Each Incentive Stock Option will be exercisable to purchase one Common Share at a price of \$0.10 for a period of 10 years following the date of grant. The Incentive Stock Options are qualified for distribution under this prospectus. See "Options to Purchase Securities".

Market for Securities

There is currently no market through which the Common Shares may be sold and purchasers may not be able to resell the Common Shares purchased under this prospectus. This may affect the pricing of the Common Shares in the secondary market, the transparency and availability of trading prices, the liquidity of the Common Shares, and the extent of issuer regulation. See "Risk Factors".

As at the date of this prospectus, the Corporation does not have any of its securities listed or quoted, has not applied to list or quote, and does not intend to apply to list or quote any of its securities, on the Toronto Stock Exchange, a U.S. marketplace or a marketplace outside Canada or the United States of America.

The Corporation has applied to list its Common Shares (including the Common Shares issuable upon the exercise of the Agent's Option) on the Exchange. Listing will be subject to the Corporation fulfilling all of the listing requirements of the Exchange.

Other than the initial distribution of the Common Shares pursuant to this prospectus and the grant of the Agent's Option and the grant of the Incentive Stock Options, trading in all securities of the Corporation is prohibited during the period between the date a receipt for the preliminary prospectus is issued by the securities commissions and the time the Common Shares are listed for trading on the Exchange, except subject to prior acceptance of the Exchange, where appropriate registration and prospectus exemptions are available under securities legislation or where the applicable securities commissions grant a discretionary order.

Risk Factors

Investment in the Common Shares offered by this prospectus is highly speculative due to the nature of the Corporation's business and its present stage of development. This Offering is suitable only to those investors who are prepared to risk the loss of their entire investment. See "Risk Factors".

The Corporation has not commenced commercial operations and has no assets other than cash. It has no history of earnings and will not generate earnings or pay dividends until at least after the Completion of the Qualifying Transaction. Until Completion of the Qualifying Transaction, the Corporation is not permitted to carry on any business other than the identification and evaluation of potential Qualifying Transactions. See "Corporate Structure", "Business of the Corporation" and "Use of Proceeds".

The directors and officers of the Corporation will only devote a portion of their time to the business and affairs of the Corporation and some of them are or will be engaged in other projects or businesses such that conflicts of interest may arise from time to time. See "Directors and Officers".

There can be no assurance that an active and liquid market for the Common Shares will develop and an investor may find it difficult to resell its Common Shares.

Investors acquiring the Common Shares offered by this prospectus will suffer an immediate dilution on investment of approximately 22.73% or approximately \$0.023 per Common Share, before deduction of selling commissions or related expenses of the issue. See "Dilution".

The Corporation has only limited funds with which to identify and evaluate potential Qualifying Transactions and there can be no assurance that the Corporation will be able to identify a suitable Qualifying Transaction. Further, even if a proposed Qualifying Transaction is identified, there can be no assurance that the Corporation will be able to complete the transaction. The Qualifying Transaction may be financed in whole, or in part, by the issuance of additional securities by the Corporation and this may result in further dilution to investors. See "Use of Proceeds".

The Exchange will generally suspend trading in the Common Shares or delist the Corporation in the event that the Exchange has not issued a Final Exchange Bulletin (as defined below) within 24 months from the date of listing. Neither the Exchange, nor any securities regulatory authority, passes upon the merits of the proposed Qualifying Transaction.

In the event that management or directors of the Corporation reside outside of Canada or the Corporation identifies a foreign business or assets as a proposed Qualifying Transaction, investors may find it difficult or impossible to effect service or notice to commence legal proceedings upon any management or director resident outside of Canada or upon the foreign business and may find it difficult or impossible to enforce against such persons, judgments obtained in Canadian courts.

As a result of these factors, the Offering is suitable only to investors who are willing to rely solely on the management of the Corporation and who can afford to lose their entire investment. Those investors who are not prepared to do so should not invest in the Common Shares. See "Business of the Corporation", "Directors and Officers", "Use of Proceeds" and "Risk Factors".

Maximum Investment

Pursuant to the CPC Policy, no purchaser of the Common Shares is permitted to directly or indirectly purchase more than 2% of the total Common Shares offered under this prospectus, or 60,000 Common Shares. In addition, the maximum number of Common Shares that may directly or indirectly be purchased by that purchaser, together with any Associates (as defined below) or Affiliates (as defined below) of that purchaser, is 4% of the total Common Shares offered under this prospectus, or 120,000 Common Shares.

The Agent hereby offers for sale, on a commercially reasonable efforts agency basis as Agent on behalf of the Corporation, 3,000,000 Common Shares at a price of \$0.10 per Common Share. The Common Shares are conditionally offered, subject to prior sale, if, as and when issued by the Corporation, and in accordance with the conditions contained in the Agency Agreement referred to under “Plan of Distribution” and subject to the approval by Wildeboer Dellelce LLP, on behalf of the Corporation, and by DLA Piper (Canada) LLP, on behalf of the Agent, of such legal matters for which approval is specifically sought by the Corporation or the Agent.

Receipt of Subscriptions

Subscriptions will be received subject to rejection or allotment in whole or in part and the Corporation reserves the right to close the subscription books at any time without notice. It is expected that share certificates or similar entitlements evidencing the Common Shares in definitive form will be available for delivery at closing of this Offering unless the Agent elects for delivery in electronic book entry form through CDS Clearing and Depository Services Inc. (“CDS”) or its nominee. If delivered in book entry form, purchasers of Common Shares will receive only a customer confirmation from the registered dealer that is a CDS participant and from or through which the Common Shares were purchased.

