

**KERMODE RESOURCES LTD.**

**FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

**FOR THE YEAR ENDED OCTOBER 31, 2017**

## INDEPENDENT AUDITORS' REPORT

To the Shareholders of  
Kermode Resources Ltd.

We have audited the accompanying financial statements of Kermode Resources Ltd., which comprise the statements of financial position as at October 31, 2017 and 2016 and the statements of income (loss) and comprehensive income (loss), cash flows and changes in equity (deficiency) for the years then ended, and a summary of significant accounting policies and other explanatory information.

### *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditors' Responsibility*

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

*Opinion*

In our opinion, these financial statements present fairly, in all material respects, the financial position of Kermode Resources Ltd. as at October 31, 2017 and 2016 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

*Emphasis of Matter*

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which describes conditions and matters that indicate the existence of a material uncertainty that may cast significant doubt about the ability of Kermode Resources Ltd. to continue as a going concern.

**KERMODE RESOURCES LTD.**  
NOTES TO THE FINANCIAL STATEMENTS  
(Expressed in Canadian Dollars)  
FOR THE YEAR ENDED OCTOBER 31, 2017

---

**1. NATURE AND CONTINUANCE OF OPERATIONS**

Kermode Resources Ltd. (the "Company") was incorporated under the laws of the Province of Alberta and was subsequently continued into British Columbia. The Company has one reportable segment consisting of the acquisition and exploration of minerals property interests in Canada. The Company has not yet determined whether its exploration and evaluation assets contain economic ore reserves.

The Company's registered and records office is 2900-595 Burrard Street, Vancouver, British Columbia, Canada.

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred ongoing losses. A number of alternatives including, but not limited to completing a financing, are being evaluated with the objective of funding ongoing activities and obtaining additional working capital. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due. These material uncertainties may cast significant doubt about the Company's ability to continue as a going concern.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

**2. BASIS OF PREPARATION**

**Statement of Compliance**

These financial statements, including comparatives have been prepared using accounting policies consistent with IFRS as issued by the International Accounting Standards Board ("IASB") and Interpretation issued by the International Financial Reporting Interpretations Committee ("IFRIC"). The financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit and loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information.

**Critical accounting estimates**

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the year. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

**KERMODE RESOURCES LTD.**  
NOTES TO THE FINANCIAL STATEMENTS  
(Expressed in Canadian Dollars)  
FOR THE YEAR ENDED OCTOBER 31, 2017

---

**2. BASIS OF PREPARATION (cont'd...)**

**Critical accounting estimates (cont'd...)**

- i) The carrying value and the recoverability of exploration and evaluation assets, which are included in the statements of financial position. The cost model is utilized and the value of the exploration and evaluation assets is based on the expenditures incurred. At every reporting period, management assesses the potential impairment which involves assessing whether or not facts or circumstances exist that suggest the carrying amount exceeds the recoverable amount.
- ii) The recognition of deferred tax assets. The Company considers whether the realization of deferred tax assets is probable in determining whether or not to recognize these deferred tax assets.
- iii) The reversal of impairment of exploration and evaluation assets includes an assessment of the fair value of the Jackson's Arm project based upon the subsequent sale price of the project. The Company reversed prior impairments to the amount received subsequent.

**3. SIGNIFICANT ACCOUNTING POLICIES**

**Financial instruments**

Financial assets

The Company classifies its financial assets into one of the following categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

*Fair value through profit or loss* - This category comprises derivatives, or assets acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statement of comprehensive income (loss).

*Loans and receivables* - These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at cost less any provision for impairment.

Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default.

*Held-to-maturity investments* - These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized in the statement of comprehensive income (loss).

**KERMODE RESOURCES LTD.**  
NOTES TO THE FINANCIAL STATEMENTS  
(Expressed in Canadian Dollars)  
FOR THE YEAR ENDED OCTOBER 31, 2017

---

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**

**Financial instruments (cont'd...)**

Financial assets (cont'd...)

