidity and Capital Resources".

On February 1, 2013, the Company entered into the Caravel Promissory Note for an amount up to \$200,000, which bears interest calculated quarterly at a rate of 15% per annum for a period of five years. On January 31, 2018, the Company entered into an amended promissory note with Caravel which was effective February 1, 2018, extending the term of the loan to January 31, 2025. All other terms of the loan remain unchanged. On January 31, 2018, the loan was revalued to account for current comparable market interest rates, and as a result, the effective interest rate was determined to be 18% per annum and a gain of \$4,833 was deemed to have been received upon the extension of the due date of the loan. This gain was recorded in contributed surplus to reflect the benefit of having been received from a related party. According to the Caravel Promissory Note, as of September 30, 2020, the Company owes Caravel the principal sum of \$46,500 and \$53,068 in accrued interest.

On January 1, 2014, a promissory note between the Company and Mr. Hislop was renewed for the amount of \$4,018,636 (the "New Vendor Note").

On January 1, 2014, a second promissory note between the Company and Caravel was renewed for the amount of \$2,174,584 (the "New Second Note").

The New Vendor Note and the New Second Note were due for repayment on December 31, 2018 and bore interest calculated quarterly at a rate of 15% per year. The notes payable balance consisted of two notes arising from the purchase consideration for the acquisition of Strikewell Capital and the restructuring of certain accounts payable and loans payable of the Company. Both notes were renewed on January 1, 2019. Additional details regarding the notes payable are described above on page 4 under the heading "Discussion of Operations".

On August 25, 2015, the Company entered into a promissory note with Mr. Hislop for \$75,000, which bears interest calculated quarterly at a rate of 15% per annum for a period of seven years. As of September 30, 2020, the Company owes Mr. Hislop the principal sum of \$75,000 and \$57,822 in accrued interest. The loan is described in detail on page 7 under the heading "Liquidity and Capital Resources".

On October 9, 2015, the Company closed the agreement of purchase and sale dated June 30, 2015 between Strikewell Capital and Mr. Hislop. The Purchase Price was paid by way of issuance by Strikewell Capital to Mr. Hislop of a promissory note in the amount of \$1,000,000. The Promissory Note is due on June 30, 2022 and bears interest at a rate of 15% per annum. The loan is described in detail on page 7 under the heading "Liquidity and Capital Resources".

Subsequent Events

There are no subsequent events as of the date of this MD&A.

Critical Accounting Estimates

The preparation of the Interim Financial Statements in conformity with IFRS requires management to make judgements, estimates and assumptions that may affect the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Following are the accounting policies subject to such judgements and the key sources of estimation uncertainty that the Company believes could have the most significant impact on the reported results and financial position.

Reserves

The estimate of petroleum and natural gas reserves is integral to the calculation of the amount of depletion charged to the consolidated statements of comprehensive loss and is also a key determinant in assessing whether the carrying value of any of the Company's development and production assets have been impaired. Changes in reported reserves can impact asset carrying values and the decommissioning provision due to changes in expected future cash flows. The Company's reserves are evaluated and reported on by independent reserve engineers at least annually in accordance with Canadian Securities Administrators' National Instrument 51-101 *Standards of Disclosure of Oil and Gas Activities*. Reserve estimation is based on a variety of factors including engineering data, geological and geophysical data, projected future rates of production, commodity pricing and timing of future expenditures, all of which are subject to significant judgement and interpretation.

Carrying value of petroleum and natural gas interests

The Company assesses at each reporting date whether there is an indication that an asset or cash-generating unit ("CGU") may be impaired. A CGU is defined as the lowest grouping of assets that generate identifiable cash inflows that are largely independent of cash inflows of other assets or groups of assets. The allocation of assets into CGUs requires significant judgement and interpretation with respect to the way in which management monitors operations. If any indication exists that an asset or CGU may be impaired, the Company estimates the recoverable amount. The recoverable amounts of individual assets and CGUs have been determined based on the higher of value-in-use calculations and fair value less costs to sell. These calculations require the use of estimates and assumptions, such as estimates of proved plus probable reserves, future production rates, oil and natural gas prices, future costs and other relevant assumptions, all of which are subject to change.