See “Escrowed Securities.”

Risk Factors:

There is currently no established market for the Common Shares. Investment in the Common Shares must be regarded as highly speculative due to the proposed nature of the Corporation’s business and its present stage of development. The Corporation was only recently incorporated and has no active business or assets other than cash. It does not have a history of earnings, nor has it paid any dividends and will not generate earnings or pay dividends until at least after the Completion of the Qualifying Transaction.

The Offering is only suitable to investors who are prepared to rely entirely on the directors and management of the Corporation and can afford to risk the loss of their entire investment.

The directors and the officers of the Corporation will only devote part of their time and attention to the affairs of the Corporation and there are potential conflicts of interest to which some of the directors and officers of the Corporation will be subject in connection with the operations of the Corporation.

Assuming completion of the Offering, an investor will suffer an immediate dilution on investment of approximately 22.73% or approximately \$0.023 per Common Share, before deduction of selling commissions or related expenses of the issue. An acquisition financed by the issuance of treasury shares could result in a change in control of the Corporation and may cause the shareholders’ interest in the Corporation to be further diluted. There can be no assurance that an active and liquid market for the Corporation’s Common Shares will develop and an investor may find it difficult to resell the Common Shares.

Until Completion of the Qualifying Transaction, the Corporation will not carry on any business other than the identification and evaluation of assets or businesses with a view to completing a Qualifying Transaction. The Corporation has only limited funds with which to identify and evaluate possible Qualifying Transactions and there can be no assurance that the Corporation will be able to identify or complete a suitable Qualifying Transaction.

The Qualifying Transaction may involve the acquisition of a business or assets located outside of Canada. In the event that the Corporation identifies a foreign business or assets as a proposed Qualifying Transaction, investors may find it difficult or impossible to effect service or notice to commence legal proceedings upon any management, directors or experts resident outside of Canada or upon the foreign business or the Resulting Issuer and may find it difficult or impossible to enforce against such persons or companies judgments obtained in Canadian courts predicated upon the civil

liability provisions applicable to securities laws in Canada.

See “Risk Factors” for more detailed information on the risks of an investment in the Corporation’s Common Shares.

Until Completion of a Qualifying Transaction, the Corporation will not carry on any business other than the identification and evaluation of businesses or assets with a view to completing a potential Qualifying Transaction. With the consent of the Exchange, this may include the raising, of additional funds in order to finance an acquisition. Except as described under “Private Placement for Cash” and “Restrictions on Use of Proceeds”, the funds raised pursuant to this Offering and any subsequent financing will be utilized only for the identification and evaluation of potential Qualifying Transactions and not for any deposit, loan or direct investment in a potential acquisition.

Although the Corporation has commenced the process of identifying potential acquisitions with a view to completing a Qualifying Transaction, the Corporation has not yet entered into an Agreement in Principle.

Method of Financing

The Corporation may use either issuance of treasury shares or public financing of debt or equity, or a combination of these, for the purpose of financing, its proposed Qualifying Transaction. **A Qualifying Transaction financed by the issuance of treasury shares or securities convertible into or exercisable for treasury shares could result in a change in the control of the Corporation and may cause the shareholders' interest in the Corporation to be further diluted.**

Criteria for a Qualifying Transaction

The board of directors of the Corporation must approve any proposed Qualifying Transaction. In exercising their powers and discharging their duties in relation to a proposed Qualifying Transaction, the directors will act honestly and in good faith with a view to the best interests of the Corporation and will exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances.

Filings and Shareholder Approval of a Non Arm's Length Qualifying Transaction

Upon the Corporation reaching an Agreement in Principle, the Corporation must issue a comprehensive news release, at which time the Exchange generally will halt trading in the Common Shares until the filing requirements of the Exchange have been satisfied as set forth under "Trading Halts, Suspensions and Delisting". Within seventy-five (75) calendar days after issuance of such news release, the Corporation shall be required to submit for review to the Exchange either an information circular that complies with applicable corporate and securities laws or a filing statement that complies with Exchange requirements. An information circular must be submitted where there is a Non Arm's Length Qualifying Transaction. A filing statement must be submitted where the Qualifying Transaction is not a Non Arm's Length Qualifying Transaction. The information circular or filing, statement, as applicable, must contain prospectus level disclosure of the Target Company and the Corporation, assuming Completion of the Qualifying Transaction, and be prepared in accordance with the CPC Policy and Form 3B1 or Form 3B2. Upon acceptance by the Exchange, the Corporation must then:

- (a) file the filing statement on SEDAR at least seven business days prior to closing of the Qualifying Transaction, and issue a news release which discloses the scheduled closing date for the Qualifying Transaction as well as the fact that the filing statement is available on SEDAR; or
- (b) mail the information circular and related proxy material to its shareholders in order to obtain the Majority of the Minority Approval of the Qualifying Transaction or other requisite approval, at a meeting of the shareholders.

Unless waived by the Exchange, the Corporation may also be required to retain a Sponsor, who must be a Member of the Exchange, and who will be required to submit to the Exchange a Sponsor Report prepared in accordance with the policies of the Exchange. The Corporation will no longer be considered to be a CPC upon the Exchange having issued the Final Exchange Bulletin. The Exchange will generally not issue the Final Exchange Bulletin until the Exchange has received:

- (a) in the case of a Non Arm's Length Qualifying Transaction, confirmation of the Majority of the Minority Approval of the Qualifying Transaction;
- (b) confirmation of closing of the Qualifying Transaction; and

- (c) all post-meeting or final documentation, as applicable, otherwise required to be filed with the Exchange pursuant to the CPC Policy.

