Expressed in Canadian dollars

[Unaudited – prepared by management]

1. Nature and Continuance of Operations and Going Concern

The Company was incorporated on February 19, 2018 under the Business Corporations Act (British Columbia) under the name GSP Resource Corp. The Company's principal business activity is the exploration of mineral properties. The Company currently conducts substantially all of its operations in Canada in one business segment.

On February 23, 2018, the Company entered into an option agreement to acquire a 100% interest in 25 mineral claims located in the Similkameen Mining Division in the Province of British Columbia. (See Note 4)

The head office and principal address of the Company is located at 1610 – 777 Dunsmuir Street, Vancouver, B.C., V7Y 1K4

The Company has not yet determined whether its properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for mineral properties and exploration costs is dependent upon the existence of economically recoverable ore reserves, the ability of the Company to obtain necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposal of properties.

These financial statements have been prepared using accounting principles applicable to a going concern which assumes the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company emphasises that attention should be drawn to matters and conditions that indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern the most significant of these being the Company's ability to carry out its business objectives dependent on the Company's ability to receive continued financial support from related parties, to obtain public equity financing, or to generate profitable operations in the future. Other uncertainties include the fact that the Company is currently in the exploration stage for its interests in the Olivine Mountain property in British Columbia, Canada (see Note 3), the economic viability of which have not been fully assessed. The Company has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of capitalized costs on the Olivine Mountain property is uncertain and dependent upon projects achieving commercial production or sale. The outcome of these matters cannot be predicted at this time. The Company is considering a number of alternatives to secure additional capital including obtaining funding facilities or equity financings. Although management intends to secure additional financing there is no assurance management will be successful or that it will establish future profitable operations. These factors together raise substantial doubt about the Company's ability to continue as a going concern.

	August 31 2018	May 31 2018
Deficit	\$ (40,515)	\$ (28,272)
Working capital	\$ 157,861	\$ 231,274

If the going concern assumption was not appropriate for these financial statements then adjustments would be necessary to the carrying value of assets and liabilities, the reported expenses and the statement of financial position classifications used, and such amounts would be material.

GSP RESOURCE CORP

Notes to Condensed Interim Financial Statements

August 31, 2018

Expressed in Canadian dollars

[Unaudited – prepared by management]

2. Significant Accounting Policies

Statement of Compliance

The condensed interim financial statements have been prepared in accordance with International Financial Reporting Standard 34 – *Interim Financial Reporting*, using accounting policies consistent with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). They do not include all of the information required for full annual financial statements.

The financial statements were approved by the Board of Directors of the Company on October 25, 2018.

Basis of presentation

These financial statements have been prepared on a historical cost basis except for certain financial instruments which are measured at their fair value as explained in the accounting policies set out below. In addition, these financial statements have been prepared using the accrual basis of accounting.

The financial statements were approved by the Board of Directors of the Company on October 25, 2018.

Cash

Cash consists of cash on hand and deposits in banks with no restrictions. Cash equivalents include money market instruments that are readily convertible to cash and have maturities at the date of purchase of less than ninety days. There were no cash equivalents as at August 31, 2018.

Exploration and evaluation assets

The Company is in the exploration stage with respect to its investment in mineral interests. Accordingly, once a license to explore an area has been secured, the Company follows the practice of capitalizing all costs relating to the acquisition of, exploration for and development of exploration and evaluation assets. Such costs, include, but are not limited to, geological and geophysical studies, exploratory drilling and sampling. At such time as commercial production commences, these costs will be charged to operations on a unit-of-production method based on proven and probable resources. The aggregate costs related to abandoned exploration and evaluation assets are charged to operations at the time of any abandonment or when it has been determined that there is evidence of a permanent impairment.

Mining exploration tax credit

Mining tax credits are recorded as a reduction of the related deferred exploration expenditures upon receipts from the Canada Revenue Agency (“CRA”). These non-repayable mining credits are earned in respect to exploration costs incurred in British Columbia, Canada and are recorded as a reduction of the related exploration expenditures.

