

FORM 51-102F3
MATERIAL CHANGE REPORT

Item 1. Name and Address of Company

Goldplay Exploration Ltd. (“Goldplay”)
Suite 900 – 999 West Hastings Street
Vancouver, BC V6C 2W2

Item 2. Date of Material Change

December 23, 2019.

Item 3. News Release

A news release dated and issued December 23, 2019, at Vancouver, British Columbia, through CNW Group and SEDAR.

Item 4. Summary of Material Change

Goldplay issues shares for services.

Item 5. Full Description of Material Change

See news release, a copy of which is attached hereto.

Item 6. Reliance on subsection 7.1(2) of National Instrument 51-102

Not applicable.

Item 7. Omitted Information

Not applicable.

Item 8. Executive Officer

Marcio Fonseca, President & CEO
Telephone: 1.604.202.3155

Item 9. Date of Report

December 23, 2019.

December 23, 2019

Goldplay Exploration Ltd. Issues Shares for Services

Vancouver, BC - Goldplay Exploration Ltd. (TSXV: GPLY, FRANKFURT: GPE, OTCQB: GLYXF) (“Goldplay” or the “Company”) announces that it has made its final issuance of shares to a drilling contractor engaged under the shares for services previously announced on May 16, 2019. Under this issuance, the Company has issued 259,443 common shares at a deemed price of \$0.185/share for services valued at \$47,997. These shares are subject to a hold period expiring April 21, 2020, in accordance with applicable securities laws.

About Goldplay Exploration Ltd.

Goldplay has successfully consolidated a district-sized portfolio, owning >250 sq. km of mineral concessions in the historic Rosario gold-silver Mining District in the state of Sinaloa, Mexico. Its flagship project, San Marcial, consists of a 1,250 ha land package located south of the La Rastra and Plomosas historic mines. San Marcial is a near-surface, high-grade silver, lead, and zinc open pit amenable project for which a NI 43-101 resource estimate was completed by Goldplay in early 2019. Additionally, high-grade gold was drilled in July 2019 at San Marcial, opening up the potential for further gold success. Goldplay’s 100% owned El Habal precious metals project is located 20 km west of the San Marcial Project. It comprises 3,700 hectares and is located 75 km southeast of the modern coastal port of Mazatlán, and 10 km on a paved road from the historic mining town of Rosario, Sinaloa, Mexico.

Goldplay's current focus includes expanding its NI 43-101 resource estimate at the San Marcial project, which contains 36Moz Ag Eq (indicated) + 11Moz Ag Eq (Inferred), by defining new high-grade gold and silver targets along the project’s 6 km mineralized trend. Goldplay is the first company to perform exploration work at San Marcial in over 10 years. It is a low-risk development stage project, fully exploration permitted and supported by the local communities to carry out all proposed exploration activities. Only 500 m of the 6 km trend has been drilled to date, highlighting the significant potential for further discoveries. The Company has identified 8 high-priority targets along the 6 km trend and is currently drilling two high-priority targets at Faisanes and Nava. Some of these exploration targets consist of old shallow pits, caved shafts and historic shallow underground workings in areas with extensive hydrothermal alteration, hosted by major regional structures in a felsic volcanic environment. Mapping and sampling by Goldplay have revealed evidence of dacite-rhyolite dome structures in a highly prospective geological environment for additional high-grade gold and silver discoveries.

The El Habal Project is a drill-stage project. Its oxidized gold mineralized zone outcrops along a series of rolling hills with evidence of historic shallow underground mining along a 6 km-long prospective corridor. The El Habal Project is located near the historic gold-silver Rosario Mine which operated for over 250 years.

Goldplay’s team has over 30 years of experience with senior roles in exploration, financing, and development in the mining industry, including over ten years of extensive exploration experience in the Rosario Mining District, leading to previous successful discoveries.

The NI 43-101 reports for each of the San Marcial and El Habal Projects are available on SEDAR.
