INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
First Helium Inc.

Opinion

We have audited the accompanying consolidated financial statements of First Helium Inc. (the "Company"), which comprise the consolidated balance sheets as at March 31, 2025 and 2024, and the consolidated statements of loss and comprehensive loss, changes in shareholders' equity, and cash flows for the years then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2025 and 2024, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained in our audit is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 2 of the consolidated financial statements, which indicates that the Company incurred a net loss of \$6.7 million during the year ended March 31, 2025 and, as of that date, the Company's current liabilities exceeded its current assets by \$2.5 million. As stated in Note 2, these events and conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current year ended. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the Material Uncertainty Related to Going Concern section, we have determined the matters described below to be the key audit matters to be communicated in our auditor's report.

Assessment of Impairment Indicators of Exploration and Evaluation Assets ("E&E Assets")

As described in Note 5 to the consolidated financial statements, the carrying amount of the Company's E&E Assets was \$14,194,362 as of March 31, 2025. As more fully described in Note 3 to the consolidated financial statements, management assesses E&E Assets for indicators of impairment at each reporting period.

The principal considerations for our determination that the assessment of impairment indicators of the E&E Assets is a key audit matter are that there was judgment made by management when assessing whether there were indicators of impairment for the E&E Assets, specifically relating to the assets' carrying amount which is impacted by the Company's intent and ability to continue to explore and evaluate these assets. This in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures to evaluate audit evidence relating to the judgments made by management in their assessment of indicators of impairment that could give rise to the requirement to prepare an estimate of the recoverable amount of the E&E Asset.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. Our audit procedures included, among others:

- Evaluating management's assessment of impairment indicators.
- Evaluating the intent for the E&E Assets through discussion and communication with management.
- Reviewing the Company's recent expenditure activity and expenditure budgets for future periods.
- Reviewing the classification of E&E Assets additions.
- Obtaining, on a test basis, confirmation of title to ensure mineral rights underlying the E&E Assets are in good standing.

Assessment of Impairment Indicators of Property, Plant, and Equipment ("PP&E Assets"):

As described in Note 6 to the consolidated financial statements, the carrying amount of the Company's PP&E Assets was \$684,207 as of March 31, 2025. As more fully described in Note 3 to the consolidated financial statements, management assesses PP&E Assets for indicators of impairment at each reporting period.

The principal considerations for our determination that the assessment of impairment indicators of the PP&E Assets is a key audit matter are that there was judgment made by management when assessing whether there were indicators of impairment for the PP&E Assets, specifically relating to the assets' carrying amount which is impacted by the Company's intent and ability to continue to develop and produce resources from these assets. This in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures to evaluate audit evidence relating to the judgments made by management in their assessment of indicators of impairment that could give rise to the requirement to prepare an estimate of the recoverable amount of the PP&E Assets.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. Our audit procedures included, among others:

- Evaluating management's assessment of impairment indicators, including the decision not to prepare and file a Statement of Reserves Data and Other Information, as provided for in the provisions of the National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities.
- Reviewing management's identification of cash generating units ("CGU's") and verifying the carrying amounts.
- Reviewing management's determination of the recoverable amount for the relevant CGU's.
- Recalculating impairments, depletion and ending balances.

Other Information

Management is responsible for the other information. The other information obtained at the date of this auditor's report includes Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

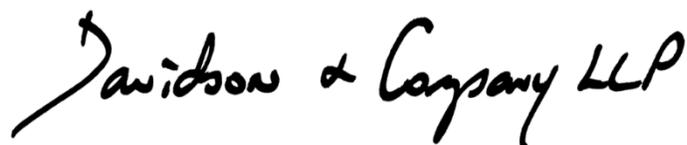

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.
- We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current year ended and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Daniel Nathan.

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

1. REPORTING ENTITY

First Helium Inc. ("First Helium" or the "Company") is a company focused on the exploration, development, and production of helium across western Canada. Petroleum and natural gas are produced as part of its operations. The Company was incorporated under the laws of the Province of British Columbia on May 10, 2016. The address of the Company's corporate office 550 - 800 West Pender Street, Vancouver, British Columbia, V6C 2V6.