Upon issuance of the Final Exchange Bulletin, the CPC Policy will generally cease to apply, with the exception of the escrow provisions of the CPC Policy and the restrictions in the CPC Policy precluding the Corporation from completing a reverse take-over for a period of one year from the Completion of the Qualifying Transaction.

Initial Listing Requirements

The Resulting Issuer must satisfy the Exchange's initial listing requirements for the particular industry sector in either Tier 1 or Tier 2 as prescribed under the applicable policies of the Exchange.

Trading Halts, Suspensions and Delisting

The Exchange will generally halt trading in the Common Shares from the date of the public announcement of an Agreement in Principle until all filing requirements of the Exchange have been satisfied, which includes the submission of a Sponsorship Acknowledgment Form, where the Qualifying Transaction is subject to sponsorship. In addition, personal information forms or, if applicable, declarations for all individuals who may be directors, senior officers, promoters, or insiders of the Resulting Issuer must be filed with the Exchange, and any preliminary background searches that the Exchange considers necessary or advisable, must also be completed, before the trading halt will be lifted by the Exchange.

Even if all filing requirements have been satisfied and preliminary background checks completed, the Exchange may continue or reinstate a halt in trading of the Common Shares for public policy reasons including:

- (a) the unacceptable nature of the business of the Resulting Issuer; or
- (b) the number of conditions precedent to, or the nature and number of deficiencies required to be resolved prior to, Completion of the Qualifying Transaction, are so significant or numerous as to make it appear to the Exchange that the halt should be reinstated or continued.

A trading halt may also be imposed by the Exchange where the Corporation fails to file the supporting documents relating to the Qualifying Transaction within a period of seventy-five (75) calendar days after public announcement of the Agreement in Principle or if the Corporation fails to file post-meeting or final documents, as applicable, within the time required. A trading halt may also be imposed if a Sponsor terminates its sponsorship.

The Exchange may suspend from trading or delist the Common Shares of the Corporation where the Exchange has not issued a Final Exchange Bulletin to the CPC within 24 months of the date of listing. In the event that the Common Shares of the Corporation are delisted by the Exchange, within 90 days from the date of such delisting, the Corporation shall wind up and shall make a pro rata distribution of its remaining assets to its shareholders, unless shareholders, pursuant to a majority vote, exclusive of the votes of Non Arm's Length Parties to the Corporation, determine to deal with the remaining assets in some other manner. See "Filings and Shareholder Approval of a Non Arm's Length Qualifying Transaction" above.

Refusal of Qualifying Transaction

The Exchange, in its sole discretion, may not accept a Qualifying Transaction where:

- (a) the Resulting Issuer fails to satisfy the applicable initial listing requirements of the Exchange;
- (b) the aggregate number of securities of the Resulting Issuer owned, directly or indirectly, by:
 - (i) a Member firm of the Exchange;
 - (ii) registrants, unregistered corporate finance professionals, employee shareholders and partners of such Member firm; and
 - (iii) Associates of any such Person,collectively, would exceed 20% of the issued and outstanding securities of the Resulting Issuer;
- (c) the Resulting Issuer will be a financial institution, finance Company, finance Issuer or mutual fund, as defined in the securities legislation;
- (d) the majority of the directors and senior officers of the Resulting Issuer are not residents of Canada or the United States or are individuals who have not demonstrated positive association as directors or officers with public companies that are subject to a regulatory regime comparable to the companies listed on a Canadian exchange;
- (e) in the case of a Resulting Issuer that is a reporting issuer in Ontario, other than an oil and gas or mining issuer, the Qualifying Transaction involves the acquisition of Significant Assets, outside of Canada or the United States and is not undertaken using a prospectus as a disclosure document; or
- (f) notwithstanding the definition of a Qualifying Transaction, there is any other reason for denying acceptance of the Qualifying Transaction.

- (2) This entity is beneficially owned and controlled by Damian Lopez.

Where the Common Shares which are required to be held in escrow are held by a non-individual (a "**holding company**"), each holding company pursuant to the Escrow Agreement has agreed, or will agree, not to carry out any transactions during the currency of the Escrow Agreement which would result in a change of control of the holding company, without the consent of the Exchange. Any holding company must sign an undertaking to the Exchange that, to the extent reasonably possible, it will not permit or authorize any issuance of securities or transfer of securities which could reasonably result in a change of control of the holding company. In addition, the Exchange may require an undertaking from any control person of the holding company not to transfer the shares of that company.

Under the Escrow Agreement, 10% of the escrowed Common Shares will be released from escrow on the issuance of the Final Exchange Bulletin (the "**Initial Release**") and an additional 15% will be released on the dates that are 6 months, 12 months, 18 months, 24 months, 30 months and 36 months following the Initial Release.

If the Resulting Issuer meets the Exchange's Tier 1 initial listing requirements either at the time the Final Exchange Bulletin is issued or subsequently, the release of the escrowed Common Shares will be accelerated. An accelerated escrow release will not commence until the Resulting Issuer has made an application to the Exchange for listing as a Tier 1 Issuer and the Exchange has issued a bulletin that announces the acceptance for listing of the Resulting Issuer on Tier 1 of the Exchange.

The Exchange's prior consent must be obtained before a transfer within escrow of escrowed Common Shares. Generally, the Exchange will only permit a transfer within escrow to be made to incoming Principals in connection with a proposed Qualifying Transaction.

