**Re: Global X Equal Weight Canadian Bank Covered Call ETF (“BKCC”)
Global X Seasonal Rotation ETF (“HAC” and with BKCC, the “ETFs”)
ETF Facts Documents dated May 1, 2024 (“ETF Facts Documents”)**

We are refiling the ETF Facts Documents of the ETFs to correct inadvertent misstatements of the management expense ratio (“MER”), trading expense ratio (“TER”) and ETF expenses of the ETFs. The MER, TER and ETF expenses of the ETFs are in fact lower than as disclosed in the ETF Facts Document. The corrected figures are as set out below:

	Reported MER	Corrected MER	Reported TER	Corrected TER	Reported ETF Expenses	Corrected ETF Expenses
BKCC	0.82%	0.57%	0.31%	0.27%	1.13%	0.84%
HAC	1.09%	1.08%	0.14%	(no change)	1.23%	1.22%

We confirm that there are no other changes to the ETF Facts Documents of the ETFs.

Yours very truly,

GLOBAL X INVESTMENTS CANADA INC.

Signed “McGregor V. Sainsbury”

McGregor V. Sainsbury
General Counsel & Secretary

This document contains key information you should know about Global X Big Data & Hardware Index ETF. You can find more details about this exchange traded fund (ETF) in its prospectus. Ask your representative for a copy, contact Global X Investments Canada Inc. at info@globalx.ca or 1-866-641-5739, or visit www.globalx.ca.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

Prior to the opening of trading on May 1, 2024, the name of the ETF has changed from Horizons Big Data & Hardware Index ETF to Global X Big Data & Hardware Index ETF.

Quick facts

Date ETF started:	June 21, 2018	Fund manager:	Global X Investments Canada Inc.
Total value on March 31, 2024:	\$18.3 Million	Portfolio manager:	Global X Investments Canada Inc.
Management expense ratio (MER):	0.58%

The base currency of the ETF is in Canadian dollars. However, units of the ETF may be purchased in both Canadian dollars and US dollars under the ticker symbols HBGD and HBGD.U, respectively.

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible, the performance of the Solactive Big Data & Hardware Index, net of expenses. The Solactive Big Data & Hardware Index tracks a portfolio of global companies focusing directly on data development, storage, and management-related services and solutions as well as hardware and hardware-related services used in data-intensive applications such as blockchain.

The charts below give you a snapshot of the ETF's exposure on March 31, 2024. The ETF's exposure will change to reflect changes in the Solactive Big Data & Hardware Index.

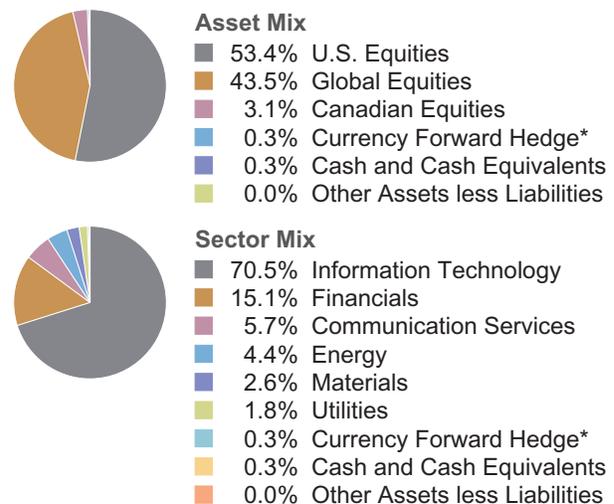

Top 10 investments (March 31, 2024)

Total number of investments: 46

Investment mix (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 5 years.

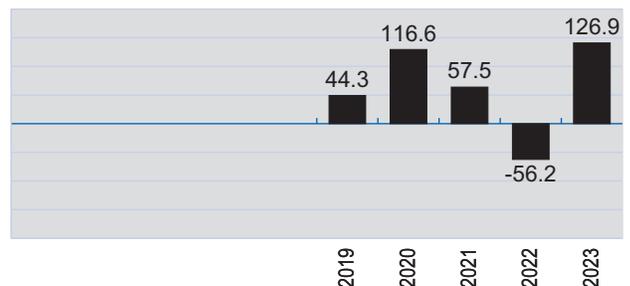

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the Solactive Big Data & Hardware Index.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 5 completed calendar years. The ETF dropped in value in 1 of the 5 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 5 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	100.8%	January 31, 2021	Your investment would rise to \$2,008
Worst return	-40.4%	June 30, 2022	Your investment would drop to \$596

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$3,509. This works out to an annual compound return of 24.2%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.

- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the “**bid-ask spread**”.
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF’s investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are seeking passive exposure to companies that stand to benefit from the increased adoption of data and blockchain
- can handle the ups and downs of stock markets
- are comfortable with a high degree of risk.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.92% of its value. This equals \$9.20 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.58%
Trading expense ratio (TER) These are the ETF's trading costs.	0.34%
ETF expenses	0.92%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

For more information

Contact Global X Investments Canada Inc. or your representative for a copy of the ETF's prospectus and other disclosure documents. These documents and the ETF Facts make up the ETF's legal documents.

Pricing information (12 months ending March 28, 2024)

Market price:	\$10.13 - \$11.43	Average bid-ask spread:	0.11%
Net asset value {NAV}:	\$10.11 - \$11.42		

What does the ETF invest in?

The investment objective of the ETF seeks to provide, to the extent possible and net of expenses: (a) exposure to the performance of an index of Canadian companies that are involved in the crude oil and natural gas industry (currently, the Solactive Equal Weight Canada Oil & Gas Index); and (b) monthly distributions of dividend and call option income. To mitigate downside risk and generate income, the ETF will employ a dynamic covered call option writing program.