*Available-for-sale* - Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in equity. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from equity and recognized in the statement of comprehensive income (loss).

All financial assets except for those at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described above.

Financial liabilities

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

*Fair value through profit or loss* - This category comprises derivatives, or liabilities acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statement of comprehensive income (loss).

*Other financial liabilities*: This category includes promissory notes, amounts due to related parties and accounts payables and accrued liabilities, all of which are recognized at amortized cost.

The Company has classified its cash as fair value through profit and loss and receivables and advances receivable as loans and receivables. The Company's accounts payable and advances payable are classified as other financial liabilities.

Financial instruments measured at fair value are classified into one of the three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

See Note 10 for relevant disclosures.

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**

**Exploration and evaluation assets**

Exploration and evaluation assets include the costs of acquiring licenses, costs associated with exploration and evaluation activity, and the fair value (at acquisition date) of exploration and evaluation assets acquired in a business combination. All costs related to the acquisition, exploration and development of mineral properties are capitalized by property as an intangible asset. Costs incurred before the Company has obtained the legal rights to explore an area are recognized in profit or loss.

Exploration and evaluation assets are assessed for impairment if (i) sufficient data exists to determine technical feasibility and commercial viability and (ii) facts and circumstances suggest that the carrying amount exceeds the recoverable amount. Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified to mining property and development assets within property, plant and equipment.

Recoverability of the carrying amount of the exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

**Impairment**

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

**KERMODE RESOURCES LTD.**  
NOTES TO THE FINANCIAL STATEMENTS  
(Expressed in Canadian Dollars)  
FOR THE YEAR ENDED OCTOBER 31, 2017

---

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**

**Provisions**

*a) Environmental rehabilitation provisions*

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations, including those associated with the reclamation of exploration and evaluation assets and equipment, when those obligations result from the acquisition, construction, development or normal operation of the assets. Initially, a liability for an environmental rehabilitation obligation is recognized at its fair value in the period in which it is incurred if a reasonable estimate of cost can be made. The Company records the present value of estimated future cash flows associated with reclamation as a liability when the liability is incurred and increases the carrying value of the related assets for that amount. Subsequently, these capitalized asset retirement costs are amortized over the life of the related assets. At the end of each period, the liability is increased to reflect the passage of time (accretion expense) and changes in the estimated future cash flows underlying any initial estimates (additional rehabilitation costs). The Company recognizes its environmental liability on a site-by-site basis when it can be reliably estimated.

Environmental expenditures related to existing conditions resulting from past or current operations and from which no current or future benefit is discernible are charged to profit or loss. The Company had no rehabilitation obligations as at October 31, 2017 and October 31, 2016.

*b) Other provisions*

Provisions are recognized when the Company has a present obligation (legal or constructive) that has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the obligation. An amount equivalent to the discounted provision is capitalized within tangible fixed assets and is amortized over the useful lives of the related assets. The increase in the provision due to passage of time is recognized as interest expense.

**Income (loss) per share**

Basic income (loss) per share is computed by dividing net loss attributable to common shareholders by the weighted average number of shares outstanding during the year. Diluted income (loss) per share is computed similar to basic income (loss) per share except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting periods.

**KERMODE RESOURCES LTD.**  
NOTES TO THE FINANCIAL STATEMENTS  
(Expressed in Canadian Dollars)  
FOR THE YEAR ENDED OCTOBER 31, 2017

---

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**

**Share-based payments**

The Company grants stock options and compensatory warrants to acquire common shares of the Company to directors, officers, employees and consultants. An individual is classified as an employee when the individual is an employee for legal or tax purposes, or provides services similar to those performed by an employee.

The fair value of stock options is measured on the date of grant, using the Black-Scholes option pricing model, and is recognized over the vesting period. Consideration paid for the shares on the exercise of stock options is credited to share capital.

