**Notice of No Auditor Review**

Pursuant to National Instrument 51-102, Part 4, subsection 4.3(3)(a), the accompanying unaudited condensed consolidated interim financial statements have been prepared by and are the responsibility of the Company's management. The Company's independent auditors have not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditor.

## MANAGEMENT'S REPORT TO THE SHAREHOLDERS

The accompanying unaudited condensed consolidated interim financial statements have been prepared by management and approved by the Board of Directors of the Company. Management is responsible for the information and representations contained in these unaudited condensed consolidated interim financial statements and the accompanying Management's Discussion and Analysis. The unaudited condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS).

To assist management in discharging these responsibilities, the Company maintains a system of procedures and internal controls which are designed to provide reasonable assurance that its assets are safeguarded, that transactions are executed in accordance with management's authorization, and that the financial records form a reliable base for preparation of accurate and timely financial information.

The Board of Directors ensures that management fulfills its responsibilities for financial reporting and internal control. The Board of Directors exercises this responsibility through an Audit Committee. The Audit Committee has reviewed and discussed the unaudited condensed consolidated interim financial statements, including the notes thereto, with management. The unaudited condensed consolidated interim financial statements have been approved by the Board of Directors on the recommendation of the Audit Committee.

**(Unaudited - Expressed in Canadian Dollars)**  
**July 31, 2022 and July 31, 2021**

**1. CORPORATE INFORMATION AND NATURE OF OPERATIONS**

Volt Carbon Technologies Inc. (formerly Saint Jean Carbon Inc.) incorporated provincially in Alberta, and extra provincially Saskatchewan, Manitoba, Quebec and British Columbia has shares listed on the TSX Venture Exchange ("TSX-V").

The Company is in the process of developing mineral properties and developing battery technology through its wholly-owned subsidiary Solid Ultrabattery Inc. The Company also generates incidental revenue by processing raw materials through its mill.

To date, the Company has not earned significant revenues and is considered to be in the exploration stage of mining and development stage for developing the battery technology.

**2. BASIS OF PRESENTATION AND GOING CONCERN**

Statement of compliance

These unaudited condensed consolidated interim financial statements were approved by the Board of Directors on September 21, 2022.

The unaudited condensed consolidated interim financial statements were prepared using the same accounting policies and methods as those used in the Corporation's financial statements for the year ended October 31, 2021. The unaudited condensed consolidated interim financial statements are in compliance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34"). Accordingly, certain information and disclosure normally included in annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB"), has been omitted or condensed. The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Accounts that require significant judgments, estimates and assumptions as the basis for determining the stated amounts are consistent with those applied and disclosed in the Corporation's financial statements for the year ended October 31, 2021.

These unaudited condensed consolidated interim financial statements should be read in conjunction with the Corporation's financial statements for the year ended October 31, 2021 which were prepared in accordance with IFRS.

a) Going concern

These unaudited condensed consolidated interim financial statements have been prepared on a going-concern basis which assumes that the Company will be able to realize assets and discharge liabilities in the normal course of business for the foreseeable future. Accordingly, it does not give effect to adjustments, if any, that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities in other than normal course of business and at amounts which may differ from those shown in the consolidated financial statements.

**VOLT CARBON TECHNOLOGIES INC. (FORMERLY SAINT JEAN CARBON INC.)**  
**Notes to the condensed consolidated interim financial statements**  
**(Unaudited - Expressed in Canadian Dollars)**  
**July 31, 2022 and July 31, 2021**

---

**2. BASIS OF PRESENTATION AND GOING CONCERN (continued)**

As at July 31, 2022, the Company has incurred a loss from operations of \$2,127,717, has a working capital deficit of \$932,982, negative cash flow from operations of \$1,642,439 and an accumulated deficit of \$27,705,393. As the Company currently has no significant revenue generating activity, it is dependent upon obtaining additional equity and debt financing to fund its research activities and continue as a going concern. During the period, the Company raised proceeds of \$2,500,000 through the issuance of shares through private placement, \$100,000 from the exercise of stock options, \$159,188 from the exercise of warrants and proceeds of \$480,000 from debt financing.

This condition, along with other matters as set forth in the above paragraph, indicates the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

b) Measurement basis

These unaudited condensed consolidated interim financial statements are prepared on the historical cost basis except for certain financial instruments, which are measured at fair value. The Company's presentation and functional currency is Canadian dollars.

c) Basis of consolidation

Subsidiaries consist of entities over which the Company has rights, or is exposed, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Subsidiary's financial statements are included in the consolidated financial statements from the date that control commences until the date that control ceases. Control is established when the Company has the power to govern the financial and operating policy decisions of the entity so as to obtain benefits from the entity's activities, and generally exists where more than 50% of the voting power of the entity is held by the Company. The subsidiary's year end and accounting policies are aligned with those adopted by the Company.

These unaudited condensed consolidated interim financial statements include the accounts of the Corporation and its wholly-owned subsidiary Solid UltraBattery Inc. All inter-company balances and transactions have been eliminated on consolidation.

