8. Executive Officer

Mr. Adrian Lamoureux, President and CEO of the Company, is knowledgeable about the material change contained herein and may be reached at (778) 945-2950.

9. Date of Report

This report is dated November 21, 2018.

SCHEDULE “A”
to the Material Change Report dated November 21, 2018

92 RESOURCES CORP.

Silver Sands Vanadium Project acquired by 92 Resources

Vancouver, November 20, 2018 – **92 Resources Corp. (the “Company”)** (TSX.V: **NTY**) (OTCQB: **RGDCF**) (FSE: **R9G2**) is pleased to announce the acquisition of the Silver Sands Vanadium project (the “Project”), located in the Pine Pass area of eastern British Columbia.

Adrian Lamoureux, CEO of 92 Resources stated “The vanadium spot price is currently nearing its all-time high since 2005 and has been on the steady climb gaining more than 550% since September 2016. The vanadium prices are expected to continue as the long term demand increases due to the commercialization of vanadium-redox flow batteries, we felt it appropriate to evaluate and acquire a high-quality vanadium project. The Silver Sands Vanadium project offers an opportunity to discover black shale hosted vanadium mineralization at a location with excellent access within a mining friendly jurisdiction.”

The Silver Sands Vanadium Project covers 3735 hectares directly east of the Pine Pass Vanadium Project held by Ethos Gold Corp., which is located about 200 km north of Prince George, British Columbia. The Silver Sands Vanadium project contains the same geological formations prospective for vanadium mineralization that is known within the region. The Project is within close proximity to the well-established infrastructure corridor of Pine Pass, which includes the Highway 97, Canadian National Railway and high-voltage powerlines and natural gas pipelines.

About 92 Resources Corp.

92 Resources Corp is a modern energy solution company, focused on acquiring and advancing strategic and prospective modern energy related projects. The Company currently holds four principal assets in Canada: the Corvette and Pontax lithium properties in Quebec, the Golden Frac Sand Property, BC, and the Hidden Lake Lithium Property, NWT, currently under option to Far Resources Ltd.

NI 43-101 Disclosure

Darren L. Smith, M.Sc., P. Geol., of Dahrouge Geological Consulting Ltd., a Qualified Person as defined by National Instrument 43-101, supervised the preparation of the technical information in this news release.