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

If and when the stock options are exercised, the applicable amounts of reserves are transferred to share capital. When vested options are forfeited or not exercised at the expiry date the amount previously recognized in share-based payments is transferred from reserves to deficit.

**Income taxes**

Income tax expense comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity. Current tax expense is the expected tax payable on taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recorded using the liability method, providing for temporary differences, between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Temporary differences are not provided for relating to goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting or taxable loss, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the statement of financial position date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, it does not recognize that excess.

**Flow-through shares**

Canadian Income Tax legislation permits an enterprise to issue securities referred to as flow-through shares, whereby the investor can claim the tax deductions arising from the renunciation of the related resource expenditures. The Company accounts for flow through shares whereby the premium paid for the flow through shares in excess of the market value of the shares without flow through features at the time of issue is credit to other liabilities and included income at the same time the qualifying expenditures are made.

**KERMODE RESOURCES LTD.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
(Expressed in Canadian Dollars)  
**FOR THE YEAR ENDED OCTOBER 31, 2017**

---

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**

**New standards yet adopted**

The following new standards, amendments to standards and interpretations have been issued but are not effective during the year ended October 31, 2017:

- IFRS 9                      New financial instruments standard that replaces IAS 39 for classification and measurement of financial assets<sup>(i)</sup>
- IFRS 15                    New revenue standard that establishes a single five-step model framework for determining the nature, amount, timing and uncertainty of revenue and cash flows arising from a contract with a customer<sup>(i)</sup>
- IFRS 16                    New leases standard was issued in January 2016 with the objective to recognize all leases on the statement of financial position. IFRS 16 requires lessees to recognize a “right of use” asset and a lease liability calculated using a prescribed methodology. The Company is currently evaluating the effect the standard will have on its financial statements<sup>(ii)</sup>

(i)        Effective for annual periods beginning on or after January 1, 2018

(ii)       Effective for annual periods beginning on or after January 1, 2019

The Company anticipates that the application of these standards, amendments and interpretations will not have a material impact on the results and financial position of the Company.

**4. ADVANCES**

	October 31, 2017	October 31, 2016
<b>Balance, beginning of year</b>	\$ 6,307	\$ 50,814
Advances (received) paid	(28,743)	8,290
Repayments and expenses incurred on behalf of the Company	<u>(6,307)</u>	<u>(52,797)</u>
<b>Balance, end of year</b>	<u>\$ (28,743)</u>	<u>\$ 6,307</u>

The Company advances funds to a management company, owned by a spouse of a director, by way of a loan agreement. The management company incurs administration expenditures and settles certain exploration expenditures on behalf of the Company. The maximum amount extendible under the loan is \$250,000 and the balance is non-interest bearing. The Company treats these transactions as advances between the Company and management company.

**KERMODE RESOURCES LTD.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
(Expressed in Canadian Dollars)  
**FOR THE YEAR ENDED OCTOBER 31, 2017**

**5. EXPLORATION AND EVALUATION ASSETS**

	Jackson's Arm	Eastgate Gold
<b>Acquisition costs:</b>		
Balance, at October 31, 2015	\$ -	\$ 300,500
Write down	-	(300,500)
<b>Balance, at October 31, 2016</b>	<b>\$ -</b>	<b>\$ -</b>
Reversal of impairment	551,000	-
<b>Balance, at October 31, 2017</b>	<b>\$ 551,000</b>	<b>-</b>

**Title to mineral properties**

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties are in good standing.

**Eastgate Gold**

The Company entered into a Mineral Property Option and Joint Venture Agreement with Blue Ridge Gold LLC, (a private Nevada company)("Blue Ridge"). The Eastgate Gold property is comprised of mineral claims located northeast of the Rawhide Mine, and east of Fallon in Churchill, County, Nevada. The Company may acquire up to a 100% interest in the property. As at October 31, 2014, the Company held a 30% interest pursuant to the terms of the agreement.

