## Notes to the Condensed Interim Consolidated Financial Statements

For the three and six months ended August 31, 2025 and 2024

(Expressed in Canadian Dollars – unaudited – prepared by management)

### 1. NATURE OF OPERATIONS AND GOING CONCERN

American Lithium Corp. (the “Company”) was incorporated in the Province of British Columbia. The Company is engaged in the business of identification, acquisition, and exploration of mineral interests in the United States of America and Peru. The Company’s head office and registered and records office is located at 710 – 1030 West Georgia Street, Vancouver, British Columbia, V6E 2Y3. The Company’s common shares are listed for trading on Tier 2 of the TSX Venture Exchange (the “Exchange”) under the symbol “LI”, the OTCQX Best Market under the symbol “AMLIF”, and on the Frankfurt Stock Exchange under the symbol “5LA1”.

The Company is in the process of exploring its principal mineral properties and has not yet determined whether the properties contain ore reserves that are economically recoverable. The recoverability of amounts shown as exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the confirmation of the Company’s interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production or proceeds from the disposition thereof.

These condensed interim consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The Company is in the exploration stage and has not generated revenue from operations. As at August 31, 2025, the Company had a working capital position of \$7,856,059 (February 28, 2025 – working capital deficiency of \$1,278,225), and for the six months ended August 31, 2025, realized a net loss of \$943,425 (August 31, 2024 – net loss of \$13,063,088). Furthermore, as at August 31, 2025, the Company had an accumulated deficit of \$185,113,261 (February 28, 2025 – \$184,169,836), which has been funded primarily by the issuance of equity. As the Company is in the exploration stage, the recoverability of the costs incurred to date on exploration properties is dependent upon the successful results from its exploration activities and the ability of the Company to obtain the necessary financing to continue the exploration, evaluation and development of its assets. Though the Company has raised financing in the past and closed a \$9,400,000 non-brokered private placement during the six months ended August 31, 2025, there is no guarantee that it will be able to in the future. If the Company is not able to raise additional capital, the Company would have to reduce its cash requirements by eliminating or deferring spending on exploration and corporate activities. These factors indicate that a material uncertainty exists that may cast significant doubt on the Company’s ability to continue as a going concern.

These condensed interim consolidated financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and thus be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these consolidated financial statements. Those differences would likely be material.

### 2. MATERIAL ACCOUNTING POLICY INFORMATION

#### Statement of compliance

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Accounting Standards (“IAS”) 34, “Interim Financial Reporting” using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”). These condensed interim consolidated financial statements do not include all the information required by IFRS for annual financial statements and should be read in conjunction with the annual audited consolidated financial statements of the Company for the years ended February 28, 2025 and February 29, 2024.

## Notes to the Condensed Interim Consolidated Financial Statements

For the three and six months ended August 31, 2025 and 2024

(Expressed in Canadian Dollars – unaudited – prepared by management)

---

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

The accounting policies used in the preparation of these condensed interim consolidated financial statements are the same as those applied in the Company's most recent annual audited consolidated financial statements for the year ended February 28, 2025.

Certain accounts have been reclassified to be consistent with the current period classification.

These condensed interim consolidated financial statements were approved and authorized for issue by the Board of Directors on October 29, 2025.

#### Basis of measurement

These condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments that are measured at fair value. In addition, the consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow disclosure.

The condensed interim consolidated financial statements are presented in Canadian dollars unless otherwise noted. The Canadian dollar is also the functional currency of the Company and its subsidiaries, except for Macusani Yellowcake S.A.C. and Macusani Uranium S.A.C. where the functional currency is the United States dollar.

Transactions in currencies other than the functional currency of an entity are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting date, monetary assets and liabilities are translated using the period-end foreign exchange rate. Non-monetary assets and liabilities are translated using the historical rate on the date of the transaction. Non-monetary assets and liabilities stated at fair value are translated using the historical rate on the date that the fair value was determined. All gains and losses on translation of these foreign currency transactions are included in profit or loss.

Where applicable, the functional currency of an entity is translated into the presentation currency using the period-end rates for assets and liabilities while the operations and cash flows are translated using average rates of exchange. Exchange adjustments arising when net assets and profit or loss are translated into the presentation currency are taken into a separate component of equity and reported in other comprehensive income or loss.

#### Principles of consolidation

The consolidated financial statements include the accounts of the Company and the following subsidiaries:

Name	Jurisdiction
American Lithium Holdings Corp.	British Columbia, Canada
Tonopah Lithium Corp.	Nevada, USA
Plateau Energy Metals Inc. ("Plateau")	British Columbia, Canada
Macusani Yellowcake S.A.C.	Peru
Macusani Uranium S.A.C.	Peru

All intercompany transactions, balances, revenue and expenses are eliminated on consolidation.

