

BLACK MAMMOTH METALS CORPORATION

CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021

(Unaudited – Prepared by Management)

(Expressed in Canadian Dollars)

NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Chartered Professional Accountants of Canada for a review of interim financial statements by an entity's auditor.

BLACK MAMMOTH METALS CORPORATION
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

The Company was incorporated on August 17, 2004 in British Columbia, Canada and began active operations on that date.

The Company is a natural resource company engaged in the acquisition and exploration of resource properties in Idaho and Nevada. The Company presently has no proven or probable reserves and on the basis of information to date, it has not yet determined whether these properties contain economically recoverable ore reserves. Consequently, the Company considers itself to be an exploration stage company. The Company is listed on the TSX Venture Exchange, having a symbol BMM.V.

The address of the Company's corporate office and principal place of business is Suite 1710 – 1177 West Hastings Street, Vancouver, British Columbia, Canada.

The Company's condensed interim consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. The Company had net loss of \$83,868 for the period ended September 30, 2022 and, as of that date, had an accumulated deficit of \$13,887,767.

Management cannot provide assurance that the Company will ultimately achieve profitable operations or become cash flow positive or raise additional debt and/or equity capital. Management intends to continue to raise additional funding in the form of equity financing from the sale of common stock to improve the working capital position, but there is no assurance that the Company will be successful in achieving this goal. These factors may cast significant doubt on the use of the going concern basis of accounting used in the preparation of these consolidated financial statements. These consolidated financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue in business, and these adjustments may be material.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or ability to raise funds.

2. BASIS OF PRESENTATION

a) Statement of Compliance

These condensed interim consolidated financial statements, including comparatives have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting.

The condensed interim consolidated financial statements were authorized for issue by the Board of Directors on November 28, 2022.

BLACK MAMMOTH METALS CORPORATION
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

2. BASIS OF PRESENTATION (Continued)

b) Principles of Consolidation

The condensed interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries as follows:

<i>Name of Subsidiary</i>	<i>Country of Incorporation</i>	<i>Ownership Interest at September 30, 2022</i>	<i>Ownership Interest at December 31, 2021</i>
La Quinta Nevada Inc.	United States	100%	100%
Black Mammoth Gold Corporation	United States	100%	100%
Antelope Creek Gold Corporation	United States	100%	100%

During the year ended December 31, 2020, the Company incorporated Antelope Creek Gold Corporation in Nevada. As at September 30, 2022, the principal activity of the Company's subsidiaries was that of holding companies. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity as to obtain benefits from its activities. Intercompany transactions and balances are eliminated on consolidation.

c) Basis of Measurement

The condensed interim consolidated financial statements have been prepared on a historical cost basis in Canadian dollars, which is the Company's and its subsidiaries' functional currency.

3. USE OF ESTIMATES AND JUDGMENTS

The preparation of condensed interim consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, profit and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the review affects both current and future periods.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting year that could result in a material adjustment of the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Critical accounting judgments:

i) Impairment of exploration and evaluation assets

Assets or cash-generating units are evaluated at each reporting date to determine whether there are any indications of impairment. The Company considers both internal and external sources of information when making the assessment of whether there are indications of impairment for the Company's exploration and evaluation assets.

BLACK MAMMOTH METALS CORPORATION
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

3. USE OF ESTIMATES AND JUDGMENTS (Continued)

ii) Going Concern

The Company's assessment of its ability to raise sufficient funds to finance operations involves significant judgments. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates:

i) Economic recoverability and probability of future benefits of exploration and evaluation costs

The carrying value of exploration and evaluation assets and the likelihood of future economic recoverability of these carrying values is subject to significant management estimates. The application of the Company's accounting policy for and determination of recoverability of capitalized assets is based on assumptions about future events or circumstances. New information may change estimates and assumptions made. If information becomes available indicating that recovery of expenditures is unlikely, the amounts capitalized are impaired and recognized as a loss in the period that the new information becomes available. A change in estimate could result in the carrying amount of capitalized assets being materially different from their presented carrying costs.

ii) Recognition of deferred income tax assets

Management is required to assess the recoverability of deferred income tax assets, which arise from the differences between the carrying amount of assets and liabilities and their tax bases in accordance with IAS 12 Income Taxes, to the extent that it is probable future taxable profits will be available against which the temporary differences can be utilized.