Blue Ridge will retain a 3% NSR royalty, which the Company can buy down to 2% for \$1,000,000.

During the year ended October 31, 2015, the Company entered into an agreement to sell part of its interest in its Nevada Eastgate gold project to Eros Resources Corp. ("Eros").

Under the terms of the agreement, Eros purchased one-half of the Company's 30% interest in the property for \$300,500 (US\$250,000) and has the right to participate with the Company in the underlying agreement that the Company has with Blue Ridge.

The Company received \$300,500 (USD\$250,000) during the year ended October 31, 2015 for the sale of the initial 15% interest in the property. Consequently the Company's remaining 15% interest was written down to \$300,500 during the year ended October 31, 2015. Due to delay in exploration work, the property has been written off during the year ended October 31, 2016.

The following payments are required to earn further 15% incremental interests:

- \$200,000 by May 15, 2015 for an aggregate 45% interest (paid by Eros)
- \$200,000 by May 15, 2016 for an aggregate 60% interest (paid by Eros)

Once the Company and Eros have earned a joint 75% interest, Blue Ridge shall elect to either (a) enter into a joint venture with the Company and maintain a 25% interest in the Property; or (b) grant the Company the option to acquire the remaining 25% interest in the property through the payment of \$200,000 or 200,000 shares of the Company (at Blue Ridge's election) for each additional 5% interest, exercisable over 5 years.

**KERMODE RESOURCES LTD.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
(Expressed in Canadian Dollars)  
**FOR THE YEAR ENDED OCTOBER 31, 2017**

---

**5. EXPLORATION AND EVALUATION ASSETS (cont'd...)**

**Eastgate Gold (cont'd...)**

Either the Company or Eros may elect not to complete its share of the purchases and the other party may complete the purchases entirely for its own account or may also elect not to complete its share in which case they will enter into a joint venture and joint venture agreement with each other and Blue Ridge pursuant to and as contemplated by the Blue Ridge agreement.

As of October 31, 2017 the Company elected to enter into a joint venture with Blue Ridge with Eros holding a 45% interest, the Company holds a 15% interest and Blue Ridge holds the remaining 40% interest in the Property subject to the Blue Ridge agreement with the Company.

**Jackson's Arm, Newfoundland**

The Company holds a 100% interest in certain mineral claims, located in Newfoundland. Subsequent to October 31, 2017, the Company sold its 100% (Note 11) resulting in a reversal of previous impairments to reflect the fair value received upon sale of \$551,000. This reversal is reflected in the statements of the income (loss).

**6. RELATED PARTY TRANSACTIONS**

During the year ended October 31, 2017, the Company entered into the following transactions with related parties not disclosed elsewhere in the financial statements:

- a) Paid or accrued \$25,200 (2016 - \$Nil) for professional fees to an officer of the Company,
- b) Paid or accrued \$25,200 (2016 - \$Nil) for consulting included in office and sundry to an officer of the Company.

The balance receivable as at October 31, 2017 is \$Nil (October 31, 2016 - \$6,307) from a company owned by a spouse of a director (Note 4). The balance payable as at October 31, 2017 is \$28,743 (October 31, 2016 - \$Nil) from a company owned by a spouse of a director (Note 4).

The key management personnel of the Company are the Directors, Chief Executive Officer, and the Chief Financial Officer. Compensation of the Company's key management personnel is comprised of the following:

	October 31, 2017	October 31, 2016
Professional Fees	\$ 25,200	\$ -
<b>Total Expense</b>	<b>\$ 25,200</b>	<b>\$ -</b>

**7. SHARE CAPITAL AND RESERVES**

**Authorized share capital**

As at October 31, 2017 and 2016, the authorized share capital of the Company is an unlimited number of common shares without par value. All issued shares, consisting only of common shares are fully paid.

**Issued share capital**

As at October 31, 2017 and 2016, the Company had 65,397,373 common shares issued and outstanding.