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

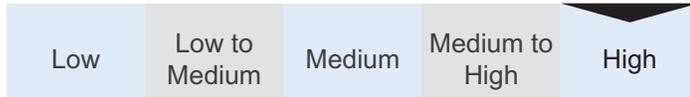

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Medium**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past year.

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF have performed in the past 1 year. The ETF dropped in value during the year. The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past calendar year. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	10.3%	December 31, 2023	Your investment would rise to \$1,103
Worst return	-12.5%	September 30, 2023	Your investment would drop to \$875

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$851. This works out to an annual compound return of -9.4%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are looking for exposure to TSX-listed high dividend paying utility services companies
- can handle the ups and downs of the stock market.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.68% of its value. This equals \$6.80 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.61%
Trading expense ratio (TER) These are the ETF's trading costs.	0.07%
ETF expenses	0.68%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

Market price:	\$22.23 - \$32.82	Average bid-ask spread:	0.25%
Net asset value {NAV}::	\$22.19 - \$32.70		

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible and net of expenses, the performance of an index that is designed to provide exposure to the performance of companies active in copper ore mining that are listed on select North American stock exchanges. Currently, the ETF seeks to replicate the performance of the Solactive North American Listed Copper Producers Index, net of expenses. The ETF seeks to hedge any U.S. dollar portfolio exposure back to the Canadian dollar at all times.

The charts below give you a snapshot of the ETF's investments on March 31, 2024. The ETF's investments will change.

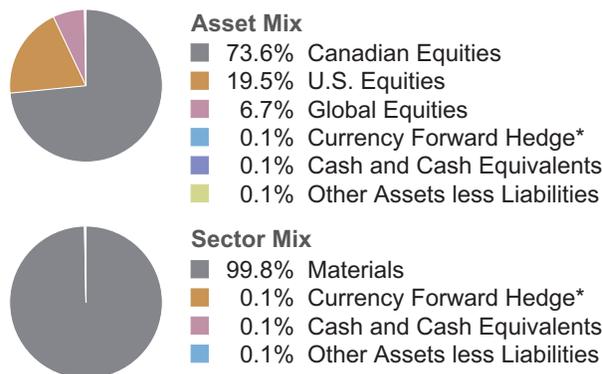

Top 10 investments (March 31, 2024)

Total number of investments: 12

Investment mix (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

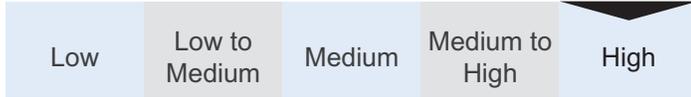

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past year.

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF have performed in the past 1 year. The ETF did not drop in value during the year. The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past calendar year. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	44.6%	January 31, 2023	Your investment would rise to \$1,446
Worst return	-28.4%	October 31, 2023	Your investment would drop to \$716

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$1,135. This works out to an annual compound return of 7.0%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- looking for exposure to companies active in copper ore mining that are listed on a North American stock exchange
- can handle the ups and downs of the stock market
- are comfortable with a high degree of risk.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.91% of its value. This equals \$9.10 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.81%
Trading expense ratio (TER) These are the ETF's trading costs.	0.10%
ETF expenses	0.91%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

Ask your representative for a copy, contact Global X Investments Canada Inc. at info@globalx.ca or 1-866-641-5739, or visit www.globalx.ca.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

Prior to the opening of trading on May 1, 2024, the name of the ETF has changed from Horizons GX Cybersecurity Index ETF to Global X Cybersecurity Index ETF.

Quick facts

Date ETF started:	December 2, 2021	Fund manager:	Global X Investments Canada Inc.
Total value on March 31, 2024:	\$2.7 Million	Portfolio manager:	Global X Investments Canada Inc.
Management expense ratio (MER):	0.55%	Distributions:	Annually (if any)

Trading information (12 months ending March 28, 2024)

Ticker symbol:	HBUG	Average daily volume:	366 units
Exchange:	Toronto Stock Exchange (TSX)	Number of days traded:	210 out of 252 trading days
Currency:	Canadian dollars		

Pricing information (12 months ending March 28, 2024)

Market price:	\$17.00 - \$24.97	Average bid-ask spread:	0.31%
Net asset value {NAV}:	\$16.88 - \$24.96		

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible and net of expenses, the performance of an index that is designed to provide exposure to the performance of global, publicly listed companies that stand to potentially benefit from the increased adoption of cybersecurity technology, such as those whose principal business is generally engaged in the development and management of security protocols preventing intrusion and attacks to systems, networks, applications, computers, and mobile devices. Currently, the ETF seeks to replicate, directly or indirectly, the performance of Indxx Cybersecurity Index, net of expenses, by investing primarily in the Global X Cybersecurity ETF. The ETF seeks to hedge any U.S. dollar portfolio exposure back to the Canadian dollar at all times.

The charts below give you a snapshot of the ETF's investments on March 31, 2024. The ETF's investments will change.

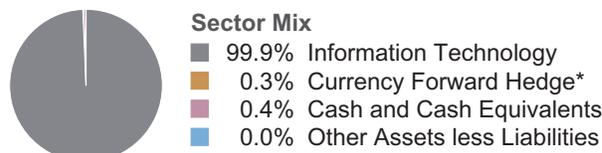

Top 10 investments (March 31, 2024)

1. Global X Cybersecurity ETF	99.9%
2. Cash and Cash Equivalents	0.4%

Total percentage of top 2 investments 100.3%

Total number of investments: 1

Investment mix (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Medium to High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 2 years.