GSP RESOURCE CORP

Notes to Condensed Interim Financial Statements

August 31, 2018

Expressed in Canadian dollars

[Unaudited – prepared by management]

2. Significant Accounting Policies (cont'd...)

Asset retirement obligation

Provisions for the decommissioning, restoration and rehabilitation are recognized in other liabilities when the Company has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of capital will be required to settle the obligation and the amount can be reliably estimated. Provisions are measured at management's best estimate of the expenditure required to settle the obligation at the end of the reporting period and are discounted to present value where the effect is material. Upon initial recognition of the liability, the corresponding costs are added to the carrying amount of the related asset and amortized as an expense, using a systematic method, over the economic life of the asset. Following initial recognition of the asset retirement obligation, the carrying amount of the liability is adjusted annually for the passage of time and changes to the amount or timing of the underlying cash flows needed to settle the obligation. The Company performs evaluations to identify onerous contracts and, where applicable, records provisions for such contracts. The Company does not have any asset retirement obligation as at August 31, 2018.

Related party transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control, related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

Share capital

Common shares are classified as equity. Transaction costs directly attributable to the issue of common shares and share purchase warrants are recognized as a deduction from equity, net of any tax effects.

Flow-through shares

Flow-through shares expenditure deductions for income tax purposes related to exploratory activities funded by flow-through equity instruments are renounced to investors in accordance with income tax legislation. The proceeds from issuance are allocated between the offering of shares and the sale of tax benefits. The allocation is made based on the difference between the quoted price of the existing shares and the amount the investor pays for the shares. A flow through share premium liability is recognized for this difference, and included in deferred tax recovery at the time the qualifying expenditures are made.

A deferred tax liability equal to the tax value of flow-through expenditures renounced is recognized once the Company has fulfilled its obligations associated with the renunciation of related flow-through expenditures. In respect of a retrospective renunciation, such obligation is considered to have been fulfilled when eligible expenditures have been incurred and management establishes the intent to make renunciation filings with the appropriate taxation authorities. In respect of prospective renunciation (i.e., a look-back renunciation), the obligation is considered to be fulfilled once related flow-through expenditures have been incurred.

GSP RESOURCE CORP

Notes to Condensed Interim Financial Statements

August 31, 2018

Expressed in Canadian dollars

[Unaudited – prepared by management]

2. Significant Accounting Policies (cont'd...)

Share issuance costs

Professional, consulting, regulatory and other costs directly attributable to equity financing transactions are recorded as deferred share issue costs until the financing transactions are completed, if the completion of the transaction is considered likely; otherwise they are expensed as incurred. Share issue costs are charged to share capital when the related shares are issued. Deferred share issue costs related to financing transactions that are not completed are charged to expenses.

Share purchase warrants

The Company bifurcates units consisting of common shares and share purchase warrants using the residual value approach whereby it first measures the common share component of the unit at fair value using quoted market prices as input values and then allocates any residual amount to the warrant component of the unit. The residual value of the warrant component is credited to contributed surplus. If the proceeds from the offering are less than or equal to the estimated fair market value of shares issued, a nil carrying amount is assigned to the warrants. When warrants are exercised, the corresponding assigned value of the warrants is reclassified to share capital. Warrants that are issued as payments for agency fee or other transactions costs are accounted for as share-based payments.

Share based payments

Share based payments to directors, officers and consultants are measured at the fair value of the goods or services received, unless that fair value cannot be estimated reliably, in which case the fair value of the equity instruments issued is used. The value of the goods or services is recorded at the earlier of the vesting date, or the date the goods or services are received. The corresponding amount is recorded to the contributed surplus. The Company applies the fair value method of accounting for share-based payments and the fair value is calculated using the Black-Scholes option pricing model.

Loss per share

Basic loss per share is calculated using the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share is calculated giving effect to the potential dilution that would occur if securities or other contracts to issue common shares were exercised or converted to common shares using the treasury method. The treasury method assumes that proceeds received from the exercise of stock options and warrants are used to repurchase common shares at the prevailing market rate. Diluted loss per share is equal to the basic loss per share as the outstanding options and warrants are anti-dilutive.

