THE COMPANY

Overview

Our principal business activity is offering technology-enabled property management services to meet the needs of developers, condominium and residential communities, and owners and residents. The services provided via our technology platform are focused on improving the living experience of the residents within each community, with a key focus on communication, information, education and protection. Through our technology platform, we provide on-demand access to important records and documents, simple communication tools, online payment options, bookable amenities and a ticketing system for residents to notify their developer or management of issues, warranty concerns and deficiencies.

The majority of our business is generated from software and service revenues which our community-living technology platform contributes to. Our deficiency management software for real estate developers and rental management software for landlords contribute to our software licensing fees which make up a lesser part of our business.

Condo/Strata Management

Our community-living technology platform provides strata councils and residents with on-demand access to important records and documents, simple communication tools, online payment options and bookable amenities. Our community-living platform strengthens communications, empowers residents and builds community. It offers high value for community residents with features that allow councils, boards and homeowners' associations to protect their real estate investment through improved communication, greater collaboration and self-service tools for residents. Examples include secure and easy communications tools with easy-to-find records, on-demand access to shared community documents, amenity booking and a help desk ticketing system.

Real Estate Management

Our deficiency management software for real estate developers provides developers and residents with a ticketing system for residents to notify their developer or management of issues, warranty concerns or deficiencies. This deficiency management software is used by property developers to organize and streamline post-construction workflow from pre-inspection and owner walk-throughs to post-occupancy and beyond. Developers can digitally track and manage home issues, while owners can access digital homeowner manuals and submit warranty issues upon move-in, directly to customer care teams.

Rental Management

Our rental management software for landlords provides landlords and tenants with an online tool designed to streamline landlord tasks. The tool eliminates tedious tasks and streamlines every step in the rental process, allowing users to take advantage of listing websites, online rental applications, tenant vetting and onboarding, digital lease agreements, cashflow management, online rent collection and financial reporting. This software is available to owner-investors within our end-to-end community solution.

Competitive Conditions

The traditional property management delivery model is facing challenges within its current environment, and struggling to keep up with community needs, market growth and technologies that enhance community living. Service offerings are characterized by a general lack of communication and oversight, inconsistent service levels and highly paper-based systems. These inefficiencies are generally reinforced by a shortage of licensed real estate managers available to provide community management services, and an inability to scale operations.¹ There are thousands of property management companies in North America, with the majority being local to their markets.²

There are many software tools on the market that focus on a single point of the residential community- living journey – e.g. tools specifically for construction, in-house property management tools, neighbourhood engagement or landlord-specific features. None of these applications consider the end-to-end life cycle of residential community living including the actual management function itself. The Company brings together a holistic solution comprised of the Company’s broad suite of software products offered in conjunction with its service delivery model, thereby providing a unique offering to different stakeholders of the industry. Examples of some of these point software products include pre-occupancy deficiency management tools for builders, such as those offered by Bridgit and Conasys, or specific condo management software applications, such as those offered by Buildium and Frontsteps.

The Company’s property management business competes with a limited number of regional companies and many small, traditional property management firms. The Company believes that it is one of a limited number of national companies in Canada in the property management services space. The Canadian property management services space can be segmented into rental management and strata or condominium management companies. Nationally, the largest companies in Canada are believed to be FirstService Residential and Associa. In addition to these companies as well as a large number of small companies, the Company competes with the following companies in the rental property management segment: The DMS Group, MetCap Living Management, BriarLane Rental Property, Greenwin, Societe de Gestion Cogir and Medallion Corporation. In the strata or condominium management segment, the Company competes with Condo Management, Crossbridge Condominium, Del Property Management, Rancho Management, ICC Property Management, Pacific Quorum and AWM Alliance. The Company believes that its technology forward approach differentiates it from its competition. Based on number of homes under management, the Company believes that it is one of the top ten property management firms in Canada in both the rental management segment and the strata or condominium management segment.

COVID-19 Pandemic

The outbreak of the novel coronavirus, commonly referred to as “COVID-19”, has spread throughout North America and Europe, causing companies and various international jurisdictions to impose restrictions such as quarantines, business closures and travel restrictions. While these effects are expected to be temporary, the duration of the business disruptions internationally and their impacts on the Company cannot be reasonably estimated at this time.