A material adjustment to the carrying value of the Company's petroleum and natural gas interests could arise as a result of changes to these estimates and assumptions.

Decommissioning obligations

The Company's activities give rise to dismantling, decommissioning and site disturbance remediation activities. Provision is made for the estimated cost of site restoration and capitalized in the relevant asset category.

Decommissioning obligations are measured at the present value of management's best estimate of expenditure required to settle the present obligation at the consolidated statement of financial position date. Subsequent to the initial measurement, the obligation is adjusted at the end of each period to reflect the passage of time and changes in the estimated future cash flows underlying the obligation. The increase in the provision due to the passage of time is recognized as finance costs whereas increases/decreases due to changes in the estimated future cash flows are capitalized. Actual costs incurred upon settlement of the decommissioning obligations are charged against the provision to the extent the provision was established. For more information on the Company's decommissioning obligations see Note 11 of the Interim Financial Statements.

Income taxes

Related assets and liabilities are recognized for the estimated tax consequences between amounts included in the consolidated financial statements and their tax base using substantively enacted future income tax rates. Timing of future revenue streams and future capital spending changes can affect the timing of any temporary differences, and accordingly, affect the amount of the deferred tax asset or liability calculated at a point in time. These differences could materially impact earnings.

The assessment of an asset acquisition or business combination and existing working interest

Management has had to apply judgements with respect to whether the acquisition of the additional interests in the property and equipment was a business combination or an asset acquisition. Management applied a three-element process to determine whether a business or an asset was purchased, considering inputs, processes and outputs of each acquisition in order to reach a conclusion.

In instances where the Company acquired additional working interest, the Company does not re-measure the previously held interest in the assets that it already controls.

Going concern

The assessment of whether the going concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company is aware that material uncertainties related to events or conditions may cast significant doubt upon the Company's ability to continue as a going concern.

Discount rate of loans

The promissory notes are initially recognized at fair value, calculated as the net present value of the liability based upon discount rate issued by comparable issuers and accounting for at amortized cost using the effective interest rate method.

Significant Accounting Policies

The significant accounting policies used by our Company are disclosed in Note 3 of our Interim Financial Statements for the nine-month period ended September 30, 2020. There have been no significant changes to these accounting policies during the third quarter ended September 30, 2020. Please refer to the Interim Financial Statements for a description of the Company's significant accounting policies.

Changes in Accounting Policies Including Initial Adoption

Newly Adopted Accounting Pronouncements

IFRS 16 Leases

This new standard sets out the principles for the recognition, measurement, presentation and disclosure of leases for both the lessee and the lessor. The new standard introduces a single lessee accounting model that requires the recognition of all assets and liabilities arising from a lease.

The main features of the new standard are as follows:

- An entity identifies as a lease a contract that conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

- A lessee recognizes an asset representing the right to use the leased asset, and a liability for its obligation to make lease payments. Exceptions are permitted for short-term leases and leases of low-value assets.
- A lease asset is initially measured at cost, and is then depreciated similarly to property, plant and equipment. A lease liability is initially measured at the present value of the unpaid lease payments.
- A lessee presents interest expense on a lease liability separately from depreciation of a lease asset in the statement of profit or loss and other comprehensive income.
- A lessor continues to classify its leases as operating leases or finance leases, and to account for them accordingly.
- A lessor provides enhanced disclosures about its risk exposure, particularly exposure to residual-value risk.

The Company has adopted IFRS 16 on January 1, 2019. There was no significant impact on the consolidated financial statements as the Company did not have any outstanding leases in effect during the year ended December 31, 2019.

Financial Instruments and Other Instruments

Our Company is exposed in varying degrees to a number of risks arising from financial instruments. The Board of Directors has overall responsibility for the establishment and oversight of our Company's risk management framework. Management's close involvement in the operations allows for the identification of risks and variances from expectations. The Board approves and monitors the risk management process.

Please refer to Notes 4 and 5 of our Interim Financial Statements for additional details on our Financial Instruments and Other Instruments.