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Subsidiaries are entities over which the Company has exposure to variable returns from its involvement and has the ability to use power over the investee to affect its returns. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Company until the date on which control ceases.

#### Accounting pronouncements not yet adopted

IFRS 18 *Presentation and Disclosure in Financial Statements*, which will replace IAS 1, Presentation of Financial Statements aims to improve how companies communicate in their financial statements, with a focus on information about financial performance in the statement of profit or loss, in particular additional defined subtotals, disclosures about management-defined performance measures and new principles for aggregation and disaggregation of information. IFRS 18 is accompanied by limited amendments to the requirements in IAS 7 Statement of Cash Flows. IFRS 18 is effective from January 1, 2027. Companies are permitted to apply IFRS 18 before that date.

The Company is currently in the process of performing an assessment of the new standards issued by the IASB and has not yet determined the impact the standard will have on the Company's consolidated financial statements.

#### Judgements and estimates

The preparation of these condensed interim consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities and contingent liabilities as at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. The results of estimates form the basis for making judgments about carrying values of assets and liabilities that are not readily apparent from other sources.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

The key areas of judgement and estimation impacting these consolidated financial statements are as follows:

#### *Carrying value of exploration and evaluation assets*

- The Company's exploration and evaluation assets represent its most significant asset on the statement of financial position. The Company's management applies its judgement, using facts and circumstances available at the time, to determine whether the exploration and evaluation asset value may be realized. For each of its projects, the Company reviews its right to the claims/concessions, future plans and exploration or development progress to determine if it should test the respective projects for impairment. There is significant judgement involved in determining if a project shows impairment indicators that may impact the carrying value of exploration and evaluation assets.

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

#### *Valuation of share-based compensation awards*

- Stock options are valued using the Black-Scholes option pricing model with inputs that can significantly impact the calculated value. Typical inputs into the Black-Scholes option pricing model include: exercise price, historical volatility, time to expiration and risk-free discount rates. Historical volatility and risk-free discount rates in particular require judgement around the reference period or benchmark rate used as inputs into the Black-Scholes option pricing model.

#### *Valuation of common shares and common share purchase warrants received from investment in Surge Battery Metals Inc. (notes 5 and 6)*

- The Company's investment in Surge Battery Metals Inc. ("Surge") required the use of the Black-Scholes option pricing model to determine the discount for lack of marketability applied to the initial value of the Surge common shares and to value the Surge common share purchase warrants. Typical inputs into the Black-Scholes option pricing model include: exercise price, historical volatility, time to expiration and risk-free discount rates. Historical volatility and risk-free discount rates in particular require judgement around the reference period or benchmark rate used as inputs into the Black-Scholes option pricing model.

#### *Determination of significant influence*

- The accounting for investments in other companies can vary depending on the degree of control and influence over those other companies. Management is required to assess at each reporting date the Company's control and influence over these other companies. Management has used its judgment to determine which companies are controlled and require consolidation and those which are significantly influenced and require equity accounting. During the six months ended August 31, 2025, the Company determined it had no longer significant influence over Surge (notes 4 and 6) and reclassified its investment in Surge from investment in associate to marketable securities.

### 4. MARKETABLE SECURITIES

	Surge Battery Metals Inc.
	\$
Balance, February 28, 2025	-
Fair value on initial recognition	3,226,005
Proceeds from sale of marketable securities	(1,456,175)
Realized gain on sale of marketable securities	40,797
Change in fair value of marketable securities	(35,502)
<b>Balance, August 31, 2025</b>	<b>1,775,125</b>

On April 16, 2025, the Company reclassified its investment in Surge from investment in associate to marketable securities as Surge appointed a new director, expanding its board of directors from five to six members (note 6). The Company held 12,651,000 shares with a value of \$0.255 per share but no longer had significant influence over Surge. As a result of the reclassification, the Company recorded a gain of \$2,809,656 on initial recognition of marketable securities.

During the period of April 16 to August 31, 2025, the Company sold 5,550,500 shares of Surge for proceeds of \$1,456,175 and realized a gain of \$40,797.

### 5. SHORT-TERM INVESTMENT

As part of the Company's investment in Surge's private placement (note 6), the Company was issued 13,400,000 common share purchase warrants ("Surge Warrants"). The Surge Warrants are exercisable at \$0.55 per Surge Warrant for a period of three years from June 9, 2023. The Surge Warrants are financial assets carried at FVTPL and are revalued at each reporting period end.

The following table provides a reconciliation of changes in the carrying value of the Warrants.

