

Tantalus Named a Top 25 Grid Modernization Vendor by Frost & Sullivan

*Independent research firm validates Tantalus' innovative, data-centric approach
to distribution grid modernization*

Burnaby, BC – December 11, 2025 — Tantalus Systems (TSX: GRID, OTCQX: TGMPPF) (“Tantalus” or the “Company”), a technology company dedicated to helping utilities modernize their distribution grids by harnessing the power of data, today announced that it has been named a Top 25 vendor by independent research firm Frost & Sullivan in their latest report, “Top 25 for 2025: Companies to Action in the Power Grids Industry, Global, 2025.”

This year’s report focused on the growing demand for innovative grid modernization solutions and included companies from across five segments: grid operation solutions, grid flexibility solutions, grid data intelligence solutions, grid communications & security, and grid enhancing technologies. Frost & Sullivan selected Tantalus as one of its Top 25 vendors, noting its data-centric architecture, advanced AMI solutions, grid data management capabilities, AI-driven analytics, and advanced load and DER management.

“Tantalus’ data-centric approach to distribution grid modernization stands out as a highly differentiated and innovative approach,” said Jonathan Robinson, Global Power and Energy Research Leader for Frost & Sullivan. “Our research team is seeing increased market demand for grid modernization solutions, and Tantalus’ portfolio of data-centric solutions and commitment to sustained innovation is ideally suited to meet that demand.”

The report also noted that key success factors for Tantalus included its data-centric technology architecture, the Tantalus Grid Modernization Platform™ (TGMP™), as well as the Company’s innovative TRUSense Gateway™ solution, a multi-purpose device that can be installed in any ANSI meter socket to create a secure communication pathway via a fiber, ethernet or cellular network. Tantalus’ steady track record of continuous innovation and product launches, strong market penetration and compelling growth opportunities were also noted as particular strengths.

“Tantalus is proud to be included as a Top 25 grid modernization vendor in Frost & Sullivan’s report,” said Peter Londa, President & CEO of Tantalus. “Our overall objective is to help utilities achieve measurable and immediate value from their grid modernization investments while laying a foundation to support future innovation. This research further validates our vision and proven track record for helping utilities harness the power of data to achieve better outcomes for their communities.”

About Tantalus Systems Holding Inc. (TSX: GRID) (OTCQX: TGMPPF)

Tantalus is a technology company dedicated to helping utilities modernize their distribution grids by harnessing the power of data across all their devices and systems deployed throughout the entire distribution grid. The company offers a grid modernization platform across multiple levels: intelligent connected devices, communications networks, data management, enterprise applications and analytics. Tantalus’ solutions provide utilities with the flexibility they need to get the most value from existing infrastructure investments while leveraging advanced capabilities to plan for future requirements. Tantalus’ technology is grounded in a data-centric approach that is designed to help

utilities find the most cost-effective path to grid modernization with the least risk. Ultimately, Tantalus delivers Unified Intelligence to utilities, through which they can leverage data and insights across their entire grid, no matter what devices, systems or vendors they choose to work with.
