SAN LORENZO GOLD CORP.
Notes to the Condensed Interim Consolidated Financial Statements
For the nine and three months ended September 30, 2021
(Expressed in Canadian dollars)

1. Nature of operation and going concern

On December 16, 2020, Kairos Meals Corp. (“Kairos”) and Tailwind Capital Corporation (“Tailwind”) were amalgamated to form San Lorenzo Gold Corp. (the “Corporation” or “San Lorenzo”) which completed Tailwind’s qualifying transaction in accordance with the policies of the TSX Venture Exchange Inc.

The Corporation’s principal business activities is the acquisition and development of mining properties in Chile and its common shares trade on the TSX Venture Exchange under the symbol SLG.

The head office is located at 900, 903 – 8th Avenue SW, Calgary, Alberta, Canada, T2P 0P7.

Going concern

The condensed interim financial statements have been prepared by management in accordance with International Financial Reporting Standards (“IFRS”) on a going concern basis. The going concern basis contemplates the realization of assets and the settlement of liabilities in the ordinary course of business. If the Corporation is unable to raise funds to pay its liabilities as they become due and successfully finance its current and future exploration projects, it may not be able to realize its assets and discharge its liabilities in the normal course of operations.

For the nine months ended September 30, 2021, the Corporation reported a net loss of \$(832,912) (2020 - \$(127,069)) and negative cash flows from operations of \$(507,698) (September 2020 - \$(31,039)). For the three months ended September 30, 2021, the Corporation reported a net loss of \$(548,819) (2020 - \$(16,652)) and negative cash flows from operations of \$(10,018). These conditions indicate the existence of a material uncertainty which may cast significant doubt related to the Corporation’s ability to continue as a going concern. If the going concern assumption is not appropriate, adjustments may be necessary to the carrying amounts and classification of the Corporation’s assets and liabilities. The accompanying financial statements do not include any adjustments that may result if the Corporation is unable to continue as a going concern, and, such adjustments could be material.

The outbreak of the novel coronavirus (“COVID-19”) was declared a pandemic by the World Health Organization on March 11, 2020. Global financial markets experienced significant volatility and weakness as a consequence of the pandemic and governments worldwide enacted emergency measures to contain the spread of the virus. These measures, which include the implementation of travel bans, temporary business closures, self-imposed quarantine periods, social distancing, and restrictions on public gatherings, have caused material disruption to businesses globally resulting in an economic slowdown. Second and third waves of the outbreak are underway in several countries and new restrictions are being imposed as COVID-19 case counts rise. The duration and full extent of the impact of COVID-19 is uncertain as information surrounding the pandemic continues to evolve. New variants of the virus have emerged globally adding to this uncertainty. The uncertainty caused by COVID-19 may impact the Corporation’s ability to raise the necessary funds to meet its short-term exploration objectives.

The face value of the original notes payable to LITH of \$1,564,000 (US\$1,150,000) and Minera Kairos \$2,188,302 (US\$1,600,000) were due two years from the date of issuance, being May 16 and May 8, 2018, respectively, and were unsecured.

During the year ended December 31, 2018, Kairos (predecessor entity to the Corporation) was a wholly-owned subsidiary of Lithium Chile Inc. ("LITH") and at a meeting of the shareholders of LITH on April 27, 2018, the LITH shareholders approved a proposed plan of arrangement (the "Arrangement") under Section 193 of the *Business Corporations Act* (Alberta) involving the distribution of common shares of Kairos (the "Kairos Shares"), to the LITH shareholders during the year ended December 31, 2018. The following transactions occurred and were part of a series of transactions related to the Arrangement:

During the year ended December 31, 2020, an agreement was entered into between Kairos and LITH to transfer certain gold, silver and copper properties (the "Retransferred Mineral Claims"), having a carrying value of \$1,056,320, from San Lorenzo back to Minera Kairos (the "Retransfer Agreement") such that the values and terms of the notes payable were adjusted as follows:

- iii) The Minera Kairos note payable, with the original face value of US\$1,600,000 together with accrued interest of US\$62,334, was satisfied in exchange for the Retransferred Mineral Claims.
- iv) The LITH note payable was renegotiated from US\$1,115,000, plus interest, to CAD\$1,000,000 with the repayment term extended from May 16, 2020 to November 30, 2022 and is unsecured.

Both the Arrangement and the Retransfer Agreement is also considered a common control transaction and as such, the gain realized from the re-transfer of mineral properties was charged to contributed surplus.

The Corporation manages the capital structure and adjusts it in light of changes in economic conditions and the risk characteristics of the underlying assets.

The Corporation does not have any externally imposed capital requirements to which it is subject.

9. Financial instruments and risk management

The Corporation, as part of its operations, carries financial instruments consisting of cash, due from related party, other receivables, trade and other payables, notes payable due to related parties, and due to shareholder. It is management's opinion that the Corporation is not exposed to significant credit, interest, or currency risks arising from this financial instrument.

The carrying amount of cash, due from related party, other receivable, trade and other payables, due to related parties and due to shareholder approximates its fair value due to its short-term maturity.

The carrying amount of notes payable approximate its fair value due to market rate of interest being applied to this financial instrument.

Credit Risk

Credit risk is the risk of loss associated with the counterparty's inability to fulfill its payment obligations. The Corporation believes it has no significant credit risk as cash is held with reputable banks in both Canada and Chile.

Liquidity Risk

The Corporation's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet current liabilities when due. As at September 30, 2021 the Corporation had a cash balance of \$910,603 (September 2020 - \$(1,118)) to settle current obligations of \$157,966 (September 2020 - \$375,638). Due to the nature of the mining industry, additional financing will be required in due course. Management will seek additional forms of financing through the issuance of new equity or debt instruments to continue its operations and there can be no assurance it will be able to do so.

The following are the financial liabilities at September 30:

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

(1) Interest rate risk

The Corporation believes it has negligible interest rate risk due to its cash balances and fixed rate interest-bearing debt.

(2) Foreign currency risk

The Corporation is exposed to the risk of changes in the Canadian/U.S. dollar exchange rate and in the U.S./Chilean Peso exchange rate for services and geological costs that are denominated in Chilean Pesos and converted to U.S. dollars or directly influenced by U.S. dollar benchmark prices. A hypothetical change of 10% to the foreign exchange rate between Canadian/U.S. and U.S./Chilean Peso would not have a material impact of the Corporation's loss during the year.

(3) Commodity risk

The Corporation is not exposed to commodity price risk.