	\$
Balance, February 29, 2024	4,451,480
Loss on short-term investment for the year ended February 28, 2025	(3,411,640)
Balance, February 28, 2025	1,039,840
Loss on short-term investment for the period ended August 31, 2025	(884,400)
<b>Balance, August 31, 2025</b>	<b>155,440</b>

The Company determined the fair value of the Surge Warrants at August 31, 2025 was \$155,440 (February 28, 2025 - \$1,039,840) and therefore recognized an unrealized loss of \$884,400 for the six months ended August 31, 2025 (August 31, 2024 - \$2,370,460).

The fair value of the Surge Warrants at August 31, 2025 was determined using the following inputs:

	August 31, 2025	February 28, 2025
Expected volatility	71%	74%
Risk-free interest rate	2.64%	2.57%
Spot Price	\$0.25	\$0.37

### 5. SHORT-TERM INVESTMENT (continued)

For the six months ended August 31, 2025, the Company recognized \$421,143 (August 31, 2024 - \$421,143) of the deferred gain on the Surge Warrants recognized on the date of acquisition. The balance of remaining deferred gain at August 31, 2025 was \$631,714, of which \$631,714 is current (February 28, 2025 - \$842,286) and \$nil non-current (February 28, 2025 - \$210,571). The deferred gain will be recognized over the term of the Surge Warrants.

### 6. INVESTMENT IN SURGE BATTERY METALS INC.

On June 9, 2023, the Company completed an investment in Surge, a company incorporated in Canada, whose principal business activity is the acquisition, exploration and development of mineral properties in Nevada.

Surge closed the first tranche of a non-brokered private placement financing by issuing 13,400,000 units ("Units") at a price of \$0.40 per Unit to the Company for a total transaction value of \$5,360,000. Each Unit consisted of one common share and one Surge Warrant exercisable at \$0.55 per Warrant for a period of three years from the date of issuance and was subject to a 4-month hold.

The allocation of the transaction value to the Surge common shares and Surge Warrants at June 9, 2023 was determined based on the relative fair values of each asset, \$3,062,857 and \$2,297,143, respectively. The common shares were valued based on the market price of Surge's common shares on the date of the transaction multiplied by a discount for lack of marketability ("DLOM") of 22.6%, determined by utilizing the Black-Scholes option pricing model. The Surge Warrants were valued using Black-Scholes option pricing model with the spot price of the Surge Warrants based on the DLOM price of Surge's common shares to reflect the 4-month hold period.

The following Black-Scholes assumptions were utilized to value the discount for lack of marketability on the common shares and the Surge Warrants at June 9, 2023:

	Common Shares 4-month hold	Warrants
Expected volatility	102%	132%
Risk-free interest rate	4.08%	4.08%
Spot Price	0.62	0.48
Exercise Price	0.62	0.55
Time to expiration	4 months	3 years
Dividend yield	Nil	Nil

The Company determined that the fair value of Surge Warrants acquired was \$4,824,000 at June 9, 2023. Since the fair value of this financial instrument exceeded the Unit offering's allocated transaction value of \$2,297,143, and the fair value is not based solely on observable inputs, \$2,526,857 was recorded as a deferred gain, which is recognized over the three-year life of the Surge Warrants (note 5).

After initial recognition, the Surge common shares and Surge Warrants are separate financial assets and therefore are valued separately. The Company determined that, through a combination of its shareholdings and its board representation, had significant influence over Surge on the date of acquisition, and therefore accounted for the investment using the equity method. The Surge Warrants are fair valued at each reporting date (note 5).

<b>Balance, August 31, 2025</b>	<b>-</b>

<sup>(1)</sup> The Company's investment in Surge represented 8.37% of the outstanding share capital of Surge as at February 29, 2024. For the year ended February 28, 2025, the investment decreased to 8.12% of the outstanding share capital of Surge, which resulted in a dilution loss of \$48,094 (February 29, 2024 - \$420,418).

<sup>(2)</sup> During the period of March 1 to April 15, 2025, the Company sold 749,000 shares of Surge for proceeds of \$249,022.

<sup>(3)</sup> On April 16, 2025, the Company's investment in Surge represented 7.21% of the outstanding share capital of Surge, resulting in a dilution loss of \$25,286.

On April 14, 2025, Surge announced that it had closed a private placement financing offering of 10,351,667 units, and the Company did not partake in this offering.

On April 16, 2025, Surge appointed a new director, expanding its board of directors from five to six members. The Company's right to appoint one director to Surge's board, following this appointment, remains unchanged. This expansion reduced the Company's voting interest at Surge's Board of Directors to below 20%.