As of the date of this Prospectus, the Company has successfully continued operations under COVID-19 protocols. COVID-19 has not resulted in any material delays in the development or testing of our material development projects. The Company is not currently experiencing any significant delays or interruptions in service or product delivery. The Company's production schedule has continued throughout COVID-19 on a modified employee schedule, with certain non-production employees working remotely. The Company has been able to operate relatively unaffected by the COVID-19 pandemic. The most notable impact has been that certain business development pursuits have taken longer to complete as international travel restrictions have hindered the performance and attendance of live product demonstrations, particularly for the Company's newer products.

Notwithstanding the foregoing, if the Company or its vendors and suppliers are unable to continue operations or keep up with increasing demands as a result of COVID-19, customers may experience delays or interruptions in service or the delivery of products, which may be detrimental to the Company's reputation and business. The Company cautions that it is impossible to fully anticipate or quantify the effect and ultimate impact of the COVID-19 pandemic as the situation is rapidly evolving. The extent to which COVID-19 impacts the Company's results will depend on future developments, which are highly uncertain and cannot be predicted, including new information that may emerge concerning the severity of COVID-19 and the actions taken by governments to contain it or treat its impact, including shelter in place directives, which, if extended, may impact the economies in which the Company now operates, or may in the future operate, key markets into which the Company sells products and delivers services, and markets through which the Company's key suppliers source their products. See "Risk Factors".

DESCRIPTION OF UNITS

The following sets forth certain general terms and provisions of the Units. The Company may issue Units comprising any combination of the other Securities described in this Prospectus. Each Unit will be issued so that the holder of the Unit is also the holder of each Security included in the Unit. Thus, the holder of a Unit will have the rights and obligations of a holder of each Security comprising the Unit. The agreement, if any, under which a Unit is issued may provide that the Securities comprising the Unit may not be held or transferred separately, at any time or at any time before a specified date.

The preceding description and any description of Units in the applicable Prospectus Supplement does not purport to be complete and is subject to and is qualified in its entirety by reference to, if applicable, the unit agreement, collateral arrangements and depositary arrangements relating to such Units.

PLAN OF DISTRIBUTION

The Company may, during the 25-month period that this Prospectus remains effective, offer for sale and issue, as applicable, the Securities, separately or together: (i) through underwriters, dealers or agents purchasing as principal or acting as agent; (ii) directly to one or more purchasers, including sales upon the exercise of conversion or exchange rights attaching to convertible or exchangeable securities held by the purchaser; or (iii) through a combination of any of these methods of sale. Securities sold to the public pursuant to this Prospectus may be offered and sold exclusively in Canada. The Prospectus Supplement relating to each offering of Securities will indicate the jurisdiction or jurisdictions in which such offering is being made to the public, identify each underwriter, dealer or agent, as the case may be, and will also set forth the terms of that offering, including the purchase price or prices of the Securities (or the manner of determination thereof if offered on a non-fixed price basis), the proceeds to the Company and any underwriters', dealers' or agents' fees, commissions or other items constituting underwriters' or agents' compensation. Only underwriters, dealers or agents so named in the applicable Prospectus Supplement are deemed to be underwriters, dealers or agents, as the case may be, in connection with the Securities offered thereby.

The Securities may be sold, from time to time in one or more transactions at a fixed price or prices which may be changed or at market prices prevailing at the time of sale, at prices related to such prevailing market prices or at negotiated prices, including sales in transactions that are deemed to be "at-the-market distributions" as defined in NI 44-102, including sales made directly on the TSXV, or other existing trading markets for the securities. The prices at which the Securities may be offered may vary between purchasers and during the period of distribution.

If, in connection with the offering of Securities at a fixed price or prices, the underwriters have made a *bona fide* effort to sell all of the Securities at the initial offering price fixed in the applicable Prospectus Supplement, the offering price may be decreased and thereafter further changed, from time to time, to an amount not greater than the initial offering price fixed in such Prospectus Supplement, in which case the compensation realized by the underwriters will be decreased by the amount that the aggregate price paid by purchasers for the Securities is less than the gross proceeds paid by the underwriters to the Company.