2. BASIS OF PRESENTATION AND GOING CONCERN

The business of exploring for helium and petroleum and natural gas involves a high degree of risk and there can be no assurance that planned exploration and development programs will result in profitable helium operations. The continuance of the Company is dependent upon completion of the exploration and development properties, the discovery of economically recoverable reserves, and the ability of the Company to obtain necessary financing to complete the development and future profitable production or, alternatively, upon disposition of such property at a profit. Changes in future conditions could require material write downs of the carrying values of the Company's assets.

These consolidated financial statements have been prepared in accordance with the IFRS issued by the International Accounting Standard Board ("IASB"). A summary of the material accounting policies applied in the financial statements is presented in Note 3. These consolidated financial statements include the accounts of First Helium together with its wholly-owned subsidiary, First Helium Alberta Inc. All intercompany balances and transactions have been eliminated on consolidation.

These consolidated financial statements are presented in Canadian dollars, except when otherwise indicated. The financial statements were approved by the Company's Board of Directors on July 29, 2025.

Going Concern

These consolidated financial statements have been prepared on a going concern basis which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business. The Company earned \$0.3 million in revenues during the year ended March 31, 2025 and incurred a net loss of \$6.7 million including non-cash expenses of \$4.8 million. As at March 31, 2025, the Company has a working capital deficit of \$2.5 million (March 31, 2024 – negative working capital of \$0.7 million). Management will need additional debt or equity financing for its development activities. These material uncertainties may cast significant doubt on the Company's ability to continue as a going concern.

The Company's ability to continue as a going concern is dependent upon its ability generate net cash from operating activities and/or raise additional financing to meet its ongoing operational requirements and to fund its exploration and development programs. These consolidated financial statements do not reflect the adjustments to the carrying values and classification of assets and liabilities should the Company were unable continue as a going concern. Such adjustments could be material.

Evolving Demand for Energy - Changing Regulation

Emission, carbon, and other regulations impacting climate and climate-related matters are dynamic and constantly evolving. With respect to environmental, social, and governance ("ESG") and climate reporting, the International Sustainability Standards Board has issued two IFRS Sustainability Disclosure Standards with the aim to develop sustainability disclosure standards that are globally consistent, comparable, and reliable. In addition, the Canadian Securities Administrators have issued a proposed National Instrument 51-107 Disclosure of Climate-related Matters. The cost and financial reporting impact of compliance with these standards, and others that may be developed or evolve over time, has not yet been quantified by the Company.

3. MATERIAL ACCOUNTING POLICIES

Revenue Recognition

Revenue associated with the sales of petroleum and natural gas is recognized when control of the product is transferred to the customer. The Company's commodity sales contracts represent a series of distinct transactions. Revenue is measured at the consideration specified in the contracts and represents amounts receivable for goods or services provided in the normal course of business. First Helium considers its performance obligations to be satisfied and control to be transferred when all the following conditions are satisfied:

- the Company has transferred title and physical possession of the goods to the buyer;
- the Company has transferred the significant risks and rewards of ownership of the goods to the buyer; and
- the Company has the present right to payment.

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

Transportation

Costs incurred by First Helium for the transportation of crude oil from wellhead to the point of where control transfers to the customer is recognized as the service is provided. These costs are considered transportation costs if they involve transporting saleable product. Transportation of emulsion or unprocessed gas are considered operating costs.

Joint arrangements

The Company conducts a portion of its activities jointly with others. These financial statements reflect only the Company's proportionate interest in such activities.

Exploration and evaluation ("E&E")

Costs incurred prior to obtaining the legal right to explore (pre-exploration costs) are expensed in the period in which they are incurred as E&E expense.

Costs incurred after the legal right to explore is obtained are initially capitalized by exploration area. Exploration and evaluation assets consist of the expenditures incurred in an area where technical feasibility and commercial viability of the reserves has not yet been determined. These costs include undeveloped land, costs of drilling exploratory wells, geological and geophysical costs and other directly attributable costs thereon and are capitalized on an area-by-area basis.

Exploration and evaluation assets are assessed for indicators of impairment at each reporting date, or any time facts and circumstances suggest that the carrying amount exceeds the recoverable amount. The impairment of exploration and evaluation assets, and any eventual reversal thereof, is recognized in the statement of profit or loss. The technical feasibility and commercial viability of extracting a mineral resource is considered to be determinable when proved or probable reserves are determined to exist.