If a Final Exchange Bulletin is not issued, the escrowed Common Shares will not be released. Under Escrow Agreement, each Non Arm's Length Party to the Corporation who holds escrowed Common

Shares acquired at a price below the Offering price under this prospectus has irrevocably authorized and directed the Transfer Agent to immediately:

- (a) cancel all of those escrowed Common Shares upon the issuance by the Exchange of a bulletin delisting the Common Shares of the Corporation; or
- (b) if the Corporation lists on NEX, either:
 - (i) cancel all seed shares purchased by Non-Arm's Length Parties to the CPC at a discount from the IPO price, in accordance with section 11.2(a) of the CPC Policy, or
 - (ii) subject to majority shareholder approval, cancel an amount of seed shares purchased by Non-Arm's Length Parties to the CPC so that the average cost of the remaining seed shares is at least equal to the IPO price.

Escrowed Securities on Qualifying Transaction

Generally, if at least 75% of the securities issued pursuant to the Qualifying Transaction are "Value Securities" (as defined below), then all of the securities issued to Principals of the Resulting Issuer pursuant to the Qualifying Transaction will be deposited into escrow pursuant to a value security agreement (the "**Value Security Escrow Agreement**"). "**Value Securities**" are securities issued pursuant to a transaction, for which the deemed value of the securities at least equals the value ascribed to the asset, using a valuation method acceptable to the Exchange, or securities that are otherwise determined by the Exchange to be Value Securities and required to be placed in escrow under a Value Security Escrow Agreement. However, if at least 75% of the securities issued pursuant to the Qualifying Transaction are not Value Securities, all securities issued pursuant to the Qualifying Transaction will be deposited into a surplus security escrow agreement (a "**Surplus Security Escrow Agreement**").

The principal distinction between a Value Security Escrow Agreement and a Surplus Security Escrow Agreement is the time period for release of securities from escrow. In the case of a Resulting Issuer that will be a Tier 2 Issuer when the Final Exchange Bulletin is issued, the Value Security Escrow Agreement provides for a three year escrow release mechanism with 10% of the escrowed securities being releasable at the time of the Final Exchange Bulletin, and 15% of the escrowed securities being releasable every 6 months thereafter, on each of the 6, 12, 18, 24, 30 and 36 month anniversaries of the Final Exchange Bulletin. In the case of a Resulting Issuer that will be a Tier 2 Issuer subject to a Surplus Security Escrow Agreement, when the Final Exchange Bulletin is issued, the Surplus Security Escrow Agreement provides for a three year escrow release mechanism with:

- (a) 5% of the escrowed securities being releasable at the time of the Final Exchange Bulletin;
- (b) 5% of the escrowed securities being releasable on the date which is 6 months after the Final Exchange Bulletin;
- (c) 10% of the escrowed securities being releasable on each of the dates which are 12 and 18 months after the Final Exchange Bulletin;
- (d) 15% of the escrowed securities being releasable on each of the dates which are 24 and 30 months after the Final Exchange Bulletin; and

- (e) 40% of the escrowed securities being releasable on the date which is 36 months after the Final Exchange Bulletin.

In the case of a Resulting Issuer that will be a Tier 1 Issuer when the Final Exchange Bulletin is issued, the Value Security Escrow Agreement provides for an 18 month escrow release mechanism with 25% of the escrowed securities being releasable at the time of the Final Exchange Bulletin, and 25% of the escrowed securities being releasable every 6 months thereafter. In the case of a Resulting Issuer that will be a Tier 1 Issuer when the Final Exchange Bulletin is issued, the Surplus Security Escrow Agreement provides for an 18 month escrow release mechanism with:

- (a) 10% of the escrowed securities being releasable upon the issuance of the Final Exchange Bulletin;
- (b) 20% of the escrowed securities being releasable on the date which is 6 months after the Final Exchange Bulletin;
- (c) 30% of the escrowed securities being releasable on the date which is 12 months after the Final Exchange Bulletin; and
- (d) 40% of the escrowed securities being releasable on the date which is 18 months after the Final Exchange Bulletin.

Securities issued pursuant to a private placement to Principals of the Corporation and the proposed Resulting Issuer will generally be exempt from escrow requirements where:

- (a) the private placement is announced at least five trading days after the news release announcing the Agreement in Principle and the pricing for the financing is at not less than the discounted market price, as determined in accordance with the policies of the Exchange; or
- (b) the private placement is announced concurrently with the Agreement in Principle and:
 - (i) at least 75% of the proceeds from the private placement are not from Principals of the Corporation or the proposed Resulting Issuer;
 - (ii) if subscribers, other than Principals of the Corporation or the proposed Resulting Issuer, will obtain securities subject to hold periods, then in addition to any resale restrictions under applicable securities legislation, any securities issued to such Principals will be subject to a four month hold period; and
 - (iii) none of the proceeds of the private placement are allocated to pay compensation or to settle indebtedness owing to Principals of the Resulting Issuer.

Aggregate Ownership of Securities

The directors and officers as a group own 2,500,001 Common Shares, or 45.5% of the issued and outstanding Common Shares upon completion of the Offering, assuming that no Common Shares are purchased by these shareholders under the Offering and before the exercise of the Agent's Option and the Incentive Stock Options.

Corporate Cease Trade Orders or Bankruptcies

No director, officer, insider or promoter of the Corporation is, or within the ten (10) years prior to the date of this prospectus has been, a director, officer or promoter of any other Issuer that, while that person was acting in that capacity:

- (a) was the subject of a cease trade or similar order, or an order that denied the other Issuer access to any exemptions under applicable securities legislation for a period of more than 30 consecutive days; or
- (b) became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets.