Deferred financing costs

Costs directly identifiable with the raising of capital will be charged against the related capital stock. Costs related to shares not yet issued are recorded as deferred financing costs. These costs will be deferred until the issuance of the shares to which the costs relate, at which time the costs will be charged against the related capital stock or charged to operations if the shares are not issued.

GSP RESOURCE CORP

Notes to Condensed Interim Financial Statements

August 31, 2018

Expressed in Canadian dollars

[Unaudited – prepared by management]

2. Significant Accounting Policies (cont'd...)

Income taxes

Income tax expense comprises current and deferred tax. Income tax is recognized in the statement of loss and comprehensive loss except to the extent it relates to items recognized directly in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at year end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recognized using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized on the initial recognition of assets or liabilities in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss). In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Segment information

The Company currently conducts substantially all of its operations in Canada under one business segment.

Financial instruments

The Company's financial instruments consist of cash, accounts payable and accrued liabilities and due to related parties. Cash are classified as fair value through profit or loss and recorded at fair value. Due to related parties are classified as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost.

Financial assets

The Company classifies its financial assets into one of the following categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss – This category comprises derivatives, or assets acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statements of loss and comprehensive loss.

GSP RESOURCE CORP

Notes to Condensed Interim Financial Statements

August 31, 2018

Expressed in Canadian dollars

[Unaudited – prepared by management]

2. Significant Accounting Policies (cont'd...)

Financial instruments (cont'd...)

Loans and receivables – These assets are non-derivative financial assets with fixed or determinable payment that are not quoted in an active market. They are carried at cost less any provision for impairment. Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default.

Held-to-maturity investments – These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized in the statements of loss and comprehensive loss.

Available-for-sale – Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in equity. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from equity and recognized in the statements of loss and comprehensive loss.

All financial assets, except those at fair value through profit or loss, are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is objective evidence that a financial asset or a group of financial assets is impaired. Different criteria are applied for each category of financial assets described above to determine impairment.

Financial liabilities

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss – This category comprises derivatives or liabilities acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statements of operation and comprehensive loss.

Other financial liabilities – This category includes accounts payables and accrued liabilities, which is recognized at amortized cost.

Standards issued but not yet effective

The Company has not yet applied the following new standards, interpretations or amendments to standards that have been issued as at August 31, 2018 but are not yet effective. Unless otherwise stated, the Company does not plan to early adopt any of these new or amended standards and interpretations and intends to adopt those standards when they become effective.

The Company does not expect the impact of such changes on the financial statements to be material, unless otherwise stated.

GSP RESOURCE CORP

Notes to Condensed Interim Financial Statements

August 31, 2018

Expressed in Canadian dollars

[Unaudited – prepared by management]

2. Significant Accounting Policies (cont'd...)

Standards issued but not yet effective (cont'd...)

IFRS 9 Financial instruments ("IFRS 9")

IFRS 9, issued on July 24, 2014, is the IASB's replacement of IAS 39, Financial Instruments: Recognition and Measurement (IAS 39"). IFRS 9 introduces new requirements for the classification and measurements of financial assets. Under IFRS 9, financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. The standard introduces additional changes relating to financial liabilities and amends the impairment model by introducing a new "expected credit loss" model for calculating impairment. It also includes a new general hedge accounting standard which aligns hedge accounting more closely with risk management. The mandatory effective date of IFRS 9 is for annual periods beginning on or after January 1, 2018 and must be applied retrospectively with some exemptions. Early adoption is permitted. The restatement of prior periods is not required and is only permitted if information is available without the use of hindsight. The Company currently does not practice hedge accounting, but will continue to evaluate the impact of the change to the consolidated financial statements based on the characteristics of financial instruments outstanding at the time of adoption of IFRS 9.

IFRS 16, Leases ("IFRS16")

IFRS 16 was issued on January 13, 2016 and replaces the current guidance in IAS 17, Leases ("IAS17"). IFRS 16 specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS16's approach to lessor accounting substantially unchanged from IAS17. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted.

Other new standards or amendments are either not applicable or not expected to have a significant impact on the Company's financial statements.