Property, plant and equipment ("PP&E")

Items of property, plant and equipment, which include resource development and production assets, are measured at cost less accumulated depletion and depreciation and accumulated impairment losses. PP&E are capitalized on an area-by-area basis and include costs associated with the development of petroleum and natural gas properties as well as corporate assets. Gains and losses on the dispositions of PP&E are determined by comparing the sale proceeds with the carrying amount of the asset and are recognized in earnings.

Depletion and depreciation

PP&E relating to the development of petroleum and natural gas properties are componentized into groups of assets ("areas") with similar useful lives for the depletion calculation. The net carrying value is depleted using the unit-of-production method, calculated as the ratio of production in the year compared to the related proved and probable reserves, taking into account estimated future development costs necessary to bring those reserves into production. These estimates are reviewed by Company reserves engineers at least annually.

Depreciation of corporate assets is calculated on a straight-line basis over the useful lives of the assets. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term.

Impairment

The Company's PP&E is grouped into cash generating units ("CGUs" or "areas") for purposes of impairment testing. CGUs or areas are groups of assets that generate cash inflows independently of other assets held by the Company. Geological formation, product type, geography and internal management are key factors considered when grouping the Company's oil and gas assets into areas.

The carrying amount of PP&E is reviewed for impairment indicators at each reporting date, or any time when changes in circumstances indicate that the carrying amounts may not be recoverable. The recoverable amount is the greater of the area's fair value less cost to sell and the value-in-use. Fair value less costs to sell is the estimated amount for which the asset could be sold in an arm's length transaction. Value-in-use is estimated using the discounted present value of the Company's proved plus probable reserves. Discounted future net cash flows are based on forecasted commodity prices and costs over the expected economic life of reserves and discounted using market-based rates.

An impairment expense is recognized for the amount by which the carrying amount exceeds the recoverable amount. Impairment expense is reversed when there has been a subsequent increase in the recoverable amount, but only to the extent of what the carrying amount would have been had no impairment been recognized.

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

Asset retirement obligations

The Company recognizes a provision for future obligations associated with the retirement of petroleum and natural gas properties. The provision is recorded in the period in which it is incurred, with a corresponding increase in the carrying amount of the related asset. The estimated future costs are discounted using a risk-free interest rate. The capitalized costs are depleted along with the related property, plant and equipment. The liability amount is increased each period due to the passage of time and the amount of accretion is expensed in the period. Periodic revision to the liability's specific discount rate, estimated timing of cash flows, or the original estimated undiscounted cost can result in an increase or decrease to asset retirement obligation and the related asset in PP&E. Actual expenditures incurred are recorded against the accumulated obligation.

Income taxes

The Company follows the liability method for accounting for income taxes, where deferred income taxes are recorded for the effect of any temporary difference between the accounting and income tax basis of an asset or liability, using the substantively enacted income tax rates expected to apply when the assets are realized, or liabilities are settled. Deferred income tax balances are adjusted to reflect changes in income tax rates that are substantively enacted with the adjustment recognized in earnings in the period that the change occurs except when it relates to items charged or credited directly to equity, in which case the deferred income tax effect is recorded in equity.

Share capital

The Company's common shares are classified as equity. Transaction costs directly attributable to the issuance of common shares are recognized as a deduction from equity, net of any income taxes.

Financial instruments

Initial recognition and measurement

Non-derivative financial assets within the scope of IFRS 9 are classified and measured as "financial assets at fair value", as either fair value through profit or loss ("FVPL") or fair value through other comprehensive income ("FVOCI"), and "financial assets at amortized costs", as appropriate. The Company determines the classification of financial assets at the time of initial recognition based on the Company's business model and the contractual terms of the cash flows. All financial assets are recognized initially at fair value plus, in the case of financial assets not at FVPL, directly attributable transaction costs on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

Trade receivables or debt securities issued are initially recognized when they are originated. All other financial asset and financial liabilities are recognized when the Company becomes a part to the contractual provisions of the instrument. A financial asset or financial liability is initially measured at fair value. Financial liabilities are measured at amortized cost or FVOCI. A financial liability is classified as FVPL if it is classified as held for trading, it is a derivative, or it is designated as such on initial recognition.