Any offering of Debt Securities, Subscription Receipts, Warrants or Units will be a new issue of Securities with no established trading market. Unless otherwise specified in the applicable Prospectus Supplement, Debt Securities, Subscription Receipts, Warrants and Units will not be listed on any securities exchange. There is no market through which the Securities, other than the Common Shares, may be sold and purchasers may not be able to resell such Securities purchased under this Prospectus and any applicable Prospectus Supplement. This may affect the pricing of such Securities in the secondary market, the transparency and availability of trading prices, the liquidity of such Securities, and the extent of issuer regulation. See “Risk Factors”.

Underwriters, dealers or agents may make sales of Securities in privately negotiated transactions and/or any other method permitted by law, including sales deemed to be an “at-the-market distribution” and subject to limitations imposed by and the terms of any regulatory approvals required and obtained under, applicable Canadian securities laws, which includes sales made directly on an existing trading market for the Common Shares, or sales made to or through a market maker other than on an exchange. In connection with any offering of Securities, except with respect to “at-the-market distributions” or as otherwise set out in a Prospectus Supplement relating to a particular offering of Securities, the underwriters, dealers or agents may over-allot or effect transactions which are intended to stabilize or maintain the market price of the offered Securities at a level other than that which might otherwise prevail in the open market. Such transactions may be commenced, interrupted or discontinued at any time. No underwriter, dealer or agent involved in an “at-the-market distribution”, no affiliate of such an underwriter, dealer or agent and no person or company acting jointly or in concert with such an underwriter, dealer or agent may, in connection with the distribution, enter into any transaction that is intended to stabilize or maintain the market price of the Securities distributed, including selling an aggregate number or principal amount of securities that would result in the underwriter, dealer or agent creating an over-allocation position in the Securities distributed.

If underwriters or dealers purchase Securities as principals, the Securities will be acquired by the underwriters or dealers for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed offering price or at varying prices determined at the time of sale. The obligations of the underwriters or dealers to purchase those Securities will be subject to certain conditions precedent, and the underwriters or dealers will be obligated to purchase all the Securities offered by the Prospectus Supplement if any of such Securities are purchased. If agents are used in an offering, unless otherwise indicated in the Prospectus Supplement, such agents will be acting on a “best efforts” basis for the period of their appointment. Any offering price and any discounts or concessions allowed or re-allowed or paid may be changed from time to time.

Under agreements which may be entered into by the Company, underwriters, dealers and agents who participate in the distribution of Securities may be entitled to indemnification by the Company against certain liabilities, including liabilities under securities legislation, or to contribution with respect to payments which such underwriters, dealers or agents may be required to make in respect thereof. Such underwriters, dealers and agents may be customers of, engage in transactions with, or perform services for, the Company in the ordinary course of business.

Specific information about the use of the net proceeds to the Company of any offering of Securities under this Prospectus and the specific business objectives which the Company expects to accomplish with such proceeds will be set forth in the applicable Prospectus Supplement relating to that offering of Securities. The Company had negative operating cash flow for the financial

There may be circumstances where, based on results obtained or for other sound business reasons, a reallocation of funds may be necessary or prudent. Accordingly, management of the Company will have broad discretion in the application of the net proceeds of an offering of Securities. The actual amount that the Company spends in connection with each intended use of proceeds may vary significantly from the amounts specified in the applicable Prospectus Supplement and will depend on a number of factors, including those referred to under “Risk Factors” in this Prospectus and in the documents incorporated by reference herein and any other factors set forth in the applicable Prospectus Supplement. The Company may invest funds which it does not immediately use. Such investments may include short-term marketable investment grade securities denominated in Canadian dollars, United States dollars or other currencies. The Company may, from time to time, issue securities (including debt securities) other than pursuant to this Prospectus.

The applicable Prospectus Supplement may describe certain material Canadian federal income tax considerations generally applicable to investors described therein of the acquisition, ownership and disposition of any Securities offered thereunder. Prospective investors should consult their own tax advisors prior to deciding to purchase any of the Securities.