4. SIGNIFICANT ACCOUNTING POLICIES

Translation of Foreign Currencies

The functional currency is the currency of the primary economic environment in which the entity operates and has been determined for each entity within the Company. The functional currency for all entities within the Company is the Canadian dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, The Effects of Changes in Foreign Exchange Rates.

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting year, the monetary assets and liabilities of the Company that are denominated in foreign currencies are translated at the rate of exchange at the statement of financial position date while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are reflected in profit or loss for the period.

BLACK MAMMOTH METALS CORPORATION
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Financial Instruments

Financial instruments consist of financial assets and financial liabilities and are initially recognized at fair value along with, in the case of a financial asset or liability not at fair value through profit and loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in profit and loss.

The Company classifies its financial assets and financial liabilities in the following measurement categories:

- i) those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- ii) those to be measured at amortized cost.

The Company's financial assets and liabilities are recorded and measured as follows:

Financial assets

The classification of financial assets depends on the business model for managing the financial assets and the contractual terms of the cash flows. Financial assets that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding, are generally measured at amortized cost using the effective interest method. All other financial assets are measured at their fair values at the consolidated statement of financial position date, with any changes taken through profit and loss or other comprehensive income.

The Company has classified its financial assets as follows:

- Cash is measured at fair value with changes to fair value subsequent to initial recognition being recorded in profit or loss for the period in which they occur.
- Reclamation bond is measured at amortized cost using the effective interest rate method. Interest income, where material, is recorded in profit or loss.

Impairment of financial assets

The Company assesses all information available, including on a forward-looking basis, the expected credit losses associated with its assets carried at amortized cost.

Financial liabilities

Financial liabilities are classified as those to be measured at amortized cost unless they are designated as those to be measured subsequently at fair value through profit or loss (irrevocable election at the time of recognition). Any fair value changes due to credit risk for liabilities designated at fair value through profit and loss are recorded in other comprehensive income.

The Company's financial liabilities include accounts payable and accrued liabilities, loans payable, and amounts due to related parties which are measured at amortized cost using the effective interest rate method. Interest expense, where material, is recorded in profit or loss.

The Company derecognizes a financial liability when the liability is extinguished by way of discharge, cancellation or expiry. There were no changes to the classification of financial instruments in the period ended September 30, 2022.

BLACK MAMMOTH METALS CORPORATION
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Exploration and Evaluation Assets

Upon acquiring the legal right to explore a property, costs related to the acquisition, exploration and evaluation are capitalized by property. If economically recoverable ore reserves are developed, capitalized costs of the related exploration and evaluation assets are reclassified as mining assets and amortized using the unit of production method. An exploration and evaluation asset is reviewed for impairment whenever events or circumstances indicate that its carrying value may not be recoverable.

Any option payments received by the Company from third parties or tax credits refunded to the Company are credited to the capitalized cost of the exploration and evaluation assets. If payments received exceed the capitalized cost of the exploration and evaluation assets, the excess is recognized as income in the year received. The amounts shown for exploration and evaluation assets do not necessarily represent present or future values. Their recoverability is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof.

Impairment of Non-Current Assets

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any.

Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash generating unit ("CGU") to which the asset belongs. The recoverable amount is the higher of fair value less costs to sell and the assets value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset or CGU is estimated to be less than its carrying amount, the carrying amount of the asset or CGU is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the year.

Where an impairment loss subsequently reverses, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or CGU in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

Decommissioning and Restoration Provision

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of exploration and evaluation assets and equipment when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future rehabilitation cost estimates arising from the decommissioning of plant and other site preparation work is capitalized to mining assets along with a corresponding increase in the rehabilitation provision in the year incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The rehabilitation asset is depreciated on the same basis as mining assets.

BLACK MAMMOTH METALS CORPORATION
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Decommissioning and Restoration Provision (Continued)

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to mining assets with a corresponding entry to the provision. The Company's estimates are reviewed annually for changes in regulatory requirements, discount rates, effects of inflation and changes in estimates. Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to profit and loss for the period.

At September 30, 2022, the Company had a \$Nil (December 31, 2021 - \$Nil) decommissioning and restoration provision.

Equipment

Equipment is recorded at cost and depreciated using the declining balance method at the following rates per annum.