Penalties or Sanctions

Except as described below, no director, officer, insider or promoter of the Corporation or a shareholder holding sufficient securities of the Corporation to affect materially the control of the Corporation, has been subject to any penalties or sanctions imposed by a court relating to securities legislation or by any securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority, or has been subject to any other penalties or sanctions imposed by a court or regulatory body or self-regulatory authority that would be likely to be considered important to a reasonable investor in making an investment decision.

Personal Bankruptcies

No director, officer, insider or promoter of the Corporation or a shareholder holding sufficient securities of the Corporation to affect materially the control of the Corporation, or a personal holding company of any such persons has, within the 10 years before the date of this prospectus, as applicable, become bankrupt or made a voluntary assignment in bankruptcy, made a proposal under any legislation relating to bankruptcy or insolvency or been subject to or instituted any proceedings, arrangement or compromise with creditors, or had a receiver or receiver manager or trustee appointed to hold the assets of that individual.

Conflict of Interests

There are potential conflicts of interest to which all of the directors, officers, insiders and promoters of the Corporation will be subject in connection with the operations of the Corporation. All of the directors, officers, insiders and promoters are engaged in and will continue to be engaged in corporations or businesses which may be in competition with the search by the Corporation for businesses or assets in order to close a Qualifying Transaction. Accordingly, situations may arise where all of the directors, officers, insiders and promoters will be in direct competition with the Corporation. Conflicts, if any, will be subject to the procedures and remedies as provided under the *Business Corporations Act* (Ontario) R.S.O. 1990, as amended.

Audit Committee

Exchange Policy 3.1 requires that the Corporation have an audit committee of at least three directors, the majority of whom are not employees, Control Persons or officers of the Corporation or any of its Associates or Affiliates. The audit committee will be responsible for overseeing the accounting and financial reporting processes of the Corporation and audits of the financial statements of the Corporation.

Given the current prescribed nature of the Corporation and its principal business being limited to identifying and evaluating assets or businesses with a view to completing a Qualifying Transaction, it is anticipated that, prior to the Completion of the Qualifying Transaction, the only committee of the board of directors will be the audit committee.

The Corporation has appointed an audit committee consisting of the following three directors: Damian Lopez, Mark Goh (independent) and Peter Simeon (Chair & independent).

EXECUTIVE COMPENSATION

Remuneration

Except as set out below or disclosed in this prospectus, prior to the Completion of the Qualifying Transaction, no payment of any kind has been made, or will be made, directly or indirectly, by the Corporation to a Non Arm's Length Party to the Corporation or a Non Arm's Length Party to the Qualifying Transaction, or to any Person engaged in investor relations activities in respect of the securities of the Corporation or any Resulting Issuer by any means, including remuneration, which includes but is not limited to:

- (a) remuneration, which includes but is not limited to:
 - (i) salaries;
 - (ii) consulting fees;
 - (iii) management contract fees or directors' fees;
 - (iv) finders' fees;
 - (v) loans, advances, bonuses; and
- (b) deposits and similar payments.

However, the Corporation may reimburse Non Arm's Length Parties for the Corporation's reasonable allocation of rent, secretarial services and other general administrative expenses, at fair market value ("**Permitted Reimbursement**"). No reimbursement may be made for any payment made to lease or buy a vehicle. There has been no reimbursement made by the Corporation to date.

The Corporation has reserved up to 550,000 Common Shares for stock options issued to its directors and officers. See "Options to Purchase Securities".

However, no payment other than the Permitted Reimbursements, will be made by the Corporation or by any party on behalf of the Corporation, after Completion of the Qualifying Transaction, if the payment relates to services rendered or obligations incurred or in connection with the Qualifying Transaction.

DILUTION

Dilution

Purchasers of Common Shares under this prospectus will suffer an immediate dilution of approximately 22.73% or approximately \$0.023 per Common Share assuming completion of the Offering. Dilution is based on the basis of total gross proceeds to be raised by this prospectus and from sales of securities prior to filing this prospectus, without deduction of commissions or related expenses incurred by the Corporation, or any Common Shares issuable on the exercise of the Agent's Option.

RISK FACTORS

Risk Factors

There are a number of risks inherent in making an investment in the Common Shares. The list below outlines the material risk factors that should be considered by persons considering purchasing the Common Shares. The list is not intended to be all-inclusive.

- (a) the Corporation was only recently incorporated, has not commenced commercial operations and has no assets other than cash. It has no history of earnings, and shall not generate earnings or pay dividends until at least after the Completion of the Qualifying Transaction. See "Corporate Structure" and "Business of the Corporation";
- (b) investment in the Common Shares offered by the prospectus is highly speculative given the proposed nature of the Corporation's business and its present stage of development;
- (c) the directors and officers of the Corporation will devote only a portion of their time to the business and affairs of the Corporation and some of them are or will be engaged in other projects or businesses such that conflicts of interest may arise from time to time. See "Directors and Officers";
- (d) assuming completion of the Offering, an investor will suffer an immediate dilution to its investment of approximately 22.73% or approximately \$0.023 per Common Share assuming completion of the Offering. See "Dilution";
- (e) there is no market through which the Common Shares may be sold and purchasers may not be able to resell the Common Shares purchased under this prospectus. This may affect the pricing of the Common Shares in the secondary market, the transparency and availability of trading prices, the liquidity of the Common Shares, and the extent of issuer regulation;
- (f) there can be no assurance that an active and liquid market for the Corporation's Common Shares will develop and an investor may find it difficult to resell its Common Shares;
- (g) until Completion of the Qualifying Transaction, the Corporation is not permitted to carry on any business other than the identification and evaluation of potential Qualifying Transactions. See "Business of the Corporation";
- (h) the Corporation has only limited funds with which to identify and evaluate potential Qualifying Transactions and there can be no assurance that the Corporation will be able to identify a suitable Qualifying Transaction. See "Business of the Corporation";