RISK FACTORS

Before deciding to invest in the Securities, investors should carefully consider all of the information contained in, and incorporated or deemed to be incorporated by reference in, this Prospectus and any applicable Prospectus Supplement. An investment in the Securities is subject to certain risks, including risks related to the business of the Company and risks related to the Company’s securities described in the documents incorporated or deemed to be incorporated by reference in this Prospectus. See the risk factors below and the “Risk Factors” section of any applicable Prospectus Supplement and the documents incorporated or deemed to be incorporated by reference herein and therein. Each of the risks described in these sections and documents could materially and adversely affect our business, financial condition, results of operations and prospects, and could result in a loss of your investment. Additional risks and uncertainties not known to us or that we currently deem immaterial may also impair our business, financial condition, results of operations and prospects.

These risk factors, together with all other information included or incorporated by reference in this Prospectus, including, without limitation, information contained in the section “Forward-Looking Information” as well as the risk factors set out below, should be carefully reviewed and considered by investors.

Some of the factors described herein, in the documents incorporated or deemed incorporated by reference herein are interrelated and, consequently, investors should treat such risk factors as a whole. If any of the adverse effects set out in the risk factors described herein, or in another document incorporated or deemed incorporated by reference herein occur, it could have a material adverse effect on the business, financial condition and results of operations of the

Company. Additional risks and uncertainties of which the Company currently is unaware of or that are unknown or that it currently deems to be immaterial could have a material adverse effect on the Company's business, financial condition and results of operations. The Company cannot provide assurance that it will successfully address any or all of these risks. There is no assurance that any risk management steps taken will avoid future loss due to the occurrence of the adverse effects set out in the risk factors herein, or in the other documents incorporated or deemed incorporated by reference herein or other unforeseen risks.

Coronavirus (COVID-19) and global health crisis

The global outbreak of COVID-19 has resulted in governments worldwide enacting emergency measures to protect against the spread of the virus. These measures, which include, among other things, limitations on travel, self-imposed quarantine periods and social distancing measures, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of any government and/or central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company and its operating subsidiaries in future periods.

Global pandemics (like the COVID-19 pandemic) and other public health threats, or a fear thereof, could adversely impact our production operations, sales efforts, lead to labour shortages, and severely impact supply chain logistics including travel and shipping disruptions and shutdowns (including as a result of government regulation and prevention measures) affecting production and delivery of the raw materials we need to operate and deliver our products to customers. It is unknown whether and how the Company may be affected if such an occurrence persists for an extended period of time, but we anticipate that it would have a material adverse effect on our business, operating results and financial performance. In addition, the Company may also be required to incur additional expenses and/or delays relating to such events which could have a further negative impact on our business, operating results and financial performance.

The risks associated with global COVID-19 measures, and the Company's own protocols, may have a material impact on the Company's ability to grow its business and generate revenue, which in turn could materially impact the Company's financial condition and results from operations. The Company is actively addressing risks to its business from COVID-19 through a broad range of measures throughout its structure and is re-assessing its response to the COVID-19 pandemic on an ongoing basis.

Negative operating cash flow

The Company had negative operating cash flow for the financial year ended December 31, 2020. As of June 30, 2021, the Company had a working capital balance of \$4,528,731. The Company cannot guarantee it will have a cash flow positive status in the future due to its desire to increase the number of employees. To the extent that the Company has negative cash flow in any future period, certain of the proceeds from an offering may be used to fund such negative cash flow from operating activities.

Discretion in the Use of Proceeds

While detailed information regarding the use of proceeds from the sale of Securities will be described in the applicable Prospectus Supplement, the Company will have broad discretion over the use of net proceeds from an offering by the Company of its securities. There may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary. In such circumstances, the net proceeds will be reallocated at the Company's sole discretion.

Management will have discretion concerning the use of proceeds scribed in the applicable Prospectus Supplement as well as the timing of their expenditures. As a result, an investor will be relying on the judgment of management for the application of the proceeds. Management may use the net proceeds described in a Prospectus Supplement in ways

that an investor may not consider desirable. The results and the effectiveness of the application of the proceeds are uncertain. If the proceeds are not applied effectively, the Company's results of operations may suffer.

