**1. NATURE OF OPERATIONS**

Great Pacific Gold Corp. (formerly Fosterville South Exploration Ltd.) (the “Company”) was incorporated under the Business Corporations Act of British Columbia on July 22, 2019. The Company is engaged in the acquisition, exploration and development of mineral properties in Australia and Papua New Guinea. The Company’s head office is located at 488 – 1090 West Georgia Street, Vancouver, BC V6E 3V7.

On March 18, 2020, the Company filed its initial prospectus and on April 14, 2020, the Company’s shares commenced trading on the TSX Venture Exchange (the “TSX-V”). The Company’s stock symbol is currently GPAC.

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company has incurred losses from inception and does not currently have the financial resources to sustain operations in the long-term. While management believes that the Company is adequately capitalized and while the Company has been successful in obtaining its required funding in the past, there is no assurance that such future financing will be available or be available on favourable terms.

**2. BASIS OF PREPARATION**

**Statement of compliance**

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. These condensed consolidated interim financial statements are compliant with IAS 34 and do not include all of the information required for full annual financial statements.

**Basis of presentation**

These condensed consolidated interim financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments measured at fair value through profit and loss.

**Consolidation**

These condensed consolidated interim financial statements include the financial statements of the Company and its wholly-owned and controlled subsidiaries, Currawong Resources Pty Ltd., incorporated in Australia on September 10, 2014 (“Currawong”) from its date of acquisition (Note 7), Bendigo Gold Corp. (“Bendigo”), incorporated in Canada on November 8, 2019, Wild Dog Resources Inc. (“Wild Dog”) from its date of acquisition (Note 5) and Wild Dog’s subsidiaries Wild Dog Resources (PNG) Ltd. (“WDRL”) and Yaendal Minerals Ltd. (“YML”).

The Company, Bendigo and Wild Dog have a functional currency of Canadian Dollar (CAD). Currawong Australia has a functional currency of the Australian Dollar (AUD). WDRL and YML have a functional currency of Papua New Guinean Kina.

Control is achieved when the Company has the power to, directly or indirectly, govern the financial and operating policies of an entity so as to obtain benefits from its activities. Subsidiaries are fully consolidated from the date on which control is obtained and continue to be consolidated until the date that such control ceases. Intercompany balances, transactions and unrealized intercompany gains and losses are eliminated upon consolidation.

### **3. SIGNIFICANT ACCOUNTING POLICIES**

The Company's accounting policies are the same as those applied in the Company's consolidated financial statements for the year ended December 31, 2022. These condensed consolidated interim financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended December 31, 2022.

### **4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS**

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions. The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive loss in the period of the change, if the change affects that period only; in the period of the change and future periods, if the change affects both.

#### **Critical Judgments**

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustments to the carrying amounts of assets and liabilities recognized in the consolidated financial statements within the next financial year are discussed below:

##### *Title to mineral property interests*

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and titles may be affected by undetected defects.

##### *Impairment of exploration and evaluation assets*

The carrying value and recoverability of exploration and evaluation assets requires management to make certain estimates, judgments and assumptions about each project. Management considers the economics of the project, including the latest resource prices and the long-term forecasts, and the overall economic viability of the project. Management has assessed these indicators and does not believe an impairment provision is required.

##### *Asset acquisition*

The assessment of whether an acquisition meets the definition of a business or an asset is an area of key judgment. In the acquisition of Wild Dog, judgement was required to determine if the acquisition represented a business combination or an asset acquisition. More specifically, management concluded that Wild Dog did not represent a business as the assets acquired were not an integrated set of activities with inputs, processes and outputs. Since it was concluded that the Wild Dog acquisition (Note 5) represented the acquisition of an asset, there was no goodwill recognized and the transactions costs were capitalized to the assets purchased rather than expensed.

##### *Issuances of shares for properties*

Management makes judgments in determining the share price attributed to issuances of shares for mineral properties. Management considers market conditions, recent or pending private placements of the Company, and or contracted terms of the issuance. Should management's judgment as to an appropriate share price be incorrect, the value attributed to properties could be materially different.