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 2 completed calendar years. The ETF dropped in value in 1 of the 2 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 2 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	20.2%	December 31, 2023	Your investment would rise to \$1,202
Worst return	-21.4%	June 30, 2022	Your investment would drop to \$786

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$986. This works out to an annual compound return of -0.6%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	15.1%	April 30, 2021	Your investment would rise to \$1,151
Worst return	-24.7%	March 31, 2020	Your investment would drop to \$753

Average return

As at March 31, 2024, a person who invested \$1,000 in the fund 10 years ago now has \$1,613. This works out to an annual compound return of 4.9%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- Suitable for investors who are looking for income
- Suitable for investors who want exposure to a portfolio of Canadian banks that seeks income enhancement
- Suitable for investors who are comfortable with fluctuations in the market value of their investment.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.84% of its value. This equals \$8.40 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.57%
Trading expense ratio (TER) These are the ETF's trading costs.	0.27%
ETF expenses	0.84%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible, the performance of the Nasdaq Future Global Sustainability Leaders Index, net of expenses. The Nasdaq Future Global Sustainability Leaders Index is designed to provide exposure to the performance of a basket of large-cap equity securities of companies that are global climate change leaders (as measured by their relative carbon efficiency), and are not materially engaged in activities deemed inconsistent with responsible investment considerations. The ETF seeks to hedge the U.S. dollar value of its portfolio to the Canadian dollar at all times.

The charts below give you a snapshot of the ETF's exposure on March 31, 2024. The ETF's exposure will change to reflect changes in the Nasdaq Future Global Sustainability Leaders Index.

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Medium**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 5 years.

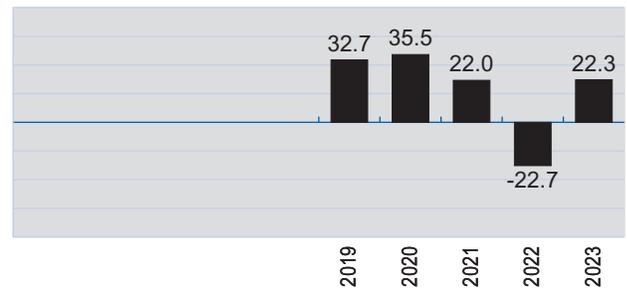

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the Nasdaq Future Global Sustainability Leaders Index.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 5 completed calendar years. The ETF dropped in value in 1 of the 5 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 5 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	25.6%	June 30, 2020	Your investment would rise to \$1,256
Worst return	-18.5%	June 29, 2022	Your investment would drop to \$815

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$2,171. This works out to an annual compound return of 15.4%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are looking for exposure to large-cap equity securities of companies that are global climate change leaders
- can handle the ups and downs of the stock market.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.69% of its value. This equals \$6.90 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.64%
Trading expense ratio (TER) These are the ETF's trading costs.	0.05%
ETF expenses	0.69%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

Market price:	\$19.29 - \$29.02	Average bid-ask spread:	0.12%
Net asset value {NAV}::	\$19.27 - \$28.99		

What does the ETF invest in?

The investment objective of the ETF seeks to provide, to the extent possible and net of expenses: (a) exposure to the performance of an index of equity securities of diversified North American listed gold producers (currently, the Solactive North American Listed Gold Producers Index) and (b) monthly distributions of dividend and call option income. To mitigate downside risk and generate income, the ETF will employ a dynamic covered call option writing program.

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

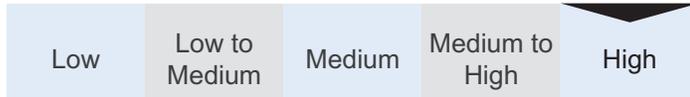

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 10 years.

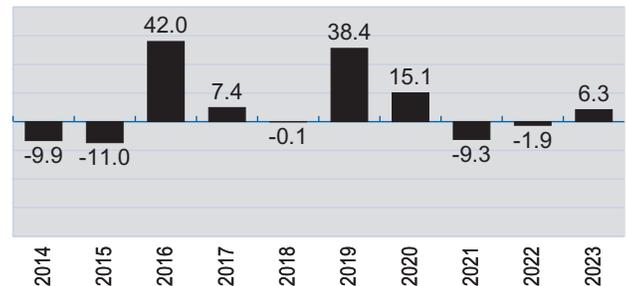

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 10 completed calendar years. The ETF dropped in value in 5 of the 10 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 10 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	52.1%	April 30, 2016	Your investment would rise to \$1,521
Worst return	-30.4%	October 31, 2014	Your investment would drop to \$696

Average return

As at March 31, 2024, a person who invested \$1,000 in the fund 10 years ago now has \$1,732. This works out to an annual compound return of 5.6%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- Suitable for investors who are looking for income
- Suitable for investors who want exposure to a portfolio of North American gold mining companies that seeks income enhancement
- Suitable for investors who are comfortable with fluctuations in the market value of their investment.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 1.16% of its value. This equals \$11.60 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.78%
Trading expense ratio (TER) These are the ETF's trading costs.	0.38%
ETF expenses	1.16%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Medium**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 10 years.