Risk Factors

Reliance on Operators: We are not the operator of our oil and gas properties. We depend on the operators for the timing of activities related to such properties and are largely unable to direct or control the activities of the operators. Because we are not the operators of our projects, we cannot control our potential costs. In addition, any decision about whether our properties contain commercially feasible oil and gas deposits and whether these should be brought into production will be made by the operator with little, if any, input from our Company. There is a substantial likelihood these decisions will be made without consideration of our Company and our financial position. In many cases, a decision to advance a property will require that the owners of the operating interests contribute capital. If such a decision is made at a time when we do not have capital available to satisfy a capital call, our interest in a property could be diluted or lost. If this happens, there is a substantial likelihood that our business would be adversely affected.

Exploration, Development and Production Risks: Oil and natural gas exploration involves a high degree of risk and there is no assurance that exploration expenditures will result in the discovery of oil or natural gas in commercially exploitable quantities.

Future oil and gas exploration may involve unprofitable efforts, not only from dry wells, but from wells that are productive but do not produce sufficient net revenues to return a profit after drilling, operating and other costs. Completion of a well does not assure a profit on the investment or recovery of drilling, completion and operating costs. In addition, drilling hazards or environmental damage could greatly increase the cost of operations, and various field operating conditions may adversely affect the production from successful wells. These conditions include delays in obtaining governmental approvals or consents, shut-ins of connected wells resulting from extreme weather conditions, insufficient storage or transportation capacity or other geological and mechanical conditions. While close well supervision and effective maintenance operations can contribute to maximizing production rates over time, production delays and declines from normal field operating

conditions cannot be eliminated and can be expected to adversely affect revenue and cash flow levels to varying degrees.

In addition, oil and gas operations are subject to inherent risks, including encountering unexpected formations or pressures, premature declines of reservoirs, blow-outs, sour gas releases, fires, spills, power outages, labour disruptions, inability to obtain suitable or adequate machinery, equipment or labour. Losses resulting from the occurrence of any of these risks could have a material adverse effect on future results of operations, liquidity and financial conditions.

Insurance: Our involvement in the exploration for, and development of, oil and gas properties may result in our Company becoming subject to liability for pollution, blow-outs, property damage, personal injury or other hazards. Although we may obtain insurance in accordance with industry standards to address such risks, such insurance has limitations on liability that may not be sufficient to cover the full extent of such liabilities. We are not an operator and do not carry insurance. In addition, such risks may not, in all circumstances, be insurable or, in certain circumstances, we may elect not to obtain insurance to deal with specific risks due to the high premiums associated with such insurance or other reasons. The payment of such uninsured liabilities would reduce our funds available. The occurrence of a significant event that we are not fully insured against, or the insolvency of the insurer of such event, could have a material adverse effect on our financial position, results of operations or prospects.

Prices, Markets and Marketing of Crude Oil and Natural Gas: Oil and natural gas are commodities whose prices are determined based on world demand, supply and other factors, all of which are beyond our control. World prices for oil and natural gas have fluctuated widely in recent years. Any material decline in prices could result in a reduction of net production revenue. Certain wells or other projects may become uneconomic as a result of a decline in world oil prices and natural gas prices, leading to a reduction in the volume of our oil and gas reserves. We might also elect not to produce from certain wells at lower prices. All of these factors could result in a material decrease in our future net production revenue, causing a reduction in our oil and gas acquisition and development activities.

In addition to establishing markets for our oil and natural gas, we must also successfully market our oil and natural gas to prospective buyers. The marketability and price of oil and natural gas which may be acquired or discovered by our Company will be affected by numerous factors beyond our control. We will be affected by the differential between the price paid by refiners for light quality oil and the grades of any oil we produced. Our ability to market our natural gas may depend upon our ability to acquire space on pipelines which deliver natural gas to commercial markets. We will also likely be affected by deliverability uncertainties related to the proximity of our reserves to pipelines and processing facilities and related to operational problems with such pipelines and facilities and extensive government regulations relating to price, taxes, royalties, land tenure, allowable production, the export of oil and natural gas and many other aspects of the oil and natural gas business. We have limited direct experience in the marketing of oil and natural gas.

Property Defects: Title reports are not title insurance and they do not act as a guarantee of title. Our properties may be subject to prior unregistered agreements, native land claims or transfers which have not been recorded or detected through title research or which have been asserted since the date the research was completed.

Environmental Risks: All phases of the oil and natural gas business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions, federal, provincial and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases of emissions of various substances produced in association with oil and gas operations.