#### 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

##### Key Sources of Estimation Uncertainty

The significant assumptions about the future and other major sources of estimation uncertainty as at the end of the reporting period that have a significant risk of resulting in a material adjustment to the carrying amounts of the Company's assets and liabilities are as follows:

##### *Share-based payments*

The Company measures the cost of equity-settled transactions by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them.

#### 5. ACQUISITION OF WILD DOG RESOURCES INC

On September 19, 2023, the Company closed the acquisition of Wild Dog ("the WD Transaction") pursuant to the terms of an amalgamation agreement (the "Agreement"). The Company acquired all of the issued and outstanding common shares of Wild Dog by issuing 16,161,441 common shares ("Consideration Shares") of the Company, 1,553,679 stock options and 526,892 share purchase warrants.

The WD Transaction did not meet the definition of a business combination and therefore, was accounted for as an asset purchase of mineral property interests. The fair value of the consideration paid for the acquisition of Wild Dog has been allocated to the assets acquired and liabilities assumed, based on management's best estimate and taking into account all available information at the time of acquisition.

The Consideration Shares are subject to contractual resale restrictions, with 33.33% being free trading on closing, 33.33% being released three months after closing, and 33.34% being released six months after closing. The value of the Consideration shares was estimated using an option model to estimate the discount related to the lack of marketability of the shares due to the contractual restriction. The following assumptions were used on the option model: share price \$0.51, expected life of 0.25 to 0.5 years, expected annualized volatility of 100%, risk free interest rate of 4.91% and a dividend yield of 0%

The Company issued the following stock options and share purchase warrants on closing of the WD Transaction:

<b>Expiry Date</b>	<b>Number</b>	<b>Exercise Price</b>	<b>Remaining Life (Years)</b>

**11. FINANCIAL INSTRUMENTS**

For financial instruments held by the Company, management classifies cash and cash equivalents as FVTPL and receivables, accounts payable and accrued liabilities, and deferred acquisition payments as amortized cost.

**a) Fair value of financial instruments**

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

As at September 30, 2023, the Company believes that the carrying values of receivables, accounts payable and accrued liabilities approximate their fair values because of their nature and relatively short maturity dates or durations. The carrying value of deferred acquisition payments approximates fair value because the factors considered in assessing the fair value of this item have not changed from the issuance date to September 30, 2023. The fair value of cash and cash equivalents is based on level 1 inputs of the fair value hierarchy.

**b) Management of risks arising from financial instruments**

Discussions of risks associated with financial assets and liabilities are detailed below:

*Credit risk*

Credit risk arises from cash and cash equivalents held with banks and financial institutions. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The Company's cash and cash equivalents is held with reputable Canadian and Australian banks. The credit risk related to cash and cash equivalents is considered minimal.

*Interest rate risk*

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The risk that the Company will realize such a loss is limited because the Company has no interest-bearing financial instruments.

*Liquidity risk*

The Company manages liquidity risk by maintaining sufficient cash and cash equivalents to enable settlement of transactions as they come due. Management monitors the Company's contractual obligations and other expenses to ensure adequate liquidity is maintained.

Contractual cash flow requirements as at September 30, 2023 were as follows:

	<b>&lt; 1 year \$</b>	<b>1 – 2 years \$</b>	<b>3 – 5 years \$</b>	<b>Total \$</b>
Accounts payable and accrued liabilities	301,616	-	-	301,616

**11. FINANCIAL INSTRUMENTS (cont'd...)**

*Currency risk*

The international nature of the Company's operations results in foreign exchange risk. The Company's operating costs are primarily in Canadian dollars, Australian dollars and US dollars. Any fluctuations of the Canadian dollar in relation to these currencies may affect the profitability of the Company and the value of the Company's assets and liabilities. Management believes the foreign exchange risk derived from currency conversions is not significant and therefore does not hedge its foreign exchange risk.

**12. RELATED PARTY TRANSACTIONS**