Machinery & Equipment	30% per annum
-----------------------	---------------

Equipment that is withdrawn from use, or has no reasonable prospect of being recovered through use or sale, are regularly identified and written off. The assets' residual values, depreciation methods and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

Subsequent expenditures relating to an item of equipment are capitalized when it is probable that future economic benefits from the use the assets will be increased. All other subsequent expenditures are recognized as repairs and maintenance.

Income Taxes

Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity. Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at year end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recorded by providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill not deductible for tax purposes; the initial recognition of assets or liabilities that affect neither accounting or taxable loss; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the consolidated statement of financial position date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

BLACK MAMMOTH METALS CORPORATION
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Share Issue Costs

Costs directly identifiable with the raising of capital are charged against the related share capital. Costs related to shares not yet issued are recorded as deferred financing costs, and are deferred until the issuance of the shares to which the costs relate, at which time the costs will be charged against the related share capital or charged to operations if the shares are not issued.

Flow-through Shares

Canadian Income Tax legislation permits an enterprise to issue securities referred to as flow-through shares, whereby the investor can claim the tax deductions arising from the renunciation of the related resource expenditures. The Company accounts for flow-through shares whereby the premium paid for the flow through shares in excess of the market value of the shares without flow-through features at the time of issue is credited to other liabilities and included in profit or loss at the same time the qualifying expenditures are made.

Earnings Per Share

The Company presents basic and diluted earnings (loss) per share for its common shares. Basic earnings (loss) per share is calculated by dividing the income attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the year. Diluted earnings per share is calculated using the treasury stock method which considers the potential exercise of outstanding financial instruments with equity purchase or conversion features. Diluted earnings per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

Valuation of Equity Units Issued in Private Placements

The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first allocates value to the most easily measured component based on fair value and then the residual value, if any, to the less easily measurable component.

The fair value of the common shares issued in a private placement is determined to be the more easily measurable component and are valued at their fair value, as determined by the closing quoted bid price on the announcement date. The balance, if any, is allocated to the attached warrants. Any fair value attributed to the warrants is recorded as reserves.

Equity-based Compensation

The Company grants stock options and warrants to acquire common shares of the Company to directors, officers, employees and consultants. An individual is classified as an employee when the individual is an employee for legal or tax purposes, or provides services similar to those performed by an employee.

The fair value of stock options and compensatory warrants are measured on the date of grant, using the Black-Scholes option pricing model, and is recognized over the vesting period. Consideration paid for the shares on the exercise of stock options is credited to share capital.

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022 AND 2021
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Government Assistance

Government assistance from the Canada Emergency Business Account (“CEBA”) loans under federal COVID-19 response programs are recorded as a liability. Any forgivable portion of the assistance is not recorded as a gain until there is reasonable assurance that it will not be repayable.

Future accounting standards

The Company has performed an assessment of new standards issued by the IASB that are not yet effective. The Company has assessed that the impact of adopting these accounting standards on its financial statements would not be significant.

5. RECLAMATION BOND

The Company has provided a US \$27,770 reclamation bond to the Division of Minerals in the state of Nevada as security against future reclamation on the Company’s mineral properties since abandoned. During the year ended December 31, 2019, US \$16,945 of the bond was returned to the Company for the portion of the restoration that has received final regulatory approval.

As at September 30, 2022 the total carrying value of the bond was \$15,350 (December 31, 2021 - \$13,833). The bond is classified as a long-term asset as it will not be recovered until the Division of Minerals approves restoration work that was completed during 2018.

a) Blanco Creek Property, Central Idaho, USA

During the year ended December 31, 2017, the Company's subsidiary, Black Mammoth Gold, entered into an assignment and assumption agreement (the "Agreement") with IDA Gold Corporation ("IDA") pursuant to which IDA has assigned, and Black Mammoth Gold has assumed, all of the rights and obligations of the lessee under a long-term lease of the Blanco Creek mineral property located in central Idaho. The lease is subject to an underlying two percent (2%) production royalty in favour of the landlord and a one percent (1%) production royalty in favour of IDA. The Company will be responsible for all costs of maintaining the property going forward.

Lease Terms (in United States Dollars "USD"):

The lease term is approximately 20 years (due date is October 14, 2036) and is renewable for up to an additional 40 years (60 years in total).