Environmental legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of regulatory authorities. Compliance can require significant expenditures and non-compliance can result in the imposition of significant fines and

penalties. Environmental laws could materially increase the costs of exploration, development or production.

Reserve Replacement: Our future oil and natural gas reserves, production, and cash flows to be derived therefrom are highly dependent on our Company successfully acquiring or discovering new reserves. Without the continual addition of new reserves, any existing reserves we may have at any particular time and the production therefrom will decline over time as existing reserves are exploited. A future increase in our reserves will depend not only on our ability to develop any properties we may have from time to time, but also on our ability to select and acquire suitable producing properties or prospects. There can be no assurance that our future exploration and development efforts will result in the discovery and development of additional commercial accumulations of oil and natural gas.

Need to Manage Growth: We could experience rapid growth in production, revenues, personnel, complexity of administration and in other areas. There can be no assurance that we will be able to manage the impact that future growth could place on our administrative infrastructure, systems, and controls. If we are unable to manage future growth effectively, our business, operating results and financial condition may be materially and adversely affected.

Reliance on Key Personnel / Employees: The Company does not have any Key Personnel or Key Employees nor does the Company carry Key Person insurance.

Conflicts of Interest: Situations may arise where our directors or officers will have a duty to our Company and to another company in respect of the same subject matter. In the event of a conflict of interest, our business could be harmed in any number of ways, including the loss of an opportunity to a competitor.

Permits and Licenses: Our operations may require permits and licenses from various governmental authorities. There can be no assurance that we will be able to obtain all necessary permits and licenses. If we require a permit or license that we cannot obtain, we could be forced to scale back or curtail our activities and our business could be harmed.

Substantial Capital Requirements and Liquidity: We anticipate that we will make substantial capital expenditures for the acquisition, exploration, development and production of oil and natural gas reserves in the future. We may have limited ability to secure the capital necessary to undertake or complete these activities. There can be no assurance that debt or equity financing, or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available to our Company, that it will be on terms acceptable to us. If we cannot raise capital when we need it, our business could fail.

Availability of Drilling Equipment and Access Restrictions: Oil and natural gas exploration and development activities are dependent on the availability of drilling and related equipment in the particular areas where such activities will be conducted. Demand for such limited equipment or access restrictions may affect the availability of such equipment to our Company and may delay exploration and development activities.

Risks Relating to the Industry

The oil and gas industry is subject to extensive controls and regulations imposed by various levels of government. Outlined below are some of the more significant aspects of the legislation, regulations and agreements governing the oil and gas industry. All current legislation is a matter of public record and we are unable to predict what additional legislation or amendments may be enacted.

Potential Profitability of Oil and Gas Ventures Depends upon Factors Beyond our Control: The potential profitability of oil and gas properties is dependent upon many factors that are beyond our control. For instance, world prices and markets for oil and gas are unpredictable, highly volatile,

potentially subject to governmental fixing, pegging, controls, or any combination of these and other factors, and respond to changes in domestic, international, political, social, and economic environments. Additionally, due to worldwide economic uncertainty, the availability and cost of funds for production and other expenses have become increasingly difficult, if not impossible, to project. These changes and events may materially affect our financial performance.

A productive well may become uneconomic or unmarketable in the event water or other deleterious substances are encountered which impair or prevent the production of oil and/or gas from the well. The marketability of oil and gas that we may acquire or discover could be affected by numerous factors beyond our control. These factors include the proximity and capacity of pipelines and processing equipment, market fluctuations of prices, taxes, royalties, land tenure, allowable production, adverse weather conditions and environmental protection. The extent of these factors cannot be accurately predicted, and the combination of these factors may result in our Company not receiving an adequate return on invested capital.

Competition in the Oil and Gas Industry: We compete for reserve acquisitions, exploration leases, licenses and concessions and skilled industry personnel with other oil and gas companies, many of which have significantly greater technical, financial, and operational resources, and personnel. Our competitors include major integrated oil and natural gas companies and numerous other independent oil and natural gas companies and individual producers and operators.

The oil and gas industry is highly competitive. Our competitors for the acquisition, exploration, production and development of oil and natural gas properties, and for capital to finance such activities, include companies that have greater financial and personnel resources available to them than our Company.