(a) Amortized cost

Accounts receivable and accounts payable and accrued liabilities are measured at amortized cost. These financial instruments are initially measured at fair value and subsequently are recorded at amortized cost using the effective interest method.

(b) Impairment of financial assets

Impairment of financial assets is determined by measuring the assets' expected credit loss ("ECL"). Accounts receivable are due within one year and are not considered to have a significant financing component and a lifetime ECL is measured at the date the accounts receivable is initially recognized.

Related parties

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

Reclassification

Certain prior period financial information has been reclassified to conform with the current year presentation, with no impact on net assets, and net and comprehensive loss.

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

New accounting standards

On April 1, 2024, the Company adopted amendments to IAS 1 Presentation of financial statements regarding classification of liabilities as current or non-current. The amendment clarifies that the classification of liabilities as current or non-current should be based on rights that are in existence at the end of the reporting period. These amendments to IAS 1 did not have a material impact on the Company's financial statements.

Future Accounting Pronouncements

In May 2024, the IASB issued amendments to IFRS 9 Presentation and Disclosure in Financial Instruments and IFRS 7 Financial Instruments: Disclosures relating to settling financial liabilities using an electronic payment system and assessing contractual cash flow characteristics of financial assets. The amendments will be effective on January 1, 2026, but are not expected to have a material impact on the Company's financial statements.

In April 2024, the IASB issued IFRS 18 Presentation and Disclosure in Financial Statements ("IFRS 18"), which will replace IAS 1 and includes requirements for all entities applying IFRS Accounting Standards for the presentation and disclosure of information in the financial statements. IFRS 18 will introduce new totals, subtotals, and categories for income and expenses in the statement of Income (Loss), as well as requiring disclosure about management-defined performance measures and additional requirements regarding the aggregation and disaggregation of certain information. It will be effective on January 1, 2027, with earlier adoption permitted, and it must be adopted on a retrospective basis. The Company is currently evaluating the impact on its financial statements.

4. SIGNIFICANT JUDGEMENTS AND MANAGEMENT UNCERTAINTY

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities as at the date of the financial statements and the reported amounts of revenues and expenses for the period. The key sources of estimation uncertainty that have a significant risk of causing material adjustment to the carrying amounts of assets and liabilities are discussed below.

Recoverability of asset carrying values

Judgements are required to assess when impairment indicators exist and impairment testing is required. In determining the recoverable amount of assets, in the absence of quoted market prices, impairment tests are based on estimates of reserves, production rates, future oil and natural gas prices, future costs, discount rates, market value of land and other relevant assumptions.

The recoverable amount of a CGU or an area is estimated using the following information:

- The net present value of the before tax cash flows from proved plus probable reserves in each CGU, as estimated by the Company's independent reserves evaluator.

Key estimates used in determining cash flows from the Company's reserves include:

- Reserves - Assumptions that are valid at the time of reserve estimation may change significantly when new information becomes available. Changes in forward price estimates, production costs, required capital expenditures, the estimate of oil and gas in place, or recovery rates may change the estimated amount and value of the reserves.
- Crude oil and natural gas prices - Forward price estimates are used in the discounted cash flow model. These prices are adjusted for quality differentials, heat content and distance to market. Commodity prices can fluctuate for a variety of reasons including supply and demand fundamentals, inventory levels, exchange rates, weather, economic factors, geopolitical factors and in the longer term shifting needs of carbon based energy in response to climate change.
- Discount rate - The discount rate used to calculate the net present value of cash flows is based on estimates of an industry peer group weighted average cost of capital as appropriate for each area being tested. Changes in the general economic environment could result in significant changes to this estimate.

The application of the Company's accounting policy for exploration and evaluation assets requires management to make certain judgements as to future events and circumstances as to whether economic quantities of reserves have been found in assessing if technical feasibility and commercial reserves have been achieved.