**3. SIGNIFICANT ACCOUNTING POLICIES**

The unaudited condensed consolidated interim financial statements were prepared using the same accounting policies and methods as those used in the Company's financial statements for the year ended October 31, 2021.

**VOLT CARBON TECHNOLOGIES INC. (FORMERLY SAINT JEAN CARBON INC.)**

**(Unaudited - Expressed in Canadian Dollars)**  
**July 31, 2022 and July 31, 2021**

---

**4. RECENT ACCOUNTING PRONOUNCEMENTS**

At the date of authorization of these unaudited condensed consolidated interim financial statements, the IASB and IFRIC have issued the following new and revised standards, amendments and interpretations which are not yet effective during the period ended July 31, 2022. The following new or amended standards are effective for year-ends starting after January 1, 2023 and have not yet been adopted by the Company.

- (a) IAS1 “Presentation of financial statements” – amendments to the classification of liabilities as current. The objectives of the amendments are to provide clarification on the classification of liabilities and state explicitly than a company classifies a liability as current when it does not have the right at the end of the reporting period to defer settlement of the liability for at least twelve months after the reporting period.
- (b) IAS8 “Accounting Policies, Changes in Accounting Estimates and Errors” – amendment. The amendment provides a definition of accounting estimates and provides clarifications to help distinguish between accounting policies and accounting estimates. Accounting estimates are defined as monetary amounts that are subject to measurement uncertainty.

The Company does not anticipate that adoption of the above standards will have significant financial reporting implications.

**5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS**

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk to cause material adjustment to the carrying amounts of assets and liabilities recognized in these unaudited condensed consolidated interim financial statements within the next financial year are discussed below:

**Impairment of non-financial assets**

Exploration and evaluation assets and equipment assets are assessed for impairment whenever events or changes in circumstances indicate that their carrying amounts exceed their recoverable amounts. The assessment requires estimates and assumptions such as discount rates, exchange rates, commodity prices, future capital requirements and future operating performance.

**VOLT CARBON TECHNOLOGIES INC. (FORMERLY SAINT JEAN CARBON INC.)**  
**Notes to the condensed consolidated interim financial statements**  
**(Unaudited - Expressed in Canadian Dollars)**  
**July 31, 2022 and July 31, 2021**

**5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)**

**Fair value of options**

The fair value of equity instruments is subject to the limitations of the Black-Scholes option pricing model, as well as other pricing models that incorporate market data and involves uncertainty in estimates used by management in the assumptions. Because option pricing models require inputs of highly subjective assumptions, including the volatility of share prices, changes in subjective input assumptions can materially affect the fair value estimate.

**Business acquisitions**

Management determines whether assets acquired, and liabilities assumed constitute a business. A business consists of inputs and processes applied to those inputs to create outputs of measurable value. The Company completed the acquisition of Solid Ultrabattery Inc. on May 27, 2021 which was deemed not to be a business in accordance with IFRS 3, so the transaction has been treated as an asset acquisition.

**Title to mineral property interests**

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

**16. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

Financial assets and financial liabilities are measured on an ongoing basis at fair value or amortized cost. The disclosures in the notes to these unaudited condensed consolidated interim financial statements describe how the categories of financial instruments are measured and how income and expenses, including fair value gains and losses, are recognized.

Financial instruments recognized at fair value on the statements of financial position must classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurement. The fair value hierarchy levels are as follows:

- Level 1: Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Valuation techniques based on inputs that are other than Level 1 quoted prices that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices).
- Level 3: Valuation techniques with unobservable market inputs (involves assumptions and estimates by management).

As at July 31, 2022, the classification of the financial instruments, as well as their carrying values and fair values, with comparative figures for October 31, 2021 are shown in the table below:

	July 31, 2022		October 31, 2021	
	Fair value	Carrying value	Fair value	Carrying value
<i>Financial assets</i>				
Cash	299,852	299,852	141,996	141,996
Accounts receivable (1)	-	-	3,427	3,427
<i>Financial liabilities</i>				
Accounts payable and accrued liabilities	753,987	753,987	957,079	957,079
Notes payable	390,948	390,948	444,452	444,452
Interest payable	68,143	68,143	65,141	65,141
Other liabilities	85,000	85,000	85,000	85,000

(1) Excluding taxes receivable

**Credit risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its obligations. The Company's maximum exposure to credit risk as at July 31, 2022 under its financial instruments is summarized as follows:

**VOLT CARBON TECHNOLOGIES INC. (FORMERLY SAINT JEAN CARBON INC.)**  
**Notes to the condensed consolidated interim financial statements**  
**(Unaudited - Expressed in Canadian Dollars)**  
**July 31, 2022 and July 31, 2021**

**16. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)**

	July 31, 2022	October 31, 2021
Accounts and other receivables -		
Currently due	6,641	3,427
Past due by 90 days or less, not impaired	-	-
Past due by greater than 90 days, not impaired	-	-
	6,641	3,427
Cash	299,852	141,996
	306,493	145,423

All of the Company's cash is held with major financial institutions in Canada, and management believes the exposure to credit risk with such institutions is not significant. The Company considers the risk of material loss to be significantly mitigated due to the financial strength of the major financial institutions where cash is held. As at July 31, 2022 and October 31, 2021, no material provision has been recorded in respect of impaired receivables. The Company's maximum exposure to credit risk as at July 31, 2022, is the carrying value of its financial assets.

