#### Highlights, significant events and transactions

During the year ended 2023, 18,142,838 common shares issued to acquire Sun & Sand Mining & Metals Guinea SA ("Sun & Sand") have been returned to treasury for cancellation. The shares were returned to treasury as the Company did not have full access to the Siguri Gold Property and the renewal of the license was affected by the lack of access. The Company may seek to re-issue those cancelled common shares upon resolution of its license status and confirmation that the Company will have the necessary access to the Siguri Gold Property. Alternatively, the Company may seek the return of the balance of shares for cancellation in exchange for surrendering its ownership of Sun & Sand. Either course of action would be subject to necessary corporate and regulatory approvals including TSX-V approval. The Company also announced the appointment of Dr. Steven Sangha to the Board of Directors.

On January 04, 2023, the Company noted the resignation of Andrew Lee Smith from the Board of Directors of the Company effective December 31, 2022. The Company thanks Mr. Smith for his service to the Company.

### CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of exploration and evaluation properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital.

Management reviews its capital management approach on an on-going basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company is in the business of exploration and evaluation and has no source of operating revenue. Operations are financed through the issuance of capital stock. Capital raised is held in cash in an interest-bearing bank account and in guaranteed investment certificates until such time as it is required to pay operating expenses or exploration and evaluation costs. The Company is not subject to any externally imposed capital restrictions. Its objectives in managing its capital are to safeguard its cash and its ability to continue as a going concern, and to utilize as much of its available capital as possible for exploration activities. The Company is not subject to any externally imposed capital requirements and the Company's objectives have not changed during the three months ended October 31, 2024.

### RISK FACTORS

Companies face many and varied kinds of risks. While risk management cannot eliminate the impact of all potential risks, the Company strives to manage such risks to the extent possible and practical. Following is the risk factor most applicable to the Company.

### GOING CONCERN RISK

The financial statements have been prepared on a going concern basis under which an entity is considered to be able to realize its assets and satisfy its liabilities in the ordinary course of business. The Company's future operations are dependent upon the identification and successful completion of equity or debt or other financing and the achievement of profitable operations. There can be no assurances that the Company will be successful in achieving profitability.

The financial statements do not give effect to any adjustments relating to the carrying values and classification of assets and liabilities that would be necessary should the Company be unable to continue as a going concern.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

### RELIANCE ON MANAGEMENT AND DEPENDENCE ON KEY PERSONNEL

The success of the Company will be largely dependent upon the performance of its directors and officers and the ability to attract and retain key personnel. The loss of the services of these persons may have a material adverse effect on the Company's business and prospects. The Company will compete with numerous other companies for the recruitment and retention of qualified employees and contractors. There is no assurance that the Company can maintain the service of its directors and officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Company and its prospects.

### CONFLICTS OF INTEREST

Certain directors of the Company also serve as directors and/or officers of other companies involved in other business ventures. Consequently, there exists the possibility for such directors and/or officers to be in a position of conflict. Any decision made by such directors involving the Company will be made in accordance with their duties and obligations to deal fairly and in good faith with the Company and such other companies. In addition, directors involved in potential conflicts will declare, and refrain from voting on the conflicted matter.

### ENVIRONMENTAL

Exploration and development projects are subject to the environmental laws and regulations of the jurisdictions within which the Company is conducting its operations. As such laws are subject to change, the Company carefully monitors proposed and potential changes, and ensures that it is and will be in strict compliance.

Various non-governmental organizations dedicated to environmental protection monitors, amongst others, the mining industry. These organizations have in the past commenced actions with the regulatory agencies or the courts to prevent or delay resource extraction activities.

### TITLE TO PROPERTIES

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. The Company cannot give an assurance that title to the properties will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that the optionors or the Company, as the case may be, does not have title to the properties could cause the Company to lose any rights to explore, develop and mine any minerals on the properties without compensation for its prior expenditures relating to the properties.

The Company has no off-balance sheet arrangements.

### CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amount and classification of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revisions affect only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.