Reserve estimates

Property, plant and equipment relating to the development of petroleum and natural gas properties are depleted using the unit-of-production method based on estimated proved and probable reserves determined using estimated future prices and costs. By their nature, these estimates of reserves, including geoscientific interpretation, production forecasts, future commodity prices and costs, and related future cash flows are subject to measurement uncertainty. The impact of changes in these factors on the financial statements of future periods could be material.

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

Abandonment costs

The provision for abandonment and reclamation is based on current legal and constructive requirements, technology, price levels and expected plans for remediation. Actual costs and cash outflows can differ from estimates because of changes in laws and regulations, public expectations, market conditions, discovery and analysis of site conditions and changes in technology.

Fair values

The estimated fair values of options and warrants calculated using the Black-Scholes model are based on significant assumptions such as volatility and expected term.

5. EXPLORATION AND EVALUATION ("E&E") ASSETS

Cdn\$	Worsley Helium	Worsley Oil	Southern AB	Total
Balance, March 31, 2023	9,921,627	-	1,313,152	11,234,779
Additions	205,522	-	-	205,522
Balance, March 31, 2024	10,127,149	-	1,313,152	11,440,301
Additions	3,290	4,063,923	-	4,067,213
Exploration asset impairment	-	-	(1,313,152)	(1,313,152)
Balance, March 31, 2025	10,130,439	4,063,923	-	14,194,362

E&E assets of \$14.2 million consist of the Company's undeveloped land and exploration projects that have yet to be established as technically feasible and commercially viable.

The Company opted not to acquire certain lands within the Seismic Review and Option Agreement entered into in fiscal 2022 with a large land holder in southern Alberta. The Company's technical team has deferred its geological and geophysical evaluation of the extended lands until additional financing are obtained. The impairment of exploration assets of \$1.3 million has been expensed at March 31, 2025 related to the Southern Alberta area.

6. PROPERTY, PLANT & EQUIPMENT ("PP&E")

Cdn\$	Worsley AB	Corporate	Total

Balance, March 31, 2025	(12,876,808)	(168,494)	(13,045,302)

Net carrying amount	Worsley AB	Corporate	Total
Balance, March 31, 2024	3,705,649	56,487	3,762,136
Balance, March 31, 2025	684,207	-	684,207

The calculation of depletion and depreciation expense for the year ended March 31, 2025 estimated future development costs of \$nil (March 31, 2024 - \$2.7 million) associated with proved and probable reserves in the core development area.

In the year ended March 31, 2024, the Company disposed of some surplus tangible equipment in the Worsley field for net proceeds of \$0.2 million, the equipment had a recorded value of \$0.4 million, with a loss on sale of \$0.2 million recorded in the consolidated income statement.

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

Impairment

The Company identified three cash generating units as of March 31, 2025 and 2024, based on the lowest level at which properties generate cash inflows while applying judgment to consider factors such as shared infrastructure, geographic proximity, similar exposures to market risk and materiality, and petroleum type. For the year ended March 31, 2025, the Company has determined that there were no indicators of impairment in Worsley Helium and Worsley Oil exploration assets.

For the year ended March 31, 2025, an impairment of \$2.9 million has been recorded in the Worsley oil assets in property plant and equipment based on certain proved and probable reserves being found to be not commercially viable. The balance remaining is reflective of the fair value of the property, plant and equipment remaining. Should the asset be developed at a later date, the impairment could be reversed.

7. ASSET RETIREMENT OBLIGATIONS

	March 31, 2025	March 31, 2024
Balance, beginning of year	1,240,236	1,241,299
Change in estimates	(43,414)	(40,706)
Liabilities incurred	176,108	-
ARO costs settled	(112,066)	-
Accretion expense	44,909	39,643
Balance, end of year	1,305,773	1,240,236
Expected to be incurred beyond one year	1,305,773	1,240,236

Abandonments are expected to occur between 2028 and 2045 and related costs will be funded mainly from the Company's cash provided by operating activities. The undiscounted amount required to settle the asset retirement obligations at March 31, 2025 is estimated to be \$1.4 million (as at March 31, 2024 – \$1.2 million). The liability for the expected cash flows, as reflected in the consolidated financial statements, has been inflated at 2.9% and discounted using a risk-free rate of 3.4% (March 31, 2024 – 3.0% and 3.4% respectively).