As of April 16, 2025, the Company held 7.21% of Surge's outstanding shares and a board of directors voting interest of 16.7%. The Company determined that it no longer held significant influence over Surge and discontinued the recognition of its investment in Surge as an investment in associate. The Company's retained interest in Surge was reclassified to marketable securities on April 16, 2025, and will be measured at FVTPL and revalued at each reporting date (note 4).

Surge's unaudited loss and comprehensive loss for the period up to the date of reclassification of the investment in Surge to marketable securities is as follows:

### 10. EXPLORATION AND EVALUATION ASSETS (continued)

On August 28, 2025, the Company announced that the Peruvian Judiciary has posted its ruling, on its official website, in favor of Macusani Yellowcake S.A.C., confirming the Company's ownership of 32 concessions of the Falchani Project and Macusani Project. These 32 concessions, now held by the Company's subsidiaries Macusani Yellowcake and Macusani Uranium, have been subject to administrative and judicial processes (together, the "Processes") in Peru to overturn resolutions issued by the Geological, Mining, and Metallurgical Institute of Peru ("INGEMMET") and the Mining Council of the Ministry of Energy and Mines of Peru ("MINEM") in February 2019 and July 2019, respectively, which declared Macusani Yellowcake's title to the 32 concessions invalid due to late receipt of the annual validity payment. On November 15, 2023, the Superior Court of Peru unanimously upheld the prior ruling of the lower court in favour of the Company in relation to those 32 concessions which clearly established that Macusani Yellowcake is the rightful owner of these concessions. On December 29, 2023, the Company announced that INGEMMET and MINEM have petitioned the Supreme Court in a final attempt to reverse the ruling. The ruling announced in August 2025 confirmed that the petitions filed in December 2023 by INGEMMET and MINEM to the Supreme Court regarding the title ownership of the 32 disputed concessions were unanimously rejected. This final ruling concludes the Processes and confirms the Company's ownership of the 32 concessions.

### 11. SHARE CAPITAL

#### Authorized

Unlimited number of common shares, without par value.

#### Issued

*During the six months ended August 31, 2025*

On August 15, 2025, the Company completed a non-brokered private placement (the "Private Placement") by issuing 34,814,815 units of the Company (the "Units") at a price of \$0.27 per Unit. Each Unit issued pursuant to the Private Placement consists of one common share and one common share purchase warrant (a "Warrant"). Each Warrant entitles the holder thereof to purchase one common share at an exercise price of \$0.50 for 36 months from the closing date of the Private Placement. In connection with the Private Placement, share issuance costs were \$107,030 and no finders' fees were paid. The residual value of the Warrants was determined to be \$nil.

*During the year ended February 28, 2025*

In August 2024, the Company issued 225,000 common shares in connection with the vesting and conversion of restricted share units ("RSUs"). As a result, the Company transferred \$423,000 representing the carrying value of the converted RSUs from reserves to share capital.

In November 2024, the Company issued 150,000 common shares in connection with the vesting and conversion of RSUs. As a result, the Company transferred \$336,000 representing the carrying value of the converted RSUs from reserves to share capital.

### 11. SHARE CAPITAL (continued)

During the six months ended August 31, 2025 and 2024, there were no stock options granted. Subsequent to August 31, 2025, the Company granted 7,725,000 options to directors, officers, employees and eligible consultants to purchase common shares of the Company exercisable at \$0.51 per share. The options will vest over a 12-month period, with one-third vesting on the date of grant, a further one-third vesting six months thereafter, and the balance vesting twelve months from the date of grant. The options will expire 5 years from the date of grant.

#### Restricted share units

The Incentive Plan also provides for the grant of RSUs to directors, officers and employees. Upon vesting, at the Company's discretion, the holder of an RSU award can receive one common share or the equivalent cash payment based on the market price of the common share on settlement date. The aggregate number of RSUs granted under the Incentive Plan, as well as any other securities granted under the Incentive Plan, is limited to 10% of the Company's issued shares at the time of grant. The aggregate number of RSUs granted to any one recipient in a 12-month period is limited to 5% of the issued shares of the Company. As of August 31, 2025, all RSUs granted were equity settled and vested over a 2-year period.

RSU transactions are summarized as follows:

	<b>Number of RSUs</b>
Balance, February 29, 2024	2,830,000
Vested	(2,680,330)
Forfeited	(149,670)
<b>Balance, February 28, 2025 and August 31, 2025</b>	<b>-</b>

### 13. RELATED PARTY TRANSACTIONS (continued)

Transactions with Surge up to April 16, 2025, have been disclosed in note 6.

These transactions were in the normal course of operations.

