NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS – Page 1

FOR THE NINE MONTHS ENDED AUGUST 31, 2018 AND 2017

(Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

RT Minerals Corp. (the “Company”) was incorporated under the Business Corporations Act of British Columbia on March 9, 2007. The Company’s business activity is the exploration and evaluation of mineral properties in Canada. The Company is listed on the TSX Venture Exchange (“TSXV”), having the symbol RTM-V, as a Tier 2 mining issuer.

The address of the Company’s corporate office and principal place of business is 300 - 555 West Georgia Street, Vancouver, British Columbia, Canada.

The Company has not generated revenue from operations since inception. The Company has accumulated losses of \$13,044,554 since inception and expects to incur further losses in the development of its business, all of which may cast significant doubt about the Company’s ability to continue as a going concern. The Company’s ability to continue as a going concern is dependent upon its ability to raise financing and generate future profitable operations. As the Company is in the exploration stage, the recoverability of costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties. The Company will periodically have to raise funds to continue operations, and although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

2. BASIS OF PREPARATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These condensed interim consolidated financial statements for the nine month period ended August 31, 2018 have been prepared in accordance with IAS 34 Interim Financial Reporting. They do not include all disclosures that would otherwise be required in a complete set of financial statements and should be read in conjunction with the Company’s 2017 annual financial statements which have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

The condensed interim consolidated financial statements have been prepared using accounting policies consistent with those used in the Company’s 2017 annual financial statements except for new standards, interpretations and amendments mandatorily effective for the first time from January 1, 2017. Note 2c) sets out the impact of new standards, interpretations and amendments that have had a material effect on the financial statements.

The condensed interim financial statements were authorized for issue by the Board of Directors on October 24, 2018.

The preparation of condensed interim consolidated financial statements in compliance with IAS 34 requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company’s accounting policies. The areas where significant judgments and estimates have been made in preparing the financial statements and their effect are disclosed in Note 3.

2. BASIS OF PREPARATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

a) Basis of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, RT Minerals Corp (Guyana) Inc. (“RTMG”). RTMG was incorporated in Guyana. Inter-company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated on consolidation.

b) Foreign Currency Translation

The presentation currency and functional currency of the Company and its Guyana subsidiary is the Canadian dollar as this is the principal currency of the economic environment in which they operate. The Company’s Guyana subsidiary is financially and operationally dependent on the Company. The Company translates transactions in foreign currencies into Canadian dollars at the rates of exchange prevailing at the dates of the transactions. Monetary assets and liabilities are translated at the exchange rates in effect at the consolidated statement of financial position date. Non-monetary assets and liabilities are translated at historical rates. The resulting exchange gains or losses are recognized in comprehensive loss.

c) New Accounting Standards, Interpretations and Amendments to Existing Standards

A number of new standards, and amendments to standards and interpretations, are not yet effective for the year ended November 30, 2018, and have not been applied in preparing the consolidated financial statements.

The following new standards, amendments and interpretations have not been early adopted in these consolidated financial statements and are not expected to have a material effect on the Company’s future results and financial position:

Accounting standards effective for annual periods beginning on or after January 1, 2018

IFRS 15 *Revenue from Contracts with Customers* – In May 2014, the IASB issued IFRS 15 – Revenue from Contracts with Customers (“IFRS 15”) which supersedes IAS 11 – Construction Contracts, IAS 18 – Revenue, IFRIC 13 – Customer Loyalty Programmes, IFRIC 15 – Agreements for the Construction of Real Estate, IFRIC 18 – Transfers of Assets from Customers, and SIC 31 – Revenue – Barter Transactions Involving Advertising Services. IFRS 15 establishes a comprehensive five-step framework for the timing and measurement of revenue recognition.

IFRS 9 *Financial Instruments* – In November 2009, as part of the IASB project to replace IAS 39 *Financial Instruments: Recognition and Measurement*, the IASB issued the first phase of IFRS 9 that introduces new requirements for the classification and measurement of financial assets. The standard was revised in October 2010 to include requirements regarding classification and measurement of financial liabilities. In November 2013, new general hedge requirements were added to the standard. In July 2014, the final version of IFRS 9 was issued and adds a new expected loss impairment model and amends the classification and measurement model for financial assets by adding a new fair value through other comprehensive income category for certain debt instruments and additional guidance on how to apply the business model and contractual cash flow characteristics.

The Company is not exposed to significant interest rate risk as the Company has no fluctuating interest bearing debt. The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in gold and metal prices.