Advance Royalty Payment	Payable On or Before
\$6,000	Paid
\$8,000	Each June 1 thereafter (2017- 2022 paid)

7. EXPLORATION AND EVALUATION ASSETS (Continued)

a) Blanco Creek Property, Central Idaho, USA (Continued)

Provided all payments are current the Company may at any time during the life of the agreement purchase the property for \$3,000,000 from the landlord. In the alternative, and provided that all payments are current, the Company may at any time during the life of the agreement purchase each 1% of the Production Royalty in favour of the landlord for \$1,500,000. All royalty payments shall be credited against the purchase price for the Production Royalty and the Property, respectively, and any amount paid for the purchase of the Production Royalty shall be credited against the purchase price of the Property.

If the Company elects to purchase the property it will still be subject to the 1% production royalty in favour of IDA.

The Agreement is considered a related party transaction as the Company and IDA have two directors in common.

b) Happy Cat Gold Property, Central Nevada, USA

During the year ended December 31, 2020, the Company's subsidiary, Antelope Creek Gold Corporation ("Antelope Creek Gold"), entered into an assignment and assumption agreement (the "Agreement") with IDA Gold Corporation ("IDA") pursuant to which IDA has assigned, and Antelope Creek Gold has assumed all of the rights and obligations of the Happy Cat Gold Property located in central Nevada.

The Company will reimburse IDA for property related costs incurred totalling USD\$60,000 payable on or before April 30, 2024.

The property is subject to a 2.75% NSR in favour of IDA.

The Agreement is considered a related party transaction as the Company and IDA have two directors in common.

8. SHARE CAPITAL

a) Authorized

Unlimited common shares without par value

b) Issued and Outstanding

During the period ended September 30, 2022, the Company:

- issued 2,700,000 units pursuant to first tranche of private placement financing, for gross proceeds of \$270,000. Each unit contained one common share and one common share purchase warrant, with each purchase warrant exercisable into one common share for a period of two years at an exercise price of \$0.15. In connection with the private placement, the Company paid finder's fees of \$3,750.
- issued 800,000 units pursuant to second tranche of private placement financing, for gross proceeds of \$80,000. Each unit contained one common share and one common share purchase warrant, with each purchase warrant exercisable into one common share for a period of two years at an exercise price of \$0.15.

During the year ended December 31, 2021, the Company issued 295,000 common shares pursuant to the exercise of options for gross proceeds of \$29,500, and accordingly, relocated \$23,971 from reserves to share capital.

c) Stock Options

The Company has a stock option plan whereby it is authorized to grant options to directors, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common stock of the Company at prices to be determined and for a term not in excess of five years. Stock options granted to consultants conducting investor relations activities vest in accordance with TSX regulations. Unless otherwise stated, share purchase options vest when granted.

During the period ended September 30, 2022, the Company granted 1,395,000 incentive stock options valued at \$123,700 to certain directors, officers, consultants and to its technical advisor. The options are exercisable at a price of \$0.15 per share expiring on April 25, 2027. The options will vest 30% after year one, 30% after year two and 40% after year three. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes option pricing model are as follows: expected dividend yield of 0%; share price of \$0.10; expected volatility of 148% based on historical 5 year trends; risk-free interest rate of 2.70%; and an expected average life of 5 years. During the period ended September 30, 2022, \$31,218 was expensed.

No stock options were granted during the period ended September 30, 2022 and year ended December 31, 2021.

9. RELATED PARTY TRANSACTIONS AND KEY MANAGEMENT COMPENSATION

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers.

The following transactions are in the normal course of operations and are measured at the exchange amount of consideration established and agreed to by the related parties. All amounts owing are non-interest bearing, with no specific repayment terms and are unsecured. The remuneration of directors and other members of key management personnel during the periods ended September 30, 2022 and 2021 are as follows:

- a) Included in the due to related parties at September 30, 2022 is \$441,046 (December 31, 2021 - \$443,073) due to directors, an officer of the Company and a company with a common director. The amounts relate to accrued management fees, expense reimbursements and advances. Per the terms of debt settlement and deferral agreements repayment, the amount of \$441,046 is not due until May 31, 2023.

During the year ended December 31, 2021, the Chief Financial Officer of the Company agreed to settle outstanding payables of \$271,027 in consideration of \$986 (USD \$771), resulted in a gain of \$270,041.

