1. Nature of operations and going concern

Crystal Exploration Inc. (formerly Trigold Resources Inc.) (“Crystal” or the “Company”) was incorporated under the British Columbia Business Corporations Act on November 9, 2010 and has its shares listed for trading on the TSX Venture Exchange under the symbol “CEI”. The Company’s head office is located at suite 800-1199 West Hastings Street, Vancouver V6E 3T5, Canada. The principal business of the Company is the identification, evaluation and acquisition of mineral properties, as well as exploration of mineral properties once acquired. Crystal is an exploration stage company and is in the process of identifying and acquiring mineral properties.

These condensed interim financial statements are prepared on a going concern basis, which assumes that the Company will continue its operations for a reasonable amount of time. At August 31, 2017, the Company had working capital of \$74,531 (February 28, 2017 - working capital deficit of \$29,715) and an accumulated deficit of \$2,260,109 (February 28, 2017 - \$2,063,196). The Company's ability to continue its operations and to realize its assets at their carrying values is dependent upon obtaining additional financing or maintaining continued support from its shareholders and creditors, and generating profitable operations in the future, which indicate the existence of a material uncertainty that may cast significant doubts about the Company’s ability to continue as a going concern. These condensed interim financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying financial statements.

2. Basis of presentation

These condensed interim financial statements have been prepared in accordance with International Accounting Standard (“IAS”) 34 “Interim Financial Reporting”. They do not include all of the information required for full annual financial statements and should be read in conjunction with the financial statements for the year ended February 28, 2017, prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

These condensed interim financial statements were authorized for issue by the Board of Directors of the Company on October 26, 2017.

These condensed interim financial statements are presented in Canadian Dollars, and the use of the symbol “\$” herein is in reference to Canadian Dollars. Disclosures for amounts denominated in currencies other than Canadian Dollars use the International Standards Organization 3-letter symbol for such foreign currency.

The accounting policies applied in preparation of these condensed interim financial statements are consistent with those applied and disclosed in the Company’s financial statements for the year ended February 28, 2017, unless otherwise stated.

During the year ended February 29, 2016, the Company signed a property purchase agreement ("Agreement") to acquire a 100% interest in eight Prospecting Permits (the 'Property') totaling 1,150 km² located in Nunavut, Canada from private owners (the "Vendor"). As consideration, the Company paid a total of \$75,000 in cash and issued 1,000,000 common shares of the Company with a fair value of \$125,000.

During the year ended February 29, 2016, the Company capitalized certain acquisition costs of \$25,881 in relation to the Agreement. The Company has also agreed to pay the Vendor a 1% royalty interest on the Property. The Company also has the sole and exclusive option to purchase the NSR royalty interest at a purchase price of \$3,000,000 at any time.

The Company has also agreed to make the following additional performance payments to the Vendor, upon the completion of the following milestones:

- annual payments of \$50,000 on each anniversary date, August 5th, for the first four years, payable by the Company in either cash or common shares of the Company ("Performance Shares"), or any combination thereof, in its sole discretion (paid in cash);
- payment of \$50,000 for each new discovery of a kimberlite pipe or dyke on the Property, payable by the Company in either cash or Performance Shares, or any combination thereof, in its sole discretion;
- issue 500,000 Performance Shares on completion of an inferred mineral resource estimate by a qualified independent geologist or mining engineer of not less than 5,000,000 tonnes on each kimberlite pipe or dyke; and
- issue 500,000 Performance Shares upon completion of a feasibility study.

risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated in the note.

General objectives, policies and processes

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure effective implementation of the objectives and policies to the Company's finance function.

The overall objective of the Board and the Company's finance function is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility and to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. Further details regarding these policies are set out below.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of three types of risk: currency risk, interest rate risk, commodity price risk.

Currency risk

Currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company's share capital as well as the Company's reporting currency is denominated in Canadian dollars. Management has assessed that the Company's current exposure to currency risk is low, but acknowledges this may change in the future.

Interest rate risk

Interest rate risk is the risk arising from the effect of changes in prevailing interest rates on the Company's financial instruments. Interest rate risk is limited to potential decreases on the interest rate offered on cash held with chartered Canadian financial institutions. The Company considers this risk to be minimal.

Commodity price risk

The Company's ability to raise capital to fund exploration activities is subject to risks associated with fluctuations in the market price of mineral resources. The Company closely monitors commodity prices to determine the appropriate course of actions to be taken.

5. Financial instruments and risk management (continued)

Credit risk

Credit risk is the risk of potential loss to the Company if counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash.

The Company has assessed its exposure to credit risk on its cash and has determined that such risk is minimal. The majority of the Company's cash are held with financial institutions in Canada.

Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they fall due. The Company monitors its risk by monitoring the maturity dates of its existing debt and other payables. The Company's policy is to ensure that it will always have sufficient cash to allow it to meet its liabilities when they become due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

To achieve this objective, the Company prepares annual expenditure budgets, which are regularly monitored and updated as considered necessary. Monthly working capital and expenditure reports are prepared by the Company's finance function and presented to management for review and communication to the Board. As at August 31, 2017, all of the Company's account payable and accrued liabilities of \$128,243 is due within one year.

Determination of fair value

The statement of financial position carrying amounts for cash and accounts payable approximate fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

Financial assets and liabilities measured at fair value are grouped into three Levels or a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities; and
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: unobservable inputs for the asset or liability.

For the six months ended August 31,	2017	2016
Short term benefits	\$ 72,000	\$ 9,000
	\$ 72,000	\$ 9,000

At August 31, 2017, accounts payable and accrued liabilities include \$78,225 (February 28, 2017 - \$100,421) due to key management, directors of the Company and companies controlled by management or directors for services provided. These amounts are unsecured, non-interest bearing and have no specific terms of repayment.

7. Flow-through premium liability

During the year ended February 28, 2017, the Company issued 2,792,000 flow-through units (Note 4 (a)) for gross proceeds of \$376,920 and recognized a deferred flow-through premium of \$69,800, noncash, as the difference between the amounts recognized in common shares and the amounts the investors paid for the units. As at February 28, 2017, the flow-through premium liability outstanding relating to these flow-through shares was \$11,881. The Company is still required to spend approximately \$63,800 in eligible exploration expenditures as at February 28, 2017 relating to these flow-through shares.

As at August 31, 2017, the flow-through premium liability outstanding relating to these flow-through shares was \$Nil.

8. Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the sourcing and development of various businesses. The Company does not have any externally imposed capital requirements to which it is subject.

As at August 31, 2017, the Company considers the aggregate of its share capital, reserves and deficit as capital. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue common shares or dispose of assets or adjust the amount of cash on hand.

9. Subsequent event

Share subscription receivable of \$100,000 for the June 28, 2017 private placement was received by the Company subsequent to the period (note 4).

On October 20, 2017, the Company proposed to complete a non-brokered private placement financing on a best efforts basis of up to 7,142,857 units ("Units") at a price of \$0.07 per Unit for gross proceeds of up to \$500,000. Each Unit will consist of one common share and one common share purchase warrant. Each whole warrant entitles the holder to purchase one additional common share of the Company at an exercise price of \$0.11 for a period of 12 months from the date of issue of the warrant. In addition, Crystal is amending the flow-through financing announced on September 15, 2017. Crystal proposes to complete on a best efforts basis of up to 2,222,222 flow-through common shares at a price of \$0.09 per share for gross proceeds of up to \$200,000.

Proceeds from the private placement will be used for Canadian exploration expenditures and working capital to advance gold and diamond projects located in Nunavut, Canada.