A long-term deposit is held with the Alberta Energy Regulator of \$0.5 million (March 31, 2024 - \$0.4 million), with interest received recorded in the consolidated income statement.

8. SHAREHOLDERS' EQUITY

Share capital

Authorized capital consists of an unlimited number of common shares ("common shares") with no par value.

As at March 31, 2025, there were no common shares (March 31, 2024 – 1,432,787) with attached warrants held in escrow (March 31, 2024 – 144,777). These shares and warrants had been subject to 36-month release schedule released upon listing and 15% released every six months. These have expired on July 12, 2024.

	Year ended March 31, 2025		Year ended March 31, 2024	
	Shares	Amount \$	Shares	Amount \$
Balance, beginning of period	87,059,353	\$ 23,768,250	87,059,353	\$ 21,403,822
Issued from private placement (a)	66,173,000	890,850	-	-
Subscription receivable (a)	-	-	-	2,417,800
Issued from private placement	60,666,671	2,730,000	-	-
Issuance costs	-	(255,267)	-	(53,372)
Balance, end of period	213,899,024	\$ 27,133,833	87,059,353	\$ 23,768,250

(a) On April 4, 2024, the Company closed the non-brokered private placement of 66,173,000 units at a price of \$0.05 per unit for gross proceeds of \$3,308,650. Each unit consists of one common share and one common share purchase warrant ("Warrant"). The 66,173,000 Warrant issued are exercisable at a price of \$0.075 per common shares and will expire April 4, 2027. The Warrants are not subject to acceleration. The proceeds will be used to fund asset development and general working capital. A total of 504,980 warrants were issued as share compensation for finders fees. Of the total subscriptions, \$1,985,000 was received from certain related parties. Of the subscription of \$3,308,650, cash of \$2,417,800 was received prior to March 31, 2024 with remaining \$890,850 received on closing April 4, 2024.

(b) On October 30, 2024, the Company closed a non-brokered private of 60,666,671 units at a price of \$0.06 per unit for gross proceeds of \$3,640,000. Each unit consists of one common share at a value of \$0.045 and one common share purchase warrant with a value of \$0.015. Each warrant is exercisable to acquire one share at the price of \$0.09 per share for a period of 36 months, expiring October 30, 2027. A total of 196,000 warrants

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

were issued as share compensation for finders fees. The Warrants are subject to acceleration. All securities issued pursuant to the Private Placement will be subject to a four-month hold period in accordance with applicable Canadian securities laws. The proceeds will be used for the development and exploration activities and for working capital and general corporate purposes.

- (c) A total of 21,900 has been recorded as non-cash consideration for share issuance in the year ended March 31, 2025.

Warrants

The Company uses the residual approach when allocating the fair value of the share purchase warrants issued in conjunction with the offering of units through a private placement. The Company determines the fair value of the common share, and the residual value is allocated to the share purchase warrant for unit offerings that contain a common share and a share purchase warrant.

	Number of warrants	WA exercise price
Balance, March 31, 2023	29,237,705	\$ 0.410
Expired	(16,751,005)	\$ 0.500
Balance, March 31, 2024	12,486,700	\$ 0.300
Granted	66,677,980	\$ 0.075
Granted	60,862,671	\$ 0.090
Expired	(12,486,700)	\$ 0.300
Balance, March 31, 2025	127,540,651	\$ 0.082

Warrants by expiry date	Number of Warrants	Weighted average remaining (year)	Exercise Price per Warrant
2027-APR-04	66,677,980	2.0	\$ 0.075
2027-OCT-30	60,862,671	2.6	\$ 0.090
Balance	127,540,651	2.3	\$ 0.082

On April 4, 2024, the Company issued 504,980 warrants to various agents pursuant to the equity financing. On October 30, 2024, the Company issued 196,000 warrants as share compensation for finders' fees. The Black-Scholes option-pricing model was used to determine the fair value of warrants issued using the following assumptions:

	April 2024	October 2024
Exercise price (\$)	0.075	0.09
Expected life (years)	3	3
Risk-free interest (%)	3.9	3.5
Dividend yield (%)	-	-
Expected volatility (%)	96.0	95
Forfeiture rate (%)	-	-

