**Management Commentary**

Ido Almany, CEO of Zoomd Technologies stated, “This quarter highlights Zoomd’s ongoing transformation and resilience, with a 135% year-over-year increase in quarterly revenue to \$16.7 million and a 20% growth from Q2. This performance reflects the strength of our core business and our ability to capitalize on unique opportunities, including one-time client events such as the EURO football campaign. Importantly, this 20% revenue growth drove an approximately 50% increase in Net Income compared to the prior quarter, highlighting our disciplined cost management and operational efficiency.

Our Net Income reached \$3.2 million, marking our sixth consecutive quarter of profitability. Adjusted EBITDA surged over 500% year-over-year to \$3.9 million for the quarter, contributing to a total of \$8.1 million in Adjusted EBITDA for the first nine months of 2024.

These achievements would not have been possible without the unwavering support of our board and the hard work and dedication of our leadership team and their teams across the organization.

We remain steadfast in prioritizing profitability and operational efficiency over outright revenue growth as core elements of our strategy.”

The market has rewarded the successful execution of our strategic plan, which prioritizes profitability and operational efficiency over outright revenue growth. Despite our strong stock performance, we believe that our financial multiples indicate significant headroom for growth. Our P/E, P/S, and EV/EBITDA ratios remain notably below industry benchmarks, which we believe underscores the substantial value and potential that Zoomd offers.

We remain committed to creating long-term value for our shareholders.”
