

## **STELLAR AFRICAGOLD - ROAD REHABILITATION RAMPS-UP AND EXPLORATION WORKS ARE RESUMED IN MOROCCO**

**Vancouver, BC October 11<sup>th</sup> 2023** – Stellar AfricaGold Inc., (TSX-V: SPX) ("Stellar" or the "Company") reported last month that the terrible earthquake that struck Morocco was in the vicinity of Stellar's flagship Tichka Est Gold Project in the province of Al Haouz, Morocco.

### **Resumption of Exploration Works**

Roadway infrastructure is improving rapidly following swift mobilization from Morocco's authorities. Last week, Stellar's geologist was able to use the rehabilitated national roads to access Anarghi Village and the Tichka Est Gold property.

Stellar's geologist reported that a portion of Stellar's constructed 9 km mountain road has been cleared by the communities, and the rest of the road shows limited rockslides that can be cleared over the coming weeks. Notwithstanding, Stellar's geologist was able to access Tichka Est's Structure B, the primary drill target of Stellar AfricaGold.

Stellar confirms that exploration works are continuing at Tichka Est Gold Project.

The above link provides access to a Moroccan earthquake relief campaign (see below) which will deliver the funds accumulated from this campaign directly **to the rehabilitation and reconstruction of the communities** close to Stellar's project.

## Director Resignation

Stellar also announces that John Ryan has resigned as a Director of the Company. John has been a Board Member for more than 10 years and the Company thanks him for his services throughout that period.

## **About Tichka Est Gold Project Project, Morocco**

The Tichka Est gold project, comprising seven permits aggregating 82 square kilometres, is in the High Atlas Mountain region of Morocco approximately 80 kilometres south-southwest of Marrakech, a region easily accessible year-round via national and regional roads to the village of Anarghi located near the mineralized gold zone. Follow up on gold sampling results reported by ONHYM lead Stellar to the discovery of 3 extensive gold mineralized structures A, B and C.