- (i) even if a proposed Qualifying Transaction is identified, there can be no assurance that the Corporation will be able to successfully complete the transaction. See “Business of the Corporation”;
- (j) completion of the Qualifying Transaction is subject to a number of conditions including acceptance by the Exchange and in the case of a Non Arm’s Length Qualifying Transaction, Majority of the Minority Approval. See “Business of the Corporation”;
- (k) unless a shareholder has the right to dissent and be paid fair value in accordance with applicable corporate or other law, a shareholder who votes against a proposed Non Arm’s Length Qualifying Transaction for which Majority of the Minority Approval by shareholders has been given, will have no rights of dissent and no entitlement to payment by the Corporation of fair value for the Common Shares;
- (l) upon public announcement of a proposed Qualifying Transaction, trading in the Common Shares of the Corporation will be halted and will remain halted for an indefinite period of time, typically until a Sponsor has been retained and certain preliminary reviews have been conducted. The Common Shares of the Corporation may be reinstated to trading, before the Exchange has reviewed the transaction and before the Sponsor has completed its full review. Reinstatement to trading provides no assurance with respect to the merits of the transaction or the likelihood of the Corporation completing the proposed Qualifying Transaction. See “Business of the Corporation”;
- (m) trading in the Common Shares of the Corporation may be halted at other times for other reasons, including for failure by the Corporation to submit documents to the Exchange in the time periods required;
- (n) the Exchange will generally suspend trading in the Corporation’s Common Shares or delist the Corporation in the event that the Exchange has not issued a Final Exchange Bulletin within 24 months from the date of listing;
- (o) neither the Exchange nor any securities regulatory authority passes upon the merits of the proposed Qualifying Transaction;
- (p) in the event that the Corporation identifies a foreign business as a proposed Qualifying Transaction, investors may find it difficult or impossible to effect service or notice to commence legal proceedings upon any management resident outside of Canada or upon the foreign business and may find it difficult or impossible to enforce against such persons, judgments obtained in Canadian courts;
- (q) the Qualifying Transaction may be financed in all or part by the issuance of additional securities by the Corporation and this may result in further dilution to the investor, which dilution may be significant and which may also result in a change of control of the Corporation; and
- (r) subject to prior Exchange acceptance, the Corporation may be permitted to loan or advance up to an aggregate of \$250,000 of its proceeds to a target business without requiring shareholder approval and there can be no assurance that the Corporation will be able to recover that loan. See “Use of Proceeds”.

As a result of these factors, this Offering is suitable only to investors who are willing to rely solely on management of the Corporation and who can afford to lose their entire investment. Those investors who are not prepared to do so should not invest in the Common Shares.

ELIGIBILITY FOR INVESTMENT

In the opinion of Wildeboer Dellece LLP, counsel to the Corporation, based on the current provisions of the Tax Act provided that the Common Shares are listed on a “designated stock exchange” within the meaning of the Tax Act (which includes the Exchange), if issued on the date hereof, the Common Shares would be qualified investments under the Tax Act for a trust governed by a registered retirement savings plan (“RRSP”), a registered retirement income fund (“RRIF”), a registered education savings plan (“RESP”), a deferred profit sharing plan, a tax-free savings account (“TFSA”), or a registered disability savings plan (“RDSP”), all as defined in the Tax Act (“Plans”).

If the Common Shares are not listed on the Exchange on the closing of the Offering but become listed on the Exchange prior to the date on which the Corporation must file a tax return under the Tax Act for its first taxation year, the Corporation may make an election in such income tax return to be deemed to have been a “public corporation” for purposes of the Tax Act from the beginning of its first taxation year until the time when the Common Shares are listed on the Exchange. If this occurs, the Common Shares will be qualified investments for Plans at the closing of the Offering notwithstanding that the Common Shares were not listed on the Exchange at the closing of the Offering.

Notwithstanding that the Common Shares may be a qualified investment for a trust governed by a TFSA, RRSP, RDSP or RRIF, a holder of a TFSA or a RDSP an annuitant of a RRSP or RRIF, or a subscriber of an RESP, as the case may be, will be subject to a penalty tax in respect of Common Shares held in the TFSA, RRSP, RESP or RRIF, as applicable, if such Common Shares are a “prohibited investment” for the purposes of the Tax Act. The Common Shares will generally be a “prohibited investment” if the holder of the TFSA or RDSP, the annuitant of the RRSP or RRIF, or a subscriber of an RESP, as the case may be, does not deal at arm’s length with the Corporation for the purposes of the Tax Act or has a “significant interest” (as defined in the Tax Act) in the Corporation for the purposes of the Tax Act. In

addition, the Common Shares will generally not be a “prohibited investment” if such shares are “excluded property” as defined in the Tax Act for purposes of the prohibited investment rules. Prospective holders that intend to hold Common Shares in a TFSA, RRSP, RRIF, RESP or RDSP are urged to consult their own tax advisers.

