

Phenom Completes Drill Program at Carlin, Nevada

November 22, 2023 - Vancouver, British Columbia – Phenom Resources Corp. (TSX-V: PHNM) (OTCQX®: PHNMF) (FSE: 1PY0) (“Phenom” or the “Company”) is pleased to announce that drilling on the company’s 100% owned Carlin Gold-Vanadium Project, located within the Carlin gold trend of Nevada, has wrapped up for the season. The objective was to drill a 2000’ reverse circulation hole to test the gold system at depth near-surface gold of up to 1.4g/t Au (0.044oz Au/t) in outcrop, considered geochemical “leakage” above the deeper target zone. One hole was abandoned at 500’ due to difficult rock conditions. A second hole was drilled to a depth of 1900’ and was completed yesterday. Samples have gone into the laboratory with results anticipated in next month.

About Phenom Resources Corp.

Phenom has 100% interest in the Carlin Gold-Vanadium Project, located in Elko County, 6 miles south from the town of Carlin, Nevada and Highway I-80 which hosts the Carlin Vanadium deposit, North America’s largest highest grade primary vanadium resource. The Project lies in the Carlin Gold Trend. Approximately 9 million ounces comprised of multiple gold deposits, including past producing mines, are present near the Phenom property (5-15km).