Options

Pursuant to the Company's stock option plan, the Company may grant options to purchase common shares to officers, directors, employees, and consultants to a maximum of 10% of outstanding common shares of the Company. Options have expiry terms set by the Board set at the time of grant and shall not be more than ten years after the grant date. Vesting terms are as below. The Board may alter, amend or revise the terms and conditions of the stock option plan or any outstanding stock options. As at March 31, 2025, a balance of 12,750,000 of stock options were outstanding with an average remaining life of 3.5 years (March 31, 2024 - 5,925,000). Prices per option are in the following table. Options issued prior to calendar 2025 vest 25% on grant date and 25% at each anniversary. On January 21, 2025, the Company granted 8,000,000 stock options to certain officers, directors, and consultants with exercise price of \$0.09 and valid until January 21, 2030. This tranche of options vest immediately. The following table summarizes the Company's stock option plan activity.

Notes to the Consolidated Financial Statements

Share-based compensation

The Company accounts for its share-based compensation plan using the fair value method. Share-based compensation is expensed over the vesting period with a corresponding increase to contributed surplus. Options as discussed above were granted in the year ended March 31, 2025 (none for the year ended March 31, 2024). During the year ended March 31, 2025, the Company recorded a share-based compensation expense of \$0.3 million (\$0.2 million for year ended March 31, 2024).

9. FINANCIAL INSTRUMENTS

Classification and Measurement

The Company's financial instruments are carried at amortized costs. The Company's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities. As at March 31, 2025 and March 31, 2024, no significant differences existed between the carrying value of these financial instruments and their estimated fair values.

The Company classifies the fair value of its financial instruments according to the following hierarchy based on the amount of observable inputs used to value the instrument.

- Level 1 – Quoted prices are available in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices in active markets in Level 1, either directly or indirectly observable.
- Level 3 – Valuations in this level are those with inputs for asset or liabilities that are not based on observable market data.

Risks Associated with Financial Assets and Liabilities

The Company is exposed to a number of different financial risks arising from normal course business exposures, as well as the Company's use of financial instruments. These risk factors include market risks relating to commodity prices, foreign currency risk and interest rate risk, as well as credit and liquidity risks.

(a) Commodity price risk

Commodity price risk is the risk that fair value of future cash flows will fluctuate with changes in commodity prices. The Company is engaged in helium, oil, and gas development and production activities in Canada and as a result has significant exposure to commodity price risk. Commodity prices for petroleum and natural gas are impacted by the availability of egress out of Western Canada, the relationship between the Canadian dollar and the United States dollar, and world economic events that dictate the levels of supply and demand. The Company may manage the risks associated with changes in commodity prices by entering into risk management contracts. There are no risk management contracts in place as of March 31, 2025.

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

(b) Currency risk

Currency risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates. Substantially all of the Company's petroleum revenues are conducted in Canada and are denominated in Canadian dollars. Canadian commodity prices are influenced by fluctuations in the Canadian to United States dollar exchange rate.

(c) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to the interest rate fluctuations on cash and cash equivalents. The Company may hold a portion of cash in short-term investments that earn variable rate of interest as part of its investment policy. All other financial liabilities are non-interest bearing. If interest rates had changed by 1% (i.e. 100 basis points), assuming all other variables remain constant, the impact to net earnings would be immaterial.

(d) Credit risk

Credit risk is the potential financial loss to the Company if customers or counterparties to a financial instrument are unable to meet their contractual obligations. The majority of credit exposure on accounts receivable pertains to revenues and commodity tax receivable. The collection of accounts receivable may be affected by counterparty-specific issues or industry factors such as commodity price fluctuations and other economic conditions. Management believes the risk is mitigated by entering into transactions with reputable counterparties and partners when possible. When determining whether past due accounts are collectible, management assesses the credit worthiness and past payment history of the counterparties, as well as the nature of the past due amount.

At March 31, 2025, none of the total outstanding accounts receivable pertain to receivables from petroleum purchasers (March 31, 2024 – 70%) as the production had been shut-in. As of March 31, 2025, none of the accounts receivable balance has been outstanding greater than 90 days (March 31, 2024 – \$11,308) with all amounts estimated to be collectable.