PURCHASER’S STATUTORY RIGHTS OF WITHDRAWAL AND RESCISSION

Securities legislation in certain of the provinces of Canada provides purchasers with the right to withdraw from an agreement to purchase securities. This right may be exercised within two (2) business days after receipt or deemed receipt of a prospectus and any amendment. In several of the provinces, the securities legislation further provides a purchaser with remedies for rescission or, in some jurisdictions, damages if the prospectus and any amendment contains a misrepresentation or is not delivered to the purchaser, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser’s province for the particulars of these rights or consult with a legal adviser.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Wolf Acquisition Corp. as at June 30, 2018, and its financial performance and its cash flows for the period from January 25, 2018 (date of incorporation) to June 30, 2018 then ended in accordance with International Financial Reporting.

Notes to the Financial Statements

For the Period from the Date of Incorporation January 25, 2018 to June 30, 2018

(in Canadian dollars)

1. INCORPORATION AND NATURE OF OPERATIONS

Wolf Acquisition Corp. (the “Company”), was incorporated under the *Business Corporations Act* (Ontario) on January 25, 2018 as 2617283 Ontario Corp. and was renamed on February 23, 2018. The Company is in the process for applying for status as a Capital Pool Corporation, as defined in the Policy 2.4 of the TSX Venture Exchange (the “Exchange”). The principal business of the Company will be the identification and evaluation of assets or businesses with a view to completing a Qualifying Transaction (“QT”). The Company has not commenced operations and has no assets other than cash. The Company’s continuing operations as intended are dependent upon its ability to identify, evaluate and negotiate an acquisition, or business, or an interest therein. Such an acquisition will be subject to the approval of the regulatory authorities concerned and, in the case of a non-arm’s length transaction, of the majority of the disinterested shareholders.

The proceeds raised from the issuance of share capital may only be used to identify and evaluate assets or businesses for future investment, with the exception that up to the lesser of 30% of the gross proceeds realized by the Company, in respect of the sale of its securities, or \$210,000, may be used for purposes other than evaluating businesses or assets. These restrictions apply until completion of a QT by the Company, as defined under the policies of the Exchange. The Company is required to complete its QT on or before two years from the date the Company receives regulatory approval and its common shares are listed on the Exchange.

The head office and the registered head office of the Company is located at 20 Blue Jays Way, Suite 1406, Toronto, Ontario M5V 3W6.

On July 9, 2018, the Board of Directors and the Audit Committee approved these financial statements for the period from Date of Incorporation January 25, 2018 to June 30, 2018.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee as at the reporting date.

Basis of Measurement

These financial statements have been prepared on a historical cost basis except for financial instruments classified as financial instruments at fair value through profit or loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

These financial statements are presented in Canadian dollars, which is also the Company’s functional currency.

Wolf Acquisition Corp.**Notes to the Financial Statements****For the Period from the Date of Incorporation January 25, 2018 to June 30, 2018**

(in Canadian dollars)

Continuance of Operations

The Company's ability to continue operations as intended is dependent upon its ability to identify, evaluate and negotiate an acquisition of a participation in or an interest in properties, assets or businesses. Such an acquisition will be subject to regulatory approval and may be subject to shareholder approval. In order to continue as a going concern and meet its corporate objectives, the Company will require additional financing through debt or equity issuances or other available means. There is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company. However, management believes that the Company has sufficient working capital to meet its projected minimum financial obligations for the next fiscal year. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue its existence.

Non-derivative Financial Instruments

Non-derivative financial instruments are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership. Non-derivative financial instruments are recognized initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs.

Subsequent to initial recognition, non-derivative financial instruments are measured as described below:

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets. Loans and receivables are initially recognized at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest method.

Other Financial Liabilities

Other financial liabilities are initially measured at fair value, net of transaction costs, and are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Wolf Acquisition Corp.
Notes to the Financial Statements
For the Period from the Date of Incorporation January 25, 2018 to June 30, 2018
(in Canadian dollars)

Impairment of financial assets

Financial assets are assessed at each reporting date in order to determine whether objective evidence exists that the assets are impaired as a result of one or more events which have had a negative effect on the estimated future cash flows of the asset.

If there is objective evidence that a financial asset has become impaired, the amount of the impairment loss is calculated as the difference between its carrying amount and the present value of the estimated future cash flows from the asset discounted at its original effective interest rate. Impairment losses are recorded in earnings. If the amount of the impairment loss decreases in a subsequent period and the decrease can be objectively related to an event occurring after the impairment was recognized, the impairment loss is reversed up to the original carrying value of the asset. Any reversal is recognized in operations.

Fair Value Hierarchy

The Company classifies financial instruments recognized at fair value in accordance with a fair value hierarchy that prioritizes the inputs to valuation technique use to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Financial Instruments

The following is a summary of significant categories of financial instruments outstanding at June 30, 2018:

Cash

Loans and receivables

Carrying value and fair value of financial assets and liabilities are summarized as follows:

<u>Classification</u>	<u>Carrying value</u>	<u>Fair value</u>
Loans and receivables	\$ 100,516	\$ 100,516

The Company initially measures all its financial instruments at fair value. Subsequent measurement and treatment of any gain or loss is recorded as follows:

(a) Fair values through profit and loss are measured at fair value at reporting date with any gain or loss recognized immediately in operations.

Wolf Acquisition Corp.**Notes to the Financial Statements****For the Period from the Date of Incorporation January 25, 2018 to June 30, 2018**

(in Canadian dollars)

(b) Other financial liabilities are measured at amortized cost using the effective interest method.

(c) Transaction costs that are directly attributable to the issuance of financial assets or liabilities are accounted for as part of the carrying value at the date of incorporation, and are recognized over the term of the assets or liabilities using the effective interest method. Any gains or losses are recognized in operations.