Additional Financing

The continued development of the Company will require additional financing. There is no guarantee that the Company will be able to achieve its business objectives, including with respect to the expansion of its product offerings, completing future acquisitions, and entering into strategic partnerships. The Company intends to fund its business objectives by way of additional offerings of equity and/or debt financing as well as through anticipated positive cash flow from operations in the future. The failure to raise or procure such additional funds or the failure to achieve positive cash flow could result in the delay or indefinite postponement of current business objectives. There can be no assurance that additional capital or other types of financing will be available if needed or that, if available, will be on terms acceptable to the Company. If additional funds are raised by offering equity securities, existing shareholders could suffer significant dilution. The Company will then require additional financing to fund its operations until positive cash flow is achieved.

Securities of Tribe are subject to price volatility

The market price of the Company's securities may be volatile and subject to wide fluctuations in response to numerous factors, many of which are beyond the Company's control. This volatility may affect the ability of holders of such securities to sell their securities at an advantageous price. Market price fluctuations in the Company's securities may be due to the Company's operating results failing to meet expectations of securities analysts or investors in any period, downward revision in securities analysts' estimates, adverse changes in general market conditions or economic trends, acquisitions, dispositions or other material public announcements by government and regulatory authorities, the Company or its competitors, along with a variety of additional factors. These broad market fluctuations may adversely affect the market price of the securities of the Company.

Financial markets have at times historically experienced significant price and volume fluctuations that have particularly affected the market prices of equity securities of companies and that have often been unrelated to the operating performance, underlying asset values or prospects of such companies. Accordingly, the market price of the Company's securities may decline even if the Company's operating results, underlying asset values or prospects have not changed. Additionally, these factors, as well as other related factors, may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses. There can be no assurance that continuing fluctuations in price and volume will not occur. If such increased levels of volatility and market turmoil continue, the Company's operations could be adversely impacted and the trading price of the Company's may be materially adversely affected. As at the date of this Prospectus, only the Common Shares are listed on a securities exchange and may be purchased in the secondary market.

Sales of a significant number of Common Shares in the public markets, or the perception of such sales, could depress the market price of the Common Shares

Sales of a substantial number of Common Shares or other equity-related securities in the public markets by the Company or its significant shareholders could depress the market price of the Common Shares and impair our ability to raise capital through the sale of additional equity securities. The Company cannot predict the effect that future sales of Common Shares or other equity-related securities would have on the market price of the Common Shares. The price of the Common Shares could be affected by possible sales of the Common Shares by hedging or arbitrage trading activity. If the Company raises additional funding by issuing additional equity securities, such financing may substantially dilute the interests of shareholders of the Company and reduce the value of their investment.

Holders of Common Shares may be diluted

The Company may issue additional securities in the future, which may dilute a shareholder's holdings in the Company. The Company's articles of incorporation permit the issuance of an unlimited number of Common Shares, and shareholders will have no pre-emptive rights in connection with such further issuance. The directors of the Company have discretion to determine the price and the terms of further issuances. Moreover, additional Common Shares will

be issued by the Company on the exercise of options under the Company's stock option plan and upon the exercise of outstanding compensation options.

Market for Securities

There is currently no market through which our securities, other than our Common Shares, may be sold and, unless otherwise specified in the applicable Prospectus Supplement, our Debt Securities, Subscription Receipts, Warrants and Units will not be listed on any securities or stock exchange or any automated dealer quotation system. As a consequence, purchasers may not be able to resell Debt Securities, Subscription Receipts, Warrants or Units purchased under this Prospectus. This may affect the pricing of our securities, other than our Common Shares, in the secondary market, the transparency and availability of trading prices, the liquidity of these securities and the extent of issuer regulation. There can be no assurance that an active trading market for our securities, other than our Common Shares, will develop or, if developed, that any such market, including for our Common Shares, will be sustained.