**Liquidity risk**

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with financial liabilities. The Company has a planning and budgeting process in place by which it anticipates and determines the funds required to support normal operation requirements as well as the growth and development of its mineral property interests. The Company coordinates this planning and budgeting process with its financing activities through the capital management process described in *Note 17*, in normal circumstances. Due to the lack of liquidity, management has increased its focus on liquidity risk given the impact of the current economic climate on the availability of finance. Further information regarding liquidity risk is set out in *Note 2 (a)*.

The following table summarizes the contractual maturities of the Company's financial liabilities at July 31, 2022:

	Contractual cash flows	Less than one year
Accounts payable and accrued liabilities	\$ 753,987	\$ 844,928
Notes payable	390,948	390,484
Interest payable	68,143	56,708
Other liabilities	85,000	85,000
	\$ 1,298,078	\$ 1,377,120

**Market risk**

The significant market risks to which the Company is exposed include commodity price risk, interest rate risk and currency risk.

**16. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)**

- Commodity price risk  
The Company's ability to raise capital to fund exploration or development activities is subject to risk associated with fluctuations in the market prices of graphite, molybdenum, copper and gold and the outlook for these metals, as the Company's ability to raise capital is affected by the commodity that the Company is exploring for on its mineral property interests. The Company does not have any hedging or other derivative contracts respecting its operations.
- Interest rate risk  
The Company has no significant exposure at July 31, 2022, to interest rate risk through its financial instruments.
- Currency risk  
Currency risk relates to the risk that the fair values and future cash flows of the Company's financial instruments will fluctuate as a result of changes in foreign exchange rates. \$145,000 of notes payable are denominated in USD. Exchange rate fluctuations may impact the Company's financial results.

**17. MANAGEMENT OF CAPITAL**

The Company's objective in managing capital is to maintain adequate levels of funding to safeguard its ability to continue as a going concern in order to pursue the development of its mineral property interests.

The Company considers the items included in shareholders' equity to be capital. The Company relies on equity financing in order to fund future exploration and development and makes adjustments to the Company's capital structure based on financing needs, as well as in response to economic conditions and the risk characteristics of the underlying assets.

Management makes adjustments to its capital structure through share issuances and the acquisition or disposition of assets.

As the Company is in the exploration stage it endeavors to manage its capital structure in a manner that provides sufficient funding for operational activities through funds primarily secured through equity capital obtained in private placements. There can be no assurances that the Company will be able to continue raising capital in this manner.

The Company facilitates the management of capital through the preparation of annual expenditure budgets and cash forecasts that are updated as necessary. The Company does not have any externally imposed capital requirements.

	<b>2,327,889</b>	<b>1,519,768</b>

**18. NOVEL CORONAVIRUS ("COVID-19")**

The outbreak of the novel strain of coronavirus, specifically identified as "COVID-19" was declared a global pandemic by the World Health Organization on March 11, 2020. Governments worldwide enacted emergency measures to combat the spread of the virus. These measures, which include public health measures requiring periodic closures of non-essential businesses, requesting the public to stay home as much as possible, the implementation of travel bans, self-imposed quarantine periods and physical distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions.

The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments.

**19. SEGMENTED INFORMATION**

The Company has two operating segments. These two operating segments have been differentiated based on the type of services provided and equipment requirements. The mineral exploration and development segment focuses on the acquisition and exploration of property interests that are considered potential sites of economic mineralization. The research and development segment focuses on the scientific study and technology applications for air classifier and battery development. All transactions not related to the operating segments are considered Corporate. All of the Company's operations are in Canada.

**20. CONTINGENCY**

The Company has been named as a defendant in a statement of claim filed on January 5, 2021 in the Province of Ontario. The plaintiff is seeking \$814,820 for unpaid compensation, and \$1,000,000 for wrongful termination and damages. The unaudited condensed consolidated interim financial statements include a provision for unpaid compensation of \$241,820. Management has filed a statement of defense and counterclaim. The counterclaim against the plaintiff and other non-arm's length parties seeks damages up to \$3 million, plus further amounts which will be particularized prior to trial. The parties are in the process of exchanging affidavits of documents. Examinations for discovery have yet to be scheduled because the plaintiff is in the process of retaining new counsel. As the outcome of this lawsuit and any liability to the Company cannot be reasonably determined at this time, no additional provisions have been made in the unaudited condensed consolidated interim financial statements.

**21. COMPARATIVE AMOUNTS**

The unaudited condensed consolidated interim financial statements for the prior period have been reclassified, where applicable, to conform to the presentation used in the current period. The changes do not affect prior year earnings.