Certain of our natural gas customers and potential customers may themselves be exploring for oil and natural gas, and the results of these exploration efforts could affect our ability to sell or supply oil and gas to these customers in the future. Our ability to successfully bid on and acquire additional property rights, to discover reserves, to participate in drilling opportunities and to identify and enter into commercial arrangements with customers will be dependent upon developing and maintaining close working relationships with our industry partners and joint operators and our ability to select and evaluate suitable properties and to consummate transactions in a highly competitive environment.

Fluctuating Price and Demand: The marketability of natural resources that we may acquire or discover may be affected by numerous factors beyond our control. These factors include market fluctuations in oil and gas pricing and demand, the proximity and capacity of natural resource markets and processing equipment, governmental regulations, land tenure, land use, regulation concerning the importing and exporting of oil and natural gas and environmental protection regulations. The impact of these factors cannot be accurately predicted, but the combination of these factors could have an adverse impact on our business.

Government Regulation / Administrative Practice: There is no assurance that the laws, regulations, policies or current administrative practices of any government body, organization or regulatory agency in Canada or any other applicable jurisdiction will not be changed, applied or interpreted in a manner which will fundamentally alter our ability to develop, operate, export or market our products. The actions, policies or regulations, or changes thereto, of any government body or regulatory agency, or other special interest groups, may have a detrimental effect on our Company. Any or all of these situations may have a negative impact on our ability to operate and make a profit.

Uncertainty of Estimates of Reserves

Under applicable regulatory requirements, we will be required to identify and disclose any proved oil and gas reserves, estimated quantities of crude oil, natural gas and natural gas liquids. This geological and engineering data demonstrates with reasonable certainty the estimated quantities

of crude oil, natural gas and natural gas liquids, which will be recoverable in future years from known reservoirs under existing economic and operating conditions. However, the process of estimating oil and gas reserves is complex, requiring significant decisions and assumptions in the evaluation of available geological, geophysical, engineering and economic data for each reservoir, and as a result, such estimates are inherently imprecise. Actual future production, oil and gas prices, revenues, taxes, development expenditures, operating expenses and quantities of recoverable oil and gas reserves may vary substantially from our estimations from year to year. Any significant variance in the assumptions could materially affect the estimated quantities and present values of reserves. For example, a material drop in oil and gas prices, or a material increase in applicable taxes, will require management to reassess whether known reservoirs can continue to be reasonably judged as economically productive from one year to the next. In addition, the reserves may be subject to downward or upward revisions based upon production history, results of future exploration and development, prevailing oil and gas prices and other factors, many of which are beyond our Company's control. Actual production, revenues, taxes, development expenditures and operating expenses with respect to the reserves will likely vary from the estimates presented herein, and such variances may be material.

Declining Reserves

In general, production rates from oil and gas properties decline as reserves are depleted. The decline rates depend on reservoir characteristics and vary from steep declines to the relatively slow declines characteristic of long-lived fields in other regions. Should one or more of the above risks materialize or should our underlying assumptions prove incorrect, our actual results may materially differ from our current expectations. Therefore, in evaluating forward-looking statements, readers should specifically consider the various factors that could cause our actual results to materially differ from such forward-looking statements.

Reserves Data and Other Oil and Gas Information

Our independently prepared reserves assessment and evaluation of our oil and gas properties effective December 31, 2019 have been prepared in accordance with mandated National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities of Canadian Securities Administrators. A summary of our reports is available on SEDAR at www.sedar.com.

Outstanding Share Data

Our common shares are listed for trading on the TSXV under the symbol "SKK". We are classified as a Tier 2 issuer on the TSXV.

We had the following securities outstanding as at September 30, 2020 and as of the date of this MD&A:

Class of Shares	Par Value	Number Authorized	Number Issued
Common	Nil	Unlimited	8,626,862
Class A Preference	Nil	Unlimited	Nil

As of September 30, 2020, and as of the date of this MD&A, there are no options, warrants or convertible securities outstanding and no common shares held in escrow.

Additional Information

Additional information relating to our Company is available on SEDAR at www.sedar.com. We also maintain a website at www.strikewellenergy.com.