**Private placements**

There were no private placements completed during the year ended October 31, 2017 and October 31, 2016.

**Stock options**

During the year ended October 31, 2010, the Company adopted a 10% rolling stock option plan whereby the Company can reserve approximately 10% of its outstanding shares for issuance to officers and directors, employees and consultants. Under the plan, the exercise price of each option shall be equal or greater than the closing market price of the Company's stock on the day prior to the date of grant. These options are subject to approval from the TSX Venture Exchange ("TSX-V"), can be granted for a maximum term of 10 years, and vest at the discretion of the Board of Directors.

**Stock options and warrants**

Stock option and warrant transactions are summarized as follows:

	Warrants		Stock Options	
	Number	Weighted Average Exercise Price	Number	Weighted Average Exercise Price
Outstanding, October 31, 2015	-	\$ -	2,450,000	\$ 0.11
Expired	-	-	(2,450,000)	0.11
Outstanding and exercisable, October 31, 2016 and 2017	-	\$ -	-	\$ -

As at October 31, 2017, there were no incentive stock options and warrants outstanding.

**9. SUPPLEMENTAL DISCLOSURES WITH RESPECT TO CASH FLOWS**

There was no significant non-cash transaction during the year ended October 31, 2017.

Significant non-cash transactions during the year ended October 31, 2016 included the Company:

- a) reclassifying \$185,480 from reserves to deficit on the expiration of stock options.

**10. FINANCIAL AND CAPITAL RISK MANAGEMENT**

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly;  
and

Level 3 – Inputs that are not based on observable market data.

The fair value of the Company's advances receivable and payable, and accounts payable and accrued liabilities approximate their carrying values due to the short-term nature of these instruments. The Company's cash is measured at fair value using Level 1 inputs.

The Company is exposed to varying degrees to a variety of financial instrument related risks:

*Credit risk*

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to advances receivable. Management believes that historically the credit risk concentration with respect to financial instruments included in advances receivable is remote. The credit risk from the advances receivable is addressed with the security and guarantee.

FOR THE YEAR ENDED OCTOBER 31, 2017

---

**10. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd...)**

*Liquidity risk*

The Company's approach to managing liquidity risk is addressed in Note 1. As at October 31, 2017, the Company had a cash balance of \$40 (October 31, 2016 - \$132) available to settle current liabilities of \$335,447 (October 31, 2016 - \$313,062). All of the Company's financial liabilities are subject to normal trade terms.

*Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

a) Interest rate risk

The Company has cash balances held with financial institutions. The Company's current policy is to invest excess cash in short-term treasury bills issued by the Government of Canada and its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

b) Foreign currency risk

The Company does not have any balances denominated in a foreign currency and believes it has no significant foreign currency risk.

c) Price risk

The Company is exposed to price risk with respect to commodity prices. Changes in commodity prices will impact the economics of development of the Company's mineral properties. The Company closely monitors commodity prices to determine the appropriate course of action to be taken.

*Capital management*

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as shareholders' deficiency.

The property in which the Company currently has an interest is in the exploration stage; as such the Company has historically relied on the equity markets to fund its activities. Current financial markets are very difficult and there is no certainty with respect to the Company's ability to raise capital. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company currently is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.

**11. SUBSEQUENT EVENT**

On January 29, 2018, the Company announced the completion of a transaction to sell the Company's Jackson's Arm gold deposit in Newfoundland, Canada. Anaconda Mining Inc. ("ANX") acquired 100% of the Jackson's Arm gold deposit for cash and shares of ANX. ANX paid the Company total cash payments of \$50,000 (received) and 1,113,218 common shares ("Consideration Shares") (received and subsequently valued at \$501,000). The Consideration Shares are subject to a hold period which will expire on May 27, 2018 in accordance with the rules and policies of the Toronto Stock Exchange and applicable Canadian securities laws and are also subject to further transfer restriction pursuant to the terms of the transaction.