3. Significant accounting judgments and estimates

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses, and related disclosure. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgment is used mainly in determining how a balance or transaction should be recognized in the financial statements. Estimates and assumptions are used mainly in determining the measurement of recognized transactions and balances. Actual results may differ from these estimates.

Significant areas where management's judgment has been applied include:

- Impairment of exploration and evaluation assets (E&E assets)
In accordance with the Company's accounting policy, the Company's E&E assets are evaluated every reporting period to determine whether there are any indications of impairment. If any such indication exists, which is often judgmental, a formal estimate of recoverable amount is performed

GSP RESOURCE CORP

Notes to Condensed Interim Financial Statements

August 31, 2018

Expressed in Canadian dollars

[Unaudited – prepared by management]

3. Significant accounting judgments and estimates (cont'd...)

and an impairment loss is recognized to the extent that the carrying amount exceeds the recoverable amount. The recoverable amount of an asset or cash generating group of assets is measured at the higher of fair value less costs to sell and value in use.

The evaluation of asset carrying values for indications of impairment includes consideration of both external and internal sources of information, including such factors as market and economic conditions, metal prices, future plans for the Company's mineral properties and mineral resources and/or reserve estimates.

Management has assessed for impairment indicators for the Company's E&E assets as of August 31, 2018 and has concluded that no indicators of impairment were identified, and the Company plans to continue with its objective of developing the Olivine Mountain Mineral Property.

- **Going concern assessment**
The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay for its ongoing operating expenditures, meet its liabilities for the ensuring year as they fall due, and to fund planned and contractual exploration programs, involves judgment based on historical experience and other factors including expectation of future events that are believed to be reasonable under the circumstances.

Significant areas requiring the use of management estimates and assumptions include:

- **Asset retirement obligations**
Management's assumption that there are currently no asset retirement obligation is based on the facts and circumstances that have existed during the period. The estimated obligations and actual costs may change significantly due to changes in regulations, technology, timing of the expenditure and the discount rates used to determine the net present value of the obligations.
- **Current and deferred tax taxation**
Estimations of the tax asset or liability require assessments to be made based on the potential tax treatment of certain items that will only be resolved once finally agreed with the relevant tax authorities. Assumptions underlying the composition of deferred tax assets and liabilities include estimates of future financial performance and the timing of reversal of temporary differences as well as the tax rates and laws in each respective jurisdiction at the time of the expected reversal. As of August 31, 2018, the Company has recorded deferred tax liability of \$25,377.

GSP RESOURCE CORP

Notes to Condensed Interim Financial Statements

August 31, 2018

Expressed in Canadian dollars

[Unaudited – prepared by management]

4. Exploration and Evaluation Assets**Olivine Mountain Property, Similkameen Mining Division, British Columbia**

On February 23, 2018, the Company entered into an option agreement to acquire a 100% interest in 25 mining claims located in the Similkameen Mining District of British Columbia. To acquire the 100% interest, the Company must make cash payments of \$105,000, issue 200,000 of the Company's common shares and incur aggregate minimum exploration expenditure of \$300,000 on the Olivine Property as follows:

Date	Cash	Shares	Minimum Exploration Expenditures
Within 10 days after execution and delivery of the Agreement (paid)	\$ 15,000	-	
Within 10 days of the "Listing Date", which is five days after the date of the final TSXV bulletin approving the listing of the Company's Common Shares and the acceptance by the TSXV of the Option Agreement.	\$ 20,000	200,000	
Six-month anniversary of the Listing Date	\$ 20,000	-	
Twelfth-month anniversary of the Listing Date	\$ 25,000	-	\$100,000
Eighteenth anniversary of the Listing Date	\$ 25,000	-	-
Twenty-fourth month anniversary of the Listing Date	-	-	\$200,000
	\$ 105,000	200,000	\$300,000

During the term of the option, the Company is required to keep the claims in good standing.

These claims are also subject to a 2% Net Smelter Return ("NSR") Royalty payable commencing from the date upon which the Property is put into commercial production, 100% of which can be acquired at a purchase price of \$1,00,000 for each one-half (50%) of the NSR Royalty, leaving the Optionor with no (nil) NSR Royalty after payment of \$2,000,000.