Share-based Compensation

The Company may grant stock options to acquire common shares of the Company to directors, officers, employees and consultants. An individual is classified as an employee when the individual is an employee for legal or tax purposes, or provides services similar to those performed by an employee.

Stock options granted to directors, officers and employees are measured at their fair values determined on their grant date, using the Black-Scholes option pricing model, and are recognized as an expense over the vesting periods of the options on a graded basis. Options granted to consultants or other non-insiders are measured at the fair value of goods or services received from these parties, or at their Black-Scholes fair values if the fair value of goods or services received cannot be measured. A corresponding increase is recorded to equity reserves for share-based compensation recorded.

When stock options are exercised, the cash proceeds along with the amount previously recorded as equity reserves are recorded as share capital. When the right to receive options is forfeited before the options have vested, any expense previously recorded is reversed.

Financing Costs

Costs incurred to obtain equity financing are deducted from the value assigned to shares issued. When costs are incurred prior to the closing of a financing arrangement, these amounts are presented as a deferred asset until the financing has closed. When an expected financing arrangement does not occur, any deferred costs are recorded as an expense.

Income Taxes

Tax provisions are recognized when it is considered probable that there will be a future outflow of funds to a taxing authority. In such cases, a provision is made for the amount that is expected to be settled, where this can be reasonably estimated. This requires the application of judgment as to the ultimate outcome, which can change over time depending on facts and circumstances. A change in estimate of the likelihood of a future outflow and/or in the expected amount to be settled would be recognized in income in the period in which the change occurs. Deferred tax assets or liabilities, arising from temporary differences between the tax and accounting values of assets and liabilities, are recorded based on tax rates expected to be enacted when these differences are reversed.

Deferred tax assets are recognized only to the extent it is considered probable that those assets will be recovered. This involves an assessment of when those deferred tax assets are likely to be realized, and a judgment as to whether or not there will be sufficient taxable profits available to offset the tax assets when they do reverse. This requires assumptions regarding future profitability and is therefore inherently uncertain. To the extent assumptions regarding future profitability change, there can be an increase or

Wolf Acquisition Corp.**Notes to the Financial Statements****For the Period from the Date of Incorporation January 25, 2018 to June 30, 2018**

(in Canadian dollars)

decrease in the amounts recognized in respect of deferred tax assets as well as in the amounts recognized in income in the period in which the change occurs.

Tax provisions are based on enacted or substantively enacted laws. Changes in those laws could affect amounts recognized in income both in the period of change, which would include any impact on cumulative provisions, and in future periods.

(Loss) Earnings Per Share

Basic (loss) earnings per share is calculated by dividing net (loss) earnings by the weighted average number of common shares outstanding during the period which excludes shares held in escrow. All of the escrow shares are considered contingently returnable until the Company completes a Qualifying Transaction and, accordingly, are not considered to be outstanding shares for the purposes of the loss per share calculation.

Diluted (loss) earnings per share is determined by adjusting the earnings or loss attributable to common shareholders and the weighted average number of common shares outstanding for the effects of dilutive instruments, which includes stock options, as if their dilutive effect was at the beginning of the period. The calculation of the diluted number of common shares assumes that proceeds received from the exercise of “in-the-money” stock options and common share purchase warrants are used to purchase common shares of the Company at their average market price for the period.

In periods that the Company reports a net loss, any stock options or warrants outstanding are excluded from the calculation of diluted loss per share as their inclusion would be anti-dilutive.

Summary of Accounting Estimates and Assumptions

The preparation of these financial statements under IFRS requires management to make certain estimates, judgments and assumptions about future events that affect the amounts reported in the financial statements and related notes to the financial statements. Although these estimates are based on management’s best knowledge of the amount, event or actions, actual results may differ from those estimates and these differences could be material.

The areas which require management to make significant judgements, estimates and assumptions in determining carrying values include, but are not limited to:

Income, value added, withholding and other taxes

The Company is subject to income, value added, withholding and other taxes. Significant judgment is required in determining the Company’s provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Company’s income, value added, withholding and other tax liabilities requires interpretation of complex laws and regulations. The Company’s interpretation of taxation law as applied to transactions and activities may not coincide with the interpretation of the tax authorities. All tax related filings are subject to government audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from

Wolf Acquisition Corp.
Notes to the Financial Statements

(in Canadian dollars)

the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made.

Share-based payments

Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based share awards is determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviours and Company performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

Accounting Standards issued but not yet applied

Certain new mandatory standards, interpretations and amendments to existing standards, have been issued by the IASB or the IFRS Interpretations Committee (“IFRIC”), which the Company reasonably expects to be applicable for later periods are listed below. The Company has not early adopted these revised standards and none of these standards are expected to have a material effect on the financial statements.

IFRS 16 – Leases (“IFRS 16”) was issued in January 2016 and replaces IAS 17 – Leases as well as some lease related interpretations. With certain exceptions for leases under twelve months in length or for assets of low value, IFRS 16 states that upon lease commencement a lessee recognises a right-of-use asset and a lease liability. The right-of-use asset is initially measured at the amount of the liability plus any initial direct costs. After lease commencement, the lessee shall measure the right-of-use asset at cost less accumulated depreciation and accumulated impairment. A lessee shall either apply IFRS 16 with full retrospective effect or alternatively not restate comparative information but recognise the cumulative effect of initially applying IFRS 16 as an adjustment to opening equity at the date of initial application. IFRS 16 requires that lessors classify each lease as an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. Otherwise it is an operating lease. IFRS 16 is effective for annual periods beginning on or after January 1, 2019. Earlier adoption is permitted if IFRS 15 has also been applied.