- b) During the periods ended September 30, 2022 and 2021 included in the consolidated financial statements are the following amounts charged or accrued to officers and directors:

	For the nine months ended September 30,	
	2022	2021
<u>Key management compensation</u>		
Management fees – operating	\$ 8,000	\$ 9,000
Consulting fees – exploration and evaluation	\$ 37,000	\$ 81,000

10. CAPITAL MANAGEMENT

When managing capital, the Company's objective is to ensure the entity continues as a going concern as well as to maintain optimal returns to shareholders and benefits for other stakeholders. Management adjusts the capital structure as necessary in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management team to manage its capital.

The properties in which the Company currently has interests are in the exploration stage. As such, the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management considers its approach to capital management to be appropriate given the relative size of the Company. There were no changes in the Company's approach to capital management during the period.

11. FINANCIAL INSTRUMENTS

Fair Value

IFRS 7 establishes a fair value hierarchy that priorities the input to valuation techniques used to measure fair value as follows:

Level 1 – Applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2 – Applies to assets or liabilities for which there are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly such as quoted prices for similar assets or liabilities in active markets or indirectly such as quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions.

Level 3 – Applies to assets or liabilities for which there are unobservable market data.

The following table provides the fair value measures by level of valuation assumptions used:

	FAIR VALUE INPUT LEVEL	AS AT SEPTEMBER 30, 2022		AS AT DECEMBER 31, 2021	
		CARRYING AMOUNT	ESTIMATED FAIR VALUE	CARRYING AMOUNT	ESTIMATED FAIR VALUE
Financial Assets:					
Cash	1	\$ 169,870	\$ 169,870	\$ 5,274	\$ 5,274
Reclamation bond		\$ 15,350	\$ 15,350	\$ 13,833	\$ 13,833
Financial Liabilities:					
Accounts payable and accrued liabilities		\$ 37,272	\$ 37,272	\$ 125,058	\$ 125,058
Loan payable		\$ 40,000	\$ 40,000	\$ 40,000	\$ 40,000
Long-term payables		\$ 107,224	\$ 207,224	\$ 38,594	\$ 38,594
Due to related parties		\$ 441,046	\$ 441,046	\$ 443,073	\$ 443,073

11. FINANCIAL INSTRUMENTS (Continued)

Risk management is carried out by the Company's management team with guidance from the Board of Directors. The Company's risk exposures and their impact on the Company's financial instruments are summarized below:

a) Credit Risk

The Company's credit risk is primarily attributable to cash. Cash are held with one reputable Canadian chartered bank which is closely monitored by management. Management believes that the credit risk concentration with respect to financial instruments included in cash is minimal.

b) Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2022, the Company had current liabilities of \$37,272 (December 31, 2021 - \$125,058). All of the Company's liabilities are subject to normal trade terms.

c) Market Risk

i) Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not currently have any variable interest rate assets or liabilities. Interest rate risk is assessed as low.

ii) Commodity Price Risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. To mitigate price risk, the Company closely monitors commodity prices of precious metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

iii) Foreign Currency Risk

The Company's functional currency and the reporting currency is the Canadian dollar ("CDN\$"). Periodically the Company incurs charges on its operations for settlement in currencies other than its functional currency and any gain or loss arising on such transactions is recorded in operations for the period.

As at September 30, 2022, a 1% strengthening in the USD relative to the CDN\$ does not have a significant impact on net loss for the period. Any unrealized translation adjustments arising at period end are included in operating loss for the period.

12. SEGMENTED INFORMATION

The Company operates in one business segment, mineral exploration. Its resource properties are located in the United States.

13. DEBT DEFERRAL AGREEMENTS

During the year ended December 31, 2021, the Company renewed debt deferral agreements with certain creditors to defer settlement until May 31, 2023. As at September 30, 2022, the Company has \$29,973 (December 31, 2021 - \$38,594) in long-term payables and \$441,046 (December 31, 2021 - \$443,073) due to related parties subject to the debt deferral agreements. Both the long-term payables and due to related parties are non-interest bearing.

14. LOAN PAYABLE

During the year ended December 31, 2020, the Company received a loan of \$40,000 for the Canada Emergency Business Account to provide emergency support to business due to the impact of COVID-19. The loan is non-interest bearing until the initial term date of December 31, 2023.
