Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following five categories: FVTPL; held-to-maturity investments; loans and receivables; AFS; and other financial liabilities. The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	Category	September 30, 2017 \$	June 30, 2017 \$
Cash	FVTPL	1,273,448	1,377,315

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2017
(Unaudited - Expressed in Canadian Dollars)

7. Financial Instruments and Risk Management (continued)

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for accounts payable and accrued liabilities and payment obligation approximate their fair value due to their short-term nature. The Company's fair value of cash under the fair value hierarchy are measured using Level 1 inputs.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash. Management believes that the credit risk concentration with respect to financial instruments included in cash is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

	Contractual Maturity Analysis at September 30, 2017				
	Less than 3 Months \$	3 - 12 Months \$	1 - 5 Years \$	Over 5 Years \$	Total \$
Cash	1,273,448	-	-	-	1,273,448
Accounts payable and accrued liabilities	(206,814)	-	-	-	(206,814)
Payment obligation	(124,800)	-	-	-	(124,800)

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

(b) Foreign Currency Risk

The Company's operating expenses are incurred in Canadian Dollars. The Company maintains a US Dollar bank account in Canada to support the cash needs of its foreign operations. The fluctuation of the Canadian Dollar in relation to the US Dollar will have an impact upon the profitability of the Company and the value of the Company's assets and the amount of shareholders' equity. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks. At September 30, 2017, 1 Canadian Dollar was equal to \$0.80 US Dollar.

HANSA RESOURCES LIMITED
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2017
(Unaudited - Expressed in Canadian Dollars)

7. Financial Instruments and Risk Management (continued)

Balances are as follows:

	US Dollar	CDN \$ Equivalent
Cash	956,138	1,195,173
Accounts payable and accrued liabilities	(120,542)	(150,677)
Payment obligation	<u>(100,000)</u>	<u>(124,800)</u>
	<u>735,596</u>	<u>919,696</u>

Based on the net exposures as of September 30, 2017 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the US Dollar would result in the Company's net loss being approximately \$90,000 higher (or lower).

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital, cash and cash equivalents and short-term investments. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

9. Segmented Information

The Company operates in one reportable segment, the exploration and development of unproven exploration and evaluation assets. The Company's exploration activities have been conducted in Kazakhstan and its corporate assets are located in Canada. The Company is in the exploration stage and has no reportable segment revenues or operating results.

The Company's total assets and operations are segmented geographically as follows:

	<u>September 30, 2017</u>