Expenditures related to the property can be summarized as follows:

	Balance May 31, 2018	Additions	Balance August 31, 2018
	\$	\$	\$
Acquisition costs			
Additions during the period			
Property option payments - cash	15,000	-	15,000

5. Share Capital

a) Authorized:

Unlimited number of common shares with no par value.

b) Issued and Outstanding

As at August 31, 2018, 6,550,000 common shares with no par value were issued and outstanding.

During the period from incorporation on February 19, 2018 to August 31, 2018 the Company completed the following private placements and issued Common Shares of the Company (the "Shares") as follow:

- 1,850,000 Shares at a price of \$0.005 per Share for gross proceeds of \$9,250.
- 2,300,000 flow-through Common Shares of the Company (the "FT Shares") at a price of \$0.05 per FT Share for gross proceeds of \$115,000. Each FT Share is a Common Share of the Company that qualifies as a "flow-through share" within the meaning of the Tax Act.
- 2,400,000 Shares at \$0.10 per Share for gross proceeds of \$240,000.

c) Flow-through shares

The Company issued 2,300,000 common shares on a flow-through basis at a price of \$0.05 per share for gross proceeds of \$115,000 (see note 5b).

The Company intends to renounce the total proceeds of \$115,000 as of December 31, 2018. As at August 31, 2018, the Company has incurred approximately \$96,884 of qualified expenditures. The Company has \$18,116 unspent flow-through proceeds.

6. Related Party Balances and Transactions

During the period from three months ended August 31, 2018, the Company had the following related party transactions:

- (a) Included in accounts payable as at August 31, 2018 is \$Nil (May 31, 2018 - \$12,441) due to a company controlled by a Director of the Company.
- (b) Included in accounts payable as at August 31, 2018 is \$Nil (May 31, 2018 - \$383) due to the Company's Chief Executive Officer for expenditures incurred on behalf of the Company.

These transactions are in the normal course of operations and have been valued in these financial statements at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

7. Commitments

See Note 4.

8. Financial Instruments

The Company's financial instruments are exposed to certain financial risks, including liquidity risk, credit risk and interest rate risk.

Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they become due. Refer to note 1 for further details related to the ability of the Company to continue as a going concern.

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at August 31, 2018, the Company had a cash balance of \$190,419 (May 31, 2018 - \$244,452) to settle accounts payable and accrued liabilities of \$39,489 (May 31, 2018 - \$5,925) and due to related parties of \$Nil (May 31, 2018 - \$12,824). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. The carrying amounts of financial assets best represent the maximum credit risk exposure at the reporting date.

Cash is held with reputable banks in Canada. The long-term credit rating of these banks, as determined by Standard and Poor's, was A+.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market interest rates. An immaterial amount of interest rate exposure exists in respect of cash balances on the statement of financial position. As a result, the Company is not exposed to material cash flow interest rate risk on its cash balances.

Fair value hierarchy

The Company applied the following fair value hierarchy which prioritizes the inputs used in the valuation methodologies in measuring fair value into three levels:

The three levels are defined as follows:

- Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 – inputs to valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 – inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company's financial instruments are cash and accounts payable and accrued liabilities. Cash is measured at fair value and is considered to be Level 1 instruments.

Financial instruments that are not measured at fair value are represented by other receivable and accounts payable and accrued liabilities. The fair values of these financial instruments approximate their carrying value due to their short-term nature.

9. Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Olivine Mountain property claims in which the Company currently has an interest are in the exploration stage; as such the Company has historically relied on the equity markets to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

The capital structure of the Company consists of shareholder's equity, comprising issued capital and deficit. The Company is not exposed to any externally imposed requirements. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

10. Subsequent event

The Company obtained a receipt of the British Columbia Securities Commission for the Long Form Prospectus dated October 11, 2018. The Company intends to offer 2,500,000 common shares at a price of \$0.20 per common share and 1,000,000 flow-through common shares at a price of \$0.25 per flow-through common share for aggregate gross proceeds of \$750,000.