Profitability

There is no assurance that the Company will earn profits in the future, or that profitability will be sustained. The property management technology industry requires significant financial resources, and there is no assurance that future revenues will be sufficient to generate the funds required to continue the Company's business development and marketing activities. If the Company does not have sufficient capital to fund its operations, it may be required to reduce its research and development efforts or in the future reduce its marketing efforts or forego certain business opportunities.

Unless otherwise specified in the Prospectus Supplement relating to a specific offering of Securities, certain legal matters relating to the offering of the Securities will be passed upon on behalf of the Company by Cassels Brock & Blackwell LLP. As at the date of this Prospectus, the partners and associates of Cassels Brock & Blackwell LLP, as a group, beneficially own, directly or indirectly, less than 1% of the outstanding securities of any class or series of the Company.

STATUTORY AND CONTRACTUAL RIGHTS OF WITHDRAWAL AND RESCISSION

Unless provided otherwise in a Prospectus Supplement, the following is a description of a purchaser's statutory rights. Securities legislation in certain of the provinces and territories of Canada provides purchasers with the right to withdraw from an agreement to purchase securities. This right may be exercised within two business days after receipt or deemed receipt of a prospectus and any amendment. In several of the provinces and territories, the securities legislation further provides a purchaser with remedies for rescission or, in some jurisdictions, revisions of the price or damages if the prospectus and any amendment contains a misrepresentation or is not delivered to the purchaser, provided that the remedies for rescission, revisions of the price or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for the particulars of these rights or consult with a legal advisor.

In an offering of Securities which are convertible, exchangeable or exercisable for other securities of the Company, investors are cautioned that the statutory right of action for damages for a misrepresentation contained in this Prospectus is limited, in certain provincial and territorial securities legislation, to the price at which the Securities which are convertible, exchangeable or exercisable for other securities of the Company are offered to the public under the prospectus offering. This means that, under the securities legislation of certain provinces and territories, if the purchaser pays additional amounts upon the conversion, exchange or exercise of the Security, those amounts may not be recoverable under the statutory right of action for damages that applies in those provinces and territories. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for the particulars of this right of action for damages or consult with a legal advisor.

Original purchasers of Securities which are convertible, exchangeable or exercisable for other securities of the Company (unless the Securities are reasonably regarded by the Company as incidental to the applicable offering as a whole) will have a contractual right of rescission against the Company in respect of the conversion, exchange or exercise of such Securities. The contractual right of rescission will be further described in any applicable Prospectus Supplement, but will, in general, entitle such original purchasers to receive, upon surrender of the underlying securities, the original amount paid for the applicable convertible, exchangeable or exercisable Securities and any additional amount paid upon conversion, exchange or exercise thereof, in the event that this Prospectus, the relevant Prospectus Supplement or an amendment thereto contains a misrepresentation, provided that: (i) the conversion, exchange or exercise takes place within 180 days of the date of the purchase of such Securities under this Prospectus and the applicable Prospectus Supplement; and (ii) the right of rescission is exercised within 180 days of the date of the purchase of such Securities under this Prospectus and the applicable Prospectus Supplement.

In addition, to the extent that we file a Prospectus Supplement to qualify the Common Shares issuable upon conversion of any special warrants that we may in the future issue ("**Special Warrants**"), we will grant to each holder of a Special Warrant a contractual right of rescission of the prospectus-exempt transaction under which the Special Warrant was initially acquired. The contractual right of rescission will provide that if a holder of a Special Warrant who acquires Common Shares of the Company on exercise of the Special Warrant as provided for in this Prospectus is, or becomes, entitled under the securities legislation of a jurisdiction to the remedy of rescission because of the Prospectus or an amendment to the Prospectus containing a misrepresentation, (a) the holder is entitled to rescission of both the holder's exercise of its Special Warrant and the private placement transaction under which the Special Warrant was initially acquired, (b) the holder is entitled in connection with the rescission to a full refund of all consideration paid to the agent or Company, as the case may be, on the acquisition of the Special Warrant, and (c) if the holder is a permitted assignee of the interest of the original Special Warrant subscriber, the holder is entitled to exercise the rights of rescission and refund as if the holder was the original subscriber.