As at:	March 31, 2025	March 31, 2024
Oil and gas receivable	-	83,430
GST and other receivable	220,989	36,171
Accounts receivable	220,989	119,601

10. PETROLEUM REVENUE

The Company sells its production pursuant to variable-price contracts. The transaction price for these contracts is based on commodity prices adjusted for quality and other factors. The following table provides a summary of its revenue streams:

	Year ended March 31, 2025	2024
Light oil	292,999	1,130,809
Total	292,999	1,130,809

11. RELATED PARTY TRANSACTIONS

Key management personnel include officers and directors of the Company. The Company also provides compensation through participation in the stock option plan.

	Year ended March 31, 2025	2024
Accounting and compliance ⁽ⁱ⁾	138,000	138,000
Management fees ⁽ⁱⁱ⁾	547,500	792,500
Share-based compensation	278,763	176,326
Total	964,263	1,106,826

(i) Accounting and compliance fees were paid to a company controlled by a spouse of an officer of the Company in the amount of \$138,000 for the year ended March 31, 2025 (year ended March 31, 2024 - \$138,000).

(ii) For the year ended March 31, 2025, the Company incurred \$547,500 (year ended March 31, 2024 - \$792,500) to various officers and directors of the Company.

The balance payable to related parties as at March 31, 2025 was \$0.3 million (as at March 31, 2024 - \$0.4 million).

Notes to the Consolidated Financial Statements

For the year ended March 31, 2025 and 2024

(All amounts in Canadian dollars unless otherwise indicated)

12. INCOME TAX

Deferred income tax assets are recognized to the extent that there is taxable temporary difference to offset and/or that it is probable they will be recognized in the near future. At March 31, 2025, net deferred income tax assets of \$5.6 million have not been recognized as estimated future taxable income may not support the utilization of the deferred income tax assets. Accordingly, the Company has not recognized a deferred tax asset on \$6.1 million related to the non-capital losses. The tax provision differs from the amount computed by applying the combined Canadian federal and provincial statutory income tax rates to income before deferred income tax expense as follows.

For the years ended	March 31, 2025	March 31, 2024
Net loss before taxes	(6,745,755)	(3,195,555)
Canadian income tax rate ^(a)	23.00%	23.00%
Expected income tax (recovery)	(1,551,524)	(734,978)
Effect of taxes resulting from:		
Non-deductible items	1,137,268	88,301
Valuation allowance	414,256	646,677
Income tax expense	-	-

As at:	March 31, 2025	March 31, 2024
Deferred income tax assets:		
Asset retirement obligations	300,328	285,254
Non-capital loss carryforward ^(a)	563,751	1,339,778
Deferred income tax liabilities:		
Capital assets in excess of tax values ^(a)	(864,079)	(1,625,032)

(a) Deferred income tax assets are recognized to the extent that there are taxable temporary differences to offset and/or that it is probable that they will be recognized in the near future. Non-capital loss carry forward of \$26.4 million expire in the years 2037 to 2045.

13. FINANCIAL LEASE

The Company had an office lease agreement to November 30, 2024, after which the lease is month to month. The lease was recorded as a financial liability and a right of use asset in the interim condensed consolidated balance sheet.

	March 31, 2025	March 31, 2024
Balance, start of year	60,627	140,986
Payments	(63,296)	(94,944)
Accretion expense	2,669	14,585
Balance, end of period	-	60,627

14. SUPPLEMENTAL CASH FLOW INFORMATION

	Year ended March 31, 2025	2024
Changes in non-cash working capital:		
Accounts receivable	(101,388)	58,067
Prepays and deposits	61,779	(219,224)
Accounts payable and accrued liabilities	2,540,231	(118,000)
	2,500,622	(279,157)
Operating activities	(216,375)	(377,332)
Investing activities	2,716,993	98,175
Total	2,500,622	(279,157)

Interest income received in the year ended March 31, 2025 was \$16,519 (interest received \$26,136 for the year ended March 31, 2024).

15. SEGMENTED INFORMATION

The Company operates in one reportable segment, being the acquisition, exploration, development and production of helium, petroleum and natural gas projects. All of the Company's non-current assets and operations are located in Canada.