### 14. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral properties and to maintain a flexible capital structure for its projects for the benefit of its stakeholders, to maintain creditworthiness and to maximize returns for shareholders over the long-term. The Company does not have any externally imposed capital requirements to which it is subject. As the Company is in the exploration stage, its principal source of funds is from the issuance of common shares. The Company includes the components of shareholders' equity in its management of capital.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares to raise cash and obtain bridging loans from related parties. The Company's investment policy is to invest its cash in low-risk investment instruments in financial institutions with terms to maturity selected with regards to the expected time of expenditures from continuing operations.

There were no changes in the Company's management of capital during the six months ended August 31, 2025.

### 15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company's financial instruments consist of cash and cash equivalents, marketable securities, short-term investment, amounts receivable, deposits, reclamation deposits, accounts payable and accrued liabilities and lease liabilities. As at August 31, 2025, the Company classifies its marketable securities and short-term investment as FVTPL and its remaining financial instruments at amortized cost. For financial instruments at amortized cost, their carrying values approximate their fair values because of their current nature. The carrying value of the Company's lease liability is measured at the present value of the discounted future cash flows.

The Company classifies financial instruments carried at fair value according to the following hierarchy based on the amount of observable inputs used to value the financial instrument:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis. The Company's shares of Surge (marketable securities) are classified under Level 1.

Level 2 – Fair value measurements are those derived from inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (derived from prices).

Level 3 – Valuations in this level are those with inputs for the asset or liability that are not based on observable market data. The Company's Surge Warrants (short-term investment) are classified under Level 3.

#### 15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

The Company's financial instruments are exposed to the following risks:

##### *Credit Risk*

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments which are potentially subject to credit risk for the Company consist primarily of cash and cash equivalents and amounts receivable. The cash and cash equivalents are held at Canadian financial institutions and the Company considers the credit risk to be minimal. The Company's amounts receivable balance primarily consists of goods and sales taxes receivables from the Government of Canada.

The Company's maximum exposure to credit risk is as follows:

	<b>August 31 2025</b>	February 28 2025
	\$	\$
Cash and cash equivalents	<b>7,626,317</b>	1,110,022
Amounts receivable	<b>87,160</b>	27,744
	<b>7,713,477</b>	1,137,766

##### *Liquidity Risk*

Liquidity risk is the risk that the Company will not be able to meet its obligations with respect to financial liabilities as they come due. The Company's current financial liabilities are comprised of accounts payable and accrued liabilities and current lease liabilities. The Company's accounts payable and accrued liabilities arose as a result of exploration activities and other corporate expenses. The Company frequently assesses its liquidity position by reviewing the timing of amounts due and its current cash flow position to meet its obligations. The Company manages its liquidity risk by endeavouring to maintain sufficient cash and cash equivalents balances to meet its anticipated operational needs.

The following table summarizes the Company's current financial liabilities:

	<b>August 31 2025</b>	February 28 2025
	\$	\$
Accounts payable and accrued liabilities	<b>2,247,283</b>	3,930,458
Current lease liabilities (note 9)	<b>47,971</b>	44,467
	<b>2,295,254</b>	3,974,925

##### *Foreign Exchange Risk*

The Company is exposed to foreign currency risk on fluctuations related to cash and cash equivalents, amounts receivable, reclamation deposits, and accounts payable and accrued liabilities that are denominated in a foreign currency. As at August 31, 2025, the Company had foreign currency net assets of \$79,327 in United States dollars, net liabilities of \$39,600 in Australian dollars and net liabilities of 973,665 Peruvian soles, amounting to net liabilities of \$305,041. A 10% fluctuation in the foreign exchange rate of foreign currencies against the Canadian dollar would result in a foreign exchange gain/loss of approximately \$30,504.

### 15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

#### *Interest Rate Risk*

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has cash and cash equivalents balances and term deposits with interest based on the prime rate. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institution. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

#### *Price Risk*

Price risk is the risk that assets or liabilities carried at fair value or future cash flows of a financial instrument will fluctuate because of changes in market conditions.

The Company's maximum exposure to price risk on its marketable securities and short-term investment is as follows:

	<b>August 31 2025</b>	February 28 2025
	\$	\$
Level 1 - Marketable securities	<b>1,775,125</b>	-
Level 3 - Short-term investment	<b>155,440</b>	1,039,840
	<b>1,930,565</b>	1,039,840

During the six months ended August 31, 2025, there were no transfers between level 1, level 2 and level 3 classified assets and liabilities.

### 16. SEGMENTED INFORMATION

The Company has one reportable segment, being the acquisition and exploration of exploration and evaluation assets. Geographic information on the Company's non-current assets is as follows:
