On October 27, 2025, the Issuer announced that it had engaged Mine Technical Services to complete an updated NI 43-101-compliant mineral resource estimate for Stillwater West. The updated

mineral resource estimate will incorporate 14 drill holes totaling 5,781 meters from the 2023 and 2025 programs, plus select historic holes not included in the current estimate and is expected in the first half of 2026.

On March 26, 2025, the Issuer reported multiple large-scale magmatic sulphide targets generated from a property-wide MobileMTm magneto-telluric ("**MMT**") geophysical survey completed in late 2024 by Expert Geophysics Limited at the Stillwater West project. Data from the 2024 MMT survey was processed and incorporated into the Issuer's three-dimensional geological model of the lower Stillwater igneous complex to prioritize targets with a focus on expanding current mid- and high-grade mineral resources.
