Empire incurred a net loss of \$916,911 during the year ended December 31, 2021, as compared to a net loss of \$2,153,505 during the year ended December 31, 2020. The variance in net loss of \$1,236,594 was mainly due to the following expenses:

- impairment of exploration and evaluation assets increased from \$319,671 during the year ended December 31, 2020 to \$516,100 during the year ended December 31, 2021 due to the lapse of certain claims on the property. (Please refer to the Exploration and Evaluation Assets note in the financial statements)
- share-based compensation decreased from \$1,407,033 during the year ended December 31, 2020 to zero during the year ended December 31, 2021 due to the Company granted 6,700,00 stock options in 2020. (Please refer to the Stock Options note in the financial statements)

**SUMMARY OF QUARTERLY RESULTS**

The following table presents unaudited selected financial information for the last eight quarters:

	2023 Q3 \$	2023 Q2 \$	2023 Q1 \$	2022 Q4 \$	2022 Q3 \$	2022 Q2 \$	2022 Q1 \$	2021 Q4 \$
Revenue	-	-	-	-	-	-	-	-
Net loss	(111,316)	(127,705)	(107,439)	(1,791,168)	(75,125)	(86,789)	(102,616)	(624,956)
Basic/diluted loss per share	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)

The general fluctuation of net losses was primarily due to a variation in the timing of invoicing for the various expenses, with the Company's average quarterly net loss increasing due to the increased costs of services in general with the interest expense increasing every quarter due to an increase in the amounts payable over which interest is being charged. The net loss in quarter 4 of 2021 is due to impairment of exploration and evaluation expenditures of \$516,100. The net loss in quarter 4 of 2022 is due to the impairment of exploration and evaluation expenditures of \$1,625,152.

**OFF-BALANCE SHEET ARRANGEMENTS**

The Company does not have any off-balance sheet arrangements.

**LIQUIDITY AND CAPITAL RESOURCES**

As at September 30, 2023, Empire held cash on hand of \$2,740 (December 31, 2022: \$25,472), current assets totalled \$52,441 (December 31, 2022: \$77,402) and current liabilities totalled \$1,497,571 (December 31, 2022: \$1,083,866) which resulted in a working capital deficit of \$1,445,130 (December 31, 2022 working capital deficit: \$1,006,464).

The Company's objective when managing liquidity and capital resources is to safeguard the Company's ability to support normal operating requirements on an ongoing basis and pursue suitable business opportunities.

In the long term, the Company will undertake a series of ongoing private placement equity offerings to regularly fund ongoing operations and its planned program of property exploration and development, acquisitions of property interests, and planned working capital requirements.

Management anticipates the raising of additional funding through sale of its securities to enable the Company to fund ongoing operations. The accompanying financial statements have been prepared on the basis of IFRS applicable to a going concern. The appropriateness of using the going concern basis is dependent upon, among other things, future profitable operations, and the ability to raise additional capital. Specifically, the recovery of the Company's investment in resource properties and related

deferred costs is dependent upon the discovery of economically recoverable resources, the ability of the Company to obtain necessary financing to develop the properties and establish future profitable production from the properties or from the proceeds of their disposition. If the Company were unable to continue as a going concern it is likely that assets would be realized at amounts significantly lower than the carrying value and the Company may not be able to satisfy all its obligations.

**FINANCIAL INSTRUMENTS AND RISKS**

(a) Fair Values

Assets and liabilities measured at fair value on a recurring basis were presented on the Company's consolidated statement of financial position as at September 30, 2023 as follows:

	Fair Value Measurements Using			
Quoted prices in active markets for identical instruments (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Balance, September 30, 2023	\$
\$	\$	\$	\$	\$
Marketable securities	2,000	–	–	2,000

The fair values of other financial instruments, which include cash, accounts payable and accrued liabilities, approximate their carrying values due to the relatively short-term maturity of these instruments.

(b) Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. The carrying amount of financial assets represents the maximum credit exposure.

(c) Foreign Exchange Rate Risk

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the foreign exchange rates. The Company's functional and reporting currency is the Canadian dollar. The Company may be exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company is not exposed to any significant foreign exchange rate risk.

(d) Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to significant interest rate risk as it does not have any liabilities with variable rates.

(e) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

**EMPIRE METALS CORP.**  
Management's Discussion and Analysis of Financial  
Condition and Results of Operations  
For the Nine Months Ended September 30, 2023

(f) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

**RESULTS OF OPERATIONS**

Empire incurred a net loss of \$346,460 during the nine months ended September 30, 2023, as compared to a net loss of \$264,530 during the nine months ended September 30, 2022. The variance of \$81,930 was mainly due to the following expenses:

- Interest and bank charges increased from \$120,907 during the nine months ended September 30, 2022 to \$175,616 during the nine months ended September 30, 2023 due to an increase in the amounts payable over which interest is being charged.
- Office and miscellaneous increased from \$20,383 during the nine months ended September 30, 2022 to \$23,867 during the nine months ended September 30, 2023 due to the timing of invoicing for corporate and administrative services provided. On a year-to-year basis, there was a minimal variance in the cost of corporate and administrative services provided.
- Salaries decreased from \$53,126 during the nine months ended September 30, 2022 to \$48,710 during the nine months ended September 30, 2023 due to one employee leaving the Company.
- Finance fees increased from \$nil during the nine months ended September 30, 2022 to \$27,389 during the nine months ended September 30, 2023 due to reclassification of interest from interest and bank charges.