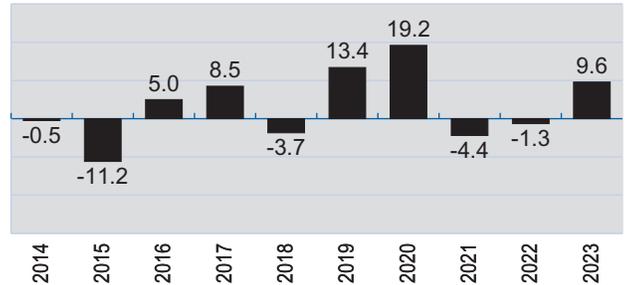

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 10 completed calendar years. The ETF dropped in value in 5 of the 10 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 10 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	14.2%	January 31, 2023	Your investment would rise to \$1,142
Worst return	-12.3%	December 31, 2016	Your investment would drop to \$877

Average return

As at March 31, 2024, a person who invested \$1,000 in the fund 10 years ago now has \$1,360. This works out to an annual compound return of 3.1%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- Suitable for investors who can handle the ups and downs of gold bullion prices
- Suitable for investors looking for monthly distributions
- Suitable for investors who are comfortable with a high degree of risk.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.98% of its value. This equals \$9.80 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.89%
Trading expense ratio (TER) These are the ETF's trading costs.	0.09%
ETF expenses	0.98%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are looking for exposure to high interest deposit accounts
- are looking for regular distributions.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.11% of its value. This equals \$1.10 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.11%
Trading expense ratio (TER) These are the ETF's trading costs.	0.00%
ETF expenses	0.11%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

Net asset value {NAV}::	\$37.82 - \$50.38		

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible, the performance of the Solactive Industry 4.0 Index, net of expenses. The Solactive Industry 4.0 Index is designed to provide exposure to the performance of equity securities of companies that are involved in the transformation of manufacturing and the industrial market through the development or implementation of new technologies and innovations. The ETF seeks to hedge the U.S. dollar value of its portfolio to the Canadian dollar at all times.

The charts below give you a snapshot of the ETF's exposure on March 31, 2024. The ETF's exposure will change to reflect changes in the Solactive Industry 4.0 Index.

Investment mix (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

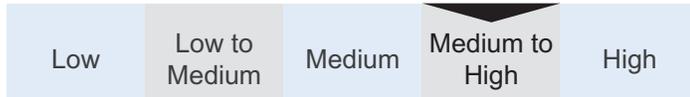

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Medium to High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 5 years.

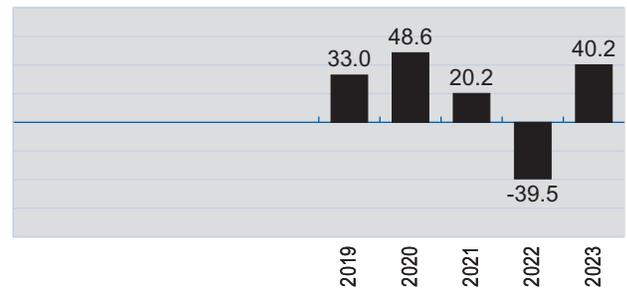

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the Solactive Industry 4.0 Index.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 5 completed calendar years. The ETF dropped in value in 1 of the 5 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 5 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	31.8%	June 30, 2020	Your investment would rise to \$1,318
Worst return	-23.7%	June 30, 2022	Your investment would drop to \$763

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$1,979. This works out to an annual compound return of 13.5%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are looking for exposure to the equity securities of companies that are involved in the transformation of manufacturing and the industrial market through the development or implementation of new technologies and innovations
- can handle the ups and downs of the stock market.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.73% of its value. This equals \$7.30 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.64%
Trading expense ratio (TER) These are the ETF's trading costs.	0.09%
ETF expenses	0.73%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Medium**. Because this is a new ETF, the risk rating is only an estimate by Horizons ETFs Management (Canada) Inc.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 6 years.

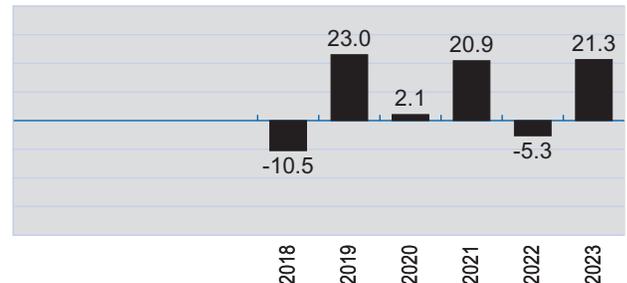

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the Nasdaq Inovestor Canada Index.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 6 completed calendar years. The ETF dropped in value in 2 of the 6 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 6 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	15.2%	June 30, 2020	Your investment would rise to \$1,152
Worst return	-24.6%	March 31, 2020	Your investment would drop to \$754

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$1,703. This works out to an annual compound return of 8.7%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

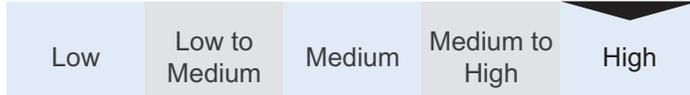

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 2 years.

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 2 completed calendar years. The ETF dropped in value in 2 of the 2 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 2 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	27.1%	October 31, 2021	Your investment would rise to \$1,271
Worst return	-35.1%	October 31, 2023	Your investment would drop to \$649

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$925. This works out to an annual compound return of -2.8%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are looking for exposure to global, publicly listed companies generally focused on the mining and/or production of lithium, lithium compounds, or lithium related components
- can handle the ups and downs of the stock market.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.98% of its value. This equals \$9.80 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.88%
Trading expense ratio (TER) These are the ETF's trading costs.	0.10%
ETF expenses	0.98%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

This document contains key information you should know about Global X Marijuana Life Sciences Index ETF. You can find more details about this exchange traded fund (ETF) in its prospectus. Ask your representative for a copy, contact Global X Investments Canada Inc. at info@globalx.ca or 1-866-641-5739, or visit www.globalx.ca.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

Prior to the opening of trading on May 1, 2024, the name of the ETF has changed from Horizons Marijuana Life Sciences Index ETF to Global X Marijuana Life Sciences Index ETF.