**TRANSACTIONS WITH RELATED PARTIES**

During the nine months ended September 30, 2023, the Company incurred salary of \$45,000 (September 30, 2022 - \$45,000) to Mark Patchett, the President and CEO of the Company.

**CHANGES IN ACCOUNTING POLICIES INCLUDING INITIAL ADOPTION**

**Accounting Standards Issued But Not Yet Effective**

A number of new standards, and amendments to standards and interpretations, are not yet effective for the current financial year ended and have not been early adopted in preparing these consolidated financial statements. These new standards, and amendments to standards and interpretations are either not applicable or are not expected to have a significant impact on the Company's consolidated financial statements

**MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

In accordance with National Instrument ("NI") 52-109 (Certification of Disclosure in Issuer's Annual and Interim Filings), the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") of the Company will file a Venture Issuer Basic Certificate with respect to the financial information contained in the unaudited interim financial statements and the audited annual financial statements and respective accompanying Management's Discussion and Analysis. The Venture Issuer Basic Certificate includes a 'Note to Reader' stating that the CEO and CFO do not make any representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109.

**RISKS AND UNCERTAINTIES**

Empire competes with other junior mineral exploration companies, some of which have greater financial resources and technical facilities. The business of mineral exploration and extraction involves a high degree of risks and few properties that are explored are ultimately developed into production. In addition to specific risks disclosed throughout this discussion, other risks facing Empire include competition, reliance on third parties, environmental and insurance risks, statutory and regulatory requirements, metal prices and foreign currency fluctuations, share price volatility and title risks.

Empire plans to continue to raise additional capital through the exercise of stock options and warrants, and issuing new share capital through equity financing. Empire's ability to continue as a going concern and to raise additional capital to fund its operations and business plan, are and will be, dependent upon its ability to raise debt and equity capital generally, secure cooperation and financing from existing creditors and suppliers, the progress and success of existing and new property acquisitions, subsequent development of resource properties and the strength of resource equity markets, which are uncertain. There can be no assurance that additional capital will be available. Empire is in the process of developing plans to raise capital.

**RISK FACTORS**

In these turbulent financial markets, development- stage mineral exploration companies, such as ours, face a variety of risk and, while unable to eliminate all of them, the Company aims at managing and reducing such risks as much as possible. Few exploration projects successfully achieve development due to factors that cannot be predicted or anticipated, and even on such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor practical to proceed. The Company closely monitors its activities and those factors that could impact them, and employs experienced consulting to assist in its risk management and to make timely adequate decisions.

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims, as well as the potential for problems arising from the frequently ambiguous conveyance history characteristic of many mineral properties. The price of the commodities being explored is also a significant risk factor, as a substantial decline in their price could result in a decision to abandon a specific project. Environmental laws and regulation could also impact the viability of a project. The Company has ensured that it has complied with these regulations, but there can be changes in legislation outside the Company's control that could also add a risk factor to a project.

**CAUTION REGARDING FORWARD LOOKING STATEMENTS**

Statements contained in this MD&A that are not historical facts are forward-looking statements (within the meaning of the Canadian securities legislation and the U.S. Private Securities Litigation Reform Act of 1995) that involve risks and uncertainties. Forward-looking statements include, but are not limited to, statements with respect to the future price of metals; the estimation of mineral reserves and resources,

the realization of mineral reserve estimates; the timing and amount of estimated future production, costs of production, and capital expenditures; costs and timing of the development of new deposits; success of exploration activities, permitting time lines, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims, limitations on insurance coverage and the timing and possible outcome of pending litigation. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and other factors include, among others, risks related to the integration of acquisitions; risks related to operations; risks related to joint venture operations; actual results of current exploration activities; actual results of current reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of metals; possible variations in ore reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities, as well as those factors discussed in the sections entitled "Risks and Uncertainties" in this MD&A.

Although Empire has attempted to identify important factors that could affect the Company and may cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The forward-looking statements in this MD&A speak only as of the date hereof. Empire does not undertake any obligation to release publicly any revisions to these forward looking statements to reflect events or circumstances after the date hereof to reflect the occurrence of unanticipated events.

Forward-looking statements and other information contained herein concerning the mining industry and general expectations concerning the mining industry are based on estimates prepared by Empire using data from publicly available industry sources as well as from market research and industry analysis and on assumptions based on data and knowledge of this industry which Empire believes to be reasonable. However, this data is inherently imprecise, although generally indicative of relative market positions, market shares and performance characteristics. While Empire is not aware of any misstatements regarding any industry data presented herein, the industry involves risks and uncertainties and is subject to change based on various factors.