The ETF is exposed to companies that are involved in the legal recreational marijuana market in Canada. The ETF will not knowingly invest in any constituent issuers that have exposure to the medical or recreational marijuana market in the United States, unless and until such time as it becomes legal under U.S. federal law. The ETF is not and will not be directly engaged in the manufacture, importation, possession, use, sale or distribution of cannabis in the cannabis marketplace in Canada.

The base currency of the ETF is in Canadian dollars. However, units of the ETF may be purchased in both Canadian dollars and US dollars under the ticker symbols HMMJ and HMMJ.U, respectively.

What does the ETF invest in?

The investment objective of the ETF is to seek to replicate, to the extent possible, the performance of the North American Marijuana Index, net of expenses. The North American Marijuana Index is designed to provide exposure to the performance of a basket of North American publicly listed companies with significant business activities in the marijuana industry.

The charts below give you a snapshot of the ETF's exposure on March 31, 2024. The ETF's exposure will change to reflect changes in the North American Marijuana Index.

Total number of investments: 20

Investment mix (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

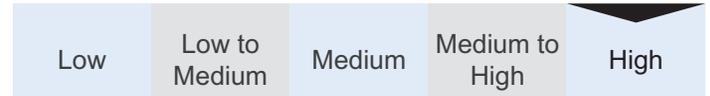

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **High**. Because this is a new ETF, the risk rating is only an estimate by Horizons ETFs Management (Canada) Inc.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 6 years.

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the North American Marijuana Index.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 6 completed calendar years. The ETF dropped in value in 6 of the 6 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 6 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	103.1%	December 31, 2017	Your investment would rise to \$2,031
Worst return	-41.9%	November 30, 2019	Your investment would drop to \$581

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$306. This works out to an annual compound return of -15.6%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are willing to invest in highly speculative investments
- are comfortable with a high degree of risk
- can handle the ups and downs of the stock market.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 1.01% of its value. This equals \$10.10 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.95%
Trading expense ratio (TER) These are the ETF's trading costs.	0.06%
ETF expenses	1.01%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

Ask your representative for a copy, contact Global X Investments Canada Inc. at info@globalx.ca or 1-866-641-5739, or visit www.globalx.ca.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

Prior to the opening of trading on May 1, 2024, the name of the ETF has changed from Horizons Global Metaverse Index ETF to Global X Metaverse Index ETF.

Quick facts

Date ETF started:	November 29, 2021	Fund manager:	Global X Investments Canada Inc.
Total value on March 31, 2024:	\$5.6 Million	Portfolio manager:	Global X Investments Canada Inc.
Management expense ratio (MER):	0.64%	Distributions:	Annually (if any)

Trading information (12 months ending March 28, 2024)

Ticker symbol:	MTAV	Average daily volume:	489 units
Exchange:	Toronto Stock Exchange (TSX)	Number of days traded:	251 out of 252 trading days
Currency:	Canadian dollars		

Pricing information (12 months ending March 28, 2024)

Market price:	\$18.11 - \$26.55	Average bid-ask spread:	0.18%
Net asset value {NAV}::	\$18.03 - \$26.50		

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible and net of expenses, the performance of an index that seeks to provide exposure to global, publicly listed companies that potentially stand to benefit from the adoption and usage of technologies expected to grow and support the functioning of the metaverse. Currently, the ETF seeks to replicate the performance of the Solactive Global Metaverse Index, net of expenses. The ETF seeks to hedge any U.S. dollar portfolio exposure back to the Canadian dollar at all times.

The charts below give you a snapshot of the ETF's investments on March 31, 2024. The ETF's investments will change.

What does the ETF invest in?

The investment objective of the ETF seeks to provide, to the extent possible and net of expenses: (a) exposure to the performance of an index of the largest domestic and international nonfinancial companies listed on the NASDAQ stock market (currently, the NASDAQ-100® Index); and (b) monthly U.S. dollar distributions of dividend and call option income. To mitigate downside risk and generate income, the ETF will employ a dynamic covered call option writing program. The ETF will not seek to hedge its exposure to the U.S. dollar back to the Canadian dollar.

The charts below give you a snapshot of the ETF's investments on March 31, 2024. The ETF's investments will change.

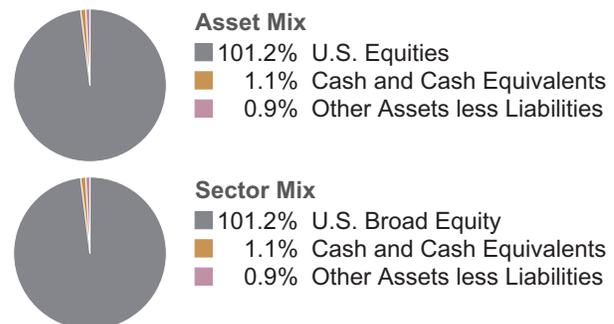

Top 10 investments (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Medium**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 10 years.

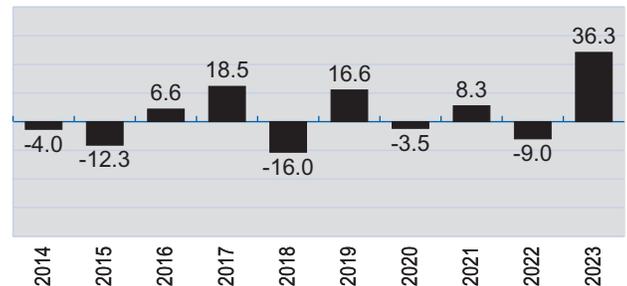

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 10 completed calendar years. The ETF dropped in value in 5 of the 10 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 10 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	8.7%	May 31, 2016	Your investment would rise to \$1,087
Worst return	-14.0%	September 30, 2015	Your investment would drop to \$860

Average return

As at March 31, 2024, a person who invested \$1,000 in the fund 10 years ago now has \$1,502. This works out to an annual compound return of 4.1%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- Suitable for investors who are looking for income
- Suitable for investors who are comfortable with fluctuations in the market value of their investment.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.86% of its value. This equals \$8.60 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.85%
Trading expense ratio (TER) These are the ETF's trading costs.	0.01%
ETF expenses	0.86%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

Market price:	\$9.35 - \$11.11	Average bid-ask spread:	0.24%
Net asset value {NAV}:	\$9.38 - \$11.10		

What does the ETF invest in?

The investment objective of the ETF is to seek to replicate, to the extent possible, the performance of the Solactive Pipelines & Energy Services Index, net of expenses. The Solactive Pipelines & Energy Services Index is designed to provide exposure to the equity securities of Canadian oil and gas services companies.

The charts below give you a snapshot of the ETF's exposure on March 31, 2024. The ETF's exposure will change to reflect changes in the Solactive Pipelines & Energy Services Index.

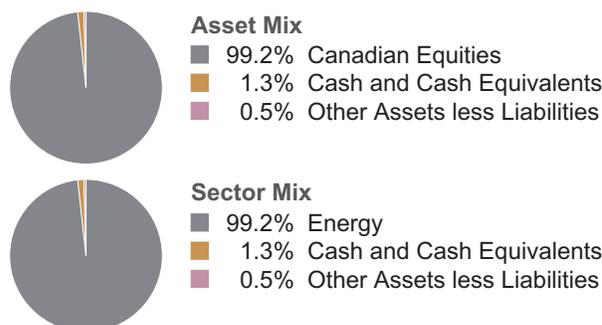

Top 10 investments (March 31, 2024)

Total number of investments: 12

Investment mix (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

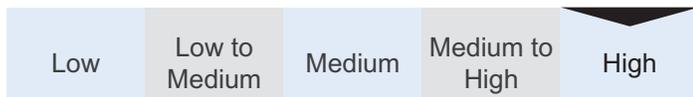

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 9 years.

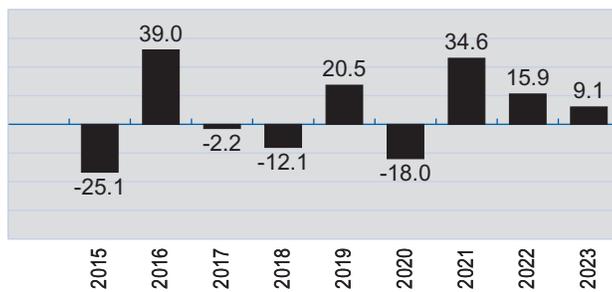

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the Solactive Pipelines & Energy Services Index.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 9 completed calendar years. The ETF dropped in value in 4 of the 9 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 9 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	21.1%	March 31, 2019	Your investment would rise to \$1,211
Worst return	-16.1%	September 30, 2015	Your investment would drop to \$839

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$1,632. This works out to an annual compound return of 5.2%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are seeking exposure to the equity securities of Canadian oil and gas services companies
- can handle the ups and downs of stock markets.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.79% of its value. This equals \$7.90 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.74%
Trading expense ratio (TER) These are the ETF's trading costs.	0.05%
ETF expenses	0.79%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

For more information

Contact Global X Investments Canada Inc. or your representative for a copy of the ETF's prospectus and other disclosure documents. These documents and the ETF Facts make up the ETF's legal documents.

Ask your representative for a copy, contact Global X Investments Canada Inc. at info@globalx.ca or 1-866-641-5739, or visit www.globalx.ca.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

Prior to the opening of trading on May 1, 2024, the name of the ETF has changed from Horizons Robotics & AI Index ETF to Global X Robotics & AI Index ETF.

Quick facts

Date ETF started:	November 29, 2017	Fund manager:	Global X Investments Canada Inc.
Total value on March 31, 2024:	\$57.3 Million	Portfolio manager:	Global X Investments Canada Inc.
Management expense ratio (MER):	0.64%		

Trading information (12 months ending March 28, 2024)

Ticker symbol:	RBOT(C\$)/RBOT.U(US\$)	Average daily volume:	6,778 units
Exchange:	Toronto Stock Exchange (TSX)	Number of days traded:	252 out of 252 trading days
Currency:	Canadian dollars		

Pricing information (12 months ending March 28, 2024)

Market price (C\$):	\$21.76 - \$31.79	Market price (US\$):	\$15.74 - \$23.57
Net asset value {NAV} (C\$):	\$21.84 - \$31.74	Net asset value {NAV} (US\$):	\$15.79 - \$23.58
Average bid-ask spread (C\$):	0.22%	Average bid-ask spread (US\$):	0.29%

The base currency of the ETF is Canadian dollars. However, units of the ETF may also be purchased in both Canadian dollars and US dollars under the ticker symbols RBOT and RBOT.U, respectively.

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible, the performance of the Indxx Global Robotics & Artificial Intelligence Thematic Index, net of expenses. The Indxx Global Robotics & Artificial Intelligence Thematic Index is designed to provide exposure to the performance of equity securities of companies that are involved in the development of robotics and/or artificial intelligence. The ETF seeks to hedge the U.S. dollar value of its portfolio to the Canadian dollar at all times.

The charts below give you a snapshot of the ETF's exposure on March 31, 2024. The ETF's exposure will change to reflect changes in the Indxx Global Robotics & Artificial Intelligence Thematic Index.

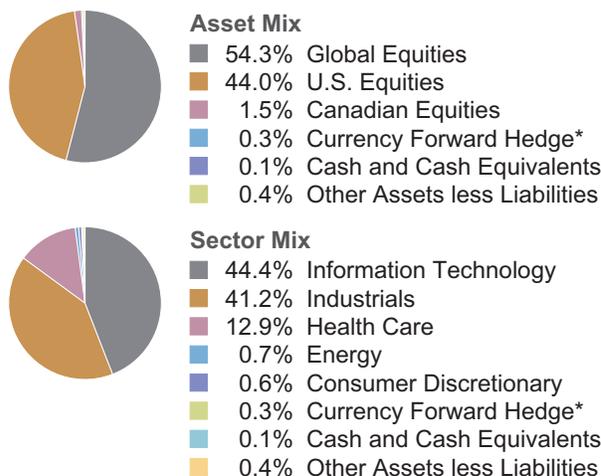

Top 10 investments (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

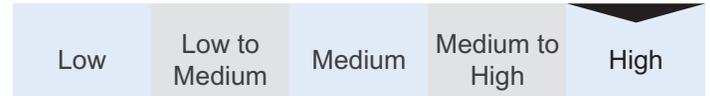

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **High**. Because this is a new ETF, the risk rating is only an estimate by Horizons ETFs Management (Canada) Inc.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 6 years.

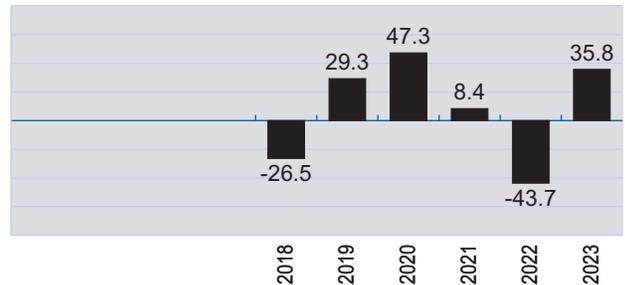

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the Indxx Global Robotics & Artificial Intelligence Thematic Index.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 6 completed calendar years. The ETF dropped in value in 2 of the 6 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 6 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	29.3%	June 30, 2020	Your investment would rise to \$1,293
Worst return	-30.4%	June 30, 2022	Your investment would drop to \$696

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$1,229. This works out to an annual compound return of 3.3%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.

What does the ETF invest in?

The investment objective of the ETF seeks to provide: (a) exposure to the performance of the large-cap market segment of the U.S. equity market and (b) monthly U.S. dollar distributions of dividend and call option income. To mitigate downside risk and generate income, the ETF will employ a dynamic covered call option writing program. The ETF will not seek to hedge its exposure to the U.S. dollar back to the Canadian dollar.

The charts below give you a snapshot of the ETF's investments on March 31, 2024. The ETF's investments will change.

Net asset value {NAV}:	\$20.35 - \$21.88		

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible and net of expenses, the performance of a market index that is designed to provide exposure to the performance of global green-labeled bonds issued in U.S. dollars that are subject to stringent eligibility criteria to fund projects that have positive environmental or climate benefits. Currently, the ETF seeks to replicate the performance of the S&P Green Bond US Dollar Select Index, net of expenses. The ETF seeks to hedge the U.S. dollar value of its portfolio to the Canadian dollar at all times.

The charts below give you a snapshot of the ETF's exposure on March 31, 2024. The ETF's exposure will change to reflect changes in the S&P Green Bond US Dollar Select Index.

Investment mix (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

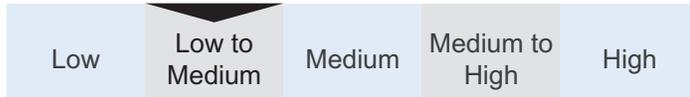

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Low to Medium**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 2 years.

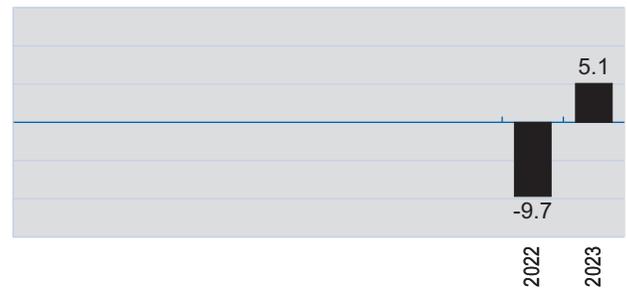

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the S&P Green Bond US Dollar Select Index.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 2 completed calendar years. The ETF dropped in value in 1 of the 2 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 2 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	5.9%	January 31, 2023	Your investment would rise to \$1,059
Worst return	-6.3%	April 30, 2022	Your investment would drop to \$937

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$938. This works out to an annual compound return of -2.2%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are looking for exposure to green bonds
- are looking for regular distributions
- can handle the ups and downs of the market.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.55% of its value. This equals \$5.50 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.55%
Trading expense ratio (TER) These are the ETF's trading costs.	0.00%
ETF expenses	0.55%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

This document contains key information you should know about Global X Seasonal Rotation ETF. You can find more details about this exchange traded fund (ETF) in its prospectus. Ask your representative for a copy, contact Global X Investments Canada Inc. at info@globalx.ca or 1-866-641-5739, or visit www.globalx.ca.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

Prior to the opening of trading on May 1, 2024, the name of the ETF has changed from Horizons Seasonal Rotation ETF to Global X Seasonal Rotation ETF.

This ETF is an "alternative mutual fund" as defined in National Instrument 81-102 Investment Funds. The ETF has the ability to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific features that differentiate this ETF from other types of mutual funds may include the ability to concentrate investments, use of derivatives and the use of leverage. While these strategies will only be used in accordance with the ETF's investment objectives and strategies, during certain market conditions they may accelerate the risk that an investment in units decreases in value.

Quick facts

Date ETF started:	November 19, 2009	Fund manager:	Global X Investments Canada Inc.

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 10 completed calendar years. The ETF dropped in value in 3 of the 10 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 10 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	14.3%	April 30, 2021	Your investment would rise to \$1,143
Worst return	-22.7%	March 31, 2020	Your investment would drop to \$773

Average return

As at March 31, 2024, a person who invested \$1,000 in the fund 10 years ago now has \$2,105. This works out to an annual compound return of 7.7%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are seeking long term capital appreciation in all market cycles
- are comfortable with exposure to equities, fixed income, commodities and currencies
- are comfortable with an ETF that may employ leverage.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 1.22% of its value. This equals \$12.20 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	1.08%
Trading expense ratio (TER) These are the ETF's trading costs.	0.14%
ETF expenses	1.22%

Performance Fee

The ETF pays to the Manager a performance fee, if any, equal to 20% of the amount by which the performance of the ETF, at any date on which the fee is payable, (i) exceeds a "high water mark" and (ii) is greater than an annualized return of 5%. The performance fee is included in the MER set out above. For a full description of the performance fee of this ETF, see the ETF's prospectus.

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

What does the ETF invest in?

The ETF seeks to replicate, to the extent possible and net of expenses, the performance of an index that is designed to provide exposure to the performance of global publicly listed companies engaged in the production and development of semiconductors and semiconductor equipment. Currently, the ETF seeks to replicate the performance of the Solactive Capped Global Semiconductor Index, net of expenses. The ETF seeks to hedge the U.S. dollar value of its portfolio to the Canadian dollar at all times.

Investment mix (March 31, 2024)

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **High**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 2 years.

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 2 completed calendar years. The ETF dropped in value in 1 of the 2 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 2 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	28.8%	March 31, 2023	Your investment would rise to \$1,288
Worst return	-26.8%	June 30, 2022	Your investment would drop to \$732

Average return

As at March 31, 2024, a person who invested \$1,000 in the ETF at inception now has \$1,514. This works out to an annual compound return of 16.1%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are looking for exposure to global, publicly-listed companies involved in the production and development of semiconductors and semiconductor equipment
- can handle the ups and downs of the stock market.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.70% of its value. This equals \$7.00 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.64%
Trading expense ratio (TER) These are the ETF's trading costs.	0.06%
ETF expenses	0.70%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

For more information

Contact Global X Investments Canada Inc. or your representative for a copy of the ETF's prospectus and other disclosure documents. These documents and the ETF Facts make up the ETF's legal documents.

This document contains key information you should know about Global X Uranium Index ETF. You can find more details about this exchange traded fund (ETF) in its prospectus. Ask your representative for a copy, contact Global X Investments Canada Inc. at info@globalx.ca or 1-866-641-5739, or visit www.globalx.ca.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

Prior to the opening of trading on May 1, 2024, the name of the ETF has changed from Horizons Global Uranium Index ETF to Global X Uranium Index ETF.

This ETF is an "alternative mutual fund" as defined in National Instrument 81-102 Investment Funds. The ETF has the ability to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific features that differentiate this ETF from other types of mutual funds may include the ability to concentrate investments, use of derivatives and the use of leverage. While these strategies will only be used in accordance with the ETF's investment objectives and strategies, during certain market conditions they may accelerate the risk that an investment in units decreases in value.

Quick facts

Date ETF started:	May 15, 2019	Fund manager:	Global X Investments Canada Inc.
Total value on March 31, 2024:	\$84.3 Million	Portfolio manager:	Global X Investments Canada Inc.
Management expense ratio (MER):	0.99%	Distributions:	Quarterly (if any)

Trading information (12 months ending March 28, 2024)

Ticker symbol:	HURA	Average daily volume:	14,215 units
Exchange:	Toronto Stock Exchange (TSX)	Number of days traded:	252 out of 252 trading days

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

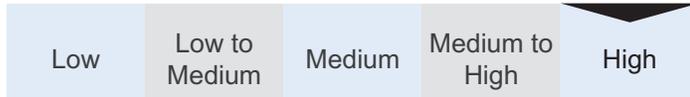

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETF's with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Global X Investments Canada Inc. has rated the volatility of this ETF as **Low to Medium**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how units of the ETF have performed over the past 10 years.

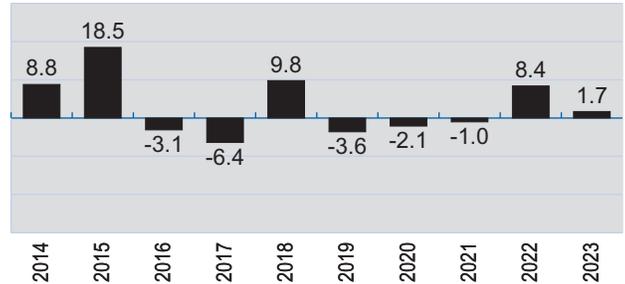

Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the US dollar relative to Canadian dollar.

¹ Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This chart shows how units of the ETF performed in each of the past 10 completed calendar years. The ETF dropped in value in 5 of the 10 years.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past 10 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	9.3%	January 31, 2015	Your investment would rise to \$1,093
Worst return	-4.8%	April 30, 2015	Your investment would drop to \$952

Average return

As at March 31, 2024, a person who invested \$1,000 in the fund 10 years ago now has \$1,310. This works out to an annual compound return of 2.7%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can effect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- want exposure to the U.S. dollar relative to the Canadian dollar
- are comfortable with currency exposure.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of December 31, 2023, the ETF's expenses were 0.61% of its value. This equals \$6.10 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER) This is the total of the ETF's management fee and operating expenses.	0.60%
Trading expense ratio (TER) These are the ETF's trading costs.	0.01%
ETF expenses	0.61%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.
